(a) Combine into one total the value computed pursuant to § 1000.70 for all handlers who made the reports prescribed by § 1000.30 for such delivery period, except those in default of payments required pursuant to § 1000.82 for the preceding delivery period;

(b) Subtract if the average butterfat content of producer milk represented by the values included under paragraph (a) of this section is greater than 4.0 percent, or add, if such average butterfat content is less than 4.0 percent, an amount computed as follows: Multiply the amount by which the average butterfat content of such milk varies from 4.0 percent by the butterfat differential computed pursuant to § 1000.85, and multiply the result by the total hundredweight of such milk.

(c) Add an amount representing the cash balance on hand in the producer-settlement fund, less the total amount on contingent obligations to handlers pursuant to § 1000.83;

(d) Divide the resulting amount by the total hundredweight of producer milk included in these computations; and

(e) Subtract not less than 4 cents nor more than 5 cents for the purpose of retaining in the producer-settlement fund a cash balance to provide against delinquencies in payments by handlers. This result shall be known as the "uniform price" per hundredweight for such delivery period for producer milk containing 4.0 percent butterfat, f. o. b. fluid milk plant.

§ 1000.72 *Computation of uniform prices for base milk and excess milk.* Following April 1, 1955, for each of the delivery periods of April through August, the market administrator shall compute the uniform prices per hundredweight for base milk and for excess milk, each of 4.0 percent butterfat content, as follows:

(a) Combine into one total the value computed pursuant to § 1000.70 for all handlers who made the reports prescribed by § 1000.30 for such delivery period, except those in default of payments required pursuant to § 1000.82 for the preceding delivery period;

(b) Subtract if the average butterfat content of producer milk represented by the values included under paragraph (a) of this section is greater than 4.0 percent, or add, if such average butterfat content is less than 4.0 percent, an amount computed as follows: Multiply the amount by which the average butterfat content of such milk varies from 4.0 percent by the butterfat differential computed pursuant to § 1000.85, and multiply the result by the total hundredweight of such milk;

(c) Add an amount representing the cash balance on hand in the producer-settlement fund, less the total amount of contingent obligations to handlers pursuant to § 1000.83;

(d) Compute the value on a 4.0 percent butterfat basis of the aggregate quantity of excess milk for all handlers included in the computation pursuant to paragraph (a) of this section by multiplying the hundredweight of such milk not in excess of the total quantity of Class II milk included in such computation by the applicable prices for such Class II milk of 4.0 percent butterfat content; multiplying the hundredweight of such milk in excess of the total hundredweight of such Class II milk by the price for Class I milk of 4.0 percent butterfat content, and adding together the resulting amounts;

(e) Divide the total value of excess milk obtained in paragraph (d) of this section by the total hundredweight of such milk, and adjust to the nearest cent. The resulting figure shall be the uniform price for excess milk of 4.0 percent butterfat content received from producers.

(f) Subtract the value of excess milk determined by applying the uniform price obtained in paragraph (e) of this section from the value of all milk obtained in paragraph (c) of this section;

(g) Divide the amount obtained in paragraph (f) of this section by the total hundredweight of base milk included in these computations;

(h) Subtract not less than 4 cents nor more than 5 cents from the amount computed pursuant to paragraph (c) of this section. The resulting figure shall be the uniform price for base milk of 4.0 percent butterfat content received from producers.

§ 1000.73 *Notification of handlers.* On or before the 10th day after the end of each delivery period, the market administrator shall mail to each handler, at his last known address, a statement showing:

(a) The amount and value of his producer milk in each class and the totals thereof;

(b) For the months of April through August the amounts and value of his base and excess milk respectively, and the totals thereof;

(c) The uniform price(s) computed pursuant to §§ 1000.71 and 1000.72 and the butterfat differential computed pursuant to § 1000.85; and

(d) The amounts to be paid by such handler pursuant to §§ 1000.82, 1000.87 and 1000.88.

PAYMENTS

§ 1000.80 *Time and method of payment for producer milk.* (a) On or before the last day of each delivery period each handler shall make payment to each producer or cooperative association for milk received from such producer or cooperative association during the first 15 days of such delivery period at not less than the Class II price per hundredweight for the preceding delivery period.

(b) On or before the 15th day after the end of each delivery period each handler shall make payment to each producer or cooperative association for milk which was received from such producer or cooperative association during the delivery period at not less than the uniform price computed pursuant to § 1000.71, if such delivery period is any of the months of September through March, or at not less than the uniform price for base milk computed pursuant to § 1000.72 with respect to base milk received from such producer or cooperative association, and at not less than the uniform price for excess milk computed pursuant to § 1000.72 with respect to excess milk received from such producer or cooperative association, if such delivery period is any of the months of April through August, subject to the following adjustments: (1) The butterfat differential pursuant to § 1000.85, (2) less payment made pursuant to paragraph (a) of this section, (3) less marketing service deductions pursuant to § 1000.88, (4) less deductions authorized in writing by the producer or cooperative association, and (5) adjusted for any error in calculating payment to such producer or cooperative association for past delivery periods: *Provided,* That if such handler has not received full payment for such delivery period pursuant to § 1000.83 he may reduce uniformly per hundredweight for all producers and cooperative associations his payments pursuant to this paragraph by an amount not in excess of the per hundredweight reduction in payment from the market administrator: *Provided further,* That the handler shall make such balance of payment to those producers and cooperative associations to whom it is due on or before the date for making payments pursuant to this paragraph next following that on which such balance of payment is received from the market administrator.

(c) Payments due to producers under paragraphs (a) and (b) of this section may be made by handlers to such persons designated by the producer in writing, signed by the producer, and addressed and delivered to the handler.

§ 1000.81 *Producer-settlement fund.* The market administrator shall establish and maintain a separate fund known

as the "producer-settlement fund" into which he shall deposit all payments made by handlers pursuant to §§ 1000.82 and 1000.84, and out of which he shall make all payments pursuant to §§ 1000.83 and 1000.84: *Provided*, That payments due to any handler shall be offset by payments due from such handler.

§ 1000.82 *Payments to the producer-settlement fund.* On or before the 12th day after the end of each delivery period, each handler shall pay to the market administrator any amount by which the total value of his milk computed pursuant to § 1000.70 for such delivery period is greater than the value of milk received by such handler from producers during the delivery period, computed at the applicable minimum uniform prices as specified in §§ 1000.71 and 1000.72 adjusted for the butterfat differential provided for in § 1000.85.

§ 1000.83 *Payments out of the producer-settlement fund.* On or before the 13th day after the end of each delivery period, the market administrator shall pay to each handler, for payment to producers, or cooperative associations, any amount by which the total value of his milk computed pursuant to § 1000.70 for such delivery period is less than the value of milk received by such handler from producers during the delivery period, computed at the applicable minimum uniform prices as specified in §§ 1000.71 and 1000.72 adjusted for the butterfat differential provided for in § 1000.85. If at such time the balance in the producer-settlement fund is insufficient to make all payments pursuant to this section, the market administrator shall reduce uniformly per hundredweight such payments and shall complete such payments as soon as appropriate funds are available.

§ 1000.84 *Adjustment of errors in payment.* Whenever verification by the market administrator of payments by any handler discloses errors made in payments to the producer-settlement fund pursuant to § 1000.82, the market administrator shall promptly bill such handler for any unpaid amount and such handler shall, within 15 days, make payment to the market administrator of the amount so billed. Whenever verification discloses that payment is due from the market administrator to any handler, pursuant to § 1000.83, the market administrator shall, within 15 days, make such payment to such handler. Whenever verification by the market administrator of the payment by a handler to any producer or cooperative association for milk received by such handler discloses payment of less than is required by § 1000.80, the handler shall pay such balance due such producer or cooperative association not later than the time of making payment to producers or cooperative associations next following such disclosure.

§ 1000.85 *Butterfat differential to producers.* If, during the delivery period, any handler has received, from any producer or cooperative association, milk having an average butterfat content other than 4.0 percent, such handler, in making payments prescribed in § 1000.80 (b), shall add to the uniform price(s) per hundredweight paid to such producer or cooperative association for each one-tenth of 1 percent that the average butterfat content of such milk is above 4.0 percent not less than, or may deduct from the uniform price(s) per hundredweight for each one-tenth of 1 percent that the average butterfat content of such milk is below 4.0 percent not more than, an amount computed as follows: Multiply by 1.2 the average daily wholesale price per pound of 92-score butter in the Chicago market, as reported by the Department of Agriculture during the delivery period, and divide the result by 10, and then adjust to the nearest one-tenth of a cent.

§ 1000.86 *Statement to producers.* In making payments required by § 1000.80 each handler shall furnish each producer or cooperative association with a supporting statement in such form that it may be retained by the producer or cooperative association which shall show:

(a) The delivery period and the identity of the handler and of the producer;

(b) The total pounds and the average butterfat content of milk delivered by the producer including for the months of April through August, the pounds of base milk and excess milk;

(c) The minimum rate or rates at which payment to the producer is required under the provisions of §§ 1000.80 and 1000.85;

(d) The rate which is used in making the payment if such rate is other than the applicable minimum;

(e) The amount or the rate per hundredweight of each deduction claimed by the handler including any deduction made pursuant to § 1000.88, together with a description of the respective deductions; and

(f) The net amount of payment to the producer or cooperative association.

§ 1000.87 *Expense of administration.* As his pro rata share of the expense of the administration of this part, each handler shall pay to the market administrator, on or before the 15th day after the end of each delivery period, 3 cents per hundredweight or such lesser amount as the Secretary may prescribe, with respect to receipts, during the delivery period of (a) milk from producers (including such handler's own production) or cooperative association, and (b) other source milk received at a fluid milk plant: *Provided*, That each cooperative association shall pay such pro rata expense on only that milk of producers for which it is a handler.

§ 1000.88 *Marketing services.* (a) Except as set forth in paragraph (b) of this section, each handler in making payments to producers pursuant to § 1000.80 (b), shall deduct 6 cents per hundredweight or such lesser amount as the Secretary may prescribe, with respect to all milk received by such handler from producers, excepting such handler's own farm production, during the delivery period, and shall pay such deductions to the market administrator not later than the 15th day after the end of the delivery period. Such moneys shall be used by the market administrator to verify weights, samples, and tests of milk received by handlers from such producers during the delivery period and to provide such producers with market information. Such services shall be performed in whole or in part by the market administrator or by an employee of the United States responsible to him.

(b) *Producers' Cooperative Associations.* In the case of producers for whom a cooperative association is actually performing, as determined by the Secretary, the services set forth in paragraph (a) of this section, each handler shall make, in lieu of the deductions specified in paragraph (a) of this section, such deductions as are authorized by such producers and, on or before the 15th day after the end of such delivery period, pay over such deductions to the association rendering such service.

§ 1000.89 *Termination of obligations.* The provisions of this part section shall apply to any obligation under this part for the payment of money irrespective of when such obligation arose, except an obligation involved in an action instituted before December 1, 1951, under section 8c (15) (A) of the act or before a court.

(a) The obligation of any handler to pay money required to be paid under the terms of this order, shall, except as provided in paragraphs (b) and (c) of this section, terminate two years after the last day of the calendar month during which the market administrator receives the handler's utilization report on the milk involved in such obligation, unless within such two-year period the market administrator notifies the handler in writing that such money is due and payable. Service of such notice shall be complete upon mailing to the handler's last known address, and it shall contain but need not be limited to, the following information:

(1) The amount of the obligation;

(2) The month(s) during which the milk, with respect to which the obligation exists, was received or handled; and,

(3) If the obligation is payable to one or more producers or to an association of producers, the name of such producer(s) or association of producers, or if the obligation is payable to the market administrator, the account for which it is to be paid.

(b) If a handler fails or refuses, with respect to any obligation under this part, to make available to the market administrator or his representative all books and records required by this part to be made available, the market administrator may, within the two-year period provided for in paragraph (a) of this section, notify the handler in writing of such failure or refusal. If the market administrator so notifies a handler, the said two-year period with respect to such obligation shall not begin to run until the first day of the calendar month following the month during which all such books and records pertaining to such obligation are made available to the market administrator or his representatives.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of the section, a handler's obligation under this order to pay money shall not be terminated with respect to any transaction involving fraud or willful concealment of a fact, material to the obligation, on the part of the handler against whom the obligations is sought to be imposed.

(d) Any obligation on the part of the market administrator to pay a handler any money which such handler claims to be due him under the terms of this part shall terminate two years after the end of the calendar month during which the milk involved in the claim was received if an underpayment is claimed, or two years after the end of the calendar month during which the payment (including deduction or set-off by the market administrator) was made by the handler if a refund on such payment is claimed unless such handler, within the applicable period of time, files, pursuant to section 8c (15) (A) of the act, a petition claiming such money.

§ 1000.90 *Producer-handlers.* Sections 1000.40 through 1000.45, 1000.50 through 1000.52, 1000.60 through 1000.62, 1000.70 through 1000.73, 1000.80 through 1000.88, shall not apply to a producer-handler.

§ 1000.91 *Plants subject to other Federal orders.* In the case of any handler who the Secretary determines disposes of a greater portion of his milk as Class I milk in another marketing area regulated by another milk marketing agreement or order issued pursuant to the act, the provisions of this subpart shall not apply except as follows:

(a) The handler shall, with respect to the total receipts of skim milk and butterfat, make reports to the market administrator at such time and in such manner as the market administrator may require and allow verification of such reports by the market administrator.

EFFECTIVE TIME, SUSPENSION OR TERMINATION

§ 1000.100 *Effective time.* The provisions of this part, or any amendments to this part, shall become effective at such time as the Secretary may declare and shall continue in force until suspended or terminated.

§ 1000.101 *Suspension or termination.* The Secretary shall suspend or terminate any or all of the provisions of this part, whenever he finds that it obstructs or does not tend to effectuate the declared policy of the act. This part shall, in any event, terminate whenever the provisions of the act authorizing it cease to be in effect.

§ 1000.102 *Continuing power and duty of the market administrator.* (a) If, upon the suspension or termination of any or all of the provisions of this part, there are any obligations arising hereunder, the final accrual or ascertainment of which requires further acts by any handler by the market administrator, or by any other person, the power and duty to perform such further acts shall continue notwithstanding such suspension or termination: *Provided*, That any such acts required to be performed by the market administrator shall, if the Secretary so directs, be performed by such other person, persons, or agency as the Secretary may designate.

(b) The market administrator, or such other person as the Secretary may designate shall (1) continue in such capacity until discharged by the Secretary; (2) from time to time account for all receipts and disbursements and deliver all funds or property on hand, together with the books and records of the market administrator, or such person, to such person as the Secretary shall direct; and (3) if so directed by the Secretary execute such assignments or other instruments necessary or appropriate to vest in such person full title to all funds, property, and claims vested in the market administrator or such persons pursuant thereto.

§ 1000.103 *Liquidation after suspension or termination.* Upon the suspension or termination of any or all provisions of this part, the market administrator or such person as the Secretary may designate shall, if so directed by the Secretary, liquidate the business of the market administrator's office, and dispose of all funds and property then in his possession or under his control, together with claims for any funds which are unpaid or owing at the time of such suspension or termination. Any funds collected pursuant to the provisions of this part, over and above the amounts necessary to meet outstanding obligations and the expense necessarily incurred by the market administrator or such person in liquidating and distributing such funds, shall be distributed to the contributing handlers and producers in an equitable manner.

MISCELLANEOUS PROVISIONS

§ 1000.110 *Separability of provisions.* If any provisions of this part, or its application to any person or circumstances, is held invalid, the application of such provision, and of the remaining provisions of this part, to other persons or circumstances shall not be affected thereby.

§ 1000.111 *Agents.* The Secretary may, by designation in writing, name any officer or employee of the United States to act as his agent or representative in connection with any of the provisions of this part.

Copies of this notice of hearing may be procured from the Hearing Clerk, Room 112–A, United States Department of Agriculture, Washington 25, D. C., or may be there inspected.

Dated: April 13, 1955, at Washington, D. C.

[SEAL] ROY W. LENNARTSON, *Deputy Administrator.*

CIVIL AERONAUTICS BOARD

[14 CFR Part 298]

[Economic Regs. Draft Release 71B]

CLASSIFICATION AND EXEMPTION OF AIR TAXI OPERATORS

SUPPLEMENTAL NOTICE OF RULE-MAKING AND ORAL ARGUMENT THEREON

APRIL 14, 1955.

Reference should be made to Economic Regulations Draft Release No. 71, dated December 21, 1954, published in the FEDERAL REGISTER on December 28, 1954 (19 F. R. 9249), in which the Board gave notice that it had under consideration a proposed amendment to § 298.4 of Part 298 of the Economic Regulations (14 CFR Part 298, as amended) which would make permanent the exemptions authorized air taxi operators by such part. Subsequently, by notice dated February 17, 1955 (Economic Regulations Draft Release No. 71A published in the FEDERAL REGISTER on February 24, 1955 (20 F. R. 1156)), the Board gave notice that on April 19, 1955, oral argument would be heard in connection with the proposal contained in Draft Release No. 71, and that time for the receipt of written comments had been extended to such date .

The Board, having received requests for deferral of oral argument which it believes warrant action, hereby gives notice that the time for the receipt of comments on the proposed rule has been extended to June 1, 1955, and that oral argument thereon has been deferred and set down for 10:00 a. m., e. d. s. t., June 1, 1955, in Room 5042, Department of Commerce Building, Washington, D. C. Oral argument will be limited to one full day. Those desiring to be heard are requested to inform F. W. Brown, Chief Hearing Examiner, Civil Aeronautics Board, prior to May 24, 1955, indicating the amount of time desired.

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN, *Secretary.*

NOTICES

CIVIL AERONAUTICS BOARD

[Docket No. 7099; Order No. E–9091]

TRANSATLANTIC CHARTER SERVICES

NOTICE OF ORAL ARGUMENT

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 13th day of April 1955.

As a result of an analysis of transatlantic operations conducted during the summer of 1950 pursuant to a series of exemption orders, the Board on March 16, 1951, issued a statement that as a matter of policy (1) no further exemptions would be issued to authorize transatlantic charter operations except where the regularly authorized transatlantic carriers (United States and foreign) were unable or unwilling to provide reasonably adequate charter service at established charter rates, (2)

certificated U. S. transatlantic carriers would be authorized to contract for the equipment and personnel of other carriers to perform charter service, (3) charter operations would be restricted to the carriage of traffic of the type permitted by Part 207 of the Economic Regulations, adopted concurrently therewith, and (4) no exemptions would be issued to indirect carriers of passengers.

In this statement of policy, the Board pointed out, among other things, that a substantial part of the passengers carried on flights operated pursuant to the 1950 exemption orders would have traveled on regular service had it not been for the great differential between the pro rata cost per passenger on those charter flights and the passenger fares on regular service and, accordingly, directed that consideration be given to the establishment of a low fare for individual passengers on regularly authorized transatlantic service. On February 12, 1952, the Board issued a reaffirmation of said policy statement after finding that proposals for the establishment of a low fare for individual passengers in transatlantic service had been perfected during 1951 and that it should assure the success of the coach-type experiments of the regularly authorized carriers in every way open to it. Accordingly, the Board has considered the foregoing criteria for transatlantic charter operations in proceedings involving applications for exemption to conduct such operations. Further, since September 29, 1953,[1] the Board in disposing of such applications has considered, inter alia, the factor whether the provision of charter service was essential to the performance of the proposed movement.

In adopting the foregoing policy, the Board had expected that the inauguration of a regularly scheduled coach-type service across the North Atlantic, together with other means of air travel available through the authorized carriers would adequately serve anticipated needs. However, recent developments affecting transatlantic charter operations have caused us some concern.

On the one hand, there has been an increasing volume of passenger traffic carried over the North Atlantic by regularly authorized carriers particularly in the coach or second-class category. On the other hand, the applications and requests for exemption to conduct transatlantic charter services have been growing in number. There is every indication that a substantial number of groups desire charter transportation across the Atlantic this coming season, and that the regularly authorized air carriers will be unable to offer the desired number of charters. Inasmuch as the charter rates of the regular carriers generally do not differ to any marked extent from those of the nonregularly authorized carriers, it is apparent that this traffic would move on the charter flights of the regular carriers if such services were made available by them on a more frequent basis than at present. An analysis of recent filings for exemption authority to conduct transatlantic charter operations indicates that much of this traffic is of a nature that could move on the coach services of the regularly authorized carriers were it not that the cost differential between the pro rata share per passenger on exempted charter flights and the coach fares of the regular carriers may be so great as to put the latter beyond the financial reach of a number of individuals comprising the proposed charter groups.

Preliminary investigation discloses that U. S. transatlantic carriers have taken no significant steps to implement our directive[2] to take prompt and effective action to utilize the equipment and personnel of other air carriers, as required, to operate charter service. A primary obligation of these carriers is to develop this scheduled, individual fare passenger service. The carriers may also have a natural incentive to fully exploit the greater profit-making opportunities inherent in developing a mass volume of individual fare business to fill up the large number of seats available on established scheduled services. In addition, a change of major significance in the financial condition of these carriers is the fact that their transatlantic operations have either attained, or are approaching, a subsidy-free status.

The foregoing and the imminence of the 1955 summer season leads us to believe that we should give prompt reexamination to the various factors which we have heretofore been considering in disposing of exemption applications for transatlantic charter authority. There may now be a need for greater flexibility in our charter policy, at least for the immediate future and pending decision in Docket No. 5132, et al.[3], if we are to take full cognizance of all the matters now operative in the area of transatlantic charter operations and not overlook the possible requirements of all persons and groups having reason to travel across the Atlantic this summer. We are particularly concerned whether we should continue to consider, in disposing of exemption applications for charter authority, all of the various criteria heretofore taken into account.

In order to assist us in giving immediate reconsideration to the transatlantic charter policy in light of the foregoing, we are desirous of receiving factual information, views and advice from regularly authorized United States transatlantic carriers, applicants for transatlantic charter exemption authority,[4] and other interested persons bearing upon the extent, if any, to which our existing transatlantic charter policy should be modified. We have concluded that oral argument would be the most practicable and helpful means under the circumstances of accomplishing this objective since there are presently pending before the Board applications for transatlantic charter authority during the coming summer season which require our urgent attention. We wish to make it clear, however, that we may order a full evidentiary hearing after said oral argument if it should appear that such full hearing would be in the public interest.

Factual material and supporting factual data should be presented in affidavit form, and should be served upon all persons named hereinafter, and three copies of such material and data should be transmitted to the Docket Section at least three (3) days in advance of the argument.

Accordingly, it is ordered, That:

1. All interested persons herein be and they hereby are afforded the opportunity to submit factual material and data on or before April 26, 1955, and to present oral argument to the Board on the issues raised by the foregoing on April 29, 1955;

2. A copy of this order be served on the following: Pan American World Airways, Inc.; Trans World Airlines, Inc.; Transocean Air Lines; Seaboard and Western Airlines, Inc.; United States Overseas Airlines, Inc.; and The Flying Tiger Line, Inc.;

3. Any person desiring to participate in the oral argument shall notify the Chief Examiner with a statement of the amount of time desired on or before April 22, 1955;

4. This order be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
Secretary.

[Docket No. 4775]

NORTHWEST AIRLINES, INC.

NOTICE OF POSTPONEMENT OF ORAL ARGUMENT

In the matter of the application of Northwest Airlines, Inc., to eliminate Kalispell, Montana, from the certificate for route No. 3 or to authorize temporary suspension.

Notice is hereby given, pursuant to the provisions of the Civil Aeronautics Act of 1938, as amended, that oral argument in the above-entitled proceeding, now assigned to be held on May 11, 1955, is postponed to May 18, 1955, 10:00 a. m., e. s. t., in Room 5042, Commerce Building, Fourteenth Street and Constitution Avenue NW., Washington, D. C., before the Board.

Dated at Washington, D. C., April 13, 1955.

[SEAL] FRANCIS W. BROWN,
Chief Examiner.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

ALASKA

SMALL TRACT CLASSIFICATION ORDER NO. 77, AMDT. 1

APRIL 11, 1955.

By virtue of the authority contained in the Act of June 1, 1938 (52 Stat. 609; 43 U. S. C. 682a) as amended and pursuant to Delegation of Authority contained in section 1.9 (o) Order No. 541 of April 21, 1954, Bureau of Land Management, Small Tract Classification Order No. 77, dated November 20, 1953, is hereby amended as follows:

1. The land description contained in paragraph 1 is amended by deleting the following-described lands:

TALKEETNA AREA
SEWARD MERIDIAN

T. 26 N., R. 4 W.,
Section 29: That portion of Lot 1 which would be described in terms of normal subdivision as NW¼NW¼NW¼ and N½SW¼NW¼NW¼, containing approximately 7 acres.
Section 30: That portion of Lot 3 which would be described in terms of normal subdivision as NE¼SE¼NE¼, containing approximately 8 acres.

Total acreage aggregating approximately 15 acres.

2. This amendment shall take effect immediately.

LOWELL M. PUCKETT,
Area Administrator.

ALASKA

REVOCATION OF ORDERS OPENING LANDS UNDER THE FOREST HOMESTEAD ACT

APRIL 12, 1955.

Upon request of the Department of Agriculture and pursuant to the authority delegated by Departmental Order No. 2583, section 2.22 (a) of August 16, 1950, it is ordered as follows:

Subject to valid existing rights, the orders described below opening lands in the Tongass and Chugach National Forests for entry under the act of June 11, 1906, as amended (34 Stat. 233, 16 U. S. C. 506–509) are hereby revoked so far as they affect the lands hereinafter described:

TONGASS NATIONAL FOREST

a. List No. 6–1871; Date of Order of Opening: June 20, 1916.
Land: Beginning at Corner No. 1, a cottonwood post marked H/1 whence Corner No. 3, of the G. B. Morgan Forest Homestead Survey on east bank of Taku River bears W. 20 chs.; extending thence E. 39.25 chs.; thence N. 25 chs.; thence W. 66.80 chs., to Corner No. 4, on east bank of Taku River; thence S. 19° 30' E., 5.30 chs.; thence E. 25.78 chs.; thence S. 20 chs., to the place of beginning.

The tract described contains 111.60 acres.

b. List No. 6–1872; Date of Order of Opening: June 20, 1916.
Land: H. E. S. 107.

The tract described contains 153.59 acres.

c. List No. 6–1873; Date of Order of Opening: June 20, 1916.
Land: H. E. S. 108.

The tract described contains 157.88 acres.

d. List No. 6–1875; Date of Order of Opening: June 20, 1916.
Land: Beginning at Corner No. 1, identical with Corner No. 4 of the John Johnson Homestead Survey, a cottonwood post marked H/4 whence a cottonwood 26" in diameter bears N. 69° E. 5.80 chs.; extending thence N. 38 chs.; thence E. 34.50 chs.; thence S. 21° 30' E., 40.82 chs.; thence W. 49.41 chs., to the place of beginning.

The tract described contains 159.42 acres.

e. List No. 6–554; Date of Order of Opening: May 21, 1914.
Land: Beginning at Corner No. 1, a white granite rock marked H/1 and set in mound of rock located at mean high tide line, whence the west end of the Sundum Island bears S. 73° 30' W., and the east end of Bush Island bears S. 14° W., and Forest Service Monument bears N. 29° 30' W. 30.50 chains; extending thence by meanders along the mean high tide line of Endicott Arm S. 30° 10' E. 6 chains, S. 4° 30' E. 4 chains, S. 54° 30' E. 5 chains, N. 67° E. 10 chains, S. 44° E. 2.56 chains, and S. 47° E. 12.44 chains to Corner No. 2; thence N. 19° 5' E. 17.43 chains; thence S. 85° W. 16.60 chains; thence N. 55° W. 17.32 chains; thence S. 19° 5' W. 5.80 chains to Corner No. 1, the place of beginning.

The tract described contains 34.10 acres.

CHUGACH NATIONAL FOREST

List No. 6–2134; Date of Order of Opening: May 10, 1920.
Land: Beginning at Corner No. 1 thence E. 15.46 chains; thence S. 3° E. 79.80 chains; thence W. 25.60 chains; thence N. 5° E. 71.00 chains; to point of curve on U. S. R. R. right-of-way; thence meander right-of-way, Course 1, N. 3° E. 2.45 chains; Course 2, N. 1° E. 2.45 chains; thence N. 4° W. 4.10 chains; to the place of beginning.

The tract described contains 160.35 acres.

W. G. GUERNSEY,
Associate Director.

[Order No. 587]

ABE H. FURR

DELEGATION OF AUTHORITY IN CONNECTION WITH APPEALS TO THE DIRECTOR

APRIL 12, 1955.

SECTION 1. Pursuant to the authority and subject to the limitation contained in Order No. 2583 of the Secretary of the Interior, Mr. Abe H. Furr, is authorized to sign decisions involving appeals to the Director filed pursuant to 43 CFR Part 221 when such appeals involve only land status or classification. Decisions involving all other matters and decisions involving new or novel questions or of unusual interest shall be signed by the Director or the Associate Director.

SEC. 2. An informal legal opinion or formal legal review may be obtained from the Office of the Solicitor when such advice or review is necessary. However, when an informal opinion is obtained formal legal review shall be secured before signature. All decisions prepared for the signature of the Director or Associate Director will be reviewed by the Solicitor's Office prior to signature.

SEC. 3. Bureau Order No. 584 of February 4, 1955, is hereby revoked insofar as it pertains to the lands and minerals functions.

EDWARD WOOZLEY,
Director.

GENERAL SERVICES ADMINISTRATION

SECRETARY OF THE SMITHSONIAN INSTITUTION

DELEGATION OF AUTHORITY TO NEGOTIATE CONTRACTS FOR CERTAIN RESTORATION AND RENOVATION WORK

1. Pursuant to the authority vested in me by the Federal Property and Administrative Services Act of 1949, 63 Stat. 377, as amended, herein called the act, authority is hereby delegated to the Secretary of the Smithsonian Institution to negotiate, without advertising, under section 302 (c) (4) and (9) of the act, contracts for restoring and renovating exhibits, dioramas, and accessories for exhibits.

2. This authority shall be exercised in accordance with applicable limitations and requirements in the act, particularly sections 304 and 307, and in accordance with policies, procedures, and controls prescribed by the General Services Administration.

3. The authority herein delegated may be redelegated to any official or employee of the Smithsonian Institution.

4. This delegation shall be effective as of the date hereof.

Dated: April 13, 1955.

EDMUND F. MANSURE,
Administrator.

DEPARTMENT OF COMMERCE

Office of the Secretary

[Department Order 153, Amdt. 3]

BUREAU OF FOREIGN COMMERCE

ESTABLISHMENT, ORGANIZATION, AND FUNCTIONS

MARCH 24, 1955.

The material appearing at 18 F. R. 6789 is hereby further amended by the following:

Department Order No. 153 of October 12, 1953, as amended, is further amended as follows:

Paragraph 3 (a) is amended to read:

(a) Subject to such policies and conditions as the Secretary of Commerce may prescribe, the Director of the Bureau of Foreign Commerce shall perform the functions and exercise the power and authorities relating to the promotion of United States international trade and investment vested in the Secretary of Commerce by applicable laws or executive orders, including but not limited to the Act of February 14, 1903 (32 Stat. 826), as amended, and shall carry out the Secretary's authority and responsibilities under the Export Control Act of 1949, as amended.

Paragraph 5 (c) is amended to read:

(c) The Foreign Economic Development Staff is responsible for the work of the bureau in executing programs of the United States for foreign economic development. The Director is also designated Coordinator of Foreign Assistance Programs for the Department and as such will be the focal point for the conduct of program and project negotiations with the Foreign Operations Administration.

In view of the creation of the Office of International Trade Fairs by Department Order No. 159 of January 27, 1955, the establishment of the Trade Fair Operations Division in the Bureau of Foreign Commerce by Amendment 2 to Department Order No. 153 is hereby rescinded and paragraph 5 (j) (6) is amended to read:

(6) In collaboration with the Office of International Trade Fairs, facilitate the effective conduct of international trade fairs with specific responsibility for (1) developing and maintaining pertinent economic data relating to international trade fair operations and the publication and dissemination of such data as appropriate, and (2) organizing individual trade information missions and maintaining trade information centers at international trade fairs;

Effective date: March 24, 1955.

[SEAL] SINCLAIR WEEKS,
Secretary of Commerce.

FEDERAL POWER COMMISSION

[Docket No. E-6594]

PENNSYLVANIA POWER & LIGHT CO.

NOTICE OF EXTENSION OF TIME TO ACQUIRE STOCK

APRIL 11, 1955.

Upon consideration of the request, filed April 7, 1955, by Pennsylvania Power & Light Company for an extension of time within which it may acquire the shares of Preferred and Common Stock of The Scranton Electric Company authorized by the Commission's order issued December 23, 1954, in the above-designated matter;

Notice is hereby given that a further extension of time is granted to and including June 24, 1955, within which Pennsylvania Power & Light Company may acquire said shares of stocks of the Scranton Electric Company. Paragraph (B) of said order issued December 23, 1954, as amended by the notice dated February 14, 1955, is further amended accordingly.

[Docket No. G-2530]

EL PASO NATURAL GAS CO.

NOTICE OF HEARING

APRIL 12, 1955.

El Paso Natural Gas Company (Applicant), a Delaware corporation having its principal place of business in El Paso, Texas, filed an application on August 5, 1954, which was supplemented on December 27, 1954, for a certificate of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of a tap approximately at mile post 229 on Applicant's 30-inch Permian-San Juan cross-over line in Torrance County, New Mexico, together with metering and regulating equipment for the sale of natural gas to the Town of Mountainair, New Mexico, for resale in the Town of Mountainair and vicinity. Due notice was given of the filing of the application including publication in the FEDERAL REGISTER on August 27, 1954 (19 F. R. 5509).

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by section 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on May 10, 1955, at 9:30 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however*, That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

[SEAL] LEON M. FUQUAY,
Secretary.

D. J. HARRISON ET AL.

NOTICE OF APPLICATIONS AND DATE OF HEARING

APRIL 11, 1955.

In the matters of D. J. Harrison, Docket No. G-2877; J. C. Means, Jr., et al., Docket No. G-3023; Lloyd H. Smith, Inc., et al., Docket No. G-3554; Lloyd H. Smith, Inc., et al., Docket No. G-3555; Meredith & Company, as operator, Docket No. G-3602; J. M. Frost, Jr., et al., Docket No. G-3684; J. M. Frost, Jr., et al., Docket No. G-3690; Kirby Petroleum Company, Docket No. G-3865; Carnes W. Weaver Drilling Company and Frank W. Warburton, Trustee, Docket No. G-4692; McCarthy Oil & Gas Corporation, et al., Docket No. G-6328.

Take notice that there have been filed with the Federal Power Commission Applications as hereinafter specified:

Applicant	Address	Date filed	Docket No.
D. J. Harrison	2105 Gulf Bldg., Houston 2, Tex.	Sept. 20, 1954	G-2877
J. C. Means, Jr., et al.	114 Bowie Bldg., Beaumont, Tex.	Sept. 23, 1954	G-3023
Lloyd H. Smith, Inc., et al.	403 City National Bank Bldg., Houston, Tex.	Sept. 28, 1954	G-3554
Do.	do.	do.	G-3555
Meredith & Co., as operator	2117 Commerce Bldg., Houston, Tex.	Sept. 29, 1954	G-3602
J. M. Frost, Jr., et al.	805 Esperson Bldg., Houston, Tex.	do.	G-3684
Do.	do.	do.	G-3690
Kirby Petroleum Co.	P. O. Box 1745, Houston 1, Tex.	Oct. 1, 1954	G-3865
Carnes W. Weaver Drilling Co., and Frank W. Warburton, trustee.	326 Gulf Bldg., Houston, Tex.	Nov. 5, 1954	G-4692
McCarthy Oil & Gas Corp., et al.	Prudential Bldg., Houston, Tex.	Nov. 29, 1954	G-6328

each for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the respective applicants to sell natural gas as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the respective applications which are on file with the Commission and open for public inspection.

Applicants produce and sell natural gas to Texas Gas Corporation as indicated below:

Docket No.	Location of field	Delivery rate	Price per Mcf (cents)
G-2877	South Mayes Field, Chambers County, Tex.	317,553 Mcf per month	6.5
G-3023	North Port Neches Field, Orange County, Tex.	1,000 Mcf per day	10
G-3554	do.	15,000 Mcf per day	10
G-3555	do.	1,000 Mcf per day	8
G-3602	East Mayes Field, Chambers County, Tex.	do.	8
G-3684	Fig Ridge Field, Chambers County, Tex.	Total production	16
G-3690	do.	do.	1
G-3865	White's Lake Field, Chambers County, Tex.	Maximum 10,000 Mcf per day	8
G-4692	Stowell Field, Chambers County, Tex.	500 Mcf per day	4
G-6328	Stowell Field, Chambers County, and Fannett Field, Jefferson County, Tex.	Total production	4

These related matters should be heard on a consolidated record and disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on May 6, 1955, at 9:40 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such applications: *Provided, however*, That the Commission may, after a non-contested hearing dispose of the proceedings pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before April 29, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[Docket No. G-8087]

TEXAS CO.

NOTICE OF APPLICATION AND DATE OF HEARING

APRIL 12, 1955.

Take notice that The Texas Company (Applicant), a Delaware corporation whose address is Houston, Texas, filed on December 8, 1954, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing Applicant to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant proposes to sell natural gas to Colorado Interstate Gas Company (Colorado Interstate) at an initial rate of 15 cents per Mcf. This gas will be produced from the Keyes Field in Cimarron and Texas Counties, Oklahoma, and from the Greenwood Field in Morton County, Kansas and Baca County, Colorado. It will be commingled with other gas and resold at markets in other states served by Colorado Interstate's transmission pipeline system.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on May 10, 1955, at 9:45 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however*, That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before May 2, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[Docket No. G-8299]

SOUTHERN UNION GAS CO.

NOTICE OF APPLICATION AND DATE OF HEARING

APRIL 12, 1955.

Take notice that Southern Union Gas Company (Applicant), a Delaware Corporation, whose address is Dallas, Texas, filed on December 28, 1955, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing Applicant to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant proposes to sell natural gas to El Paso Natural Gas Company (El Paso) at an initial rate of 11 cents per Mcf. This gas will be produced from the Blanco-Mesaverde Field in San Juan County, New Mexico. It will be commingled with other gas and resold at markets in other states served by El Paso's transmission pipeline system.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on May 9, 1955, at 9:45 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before May 2, 1955. LONG-AND-SHORT-HAUL

FSA No. 30478: Fertilizer solution—Southwest to Illinois and W. T. L. territory. Filed by F. C. Kratzmeir, Agent, for interested rail carriers. Rates on nitrogen, fertilizer solutions and fertilizer ammoniating solution, in tank-car loads, from specified points in Arkansas, Louisiana (west of the Mississippi River), Missouri, Oklahoma, and Texas to specified base points in Illinois, Indiana, Iowa, Missouri, and Wisconsin, and points grouped with such base points as taking same rates.

Grounds for relief: Rates constructed on short line distance formula, circuitous routes and additional destinations.

Tariff: Supplement 51 to Agent Kratzmeir's I. C. C. No. 4112.

FSA No. 30479: Fertilizer soultions to Illinois, Iowa, and Wisconsin. Filed by R. E. Boyle, Jr., Agent, for interested rail carriers. Rates on fertilizer ammoniating solutions and fertilizer nitrating solutions, in tank-car loads, from Vicksburg and Yazoo City, Miss., to specified base points in Illinois, Iowa and Wisconsin.

Grounds for relief: Rates constructed on short line distance formula, circuitous routes, and additional destinations.

Tariff: Supplement 41 to Agent C. A. Spaninger's I. C. C. No. 1366.

FSA No. 30480: Lumber and related articles—Pacific Coast to Lake Charles, La. Filed by W. J. Prueter, Agent, for interested rail carriers. Rates on lumber and related articles, carloads, from grouped origins on the Pacific Coast and points intermediate thereto in the so-called "Coast" and "Truckee or Hawley" groups to Lake Charles, La.

Grounds for relief: Additional circuitous routes through higher-rated intermediate destination groups.

Tariff: Supplement 37 to Agent Prueter's I. C. C. 1556.

FSA No. 30481: Clay, from, to and between points in the south. Filed by R. E. Boyle, Jr., Agent, for interested rail carriers. Rates on clay, kaolin or pyrophyllite, carloads, from specified points in Alabama, Florida, Georgia, North Carolina and South Carolina, to specified points in Georgia, Kentucky, North Carolina, Ohio, South Carolina, Tennessee and West Virginia.

Ground for relief: Rates constructed on short-line distance formula, circuitous routes and additional destinations.

Tariff: Agent Spanninger's I. C. C. 1323, supplement 73.

FSA No. 30482: Phosphate rock—Florida mines to Texarkana, Ark.-Tex. Filed by R. E. Boyle, Jr., Agent, for interested rail carriers. Rates on phosphate rock, ground or not ground, slush and floats, and soft phosphate, not acidulated nor ammoniated, carloads, from Bartow, Fla, and other Florida mines named in the application to Texarkana, Ark.-Tex.

Grounds for relief: Rail-water-rail competition and circuity.

Tariffs: Supplement 121 to Atlantic Coast Line Railroad Company's I. C. C. B-3232; Supplement 112 to Seaboard Air Line Railroad Company's I. C. C. A-8153.

FSA No. 30483: Bituminous fine coal to Eau Claire, Wis. Filed by R. G. Raasch, Agent, for interested rail carriers. Rates on bituminous fine coal, carloads, from mines in Illinois, Indiana, and Wisconsin, to Eau Claire, Wis.

Grounds for relief: Rail-barge-truck competition and circuity.

Carrier, I. C. C. No., and Supplement No.

Tariffs: AT&SF, 14708, 23; C&EI, 2, 178; C&IM, B-336, 61; C&NW, 11208, 38; CB&Q, 20447, 5; CI&L, 4798, 39; CMStP&P, B-1717, 42; CMStP&P, B-7287, 149; CRI&P, C-13446, 35; GM&O, 262, 42; IC, E-1869, 75; M&StL, 89, 9; MP, A-10454, 10; NYC, 1306, 94; Wab, 7649, 64; SFTB (L&N), 1224,[1] 82.

FSA No. 30484: Cinders from Choctaw, Okla. Filed by F. C. Kratzmeir, Agent, for interested rail carriers. Rates on cinders, clay or shale, ground or not ground, carloads, from Choctaw, Okla., to stations in Kansas as described in the applications.

Grounds for relief: Rates constructed on a short-line distance formula, additional origin and circuitous routes.

Tariff: Supplement 12 to Agent Kratzmeir's I. C. C. No. 4135.

30485: Steel sheet and plate to Beardstown, Ill. Filed by R. G. Raasch, Agent, for interested rail carriers. Rates on steel sheet and plate, carloads, from Chicago and South Chicago, Ill., East Chicago, Gary, and Indiana Harbor, Ind., to Beardstown, Ill.

Tariff: Supplement 38 to Agent Raasch's I. C. C. No. 749.

FSA No. 30486: Fertilizer compounds from St. Francis, Tex. Filed by F. C. Kratzmeir, Agent, for interested rail carriers. Rates on fertilizer compounds (manufactured fertilizer) noibn, dry, carloads, from St. Francis, Tex., (as a storage and shipping point), to points in southern, western trunk-line and Illinois territories.

Ground for relief: Rates constructed on basis of a short-line distance formula, circuity, and grouping, and additional origin.

Tariff: Supplement 52 to Agent Kratzmeir's I. C. C. 4112.

FSA No. 30487: Fuel wood—Memphis, Tenn., to the southwest. Filed by F. C. Kratzmeir, Agent, for interested rail carriers. Rates on fuel wood, namely, sawdust or shavings, compressed, straight or mixed carloads, from Memphis, Tenn., to stations in Arkansas, Louisiana (west of the Mississippi River), southern Missouri, New Mexico, Oklahoma, and Texas as described in the application.

Grounds for relief: Rates constructed on basis of a short-line distance formula, circuity, and additional destinations.

Tariffs: Supplement 150 to Agent Kratzmeir's I. C. C. 3932; supplement 80 to Agent Kratzmeir's I. C. C. 4049; Supplement 86 to Agent Kratzmeir's I. C. C. 4090; supplement 56 to Agent Kratzmeir's I. C. C. 4109; supplement 49 to Agent Kratzmeir's I. C. C. 4115.

FSA No. 30488: Methanol, Sterlington, La., to Chicago, Ill., District. Filed by F. C. Kratzmeir, Agent, for interested rail carriers. Rates on methyl alcohol, in tank-car loads, from Sterlington, La., to Chicago, Ill., and points in the Chicago Switching District, described in the application.

Grounds for relief: Competition of barge lines, rail carrier competition and circuity.

Tariff: Supplement 61 to Agent Kratzmeir's I. C. C. 4064.

FSA No. 30490: Steel or wrought pipe to Judkins, Douro and Sid Richardson, Tex. Filed by F. C. Kratzmeir, Agent, for interested rail carriers. Rates on steel or wrought iron pipe, and related articles, carloads, from points in official, southern and southwestern territories to Judkins, Douro, and Sid Richardson, Tex.

Grounds for relief: Carrier competition, additional destinations, and circuity.

Tariff: Supplement 19 to Agent Kratzmeir's I. C. C. 4116.

AGGREGATE-OF-INTERMEDIATES

FSA No. 30489: Methanol, Sterlington, La., to Chicago, Ill., District. Filed by F. C. Kratzmeir, Agent, for interested rail carriers. Rates on methyl alcohol, in tank-car loads, from Sterlington, La., to Chicago, Ill., and points in the Chicago Switching District, described in the application.

Grounds for relief: Maintenance of existing through one-factor rates from and to more distant points.

Tariff: Supplement 61 to Agent Kratzmeir's I. C. C. 4064.

By the Commission.

SECURITIES AND EXCHANGE COMMISSION

[File No. 811-342]

INDEPENDENCE TRUST SHARES PURCHASE PLANS AND INDEPENDENCE SHARES CORP.

NOTICE OF FILING OF APPLICATION FOR ORDER DECLARING THAT TRUST HAS CEASED TO BE AN INVESTMENT COMPANY

APRIL 12, 1955.

Notice is hereby given that Independence Shares Corporation ("Depositor"), for itself and as the Sponsor-Depositor of Independence Trust Shares Purchase Plans ("Plan"), a unit investment trust, registered under the Investment Company Act of 1940, has filed an application pursuant to section 8 (f) of the act for an order declaring that the Plan has ceased to be an investment company under the act.

The application makes the following representations:

Depositor is a corporation organized and existing under the laws of the State of Pennsylvania, with its principal place of business at 1526 Chestnut Street, Philadelphia, Pa., and its agent for service being Alfred H. Geary. Depositor is the Sponsor-Depositor of the Plan and is also the Sponsor-Depositor of a unit type investment trust known as Independence Trust Shares ("the Trust").

The Trust is a common law fixed trust organized under and by virtue of a Trust Indenture between Depositor and the Pennsylvania Company for Banking and Trusts ("Pennsylvania Company") dated April 2, 1930, as amended, under which Trust Certificates or shares are issued to shareholders. The Trust Certificates evidence a beneficial interest in a fixed portfolio of shares of 35 corporations designated in the Indenture, as amended. The Plan is a custodianship providing for the purchase by the Pennsylvania Company as custodian, of shares of the Trust out of the monthly or single payments made by the Planholders.

The Trust was terminated on March 31, 1954, with a final liquidation date of August 31, 1954.

Under date of April 1, 1954, the Pennsylvania Company gave notice to the Planholders that distributions would not be invested as theretofore because there were no comparable securities available for substitution for the Trust Shares. Under date of May 19, 1954, the Pennsylvania Company sent another notice to the Planholders advising them that they had the option to accept delivery of the Trust Shares or to authorize the liquidation of the Trust Shares for the account of the Planholders. Pennsylvania Company, as custodian, gave notice to the Planholders by letter dated December 23, 1954, of the termination of the plans on the ground that the Trust Shares had not been purchasable for a period of 90 days, and no other securities have been substituted therefor. At the present time, there are three Plans outstanding, and the trustee holds the sum of $3,294.20 for the liquidation of those Plans, which sum represents the cash received upon the liquidation of the Independence Trust Shares represented by those Plans. The said cash is being held by the Pennsylvania Company as custodian for payment to the Planholders upon surrender of their Plans.

Section 8 (f) of the act provides, in part, that whenever the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order and that upon the taking effect of such order the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than April 26, 1955, at 5:30 p. m., submit to the Commission in writing any facts bearing

upon the desirability of a hearing on the matter and may request that a hearing be held, such request stating the nature of his interest, the reasons for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D. C. At any time after said date, the application may be granted as provided in Rule N-5 of the rules and regulations promulgated under the act.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 811-341]

CAPITAL SAVINGS PLAN CONTRACT CERTIFICATES AND INDEPENDENCE SHARES CORP.

NOTICE OF FILING OF APPLICATION FOR ORDER DECLARING THAT TRUST HAS CEASED TO BE AN INVESTMENT COMPANY

APRIL 12, 1955.

Notice is hereby given that Independence Shares Corporation ("Depositor") for itself and as the Sponsor-Depositor for Capital Savings Plan Contract Certificates ("the Plan"), a unit investment trust, registered under the Investment Company Act of 1940, has filed an application pursuant to section 8 (f) of the act for an order declaring that the Plan has ceased to be an investment company under the act.

The application makes the following representations:

Depositor is a corporation organized and existing under the laws of the State of Pennsylvania, with its principal place of business at 1526 Chestnut Street, Philadelphia, Pa., its agent for service being Alfred H. Geary. Capital Savings Plan, Inc. was a corporation organized and existing under the laws of Pennsylvania, which was merged with Depositor as of December 31, 1938. Depositor is the Sponsor-Depositor of a unit type investment company known as Independence Trust Shares ("The Trust"), and of the Plan.

The Plan is a periodic payment plan organized under and by virtue of three Trust Indentures between Capital Savings Plan, Inc. and the Pennsylvania Company for Banking and Trusts ("Pennsylvania Company") and certain beneficiaries ("Planholders") which Indentures are dated December 11, 1931, August 9, 1932, and May 1, 1934, with supplements thereto, under which Indentures Periodic Payment Plan Certificates were issued to the Planholders. The Plan Certificates provided for the payment by Planholders to the Pennsylvania Company of certain sums, in monthly installments and in some cases in single payments, which sums were invested, after the making of certain deductions, in shares of Independence Trust Shares for the benefit of the Planholders. This Trust was terminated on March 31, 1954, and final liquidation took place on August 31, 1954.

On March 31, 1954, the termination date of the Trust, there were no plans outstanding under the Indenture dated December 11, 1931, and none had been outstanding for some years prior to that date, and at the present time there are no plans outstanding under the Indenture dated August 9, 1932.

Under date of April 1, 1954, the Pennsylvania Company gave notice to the Planholders that, since Trust Shares were no longer available for purchase and since there were no comparable securities available for substitution, distributions would not be invested as theretofore. Under date of May 19, 1954, the Pennsylvania Company sent another notice to the Planholders advising them that they had the option to accept delivery of the Trust Shares or to authorize the liquidation of the Trust Shares for the account of the Planholders. Under date of December 23, 1954, the Pennsylvania Company sent to all of the Planholders who had not elected to receive the underlying Trust Shares in accordance with the prior letter, a notice of termination of their Plan Certificates. Under date of December 6, 1954, and pursuant to the provisions of the three Indentures referred to above, Depositor terminated the Indentures forthwith by sending notices of termination to the Pennsylvania Company.

There are outstanding at the present time under the Indenture dated May 1, 1934, 24 Plan Certificates. The said 24 Certificates have a liquidation value, subject to deduction for any Federal income taxes which are found to be payable by the Trust, of $43,231.93. Said sum is being held by the Pennsylvania Company for the account of the Planholders.

Section 8 (f) of the act provides, in part, that whenever the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order and that upon the taking effect of such order the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than April 26, 1955, at 5:30 p. m., submit to the Commission in writing any facts bearing upon the desirability of a hearing on the matter and may request that a hearing be held, such request stating the nature of his interest, the reasons for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D. C. At any time after said date, the application may be granted as provided in Rule N-5 of the rules and regulations promulgated under the act.

By the Commission.

[File No. 811-340]

INDEPENDENCE TRUST SHARES AND INDEPENDENCE SHARES CORP.

NOTICE OF FILING OF APPLICATION FOR ORDER DECLARING THAT TRUST HAS CEASED TO BE AN INVESTMENT COMPANY

APRIL 12, 1955.

Notice is hereby given that Independence Shares Corporation ("Depositor"), for itself and as the Sponsor-Depositor of Independence Trust Shares ("the Trust"), a unit investment trust registered under the Investment Company Act of 1940, has filed an application pursuant to section 8 (f) of the act for an order declaring that the Trust has ceased to be an investment company under the act.

The application makes the following representations:

Depositor is a corporation organized and existing under the laws of the State of Pennsylvania, with its principal place of business at 1526 Chestnut Street, Philadelphia, Pa., its agent for service being Alfred H. Geary, and is the sponsor-depositor of the Trust.

The Trust is a common law fixed trust under and by virtue of a Trust Indenture between Depositor and the Pennsylvania Company for Banking and Trusts ("Pennsylvania Company") and certain beneficiaries ("Shareholders") dated April 2, 1930, as amended by Supplemental Agreements dated November 24, 1930, June 8, 1931, December 16, 1938, October 31, 1940, October 13, 1942, and August 16, 1951. Pursuant to the terms of the Trust Indenture, Certificates have been issued to the Shareholders. The Trust Certificates evidenced a beneficiary interest in a fixed portfolio of shares of 35 corporations designated in the Indenture, as amended.

On March 1, 1954, the Depositor gave notice, by mail and by newspaper publication in accordance with the provisions of the Trust Indenture, as amended, to the registered holders of Trust Shares, of the final termination of the Trust as a whole on March 31, 1954, and of final distribution of the Trust property on August 31, 1954. The Depositor notified the Pennsylvania Company of its intention to terminate by a letter dated February 26, 1954.

On March 31, 1954, the number of Trust Shares outstanding was 186,000 shares. There were 457 shareholders who owned the aforesaid 186,000 shares.

Under date of April 20, 1954, the Depositor notified the Shareholders that the offer of exchange made by Delaware Fund, Inc., and approved by this Commission in proceedings under File No. 812-727 by order dated September 12, 1951, whereby holders of shares of the Trust might exchange such shares for those of Delaware Fund, Inc., was still available. As stated in the said notice, the Shareholders were notified that no transfers or redemptions were permissible under the Trust Agreement after July 15, 1954, that the exchange offer would no longer be available after that date, and that liquidation of the remaining securities in the Trust would not take place until after July 15, 1954.

The sale of the underlying securities took place on or shortly after July 20, 1954, and the amount received on the sale of the underlying securities was $272,259.80 less expenses of liquidation in the amount of $6,213.57. Said amount was received by the Trustee on July 27, 1954.

All of the liabilities of the Trust have been paid. The amount distributable to Shareholders on August 31, 1954, amounted to $286,335.60, of which $281,072.45 represented distributions from principal (including the amount received upon the liquidation of the securities) and $5,263.15 from income, a total of $2.5796 per share.

Distributions have been made to the Shareholders who have delivered their shares for cancellation and at the present time there are 15,422 shares outstanding in the hands of 142 Shareholders. There is a balance of cash on hand in the amount of $39,782.48 available to pay the amounts due to the holders of the outstanding shares. This amount is held by the Pennsylvania Company in cash pursuant to the provisions of the Trust Indenture, as amended, for the redemption of the remaining shares.

Section 8 (f) of the act provides, in part, that whenever the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order and that upon the taking effect of such order the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than April 26, 1955, at 5:30 p. m., submit to the Commission in writing any facts bearing upon the desirability of a hearing on the matter and may request that a hearing be held, such request stating the nature of his interest, the reasons for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D. C. At any time after said date, the application may be granted as provided in Rule N-5 of the rules and regulations promulgated under the act.

By the Commission.

[File No. 70-3355]

NATIONAL FUEL GAS CO. ET AL.

NOTICE OF PROPOSED ISSUANCE AND SALE OF NOTES TO BANK BY PARENT, AND ISSUE AND SALE TO PARENT OF NOTES BY SUBSIDIARY COMPANIES

APRIL 12, 1955.

In the matter of National Fuel Gas Company, Iroquois Gas Corporation, Republic Light, Heat and Power Company, Inc., United Natural Gas Company, Pennsylvania Gas Company.

Notice is hereby given that National Fuel Gas Company ("National"), a registered holding company, and its gas utility company subsidiaries, Iroquois Gas Corporation ("Iroquois"), Republic Light, Heat and Power Company, Inc. ("Republic"), United Natural Gas Company ("United") and Pennsylvania Gas Company ("Pennsylvania"), have filed with this Commission a joint application-declaration, pursuant to the Public Utility Holding Company Act of 1935 ("act"), designating sections 6, 7, 9 (a), (10), 12 (b) and 12 (f) of the act and rules U-43 and U-45 promulgated thereunder as applicable to the proposed transactions, which are summarized as follows:

National proposes to borrow from time to time to November 15, 1955 up to an aggregate amount not to exceed $12,000,000 from the Chase National Bank of the City of New York upon its unsecured promissory notes bearing interest at the rate of 3 percent per annum and being payable on July 15, 1957. National proposes to use the proceeds from these loans to prepay its presently outstanding notes payable to the same bank amounting to $1,700,000 and maturing July 15, 1955, and to make loans to its subsidiaries as described below.

National states that it is its intention to finance, on or before the maturity date, the payment of any of its outstanding bank loan notes, issued pursuant to this filing, by the issuance and sale of long-term debenture bonds and/or common stock.

Iroquois, Republic, United and Pennsylvania propose to issue and sell to National from time to time during 1955 unsecured promissory notes aggregating in principal amount not in excess of the following amounts and in series with the principal amount of each note as follows:

	Aggregate principal amount	Principal amount of each note
Iroquois	$3,000,000	$200,000
Republic	3,300,000	150,000
United	4,400,000	200,000
Pennsylvania	2,700,000	[1] 100,000

[1] For the first 17 of such notes and $200,000 for the last 5 of such notes.

The first note in each of the series will mature on May 1, 1957 and each succeeding note in the series will mature on May 1 of the following calendar year. Each note will bear interest at the rate of 3 percent per annum subject to adjustment as of the date of National's next debenture issue to a rate equal to the coupon rate that will apply to such issue.

Each of the subsidiary companies proposes to use the net proceeds from the notes proposed to be issued to provide its treasury with funds with which to make needed additions to its utility plant during 1955, and in the cases of Iroquois and Republic to replenish working capital depleted by extra capital expenditures made in 1954. Such additions to utility plant are estimated to cost $3,745,000 in the case of Iroquois, $2,000,000 for Republic, $2,830,000 for United, and $1,805,000 for Pennsylvania. Republic also proposes to discharge its outstanding short-term bank borrowings (in the amount of $944,296.20 as at December 31, 1954) while United and Pennsylvania further propose to convert their short-term notes payable to National ($1,800,000 for United and $750,000 for Pennsylvania) and maturing July 15, 1955, to long-term notes payable to National.

Iroquois and Republic have applied to the New York Public Service Commission and United and Pennsylvania have applied to the Pennsylvania Public Utility Commission for authorization of their proposed note issuances. According to the filing no other State commission or Federal commission other than this Commission has jurisdiction over the proposed transactions.

It is estimated that the fees, commissions and expenses will total $11,950 for all of the companies including $6,200 for fees and expenses of counsel.

It is requested that the Commission's order herein be made effective on or before April 29, 1955.

Notice is further given that any interested person may, not later than April 28, 1955, at 5:30 p. m., request the Commission in writing that a hearing be held on such matter, stating the reasons for such request, the nature of his interest and the issues of fact or law raised by said filing which he desires to controvert, or may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D. C. At any time after said date, said application-declaration, as filed or as amended, may be granted and permitted to become effective, as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transactions as provided in Rules U-20 (a) and U-100 thereof.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[F. R. Doc. 55-3140; Filed, Apr. 15, 1955; 8:47 a. m.]

UNITED STATES TARIFF COMMISSION

[Investigation 6]

DAIRY PRODUCTS

SUPPLEMENTAL INVESTIGATION INSTITUTED AND PUBLIC HEARING ORDERED

Notice is hereby given that the United States Tariff Commission, on April 12, 1955, instituted an investigation under the provisions of section 22 (d) of the Agricultural Adjustment Act, as amended, supplemental to its Investigation No. 6 under section 22 of the said act, to determine whether changed circumstances require the modification, as hereinafter indicated, of Presidential proclamation 3019 of June 8, 1953 (18 F. R. 3361), as amended by proclamation 3025 dated June 30, 1953 (18 F. R. 3815), to

carry out the purposes of the said section 22.

Presidential proclamation 3019, as amended by proclamation 3025, established annual import quotas for certain types of manufactured dairy products, including certain types of cheeses. In a letter to the President dated March 21, 1955, the Acting Secretary of Agriculture suggested the need for a modification of the existing proclamation in order to carry out the purpose and intent thereof. Specifically, the Acting Secretary of Agriculture indicated that because of the restricted scope which is being applied to the language of the proclamation "Italian-type cheeses, made from cow's milk, in original loaves" in the administration of the proclamation, the proclamation is being rendered ineffective.

In a letter dated April 7, 1955, the President directed the Tariff Commission to make an immediate investigation under section 22 (d) to determine whether modification of the existing proclamation is warranted. A copy of the letter to the President from the Acting Secretary of Agriculture and of the letter from the President are available for inspection at the offices of the Commission in Washington, D. C. and at its New York office in the Customhouse.

The proposals of the Acting Secretary of Agriculture are that the proclamation of June 8, 1953, be amended to include the following definitions:

1. The articles designated in lists I and II include all articles which are substantially those specified notwithstanding minor variations in composition, characteristics or appearance. The determination as to whether a specific article is substantially one of those designated shall be made by the Secretary of Agriculture.

2. The term "original loaves" as used in list II includes original loaves even if cut into pieces or the rind is removed.

As an alternative to proposal 2 above, it is proposed to delete the reference to "original loaves".

The Commission's investigation will involve determination of whether the modification of the President's proclamation of June 8, 1953, to extend its scope to accomplish the purposes of the proposed amendments is warranted.

Public hearing ordered. The Commission, on April 12, 1955, ordered a public hearing to be held in connection with the above-announced supplemental investigation, beginning at 10 a. m., e. d. s. t., on May 10, 1955, in the Hearing Room, Tariff Commission Building, Eighth and E Streets NW., Washington, D. C. Interested persons desiring to appear and to be heard at the hearing should notify the Secretary of the Commission in writing, at its offices in Washington, D. C., at least 3 days in advance of the date set for the hearing.

Issued: April 13, 1955.

By order of the Commission.

[SEAL] DONN N. BENT,
Secretary.

Chapter VII—Commodity Stabilization Service (Farm Marketing Quotas and Acreage Allotments), Department of Agriculture

[1023 (Peanuts-55)-1, Amdt. 1]

PART 729—PEANUTS

DETERMINATION OF ADJUSTED ACREAGE

Basis and purpose. The amendment herein is issued under the peanut marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended, for the purpose of increasing the amount of acreage which State committees may make available to county committees for upward adjustment of old farm peanut acreage allotments.

Peanuts will be planted at a very early date in several areas of the United States and it is necessary that the amendment set forth herein be made effective at the earliest possible date in order that the county committees may make adjustment prior to the planting of peanuts. Accordingly, it is hereby determined and found that compliance with the notice, public procedure and effective date requirements of Section 4 of the Administrative Procedure Act (5 U. S. C. 1003) is impracticable and contrary to the public interest, and the amendment contained herein shall be effective upon filing of this document with the Director, Division of the Federal Register.

Subparagraph (5) of § 729.617 (b) of the Marketing Quota Regulations for the 1955 Crop of Peanuts (19 F. R. 6134) is amended as follows:

By striking the period at the end of the subparagraph and inserting in lieu thereof a colon and adding the following: "*Provided further,* That any State committee, which has available from its share of the national acreage allotment, unused acreage in sufficient quantity, and after first using the entire five percent of peanut acreage allotted to all old farms in the State in 1954 for upward adjustment of allotments as provided by this subparagraph, may make an additional acreage available to county committees for upward adjustment (under the standards of this subparagraph), but the total acreage used for adjustments under this subparagraph shall not exceed ten percent of the 1954 State peanut acreage allotment."

(Sec. 375, 52 Stat. 66, as amended; 7 U. S. C. 1375. Interprets or applies sec. 358, 55 Stat. 88, as amended; 7 U. S. C. 1358)

Done at Washington, D. C., this 14th day of April 1955. Witness my hand and the seal of the Department of Agriculture.

[SEAL] TRUE D. MORSE,
Acting Secretary of Agriculture.

FEDERAL REGISTER

Published daily, except Sundays, Mondays, and days following official Federal holidays, by the Federal Register Division, National Archives and Records Service, General Services Administration, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U. S. C., ch. 8B), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President. Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15 cents) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, directly to the Government Printing Office, Washington 25, D. C.

The regulatory material appearing herein is keyed to the CODE OF FEDERAL REGULATIONS, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended August 5, 1953. The CODE OF FEDERAL REGULATIONS is sold by the Superintendent of Documents. Prices of books and pocket supplements vary.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER, or the CODE OF FEDERAL REGULATIONS.

amended (herein referred to as "act"), after investigation, and due consideration of the evidence obtained at the public hearing held in Hilo, Hawaii, on September 30 and October 1, 1954, the following determination is hereby issued:

§ 876.7 *Fair and reasonable prices for the 1955 crop of Hawaiian sugarcane.* A producer of sugarcane in Hawaii who is also a processor of sugarcane (referred to in this part as "processor") shall have paid, or contracted to pay, for sugarcane of the 1955 crop grown by other producers and processed by him in accordance with the following requirements:

(a) *Purchase agreements.* The price for sugarcane shall be not less than that provided in sugarcane purchase agreements between the processor and producers which were effective for the 1954 crop or as otherwise specified in the price determination applicable to that crop; except, that the price for sugarcane under independent grower purchase agreements negotiated by the Hutchinson Sugar Plantation Company for the 1955 crop shall be not less than that provided in such agreements; that the price for sugarcane processed by Olaa Sugar Company harvested under unusual conditions resulting from earthquake or volcanic actions, may be as agreed upon between the processor and producer, and this processor may charge producers for total overhead costs on labor, services, or materials furnished by him on the basis of agreements as may be negotiated between the parties, and in the event the parties are unable to agree as to the price for such sugarcane or as to any charge, either party may request the Director of the Sugar Division, Commodity Stabilization Service, U. S. Department of Agriculture, Washington 25, D. C., to determine the appropriate price or charge and his decision shall be final insofar as payments under the act are concerned.

(b) *Toll agreements.* The rate for sugarcane processed under toll agreements shall be not less than that provided in the agreements between the processor and producers which were effective for the 1954 crop.

(c) *Reporting requirements.* If a purchase agreement provides that payment for sugarcane is to be based on net returns, the processor shall submit for approval to the Hawaiian Area Agricultural Stabilization and Conservation Office, Honolulu, Hawaii (referred to in this part as "Area Office") a certified statement of the average gross proceeds realized from the sale of sugar and molasses and deductible selling and delivery expenses actually incurred. Such expenses shall be limited to those items specifically enumerated by the processor and approved by the Director of the Area office for the 1954 crop: *Provided, however,* That if the processor actually incurs additional selling and delivery expenses because of conditions which the Director of the Area Office determines justify the incurrence of such expenses under the circumstances, such expenses also shall be deductible.

(d) *Subterfuge.* The processor shall not reduce returns to the producer below those determined in this section through any subterfuge or device whatsoever.

STATEMENT OF BASIS AND CONSIDERATIONS

(a) *General.* The foregoing determination establishes fair and reasonable prices to be paid for sugarcane of the 1955 crop by a producer who processes sugarcane grown by other producers. It establishes the minimum requirements with respect to prices for sugarcane which must be met as one of the conditions for payment under the act.

(b) *Requirements of the act.* Section 301 (c) (2) of the act provides that the producer on the farm who is also, directly or indirectly, a processor of sugar beets or sugarcane, as may be determined by the Secretary, shall have paid, or contracted to pay under either purchase or toll agreements, for any sugar beets or sugarcane grown by other producers and processed by him at rates not less than those that may be determined by the Secretary to be fair and reasonable after investigation and due notice and opportunity for public hearing.

(c) *1955 price determination.* This determination provides generally that prices for sugarcane of the 1955 crop shall be not less than the prices payable under agreements effective for the 1954 crop or as otherwise specified in the determination applicable to that crop. The price for sugarcane provided in a new independent grower agreement negotiated with producers by Hutchinson Sugar Plantation Company has been adopted. It also provides that Olaa Sugar Company and producers may agree upon the price for sugarcane harvested and processed on a salvage basis and upon recovery of full costs for overhead charges.

At the public hearing a representative of the members of the Hawaiian Sugar Planters Association who purchase sugarcane from adherent planters and independent growers, made a general statement regarding sugarcane pricing problems which were common to all such processors. He asked that the recommendations to be made by representatives of the individual processors be adopted for the 1955 crop. He also recommended that consideration be given to the prices payable under cane purchase agreements as currently negotiated, that total returns be distributed on the basis of the relative costs of producing and processing sugarcane, and that returns be divided so that both parties would realize a profit. The witness also stated that with respect to independent grower agreements the processors should receive a fair profit on services and materials furnished to producers.

Most processor spokesmen testified that under present purchase agreements, producers receive more than a fair and reasonable return for sugarcane, but recommended that such agreements be effective for the 1955 crop. The representative of Hutchinson Sugar Plantation Company recommended the approval of the pricing provisions of a new independent grower agreement which had been negotiated with producers. The representative of Laupahoehoe Sugar Company recommended the approval of the price payable under the independent grower agreement which had been offered to planters in 1954. Several processor spokesmen also recommended that charges to producers for services and materials include a reasonable profit to the processor and that depreciation charges on equipment furnished to producers be based on replacement value instead of cost.

Representatives of producer associations opposed any reduction in prices payable for sugarcane as provided in existing purchase agreements. One group of producers recommended an increase in the price of sugarcane because of higher costs of labor, fertilizer, and raw sugar transportation costs. The latter is one of the marketing costs which

affect net returns upon which payments for sugarcane are based. Another group recommended that returns to producers under an independent grower agreement be no less than returns received under the adherent planter agreement. A third group called attention to the fact that arbitration of the pricing arrangements of the 1946 contract between adherent planters and four processors which began in 1951, had not been concluded and asked that the Department intervene to effect a prompt settlement.

An amendment to the cane purchase agreement applicable only to the 1954 crop was negotiated by producers and Olaa Sugar Company to recognize the transition from hand to mechanical harvesting of sugarcane. The processor representative recommended that this amendment be continued for the 1955 crop since the transition to mechanical harvesting of producer cane would require another year. This representative pointed out the problems encountered in processing mechanically harvested cane in 1954 which resulted in a less satisfactory operation than had been anticipated. He also stated that additional capital investment in equipment would be required to obtain a more efficient operation with respect to the 1955 crop. The producer representative recommended that the amendment be modified to reflect interest, amortized cost of land leveling, and road building which would be required in adapting their lands to mechanical harvesting equipment. This spokesman pointed out that a revision of the cane purchase agreement was desirable to reflect normal costs of production and processing under machine harvesting methods and to change the point of delivery for sugarcane. Although additional negotiations were carried on between the parties subsequent to the hearing, no agreement for the purchase of sugarcane was reached.

Consideration has been given to recommendations made at the public hearing, to the results of studies and investigations of the economic position of producers and processors and to other pertinent factors. Analysis of the returns, costs, and profits of producing and processing sugarcane obtained by survey in 1953 and restated in terms of prospective price and production conditions for the 1955 crop indicates that producers will receive on the average a favorable share of returns in relation to their costs of production. Under these conditions, the prices provided in the negotiated agreements or as otherwise specified in this determination, are deemed to be fair and reasonable.

The recommendations of processors that replacement value rather than cost be used in computing depreciation charges to producers and that a profit be charged by processors for services and materials furnished to producers have not been adopted. Under current agreements processors may charge producers for direct costs of services and materials furnished and related overhead costs which include interest. Each processor representative stated that there would be no change in 1955 in the elements of overhead expenses charged to producers.

The recommendation that the Department intervene in the arbitration of the 1946 adherent planter agreements with certain processors has not been adopted because this is deemed to be a matter entirely within the jurisdiction of the parties to the agreement. This determination continues the pricing arrangement as provided in the previous determination for the processors involved.

An independent grower agreement was submitted by a representative of the Hutchinson Sugar Plantation Company. This agreement was negotiated with adherent planters and provides that producers will receive 61 percent of the net returns from the sugar manufactured from their sugarcane. Analysis of the agreement indicates that the pricing provisions will result in a fair and reasonable division of the net returns.

A representative of the Laupahoehoe Sugar Company submitted an independent grower agreement, the pricing provisions of which had not been negotiated with producers. The processor representative recommended a pricing factor of $1.16 per ton of sugarcane for each 1 cent of the net returns from sugar and molasses. There appears to be no basis for changing the pricing factor of $1.20 which was specified in the 1954 price determination. In establishing that pricing factor, recognition was given to the level of pricing factors negotiated by other processors and producers and to other pertinent factors. The recommendation of the producer group for the same level of returns under the independent grower agreement as they received under the adherent planter agreement has not been adopted because such recommendation does not recognize the significant changes which have occurred in the distribution of costs between producers and processors during recent years.

The Olaa Sugar Company and independent growers negotiated a temporary amendment to the cane purchase agreement applicable to the 1954 crop. That amendment provided for a charge of $2.87 per ton for mechanically harvesting producers' sugarcane and it tended to equalize hand and mechanical harvesting costs among all producers. It was recognized that the actual cost of mechanical harvesting would be less than the charge to the producer, but it was also recognized that there would be increased cost to the processor because of the large capital investment for equipment, as well as increased milling cost. It was contemplated that this charge would be effective only for the 1954 crop, and that thereafter it would be reduced so that producers and the processor would participate in the economies resulting from this operation. However, only a small quantity of producers' sugarcane was mechanically harvested in 1954 because unexpected difficulties developed in cleaning and processing mechanically harvested sugarcane. It is understood that the conversion to mechanical harvesting of producers' sugarcane will be continued during 1955 and that the processor will need to make additional capital investment for equipment. Recently a field investigation was conducted with respect to this processor's operation for 1954. A detailed analysis indicates that substantial losses were sustained by the processor in converting to mechanical harvesting methods, primarily because of difficulties encountered in milling mechanically harvested sugarcane which contains additional foreign matter. It is anticipated that these operations will improve in 1955, although the degree of improvement cannot be accurately forecast. Furthermore, recent volcanic eruptions have destroyed or damaged large areas planted to sugarcane and the harvesting of sugarcane in other areas has been seriously impaired. The extent to which such sugarcane may have to be harvested and processed on a salvage basis cannot be determined. This determination continues the pricing arrangements as provided for in the independent grower agreement, as amended, applicable to the 1954 crop. However, it also provides the flexibility needed to meet situations as they may arise by permitting the processor and producers to agree on the price for sugarcane harvested under unusual conditions. Analysis of available data disclosed that producers generally were in a more favorable position with respect to the 1954 operations than was this processor. Provision has been made for this processor to recover from producers full overhead charges for labor, services, or materials furnished by him through agreement with producers even though he may not have recovered all of such charges heretofore. Upon failure of the parties to agree with respect to the price for sugarcane or any overhead charge, the matter may be submitted to the Director of the Sugar Division for adjudication.

Accordingly, I hereby find and conclude that the foregoing price determination will effectuate the price provisions of the Sugar Act of 1948, as amended.

(Sec. 403, 61 Stat. 932; 7 U. S. C. 1153. Interprets or applies sec. 301, 61 Stat. 929; 7 U. S. C. 1131)

Issued this 14th day of April 1955.

[SEAL] TRUE D. MORSE,
Acting Secretary of Agriculture.

[F. R. Doc. 55-3204; Filed, Apr. 18, 1955; 8:53 a. m.]

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders), Department of Agriculture

[Lemon Reg. 584, Amdt. 1]

PART 953—LEMONS GROWN IN CALIFORNIA AND ARIZONA

LIMITATION OF SHIPMENTS

Findings. 1. Pursuant to the marketing agreement, as amended, and Order No. 53, as amended (7 CFR Part 953; 19 F. R. 7175), regulating the handling of lemons grown in the State of California or in the State of Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of the quantity of such lemons which may be handled, as hereinafter provided, will tend to effectuate the declared policy of the act.

2. It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice and engage in public rule-making procedure, and postpone the effective date of this amendment until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the Agricultural Marketing Agreement Act of 1937, as amended, is insufficient, and this amendment relieves restriction on the handling of lemons grown in the State of California or in the State of Arizona.

Order, as amended. The provisions in paragraph (b) (1) (ii) of § 953.691 (Lemon Regulation 584; 20 F. R. 2301) are hereby amended to read as follows:

(ii) District 2: 346 carloads.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: April 14, 1955.

[SEAL] FLOYD F. HEDLUND,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[F. R. Doc. 55-3200; Filed, Apr. 18, 1955; 8:52 a. m.]

TITLE 19—CUSTOMS DUTIES

Chapter I—Bureau of Customs, Department of the Treasury

[T. D. 53775]

PART 4—VESSELS IN FOREIGN AND DOMESTIC TRADES

ENTRY AND CLEARANCE OF VESSELS

Under the provisions of applicable laws and regulations, masters (or in their stead licensed deck officers or pursers) of vessels are required to make formal entry, to obtain clearance, and to secure permits to proceed at the customhouse incidental to certain voyages between American and foreign ports and, in some cases, between American ports. The masters or other authorized officers are thus made responsible for performance of the required acts, including execution of the necessary papers, and any such papers must be filed or produced at the customhouse, but it has been concluded that the personal appearance at the customhouse, as now generally required in all cases, need not be required. The following amendments to the Customs Regulations are accordingly promulgated in order to relieve the master or other authorized officer of the necessity of appearing in person at the customhouse to consummate the entry or clearance of his vessel in any case in which the requisite oaths, related documents, and other papers properly executed by the master or other authorized officer may be delivered by his personal representative without prejudice to the entry or clearance requirements. Nothing herein shall be deemed to relieve the master of any penalty or liability prescribed by statute relating to the entry or clearance of vessels (see 46 U. S. C. 91a).

1. Section 4.9 is amended by deleting the parenthetical matter at the end thereof and by inserting a new paragraph (e) to read as follows:

§ 4.9 *Formal entry.* * * *

(e) The master, licensed deck officer, or purser may appear in person at the customhouse to enter the vessel or the required oaths, related documents, and other papers properly executed by the master or other proper officer may be delivered at the customhouse by the vessel agent or other personal representative of the master.

(Secs. 434, 435, 46 Stat. 711, as amended, sec. 366, 58 Stat. 705; 19 U. S. C. 1434, 1435, 42 U. S. C. 269)

2. Section 4.61 (a) is amended to read as follows:

§ 4.61 *Requirements for clearance.* (a) Application for clearance for a vessel intending to depart for a foreign port shall be made orally by or on behalf of the master at the customhouse. The master, licensed deck officer, or purser may appear in person to clear the vessel or the required oaths, related documents, and other papers properly executed by the master or other proper officer may be delivered at the customhouse by the vessel agent or other personal representative of the master. Clearance shall be granted on customs Form 1378.

3. Section 4.81 is amended by deleting the parenthetical matter at the end thereof and by inserting a new paragraph (g) to read as follows:

§ 4.81 *Reports of arrivals and departures in coastwise trade.* * * *

(g) The master, licensed deck officer, or purser who enters or clears a vessel under the provisions of this section or of §§ 4.82, 4.84, 4.85, 4.87, 4.89, or 4.91 may appear in person at the customhouse for that purpose or the required oaths, related documents, and other papers properly executed by the master or other proper officer may be delivered at the customhouse by the vessel agent or other personal representative of the master.

(Secs. 433, 439, 442, 443, 444, 486, 46 Stat. 711, 712, as amended, 713, 725, as amended, R. S. 4132, as amended, R. S. 4311, as amended, R. S. 4367, 4368, sec. 27, 41 Stat. 999, as amended; 19 U. S. C. 1433, 1439, 1442, 1443, 1444, 1486, 46 U. S. C. 11, 251, 313, 314, 883)

(R. S. 161, 251, secs. 2, 3, 23 Stat. 118, as amended, 119, as amended, sec. 624, 46 Stat. 759; 5 U. S. C. 22, 19 U. S. C. 66, 1624, 46 U. S. C. 2, 3)

[SEAL] D. B. STRUBINGER,
Acting Commissioner of Customs.

Approved: April 12, 1955.

H. CHAPMAN ROSE,
Acting Secretary of the Treasury.

[F. R. Doc. 55-3192; Filed, Apr. 18, 1955; 8:51 a. m.]

TITLE 21—FOOD AND DRUGS

Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

PART 146a—CERTIFICATION OF PENICILLIN AND PENICILLIN-CONTAINING DRUGS

OPTIONAL ADDITION OF VITAMIN SUBSTANCES TO PENICILLIN TABLETS

By virtue of the authority vested in the Secretary of Health, Education, and Welfare by the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 507, 59 Stat. 463, as amended by 61 Stat. 11, 63 Stat. 409, 67 Stat. 389; sec. 701, 52 Stat. 1055; 21 U. S. C. 357, 371) and delegated to the Commissioner of Food and Drugs by the Secretary (20 F. R. 1996), the regulations for the certification of penicillin and penicillin-containing drugs (21 CFR, 1953 Supp., Part 146a; 19 F. R. 1141, 2140, 5985) are amended as indicated below.

1. In § 146a.27 *Penicillin tablets*, paragraph (a) *Standards of identity* * * * is amended by inserting in the first sentence, preceding the words "buffer substances", the words "vitamin substances,".

2. Section 146a.27 (c) (1) (vi) is changed to read as follows:

§ 146a.27 *Penicillin tablets.* * * *

(c) *Labeling.* * * *

(1) * * *

(vi) The statement "Expiration date _____," the blank being filled in, if crystalline penicillin, procaine penicillin, benzathine penicillin G, or crystalline penicillin O is not used, with the date that is 12 months; or if crystalline penicillin, procaine penicillin, benzathine penicillin G, or crystalline penicillin O is used, with the date that is 18 months (if it contains a vitamin substance), or 36 months (if it does not contain a vitamin substance) after the month during which the batch was certified, except that the blank may be filled in with the date that is 24 months or 36 months (if it contains a vitamin substance), or with the date that is 48 months or 60 months (if it does not contain a vitamin substance) after the month during which the batch was certified if the person who requests certification has submitted to the Commissioner results of tests and assays showing that after having been stored for such period of time such drug as prepared by him complies with the standards prescribed by paragraph (a) of this section: *Provided, however*, That such expiration date may be omitted from the immediate container if such immediate container is packaged in an individual wrapper or container.

(Sec. 701, 52 Stat. 1055, as amended; 21 U. S. C. 371. Interprets or applies sec. 507, 59 Stat. 463, as amended; 21 U. S. C. and Sup. 357)

Notice and public procedure are not necessary prerequisites to the promulgation of this order, and I so find, since it was drawn in collaboration with interested members of the affected industry and since it would be against public interest to delay providing for the amendments set forth above.

This order shall become effective upon publication in the FEDERAL REGISTER,

since both the public and the affected industry will benefit by the earliest effective date, and I so find.

Dated: April 13, 1955.

[SEAL] GEO. P. LARRICK,
Commissioner of Food and Drugs.

[F. R. Doc. 55-3169; Filed, Apr. 18, 1955; 8:45 a. m.]

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

Subchapter A—Civil Air Regulations

PART 41—CERTIFICATION AND OPERATION RULES FOR SCHEDULED AIR CARRIER OPERATIONS OUTSIDE THE CONTINENTAL LIMITS OF THE UNITED STATES

REVISION OF PART

Because of the number of outstanding amendments to Part 41, it has been decided to issue a revision of this part incorporating all amendments thereto in effect on April 15, 1955. Attention is also called to the following minor changes which have been made:

(1) Paragraph (e) of § 41.20 has been deleted.

(2) Paragraph (f) of § 41.20 has been redesignated as paragraph (e) and obsolete dates and references in subparagraphs (1), (2), and (3) have been deleted and the remaining references in these subparagraphs have been incorporated into paragraph (e).

(3) Provisos containing references to obsolete compliance dates have been deleted in §§ 41.24, 41.24a, 41.24b, 41.36, and 41.48 (c).

(4) Cross-references in § 41.25 (e) have been brought up to date.

(5) Section 41.26 has been changed to read substantially the same as Part 40. This involves no substantive change but incorporates dates in the regulations which are applicable at the present time.

(6) Provisos in effect during and immediately after World War II have been deleted from §§ 41.54 (d) and (e), 41.55 (c) and (d), and 41.56 (d).

(7) References to dates no longer applicable have been deleted in §§ 41.69, 41.73, and 41.74.

(8) All definitions in § 41.137 have been arranged alphabetically, without paragraph letters.

Since the changes effected by this revision are minor in nature and impose no additional burden on any person, notice and public procedure hereon are unnecessary and the revised part may be made effective on less than 30 days' notice.

In consideration of the foregoing, the Civil Aeronautics Board hereby revises Part 41 of the Civil Air Regulations (14 CFR Part 41, as amended) as attached hereto, effective on April 15, 1955.

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
Secretary.

AUTHORITY: §§ 41.0 to 41.137 issued under sec. 205, 52 Stat. 984; 49 U. S. C. 425. Interpret or apply secs. 601, 602, 604, 52 Stat. 1007, as amended, 1008, 1010; 49 U. S. C. 551, 552, 554.

CERTIFICATE

§ 41.0 *General.* The regulations in this part are prescribed for scheduled air transportation operations conducted by air carriers between a place in any State of the United States, or the District of Columbia, and any place in a Territory or possession of the United States; or between any place in a Territory or possession and a place in any other Territory or possession of the United States; or between places in a Territory or possession; or between any place in the United States and any place outside thereof; or between any two places outside the United States.

§ 41.1 *Issuance.* An air carrier operating certificate prescribing the type of operation, the routes over which such operation may be conducted, the airports which may be used, and such other specifications and restrictions as may be reasonably required in the interest of safety shall be issued by the Administrator to an applicant who demonstrates that he is capable of conducting the proposed operations in accordance with the applicable regulations specified in this part.

(a) *Alaskan air carriers.* Whenever, upon investigation, the Administrator finds that the general standards of safety required for air carrier operations within the Territory of Alaska require or permit a deviation from any specific requirement of this part for a particular operation or a class of operations for which an application for an air carrier operating certificate has been made, he may issue an air carrier operating certificate with appropriate changes, specifying therein the period during which such deviations may be permitted. The Administrator shall promptly notify the Board of any deviations included in the air carrier operating certificates and the reasons therefor.

§ 41.2 *Compliance.* All operations shall be conducted in accordance with the specifications of the air carrier operating certificate and the rules contained in this part.

§ 41.3 *Duration.* An air carrier operating certificate will continue in effect until canceled, suspended, or revoked, after which it shall be surrendered to any officer or employee of the Administrator upon request.

§ 41.4 *Display.* The air carrier operating certificate shall be available at the appropriate operations office for inspection by any authorized representative of the Administrator or Board.

§ 41.5 *Inspection.* An authorized representative of the Administrator shall be permitted at any time and place to make inspections or examinations to determine the operator's compliance with the appropriate requirements of the regulations in this subchapter and the Civil Aeronautics Act of 1938, as amended.

PASSENGER OPERATION RULES

ROUTE REQUIREMENTS

§ 41.10 *Airport spacing.* In the case of operations employing aircraft having two engines, airports adequate for the aircraft used shall be located so that the aircraft, when flying along the route, will at no time be at a greater distance therefrom than 45 minutes flying at normal cruising speed, except where the Administrator finds that because of the character of the terrain, the type of operation, and the performance of aircraft used adequate safety will be provided with airports spaced at greater distances.

§ 41.11 *Communications facilities.* A two-way ground-to-aircraft radio communications system shall be available at such points as are necessary to insure adequate communication between plane and ground over the entire route.

§ 41.12 *Weather reporting services.* Weather reporting services shall be available at such points along the route as are necessary to insure sufficient weather reports prepared from observations made and released by a source acceptable to the Administrator.

§ 41.13 *Navigational facilities*—(a) *Short distance operation.* Except in the case of a day contact operation where the characteristics of the terrain are such that navigation can be accomplished by reference to landmarks, each route shall be equipped with radio navigational facilities so located as to permit navigation by such facilities over the entire route. For instrument operation a facility shall be so located with respect to each scheduled stop and required alternate airport as to provide adequate means for making an instrument approach. In day instrument operation such a facility is not required at an alternate used only when the weather conditions are as good as or better than: broken clouds, ceiling 1,000 feet, visibility 2 miles, with conditions stable or improving.

(b) *Long distance operation.* Each route shall be equipped with radio navigational facilities so located as to permit the obtaining of reliable radio bearings when within 200 miles of any regular or approved alternate airport and a facility shall be so located with respect to each such airport as to provide adequate means for making an instrument approach: *Provided,* That the Administrator, at particular airports, may approve facilities which provide less coverage than that required in this section if he finds that adequate safety is provided.

§ 41.14 *Airport lighting facilities.* For night operation each scheduled stop and required alternate airport shall be equipped with adequate lighting facilities.

AIRCRAFT REQUIREMENTS

§ 41.20 *General.* (a) Aircraft shall be certificated and equipped in accordance with the airworthiness requirements of this subchapter applicable to the type of operation conducted.

(b) Airplanes not certificated under the transport category requirements shall have such characteristics as to permit safe operation over the routes on which such airplanes will be operated.

(c) Land aircraft operated over water beyond gliding distance from shore without the aid of power shall be equipped with retractable landing gear.

(d) Multiengine airplanes shall be so equipped that engine rotation may be promptly stopped during flight.

(e) Irrespective of the basis for certification, all aircraft possessing engine(s) rated at more than 600 h. p. (each) for maximum continuous operation shall comply with the following, except that, if the Administrator finds that in particular types of existing aircraft literal compliance with specific items of these requirements might be extremely difficult of accomplishment and that such compliance would not contribute materially to the objective sought, he may accept such measures of compliance as he finds will effectively accomplish the basic objectives of this part: Sections 4b.58, 4b.442, 4b.445, 4b.447, 4b.448 (b) and (c), 4b.478, 4b.484, 4b.503, 4b.516 through 4b.518, 4b.556, 4b.557, 4b.560, 4b.561, 4b.586, 4b.621 through 4b.624, 4b.651 through 4b.655, 4b.661 (a) and (c), and 4b.662 through 4b.676 of this subchapter.

NOTE: All references in this section to sections of Part 4b of this subchapter are those sections in effect on October 1, 1949 (14 F. R. 4102, July 16, 1949).

Instruments and Equipment

§ 41.21 *Radio equipment; short distance operation.* (a) For day contact operations over routes on which navigation can be accomplished by visual reference to landmarks, each aircraft shall be equipped with such radio facilities as are necessary to accomplish the following:

(1) Transmit communications and meteorological information to at least one ground station from any point on the route and transmit, from a distance of not less than 25 miles, to airport traffic control towers located at airports approved for the route;

(2) Receive communications at any point on the route;

(3) By either of two independent means, receive meteorological information at any point on the route and receive instructions from airport traffic control towers located at airports approved for the route.

If appropriate, one of the means provided for compliance with subparagraph (3) of this paragraph may be employed for compliance with subparagraph (2).

(b) For day contact operations over routes on which navigation cannot be accomplished by visual reference to landmarks and for night contact, day or night instrument operations, each aircraft shall be equipped with such radio facilities as are necessary to accomplish the following:

(1) Transmit communications and meteorological information to at least one ground station from any point on the route and transmit, from a distance of not less than 25 miles, to airport traffic control towers located at airports approved for the route;

(2) Receive communications at any point on the route;

(3) By either of two independent means, receive meteorological information at any point on the route and receive instructions from airport traffic

control towers located at airports approved for the route;

(4) By either of two independent means, satisfactorily receive radio navigational signals from any radio aid to navigation required by § 41.13 (a).

If appropriate, one of the means provided for compliance with subparagraph (3) of this paragraph may be employed for compliance with subparagraph (2) of this paragraph or the means provided for compliance with subparagraph (4) of this paragraph may be employed for compliance with subparagraph (3) of this paragraph.

§ 41.22 *Radio equipment; long distance operation.* Each aircraft shall be equipped with such radio facilities as are necessary to accomplish the following:

(a) By either of two independent means, transmit communications and meteorological information to at least one ground station from any point on the route and transmit, from a distance of not less than 25 miles, to airport traffic control towers located at airports approved for the route;

(b) By either of two independent means, receive communications at any point on the route;

(c) By either of two independent means, receive meteorological information at any point on the route and receive instructions from airport traffic control towers located at airports approved for the route;

(d) By either of two independent means, satisfactorily receive radio navigational signals from any radio aid to navigation required by § 41.13 (b).

If appropriate, equipment provided for compliance with paragraph (c) of this section may be employed for compliance with either paragraph (b) or this paragraph.

§ 41.23 *First-aid and emergency equipment.* Each aircraft shall be equipped with a conveniently accessible first-aid kit adequate for the type of operation involved. Aircraft scheduled over routes requiring flights for long distances over uninhabited terrain must carry such additional emergency equipment as the Administrator designates for the particular operation involved. All aircraft operated over water shall be equipped with life preservers or flotation devices readily available for each person aboard and with a Very pistol or equivalent signal equipment, except that this requirement will not apply when such operations consist only of landings, take-offs, or flights for short distances over water and the Administrator finds in each case that such equipment is not necessary. In addition, all aircraft operated for long distances over water shall be equipped with a sufficient number of life rafts to accommodate adequately all occupants and such additional emergency equipment as may be required by the Administrator.

§ 41.23a *Safety belts.* Aircraft shall have installed a safety belt for each occupant. Safety belts shall be of an approved type. In no case shall the rated strength of a safety belt be less than that corresponding with the ultimate load factors specified in the pertinent currently effective aircraft airworthiness parts of this subchapter, taking due account of the dimensional characteristics of the safety belt installation for the specific seat or berth arrangement. The webbing of safety belts shall be subject to periodic replacement as prescribed by the Administrator.

§ 41.24 *Supplemental oxygen.* Except where supplemental oxygen is provided in accordance with the requirements of § 41.24a, supplemental oxygen shall be furnished and used as set forth below. The amount of supplemental oxygen required for a particular operation to comply with the rules in this part shall be determined on the basis of flight altitudes and flight duration consistent with the operating procedures established for such operation and route. As used in the oxygen requirements hereinafter set forth, "altitude" shall mean the pressure altitude corresponding with the pressure in the cabin of the airplane, and "flight altitude" shall mean the altitude above sea level at which the airplane is operated.

(a) *Crew members.* (1) At altitudes above 10,000 feet to and including 12,000 feet oxygen shall be provided for, and used by, each member of the flight crew on flight deck duty, and provided for all other crew members, during the portion of the flight in excess of 30 minutes within this range of altitudes.

(2) At altitudes above 12,000 feet oxygen shall be provided for, and used by, each member of the flight crew on flight deck duty, and provided for all other crew members, during the entire flight time at such altitudes.

(b) *Passengers.* Each air carrier shall provide a supply of oxygen for passenger safety as approved by the Administrator in accordance with the following requirements:

(1) For flights of over 30-minute duration at altitudes above 8,000 feet to and including 14,000 feet a supply of oxygen sufficient to furnish oxygen for 30 minutes to 10 percent of the number of passengers carried shall be required.

(2) For flights at altitudes above 14,000 feet to and including 15,000 feet a supply of oxygen sufficient to provide oxygen for the duration of the flight at such altitudes for 30 percent of the number of passengers carried shall generally be considered adequate.

(3) For flights at altitudes above 15,000 feet a suply of oxygen sufficient to provide oxygen for each passenger carried during the entire flight at such altitudes shall be required.

§ 41.24a *Supplemental oxygen requirements for pressurized cabin airplanes.* When operating pressurized cabin airplanes, the air carrier shall so equip such airplanes as to permit compliance with the following requirements in the event of cabin pressurization failure.

(a) *Crew members.* When operating such airplanes at flight altitudes above 10,000 feet, the air carrier shall provide sufficient oxygen for all crew members for the duration of the flight at such altitudes: *Provided,* That not less than a two-hour supply of oxygen shall be provided for the flight crew members on flight deck duty. (The oxygen supply required by § 41.24c may be considered in determining the supplemental breathing supply required for flight crew members on flight deck duty in the event of cabin pressurization failure.)

(b) *Passengers.* When operating such airplanes at flight altitudes above 8,000 feet, the air carrier shall provide the following amount of oxygen:

(1) Where an airplane is not flown at a flight altitude of over 25,000 feet a supply of oxygen sufficient to furnish oxygen for 30 minutes to 10 percent of the number of passengers carried shall be considered adequate, if at any point along the route to be flown the airplane can safely descend to a flight altitude of 14,000 feet or less within 4 minutes.

(2) In the event that such airplane cannot descend to a flight altitude of 14,000 feet or less within 4 minutes, the following supply of oxygen shall be provided:

(i) For the duration of the flight in excess of 4 minutes at altitudes above 15,000 feet, a supply sufficient to comply with § 41.24 (b) (3);

(ii) For the duration of the flight at altitudes above 14,000 feet to and including 15,000 feet, a supply sufficient to comply with § 41.24 (b) (2); and

(iii) For flight at altitudes above 8,000 feet to and including 14,000 feet, a supply sufficient to furnish oxygen for 30 minutes to 10 percent of the number of passengers carried.

(3) Where an airplane is flown at an altitude above 25,000 feet sufficient oxygen shall be furnished in accordance with the following requirements to permit the airplane to descend to an appropriate flight altitude at which the flight can be safely conducted. Sufficient oxygen shall be furnished to provide oxygen for 30 minutes to 10 percent of the number of passengers carried for the duration of the flight above 8,000 feet to and including 14,000 feet and to permit compliance with § 41.24 (b) (2) and (3) for flight above 14,000 feet.

(c) For purposes of this section it shall be assumed that the cabin pressurization failure will occur at a time during flight which is critical from the standpoint of oxygen need and that after such failure the airplane will descend, without exceeding its normal operating limitations, to altitudes permitting safe flight with respect to terrain clearance.

§ 41.24b *Equipment standards.* The oxygen apparatus, the minimum rates of oxygen flow, and the supply of oxygen necessary to comply with the requirements of § 41.24 shall meet the standards established in §§ 4b.831 and 4b.832 of this subchapter: *Provided,* That where full compliance with such standards is found by the Administrator to be impractical, he may authorize such changes in these standards as he finds will provide an equivalent level of safety.

NOTE: All references in this section to sections of Part 4b of this subchapter are those sections in effect on October 1, 1949 (14 F. R. 5307, Aug. 26, 1949).

§ 41.24c *Protective breathing equipment for the flight crew*—(a) *Pressurized cabin airplanes.* Each flight crew member on flight deck duty shall have easily available at his station protective breathing equipment covering the eyes, nose, and mouth, or the nose and mouth where accessory equipment is provided to protect the eyes, to protect him from the effects of smoke, carbon dioxide, and other harmful gases.

(1) Not less than a 300-liter STPD supply of oxygen for each flight crew member on flight deck duty shall be provided for this purpose.

(b) *Nonpressurized cabin airplanes.* The requirement stated in paragraph (a) of this section shall apply to nonpressurized cabin airplanes, if the Administrator finds that it is possible to obtain a dangerous concentration of smoke, carbon dioxide, or other harmful gases in the flight crew compartments in any attitude of flight which might occur when the aircraft is flown in accordance with either the normal or emergency procedures approved by the Administrator.

§ 41.25 *Instruments and equipment required for continuance of flight.* If any required instrument or item of equipment in an aircraft becomes unserviceable in flight, a landing must be made at either the nearest suitable landing area or at the next point of intended landing whichever, in the opinion of the pilot, is the safer procedure, unless the equipment specified in this section for the type of operation indicated is in serviceable condition, in which case the flight may continue as scheduled to the nearest point where repairs or replacements can be made.

The items listed in this section are required for all types of operation unless otherwise specified:

(a) One air-speed indicator and one sensitive type altimeter (contact operation); two air-speed indicators and two sensitive type altimeters (instrument operation),

(b) One approved compass,

(c) A tachometer for one engine, one fuel pressure gauge with warning indicator, one oil pressure gauge with warning indicator, and one oil temperature or cylinder temperature gauge for each engine,

(d) A manifold pressure gauge for one engine,

(e) In addition to fire detecting and fire extinguishing equipment necessitated as a result of compliance with § 41.20 (e), a minimum of two hand fire extinguishers of an approved type with an approved extinguishing agent, one of which installed in the crew compartment, others readily accessible to the passengers. Such additional hand fire extinguishers as the Administrator finds necessary for compliance with § 41.20 (e),

(f) One landing gear position indicator or equivalent facility, if equipment includes a retractable landing gear,

(g) One or more storage batteries or other source of electrical supply sufficient to operate all radio and electrical equipment necessary for the flight,

(h) (1) Two of the following three units of radio equipment:

(i) One transmitter for two-way communication,

(ii) One receiver for two-way communication,

(iii) One receiver capable of receiving navigational signals.

(2) In addition to the instruments named in subparagraph (1) of this paragraph, one of the radio navigational systems required by § 41.21 (b), if navigational facilities on the route are required by § 41.13,

(i) All radio equipment required by these regulations (night and instrument operation),

(j) Forward position and tail lights, two landing lights, one set of instrument lights, and two landing flares each rated for at least 3-minute duration (night operation),

(k) Fuel quantity indicators indicating the amount of fuel in each tank to be used for the remainder of the flight, or, in the case of aircraft having a third flight crew member assigned as a member of the operating crew, an alternate means approved by the Administrator for determining the amount of fuel in each tank (night and instrument operation),

(l) An electrically heated pitot tube serving each pilot's air-speed indicator (night and instrument operation),

(m) One gyro rate-of-turn indicator combined with a bank indicator, one artificial horizon indicator, and one gyro direction indicator (night and instrument operation),

(n) One outside air temperature gauge with indicating dial in the pilot compartment and one carburetor air temperature indicator or equivalent approved device (night and instrument operation),

(o) If vacuum system is used, one vacuum gauge with warning indicator on the instrument panel installed in lines leading to the rate-of-turn and artificial horizon indicators and the gyro direction indicator (night and instrument operation),

(p) One clock with sweep second hand (night and instrument operation),

(q) Three spare fuses of each capacity, or 25 percent of the number of each capacity, whichever is the greater,

(r) After May 31, 1956, an approved anti-collision light for aircraft having a maximum certificated weight of more than 12,500 pounds; except that in the event of failure of such light, the aircraft may continue flight to the next stop where repairs or replacements can be made (Night),

(s) Effective September 1, 1955, a means shall be provided for each reversible propeller on airplanes equipped with reversible propellers, which will indicate to the pilots when the propeller is in reverse pitch. Such means may be actuated at any point in the reversing cycle between the normal low pitch stop position and full reverse pitch. No indication shall be given at or above the normal low pitch stop position. The source of indication shall be actuated by the propeller blade angle or be directly responsive to the propeller blade angle.

Limitations

§ 41.26 *Airplane certification requirements*—(a) *Airplanes certificated on or before June 30, 1942.* Airplanes certificated as a basic type on or before June 30, 1942, shall either:

(1) Retain their present airworthiness certification status and meet the requirements of § 41.36, or

(2) Comply with either the performance requirements of §§ 4a.737–T through 4a.750–T of this subchapter or the performance requirements of §§ 4b.110 through 4b.125 of this subchapter and in addition shall meet the requirements of § 41.27: *Provided,* That should any type be so qualified, all airplanes of any one operator of the same or related types shall be similarly qualified and operated.

(b) *Airplanes certificated after June 30, 1942.* Airplanes certificated as a basic type after June 30, 1942, and used in passenger operation shall be certificated as transport category airplanes and shall meet the requirements of § 41.27.

§ 41.27 *Operating limitations upon airplanes certificated under transport category requirements.* When operating any airplane certificated in accordance with the provisions of Part 4b of this subchapter, or of §§ 4a.737–T through 4a.750–T of this subchapter, the provisions of §§ 41.28–41.35 shall apply unless deviations therefrom are specifically authorized by the Administrator when he finds that, due to a peculiarity of a specific case, such application is unnecessary for safety.

In determining compliance with these provisions the data obtained in testing the airplane for type certification may be applied, by interpolation or by computation of the effects of changes in specific variables, to conditions differing from those for which specific tests were made, where such interpolations or computations will give results substantially equalling in accuracy the results of a direct test.

§ 41.28 *General limitations.* (a) Airplanes shall be operated only from airports at altitudes within the altitude range for which maximum take-off weights have been determined and set forth in the airplane operating manual and shall be dispatched only to airports of intended destination, or to airports specified as alternates, which are at altitudes within the range for which maximum landing weights have been determined and set forth in the airplane operating manual.

(b) The weight of an airplane at take-off shall not exceed the certificated maximum take-off weight for the altitude of the airport from which the take-off is made.

(c) The weight at take-off shall be such that, allowing for the consumption of the amount of fuel and oil which would normally be consumed in flight to the intended destination, the weight on arrival at the destination will not exceed the certificated maximum landing weight for the altitude of the airport of intended destination.

(d) No airplane shall be taken off at a weight which exceeds the allowable weight for the runway being used as determined in accordance with the take-off

runway limitations of the transport category operating rules, after taking into account the temperature operating correction factors required by § 4a.749a–T or § 4b.117 of this subchapter, and set forth in the Airplane Flight Manual for the airplane.

§ 41.29 *Take-off limitations to provide for engine failure.* Take-off shall be made only from such airports, in such directions, and under such weight limitations that the following conditions are fulfilled as shown by the performance data determined under § 4a.747–T or § 4b.91 of this subchapter and set forth in the airplane operating manual:

(a) From any point on the take-off up to the time of attaining the critical-engine-failure speed set forth in the airplane operating manual it shall be possible to bring the airplane to a safe stop within the landing area, as shown by the accelerate-and-stop distance data.

(b) If the critical engine should fail at any instant after the airplane attains the critical-engine-failure speed, it shall be possible to proceed with the take-off and attain a height of 50 feet, as indicated by the take-off path data, before passing over the end of the take-off area. Thereafter it must be possible to clear all obstacles either by at least 50 feet vertically, as shown by the take-off path data, or by at least 200 feet horizontally within the airport boundaries and 300 feet horizontally after passing beyond such boundaries.

In determining the allowable deviation of the flight path in order to avoid obstacles, it is assumed that the airplane is not banked before reaching a height of 50 feet, as shown by the take-off path data, and that the maximum bank thereafter does not exceed 15°.

(c) In applying the requirements of paragraphs (a) and (b) of this section, corrections shall be made for any gradient of the take-off surface. To allow for wind effect, take-off data based on still air may be corrected by not more than 50 percent of the reported wind component along the take-off path if opposite to the direction of take-off, and shall be corrected by not less than 150 percent of the reported wind component if in the direction of take-off.

NOTE: All references in this section to sections of Part 4b of this subchapter are those sections in effect on October 1, 1949 (14 F. R. 4102, July 16, 1949).

§ 41.30 *En route limitations*—(a) *All airplanes; all engines operating.* Airplanes shall be dispatched only at such take-off weights that, in proceeding along the intended track with the weight of the airplane progressively reduced by the anticipated consumption of fuel and oil, the rate of climb with all engines operating (as set forth in the airplane operating manual), shall be, in feet per minute, 6 V_{s_0} at an altitude at least 1,000 feet above the elevation of the highest ground or obstruction within 10 miles of either side of the intended track; except that this requirement need not apply to airplanes certificated under the performance requirements of the regulations issued prior to November 9, 1945 (Part 4a of this subchapter).

(b) *All airplanes; one engine inoperative.* Airplanes shall be dispatched only at such take-off weights that, in proceeding along the intended track with the weight of the airplane progressively reduced by the anticipated consumption of fuel and oil, the rate of climb with one engine inoperative (as set forth in the Airplane Flight Manual) shall be, in feet per minute

$$\left(0.06-\frac{0.08}{N}\right)V_{s_0}{}^2,$$

where N is the number of engines installed and V_{s_0} is expressed in miles per hour, at an altitude at least 1,000 feet above the elevation of the highest ground or obstruction within 10 miles of either side of the intended track; except that for airplanes certificated under the performance requirements of Part 4a of this subchapter the above rate-of-climb value shall be 0.02 $V_{s_0}{}^2$ irrespective of the number of engines installed.

(c) *Airplanes with four or more engines; two engines inoperative.* The provisions of this paragraph shall apply only to airplanes certificated in accordance with the performance requirements of Part 4b of this subchapter. No airplane having four or more engines shall be flown along an intended track except under the conditions of either subparagraph (1) or subparagraph (2) of this paragraph.

(1) No place along the intended track shall be more than 90 minutes away from an available landing area at which a landing can be made in accordance with the requirements of § 41.34, assuming all engines to be operating at cruising power.

(2) The take-off weight shall not be greater than that which would permit the airplane, with the two critical engines inoperative, to have a rate of climb in feet per minute equal to 0.01 $V_{s_0}{}^2$ (V_{s_0} being expressed in miles per hour) along all points of the route, from the point where the two engines are assumed to fail simultaneously to the landing area, either at an altitude of 1,000 feet above the elevation of the highest ground or obstruction within 10 miles on either side of the intended track or at an altitude of 5,000 feet, whichever is higher. The point where the two engines are assumed to fail shall be that point along the route which is most critical with respect to the take-off weight. In showing compliance with this prescribed rate of climb, the following shall apply:

(i) It shall be permissible to consider that the weight of the airplane as it proceeds along its intended track is progressively reduced by normal consumption of fuel and oil with all engines operating up to the point where the two engines are assumed to fail and with two engines operating beyond that point.

(ii) Where the engines are assumed to fail at an altitude above the prescribed minimum altitude, compliance with the prescribed rate of climb at the prescribed minimum altitude need not be shown during the descent from the cruising altitude to an altitude at which the rate of descent becomes zero, if the latter is sufficiently above the prescribed minimum altitude to assure compliance with the prescribed rate of climb at the prescribed minimum altitudes during the subsequent portion of the flight.

(iii) If fuel jettisoning is provided, the airplane's weight at the point where the two engines are assumed to fail shall be considered to be not less than that which would include sufficient fuel to proceed to an available landing area at which a landing can be made in accordance with the requirements of § 41.34 and to arrive there at an altitude of at least 1,000 feet directly over the landing area.

(d) *Special air navigation facilities.* Where special air navigation facilities provide for reliable and accurate identification of high ground or obstruction extending for less than 20 miles along the track, the lateral distance of 10 miles specified in § 41.30 (a), (b), (c) may be reduced to 5 miles.

§ 41.33 *Landing distance limitations.* (a) An airplane shall be dispatched only under such conditions that it would be possible, as shown by the still-air landing data obtained in § 4b.122 of this subchapter, or § 4a.750–T of this subchapter and set forth in the airplane operating manual, at a weight corresponding to the maximum weight expected to exist at the time of arrival at the airport of intended destination, and under standard air conditions for the altitude of such airport, to bring the airplane to rest from a point 50 feet directly above the intersection of the obstruction clearance line (as defined in § 41.35) and the landing surface, within a total distance not in excess of 60 percent of the effective length of the landing area (as defined in § 41.35) most suitable for landing in still air.

(b) For every probable condition of wind velocity and direction and the corresponding landing direction at the airport of intended destination required either by the ground handling characteristics of the airplane type involved or by other conditions (e. g., landing aids, terrain, etc.) the ratio of landing distance to effective length of landing area shall not be greater than that as specified in paragraph (a) of this section, after allowing for the effect on landing path and roll of not more than 50 percent of the wind component along the landing path if opposite to the direction of landing, or not less than 150 percent of the wind component if in the direction of landing.

(c) If the requirement of paragraph (a) of this section can be met, but the requirement of paragraph (b) of this section cannot be fully met, at an airport of intended destination, a flight to such airport may be dispatched if at least one approved alternate airport is designated in the flight plan at which the requirements of paragraphs (a) and (b) of this section, as modified by § 41.34, are met.

§ 41.34 *Landing distance at alternate fields.* The conditions of § 41.35 will apply with respect to alternate airports specified in the flight plan, except that in the case of alternate airports the landing distance as defined in that section shall not exceed 70 percent of the effective length of the landing area.

§ 41.35 *Definition of effective length of landing area.* The effective length of the landing area is the distance from the point where the obstruction clearance line, as defined in this section, intersects the landing surface to the far end of the landing area.

The obstruction clearance line is a line drawn tangent to or clearing all obstructions showing in a profile of the approach area as defined in this section. The obstruction clearance line is further limited by having a slope to the horizontal of 1:20 as it approaches the landing area.

The approach area, as used in this section, shall be an area symmetrical about a center line coinciding with and prolonging the center line of the runway, except that where there is a multiplicity of parallel runways or a large area continuously available for landing, the center line of the approach area shall coincide with the most probable landing path for instrument approaches. The approach area shall be considered as extending longitudinally from the landing area out to the most remote obstacle touched by the obstruction clearance line, assuming the center line of the approach area in plan view to be straight for at least 1,500 feet from the intersection of the obstruction clearance line with the landing surface and thereafter continuing in a path consistent with the instrument approach procedures for the runway in question, or, where such procedures are not specified, consistent with turns of at least 4,000 feet in radius; and as extending laterally to a distance of 200 feet on either side of its center line at the point of intersection of the obstruction clearance line with the landing surface, with this distance increasing uniformly to 500 feet on either side of the center line of the area at a longtiudinal distance of 1,500 feet from the intersection of the obstruction clearance line with the landing surface, and maintaining a distance of 500 feet from the center line thereafter.

§ 41.36 *Nontransport category airplane operating limitations.* In operating any nontransport category airplane in passenger service, the provisions of §§ 41.36a through 41.36d shall be complied with, unless deviations therefrom are specifically authorized by the Administrator on the ground that the special circumstances of a particular case make a literal observance of the requirements unnecessary for safety. Performance data published or approved by the Administrator for each such nontransport category airplane shall be used in determining compliance with the provisions of §§ 41.36a through 41.36d.

§ 41.36a *Take-off limitations.* No take-off shall be made at a weight in excess of that which will permit the airplane to be brought to a safe stop within the effective length of the runway from any point during the take-off up to the time of attaining 105 percent of minimum control speed or 115 percent of the power-off stalling speed in the take-off configuration, whichever is the greater. In applying the requirements of this section:

(a) It may be assumed that take-off power is used on all engines during the acceleration;

(b) Account may be taken of not more than 50 percent of the reported wind component along the take-off path if opposite to the direction of take-off, and account shall be taken of not less than 150 percent of the reported wind component if in the direction of the take-off;

(c) Account shall be taken of the average runway gradient when the average gradient is greater than ½ percent. The average runway gradient is the difference between the elevations of the end points of the runway divided by the total length;

(d) It shall be assumed that the airplane is operating in the standard atmosphere.

§ 41.36b *En route limitations; one engine inoperative.* (a) No take-off shall be made at a weight in excess of that which will permit the airplane to climb at a rate of at least 50 feet per minute with the critical engine inoperative at an altitude of at least 1,000 feet above the elevation of the highest obstacle within 5 miles on either side of the intended track or at an altitude of 5,000 feet, whichever is the higher: *Provided*, That in the alternative an air carrier may utilize a procedure whereby the airplane is operated at an altitude such that, in event of an engine failure, the airplane can clear the obstacles within 5 miles on either side of the intended track by 1,000 feet, if the air carrier can demonstrate to the satisfaction of the Administrator that such a procedure can be used without impairing the safety of operation. If such a procedure is utilized, the rate of descent for the appropriate weight and altitude shall be assumed to be 50 feet per minute greater than indicated by the performance information published or approved by the Administrator. Before approving such a procedure, the Administrator shall take into account, for the particular route, route segment, or areas concerned, the reliability of wind and weather forecasting, the location and types of aids to navigation, the prevailing weather conditions, particularly the frequency and amount of turbulence normally encountered, terrain features, air traffic control problems, and all other operational factors which affect the safety of an operation utilizing such a procedure.

(b) In applying the requirements of paragraph (a) of this section, it shall be assumed that:

(1) The critical engine is inoperative;

(2) The propeller of the inoperative engine is in the minimum drag position;

(3) The wing flaps and landing gear are in the most favorable positions;

(4) The operative engine or engines are operating at the maximum continuous power available;

(5) The airplane is operating in the standard atmosphere;

(6) The weight of the airplane is progressively reduced by the weight of the anticipated consumption of fuel and oil.

§ 41.36c *Landing distance limitations; airport of intended destination.* No take-off shall be made at a weight in excess of that which, allowing for the anticipated weight reduction due to consumption of fuel and oil, will permit the airplane to be brought to a stop within 60 percent of the effective length of the most suitable runway at the airport of intended destination.

(a) This weight shall in no instance be greater than that permissible if the landing were to be made:

(1) On the runway with the greatest effective length in still air, and

(2) On the runway required by the probable wind, taking into account not more than 50 percent of the probable headwind component and not less than 150 percent of the probable tailwind component.

(b) In applying the requirements of this section it shall be assumed that:

(1) The airplane passes directly over the intersection of the obstruction clearance plane and the runway at a height of 50 feet in a steady gliding approach at a true indicated air speed of at least 1.3 V_{s_0};

(2) The landing is made in such a manner that it does not require any exceptional degree of skill on the part of the pilot;

(3) The airplane is operating in the standard atmosphere.

§ 41.36d *Landing distance limitations; alternate airports.* No airport shall be designated as an alternate airport in a dispatch release unless the airplane at the weight anticipated at the time of arrival at such airport can comply with the requirements of § 41.36c: *Provided*, That the airplane can be brought to rest within 70 percent of the effective length of the runway.

Maintenance

§ 41.38 *Maintenance organization.* The air carrier is responsible for the continuous airworthiness of all aircraft, engines, propellers, and appliances. Unless maintenance is performed by another agency under a contract approved by the Administrator, it is responsible for maintaining adequate maintenance facilities, the adequacy and competence of maintenance personnel, and for the preparation of such maintenance reports as are required by the Administrator.

§ 41.39 *Alterations and repairs.* Aircraft, engines, propellers, and appliances must be altered or repaired only in conformity with the procedures and, insofar as they apply, the methods provided for in Part 18 of this subchapter. Reports of such alterations or repairs must be submitted promptly to the Administrator.

§ 41.40 *Inspection.* The air carrier shall maintain an inspection organization which is responsible for determining that all maintenance conforms to at least the minimum standards prescribed by the Administrator as to workmanship, methods employed, and materials used. Each inspector must hold a valid mechanic certificate and rating for the type of inspection involved.

§ 41.41 *Maintenance manual.* The air carrier shall prepare and maintain a manual for the use and guidance of

maintenance personnel which contains full information pertaining to the repair and service of flight equipment and clearly outlines the responsibilities of maintenance personnel. It must be in a form approved by the Administrator and copies furnished to all persons designated by the Administrator or Board. All copies in the hands of designated company personnel must be kept up to date.

(a) *Changes.* The extension of any overhaul, check, or inspection period must have the written approval of the Administrator. Other changes in the maintenance manual may be made without the prior approval of the Administrator, if such changes are not inconsistent with any Federal regulation, the air carrier operating certificate, or safe maintenance practice.

§ 41.42 *Training program.* The air carrier must provide for the proper and periodic instruction of all maintenance personnel, particularly in connection with the introduction into service of new or unfamiliar equipment.

§ 41.43 *Records.* Current records shall be kept of the total time in service, the time since last overhaul, and the time since last inspection on all aircraft components, engines, propellers, and, where practicable, on instruments, equipment, and accessories, except that in the case of a propeller for which there is no previous operating history, the Administrator may authorize the use of a new record if the hub is rebuilt and is fitted with blades which are free from defects and within the manufacturer's production tolerances. Such rebuilding of the propeller shall be accomplished by the manufacturer or by a certificated repair station having the proper rating. The new record shall be signed by the manufacturer or by the repair agency, giving the date the propeller hub or blade was rebuilt and such other information as the Administrator may require.

§ 41.44 *Cockpit check list.* (a) The air carrier shall provide for each type aircraft a cockpit check list, approved by the Administrator, adapted to each operation in which the aircraft is to be utilized. An approved check list shall be installed in a readily accessible location in the cockpit of each aircraft and shall be appropriately used by the flight crew for each flight.

(b) The cockpit check list shall include procedures prior to starting engines, prior to take-off, prior to landing, and for powerplant emergencies.

§ 41.45 *Air-speed indicators, limitations, and related information.* (a) Air-speed limitations and related information contained in the Airplane Flight Manual and pertinent placards shall be expressed in the same units as used on the air-speed indicator.

(b) When more than one air-speed indicator is required, all such indicators shall be calibrated to read in the same units.

(c) When an air-speed indicator is calibrated in statute miles per hour, a readily usable means shall be provided for the flight crew to convert statute miles per hour to knots.

(d) On and after April 1, 1956, all air-speed indicators shall be calibrated in knots, and all air-speed limitations and related information contained in the Airplane Flight Manual and pertinent placards shall be expresed in knots.

AIRMAN RULES

Pilot

§ 41.48 *Certificate.* (a) Any pilot serving as pilot in command shall hold a valid airline transport pilot certificate and a rating for the aircraft in which he is to serve.

(b) Any pilot serving as second in command in an aircraft requiring two pilots shall hold at least a commercial pilot certificate and instrument rating and must have demonstrated to an air carrier inspector of the Administrator, or to an authorized check pilot of the air carrier, his ability to take off and land aircraft in which he is to serve.

(c) Any pilot serving as second in command in an aircraft requiring three or more pilots shall meet the requirements of paragraph (a) of this section.

(d) Any pilot serving in a pilot capacity other than as pilot in command or second in command shall meet the requirements of paragraph (b) of this section.

§ 41.49 *Number of pilots required.* The number of pilots required shall be sufficient to provide adequate safety. The type of aircraft used, the type of operation involved, and the duration of flights between points where flight crews are changed shall be the basis for making this determination.

§ 41.50 *Requirements for pilot route qualification.* The air carrier shall be responsible for insuring that each pilot is thoroughly qualified for the route over which he is to serve as pilot in command in scheduled air transportation. The qualifying procedure shall be established by the air carrier in the air carrier operations manual and shall include at least the following:

(a) A written or oral examination on:
(1) Weather conditions peculiar to the route,
(2) Navigational facilities,
(3) Instrument approach procedures,
(4) Communication procedures,
(5) Minimum safe flight levels,
(6) Position reporting points,
(7) Holding procedures, and
(8) All other traffic control procedures for the route.

(b) Familiarization with the terrain, obstructions, or congested areas and physical layout for the airport and approaches at each regular, provisional, refueling, and alternate airport approved for the route.

(c) Flying through the letdown procedures at each regular, provisional, or refueling airport specified for use on the trip to which the pilot is or is to be assigned. Such letdown procedures should be made under visual flight conditions whenever possible. Compliance with this paragraph will not be required, provided the pilot makes his first entry into an airport under visual flight rules or is accompanied by a check pilot.

(d) Demonstration of ability either under instrument flight rule conditions or on a synthetic instrument trainer to accomplish letdowns for all airports approved for the route.

(e) Making at least one round trip or two one-way trips over the route with one of the carrier's check pilots. When, in the opinion of the check pilot, the pilot is qualified for the route, the check pilot shall so certify to the carrier, and this certification shall be made a matter of record by the carrier. Compliance with this paragraph will not be required when qualifying over extensions to, or modifications of, an existing route, provided the pilot makes his first flight under visual flight rules or is accompanied by a check pilot.

§ 41.51 *Maintenance of pilot route qualification.* A pilot in command shall not serve as such over a particular route unless he has either:

(a) Made at least one one-way trip over the route as pilot in command or second in command within the preceding 12 calendar months, or

(b) After an absence from the route of more than 12 consecutive months, requalified in accordance with the appropriate provisions of § 41.50.

§ 41.52 *Maintenance of pilot technique.* If within any 90-day period a pilot in command or second in command has not made at least three take-offs and landings in aircraft of a particular type, such person shall not thereafter serve as a pilot in command or second in command in aircraft of that type in scheduled air transportation without having made at least three take-offs and landings in such aircraft with not less than one-half the maximum useful load. If he is to serve in air transportation at night at least one of the three take-offs and landings specified by this section must have been made at night.

§ 41.53 *Periodic flight checks and instruction.* Each air carrier must provide a sufficient number of check pilots to insure that each pilot in command employed continues to meet the minimum requirements both with regard to route competency and technique. Each of these checks must be accomplished twice each year at intervals of not less than four months. Periodic instruction must be given all pilots. In the case of pilots in command, instruction must include the obtaining of optimum performance under simulated maximum authorized weight conditions with one engine inoperative and instrument approach procedures and landings under the same conditions in the type aircraft in which such pilots serve in scheduled air transportation. In the case of all pilots other than pilots in command, instruction must include familiarization with the operations manual, with the types of equipment used, and with the duties of a second in command.

§ 41.54 *Flight time limitations for aircraft having a crew of one or two pilots.* (a) A pilot may be scheduled to fly 8 hours or less during any 24 consecutive hours without a rest period during such 8 hours. If a pilot is scheduled to fly in excess of 8 hours during any 24 consecutive hours, he shall be given an intervening rest period at or before the termination of 8 scheduled hours of flight duty. Such rest period must equal at least twice the number of hours flown since the last preceding rest period and in no case will such rest period be less than 8 hours. During such rest period the pilot must be relieved of all duty with the air carrier.

(b) When a pilot has flown in excess of 8 hours during any 24 consecutive hours he must receive at least 18 hours of rest before being assigned any duty with the air carrier.

(c) A pilot shall not fly in excess of 32 hours during any 7 consecutive days. Relief from all duty for not less than 24 consecutive hours must be provided for and given to a pilot at least once during any 7 consecutive days.

(d) A pilot shall not fly as a member of the crew more than 100 hours during any one month.

(e) A pilot shall not fly as a member of the crew more than 1,000 hours in any 12-month period.

§ 41.55 *Flight time limitations for aircraft having two pilots and one additional flight crew member.* (a) A pilot may not be scheduled to fly a total of more than 12 hours during any 24 consecutive hours.

(b) When a pilot has flown 20 hours or more during any 48 consecutive hours, or 24 hours or more during any 72 consecutive hours, he must receive at least 18 hours of rest before being assigned to any duty with the air carrier. In any case each pilot shall be relieved from all duty for not less than 24 consecutive hours during any 7 consecutive days.

(c) A pilot shall not fly as a member of the flight crew more than 120 hours in any 30 consecutive days or 300 hours in any 90 consecutive days.

(d) A pilot shall not fly as a member of the flight crew more than 1,000 hours in any 12-month period.

NOTE: Interpretation 1, 14 F. R. 1409, March 30, 1949, provides as follows:

Minimum crew complement; flight radio operators. We have been asked for an interpretation of the effect of Civil Air Regulations Amendment 41–1, dated October 5, 1948, on the minimum number of flight radio operators required on a scheduled flight of over 12 hours from airport to airport, where radiotelegraphy is necessary for communication with ground stations over a route segment of the flight which is less than 12 hours in length.

Section 41.70 of the Civil Air Regulations provides that, "when one flight radio operator is required the flight-time limitations prescribed in § 41.55 apply. When two or more flight radio operators are required, the flight-time limitations of § 41.56 apply." Section 41.55 states that where a crew consists of two pilots and an additional flight crew member, a "pilot may not be scheduled to fly more than 12 hours during any 24 consecutive hours." Since aircraft with which the regulation is concerned require two pilots at the controls at practically all times, the phrase "scheduled to fly" as used in this section does not necessitate precise definition with respect to the flight time of pilots since they are on duty throughout the flight. However, the expression is ambiguous when applied to radio operators whose duty watch, from a safety standpoint, need not in all instances be continuous from airport to airport while the aircraft is in the air. As applied to such airmen the term "to fly" when used as part of the phrase "scheduled to fly," may be interpreted in two possible ways—it may mean the entire time the aircraft is in the air, or it may mean the time the radio operator is on flight duty on the aircraft.

In dealing with this problem it is necessary to bear in mind that the Board's power over maximum hours of service of airmen derives from section 601 (a) of the Civil Aeronautics Act and relates solely to promoting safety of flight in air commerce. It is evident that the Board does not consider that an airman's being in the air for more than 12 hours creates a hazardous condition in and of itself, for exactly such a situation is contemplated in § 41.56 with respect to pilots. In effect, what is required by that section is that when the flight is to be of more than 12 hours' duration, provision be made for a relief pilot to permit the captain and first officer to be relieved from time to time of the strain of a continuous flight watch. The same principle is applicable to radio operators. Where the radio operator's flight watch is scheduled for more than 12 hours in a given 24, it is apparent that a second operator must be carried to relieve the first. However, what is essential is that after 12 hours of duty the radio operator be relieved, not that he be relieved by another operator, and consequently, if such relief is afforded by reason of the fact that the radio operator's services are not required for the operation of the aircraft for more than 12 hours, the same safety standard would appear to have been met.

Prior to the adoption of Amendment 41–1 on October 5, 1948, which specifically defined what was intended by "route segment," it may not have been clear in all cases when a radio operator was required to be on flight duty under the regulation. However, since the adoption of the definition of "route segment," the Administrator is permitted to specify the exact limits of a route segment, which may be considerably more confined than the route between the airports of take-off and landing for the flight. Thus, under the regulations, the time scheduled over the route segment or segments for which the Administrator has determined radio telegraphy is necessary represents the minimum on-duty time for which a flight radio operator is required. If the air carrier desires to maintain a radio flight watch beyond the minimum time thus prescribed or to utilize the services of the airmen in some other certificated capacity on the flight, of course, the time so spent must be included as part of the airman's on-duty flight time.

Accordingly, we interpret "scheduled to fly" as used in § 41.55 and as applied to radio operators as meaning "scheduled for flight duty on the aircraft." Thus, only one flight radio operator is required on a scheduled flight over 12 hours from airport to airport where such operator is only required or assigned for duty as an airman over a route segment which is less than 12 hours in length.

§ 41.56 *Flight time limitations for aircraft having three or more pilots and an additional flight crew member.* (a) Flight hours shall be scheduled in such a manner as to provide for adequate rest periods on the ground while the pilot is away from his base. Adequate sleeping quarters on the aircraft must be provided in all cases where a pilot is scheduled to fly more than 12 hours during any 24 consecutive hours.

(b) A pilot, upon return to his base from any flight or series of flights, shall receive a rest period of not less than twice the total number of hours flown since the last rest period at his base and during such period will not be required to perform any duty for the company. When the required rest period exceeds 7 days, that portion of the rest period in excess of 7 days may be given at any time before the pilot is again scheduled for flight duty on any route.

(c) A pilot shall not fly as a member of the flight crew more than 350 hours in any 90 consecutive days.

(d) A pilot shall not fly as a member of the flight crew more than 1,000 hours in any 12-month period.

§ 41.57 *Flight time limitations for pilots not regularly assigned.* A pilot not regularly assigned as a flight crew member for an entire month under the provisions of § 41.55 or § 41.56 must not fly in excess of 100 hours in any 30 consecutive days.

§ 41.58 *Deadhead transportation.* The time spent in deadhead transportation to or from duty assignment will not be considered a part of any rest period.

§ 41.59 *Other commercial flying.* A pilot shall not do other commercial flying while employed by an air carrier when such flying, in addition to that in scheduled air transportation service, will exceed any flight time limitations specified herein.

§ 41.60 *Logging flight time.* (a) A pilot in command may log the total flight time elapsing during his command of the aircraft.

(b) A second in command holding an airline transport pilot certificate and rating for the aircraft flown may log the total time during which he serves as second in command.

(c) A second in command not holding an airline transport pilot certificate and rating for the aircraft flown may log 50 percent of the total flight time.

(d) Additional pilots when required, and serving as such, may log 50 percent of the total flight time.

§ 41.61 *Logging instrument flight time.* Instrument flight time may be logged as such by the pilot actually manipulating the controls only when the aircraft is flown solely by reference to instruments either under actual or properly simulated flight conditions.

§ 41.62 *Pilots at controls.* In the case of aircraft requiring two or more pilots, two pilots shall remain at the controls at all times while the aircraft is taking off, landing, and while en route, except when the absence of one is necessary in connection with his regular duties or when he is replaced by a person authorized under the provisions of § 41.121.

§ 41.63 *Pilot in command rules*—(a) *Pilot in command.* The pilot in command is in command of the aircraft at all times during flight and is responsible for the safety of persons and goods carried and for the conduct and safety of members of the crew.

(b) *Emergency decisions.* (1) The pilot in command is authorized to follow any course of action which appears necessary in emergency situations which, in the interest of safety, require immediate decision and action. He may, in such

situations, deviate from prescribed methods, procedures, or minimums to the extent required by considerations of safety. When such emergency authority is exercised the pilot shall keep the proper control station fully informed regarding the progress of the flight. He shall submit a written report of any such deviation to the Administrator of Civil Aeronautics within 7 days after the completion of the trip.

(2) In an emergency requiring either the dumping of fuel or a landing at a weight in excess of the authorized landing weight the pilot in command may elect to follow whichever procedure he considers safer.

(c) *Flight equipment.* Before any flight is started the pilot in command shall have readily available in the aircraft appropriate and current flight and navigational facility maps, including instrument procedures when instrument flight is authorized, and such other equipment as may be necessary to properly conduct the proposed flight.

§ 41.64 *Compliance with foreign air traffic rules and local airport rules.* Pilots flying in the airspace of any foreign country shall, at all times, comply with the air traffic rules of the foreign government and with local airport rules, except where any rule prescribed in this part is more restrictive and may be followed without violating the laws or rules of such country.

§ 41.65 *Composition of flight crew.* (a) No air carrier shall operate an aircraft with less than the minimum flight crew required for the type of operation and the type aircraft as determined by the Administrator in accordance with the standards prescribed in this part and specified in the air carrier operating certificate for each route or route segment.

(b) Where the provisions of this part require for a particular route, route segment, or aircraft the performance of two or more functions for which an airman certificate is necessary, such requirement shall not be satisfied by the performance of multiple functions at the same time by any airman over such route or route segment.

Flight Radio Operator

§ 41.68 *Flight radio operator; when required.* An airman holding a flight radio operator certificate shall be required for flight over any area, route, or route segment over which the Administrator has determined that radiotelegraphy is necessary for communication with ground stations during flight.

§ 41.69 *Certificate.* Each flight radio operator shall hold a valid flight radio operator certificate issued in accordance with the provisions of Part 33 of this subchapter.

§ 41.70 *Flight time limitations.* When one flight radio operator is required the flight time limitations prescribed in § 41.55 apply. When two or more flight radio operators are required the flight time limitations of § 41.56 apply.

§ 41.71 *Other flight crew members to be qualified.* In all flights requiring only one flight radio operator, one other flight crew member must be capable of operating the equipment in an emergency.

§ 41.72 *Qualification for duty.* No individual shall perform, or be assigned to peform, the duties of a flight radio operator unless he has met the recent experience requirements specified in Part 33 of this subchapter.

Flight Engineer

§ 41.73 *Flight engineer; when required.* An airman holding a flight engineer certificate shall be required on all four-engine aircraft certificated for more than 80,000 pounds maximum take-off weight, and on all other four-engine aircraft certificated for more than 30,000 pounds maximum take-off weight where the Administrator finds that the design of the aircraft used or the type of operation is such as to require a flight engineer for the safe operation of the aircraft.

§ 41.74 *Certificate.* Each flight engineer shall hold a valid flight engineer certificate issued in accordance with the provisions of Part 35 of this subchapter.

§ 41.75 *Qualification for duty.* A certificated flight engineer shall not be assigned to nor perform duties for which he is required to be certificated unless, within the preceding 12-month period, he has had at least 50 hours of experience as a flight engineer on the type aircraft on which he is to serve; or until the air carrier has checked the airman and determined that he is (a) familiar with all current informaion and operating procedures relating to the type aircraft to which he is to be assigned and (b) competent with respect to such aircraft.

§ 41.76 *Flight time limitations.* When one flight engineer is required, the flight time limitations prescribed in § 41.55 apply. When two or more flight engineers are required, the flight time limitations prescribed in § 41.56 apply.

§ 41.77 *Other flight crew members to be qualified.* In all flights requiring the use of only one flight engineer, one other flight crew member must be capable of performing the duties of such engineer in an emergency during flight.

Flight Navigator

§ 41.80 *Flight navigator; when required.* An airman holding a flight navigator certificate shall be required for flight over any area, route, or route segment when the Administrator has determined either that celestial navigation is necessary or that other specialized means of navigation necessary for the safe conduct of flight cannot be adequately accomplished from the pilot station.

§ 41.81 *Flight time limitations.* The flight time limitations prescribed in § 41.56 apply.

§ 41.82 *Qualification for duty.* A certificated flight navigator shall not be assigned to nor perform duties for which he is required to be certificated unless, within the preceding 12-month period, he has had at least 50 hours' experience as a flight navigator; or until the air carrier has checked the airman and determined that he is (a) familiar with all current navigational information pertaining to the routes to be flown and (b) competent with respect to the operating procedures and navigational equipment to be used.

Dispatcher

§ 41.84 *Number and location.* The air carrier shall provide an adequate number of certificated aircraft dispatchers located at such points as may be necessary to insure safe operations.

§ 41.85 *Certificate.* Each dispatcher shall hold a valid aircraft dispatcher certificate issued in accordance with the provisions of Part 27 of this subchapter.

§ 41.86 *Qualification for route.* Each dispatcher within 6 months immediately preceding his qualification for a route, or part thereof, shall have made at least one trip over the route on which he is to serve prior to dispatching any aircraft. In addition he must be familiar with:

(a) The contents of the air carrier operations manual;

(b) The radio facilities in the aircraft used; and

(c) With respect to the route, the following:

(1) The prevailing weather phenomena,

(2) The sources of weather information available,

(3) All phases of the air carrier operation,

(4) The maximum authorized loads for the aircraft used,

(5) The peculiarities and limitations of each radio navigational facility and similar information with regard to such additional facilities located off the route as are approved for use in obtaining fixes by means of cross bearings, and

(6) The effect of weather conditions on the radio reception of the aircraft used.

§ 41.87 *Maintenance of qualification.* Each dispatcher shall maintain his familiarity with the route or routes on which he dispatches aircraft.

§ 41.88 *Route qualification expiration.* After 24 consecutive months of absence from dispatching duty over a route or part thereof, a dispatcher will no longer be considered qualified to dispatch aircraft over such route.

FLIGHT OPERATION RULES

Dispatching Rules

§ 41.92 *Dispatching rules*—(a) *Short distance operation.* Flights may be dispatched over any approved route between two terminal points.

(b) *Long distance operation.* Flights may be dispatched over any track between two terminal points within the route approved by the Administrator for the operation.

§ 41.93 *Dispatching authorization.* Flights shall be started only on the authority of an aircraft dispatcher qualified for the route. In short distance operation this authority is not required at intermediate points specified in the original clearance unless the flight is delayed more than 30 minutes at any such point. In long distance operation redispatch is not required unless the flight is delayed more than 6 hours.

§ 41.94 *Dispatcher duty period.* A dispatcher may clear a flight only when he has been on duty at the station from which the clearance is effected for a period of time sufficient to become familiar with existing conditions. He must continue on duty until the aircraft has landed in completion of a trip, or has proceeded beyond his jurisdiction, or until he has been properly relieved by another qualified dispatcher.

§ 41.95 *Use of weather reports and forecasts in dispatch.* (a) Weather reports used to control flight movements shall be prepared from observations made and released by a source acceptable to the Administrator.

(b) Weather reports used shall be the latest reports available. Weather reports, other than off-course or on-call reports made a part of the clearance form, shall not be more than one hour and 30 minutes old at the time the aircraft departs.

(c) Weather forecasts made by the United States Weather Bureau, in the case of dispatch from points within the United States, or other sources acceptable to the Administrator, in the case of dispatch from points outside of the United States, shall be taken into account.

§ 41.96 *Weather minimums*—(a) *Dispatch under contact flight rules, short distance operations.* Aircraft may be dispatched only if current weather reports and forecasts show a trend indicating that the ceilings and visibilities along the route to be flown are, and will remain, at or above the minimums required for flight under contact flight rules until the flight arrives at the next point of intended landing specified in the clearance.

(b) *Instrument or over-the-top dispatch, short distance operations.* Aircraft may be dispatched only if the observed weather information and current weather forecasts pertaining to the next point of intended landing specified in the clearance show a trend indicating that the ceiling and visibility will be at or above the minimums specified when the flight is scheduled to arrive; and at least one alternate airport, meeting the minimum weather requirements for the airport when used as an alternate, is designated in the clearance.

(c) *Dispatch, long distance operation.* Aircraft may be dispatched only in compliance with the following conditions:

(1) The current weather forecasts must indicate that the ceiling and visibility either at the next point of intended landing or at any required alternate therefor will be at or above the approved minimums at the time the flight is estimated to arrive.

(2) In the case of overwater flights or any other flight where the point of intended landing has no available alternate, the current weather forecasts must also indicate that the ceiling and visibility either at the point of departure or at any required alternate therefor will be above the approved minimums at the time of arrival back to such point from any point along the route closer than the point-of-no-return.

§ 41.97 *Icing conditions.* Aircraft shall not be dispatched or flown into known heavy icing conditions and may be dispatched or flown into any less serious icing condition only if the aircraft is equipped for de-icing wings, propellers, and such other parts of the aircraft as are essential to safety.

§ 41.98 *Fuel supply*—(a) *Short distance contact operation.* An aircraft may be dispatched or take off only if it carries sufficient fuel, considering the wind and other weather conditions expected, to (1) fly to the next point of landing specified in the clearance and thereafter (2) for a period of at least 45 minutes at normal cruising consumption.

(b) *Short distance instrument or over-the-top operation.* An aircraft may be dispatched or take off only if it carries sufficient fuel, considering the wind and other weather conditions expected, to fly to the next point of landing specified in the clearance; and thereafter (1) to fly to and land at the most distant alternate airport designated for that point in the clearance; and thereafter (2) to fly for a period of at least 45 minutes at normal cruising consumption.

(c) *Long distance operation.* An aircraft may be dispatched or take off only if it carries sufficient fuel, considering the wind and other weather conditions expected, to fly to the next point of landing specified in the clearance; and thereafter (1) to fly to and land at the most distant alternate airport designated for that point in the clearance; and thereafter (2) to fly for a period of at least two hours at normal cruising consumption. An aircraft may be redispatched to return to the point of departure or to an alternate airport for that point only when such redispatch is accomplished while the aircraft has sufficient fuel to return to such point and thereafter to fly for a period of at least two hours at normal cruising consumption. In the case of a route approved without an available alternate for a particular stop, an aircraft dispatched to that point must carry sufficient fuel, considering wind and other weather conditions expected, to fly to that point and thereafter for at least 3 hours at normal cruising consumption. The Administrator may require fuel in excess of any of the minimums specified in this paragraph when he finds that additional fuel is necessary on a particular route in the interest of safety and, in the case of an overland operation where adequate intermediate airports and navigational facilities are available, may permit the operation to be conducted with the fuel reserves specified in paragraph (b) of this section.

§ 41.99 *Maintenance release, clearance, and load manifest forms.* All maintenance release, clearance, and load manifest forms used shall be approved by the Administrator. The original copies of such forms shall be given to the pilot in command and duplicate copies kept in the station file for at least 90 days.

§ 41.100 *Preparation of maintenance release form.* A maintenance release form shall be prepared for each aircraft delivered by the maintenance department to the operations department. This form must be signed by personnel of the air carrier charged with the duty of supervising the maintenance of the aircraft.

§ 41.101 *Preparation of clearance form.* A clearance form shall be prepared for each flight between specified clearance points. The information for such clearance shall be prepared by the authorized aircraft dispatcher of the air carrier operating the aircraft. This form shall be signed by the pilot in command and by the authorized aircraft dispatcher only when both believe the flight may be made with safety. The authority to sign such clearance may be delegated for a particular flight by the authorized aircraft dispatcher, but the authority to dispatch cannot be delegated, and such dispatcher remains responsible for the dispatch and continued supervision of the flight.

§ 41.102 *Preparation of load manifest form.* A load manifest form showing the loading of the aircraft shall be prepared and signed for each flight by qualified personnel of the air carrier charged with the duty of supervising the loading of the aircraft and the preparation of the load manifest forms, or by qualified persons authorized by the air carrier. The aircraft when loaded shall not exceed the center of gravity limits or maximum allowable weight limits set forth in the aircraft certificate for the particular aircraft.

§ 41.103 *Traffic conditions.* Immediately prior to departure it is the responsibility of the dispatcher, dispatching an instrument flight outside of an airway traffic control area, to ascertain from the best available information what other flights affecting the proposed flight are in progress over the route and to report this information to the pilot in command.

§ 41.104 *Dispatcher emergency procedure.* In the event of inability to maintain two-way communication with the aircraft while it is in flight the dispatcher is responsible for notifying all other known traffic in the area of such failure, giving the last approved flight plan and the expected time of arrival at the destination.

§ 41.105 *Redispatch from alternate airports.* Aircraft may be redispatched from any alternate airport. In the case of an off-route alternate, the return to the authorized route must be made in accordance with conditions specified by the Administrator.

Flight Preparation and Take-Off Rules

§ 41.108 *Tests and checks.* Before departure the pilot in command is responsible for the testing or checking of each item in the check list approved by the Administrator, at the time and to the extent specified.

§ 41.109 *View of traffic.* The pilot shall maneuver the aircraft to a position from which incoming and outgoing

aircraft can be observed until immediately prior to take-off.

Flight Course and En Route Rules

§ 41.110 *Continuance of flight, short distance operation.* No flight shall be continued toward any point to which it is cleared unless the weather conditions at alternate airports specified in the clearance remain at or above the minimums specified for each such airport when used as an alternate.

§ 41.111 *Change in clearance en route.* The clearance may be amended en route by the substitution of another alternate airport within the fuel range of the aircraft, as outlined in § 41.98 (b), where weather conditions are at or above the minimums for such airport when used as an alternate. If a change in clearance is made while an aircraft is in flight, the two-way conversation shall be entered in the ground station radio log. After clearance for contact flight no aircraft shall be recleared en route for instrument flight, unless all instruments and items of equipment required by § 41.25 for the type of operation are in serviceable condition.

§ 41.112 *Deviation from route.* No aircraft may deviate from the route over which it is dispatched except when circumstances render such deviation necessary as a safety measure. Any deviation from the route must be explained by the pilot in a written report dispatched to the Administrator within 7 days after return to his base.

§ 41.113 *Reporting unusual conditions.* When an icing or other unusual meteorological condition is encountered in flight the pilot shall notify his company radio ground station as soon as practicable and such information shall be relayed to all flights which may be affected.

§ 41.114 *Flight altitude rules*—(a) *Day contact operation.* Except during take-offs and landings no aircraft shall be flown at an altitude less than 500 feet above the ground or water, or within 500 feet of any mountain, hill, or other obstruction to flight, except in such cases as may be specifically approved.

(b) *Night and instrument operation.* Except during take-offs and landings or when operating in accordance with specific procedures for definite localities approved by the Administrator, no aircraft shall be flown at an altitude of less than 1,000 feet above the highest obstacle located within a horizontal distance of 5 miles from the center of the course intended to be flown.

§ 41.115 *Communication failure.* In the event of inability to maintain two-way radio communication, the pilot in command shall observe one of the following procedures in the order listed:

(a) Proceed according to current flight plan, maintaining the minimum instrument altitude or the last acknowledged assigned altitude, whichever is higher, to the airport of intended landing and commence descent at approach time last authorized or, if not received and acknowledged, at the estimated time of arrival specified in the flight plan; or

(b) If weather conditions permit, proceed in accordance with contact flight rules; or

(c) Land as soon as practicable.

Instrument Approach and Landing Rules

§ 41.117 *Altitude on initial approach.* When making an initial approach to a radio station on instruments or on top of overcast, an aircraft shall not be operated below the initial approach altitude specified for such station until arrival over the station has been definitely established, except where a marker facility is available and a procedure for a straight-in approach is authorized.

§ 41.118 *Letting-down-through procedure.* When instrument operation is authorized the standard instrument approach procedure, or the one authorized by the control tower if more than one procedure is specified for the airport, must be used for letting-down-through. The procedures and minimum altitudes of flight specified shall be strictly observed.

§ 41.119 *Approach and landing limitations.* No instrument approach procedure shall be executed or landing made at an airport when the latest U. S. Weather Bureau weather report for that airport indicates the ceiling or visibility to be less than that prescribed by the Administrator for landing at such airport: *Provided,* That, if an instrument approach procedure is initiated when the current U. S. Weather Bureau report indicates that the prescribed ceiling and visibility minimums exist and a later weather report indicating below minimum conditions is received after the aircraft (a) is on an ILS final approach and has passed the outer marker, or (b) is on a final approach using a radio range station or comparable facility and has passed the appropriate facility and has reached the authorized landing minimum altitude, or (c) is on GCA final approach and has been turned over to the final approach controller, such approach may be continued and a landing may be made in the event weather conditions equal to or better than the prescribed minimums for the airport are found to exist by the pilot in command of the flight upon reaching the authorized landing minimum altitude.

MISCELLANEOUS OPERATIONS RULES

§ 41.120 *Operations manual.* (a) The air carrier shall prepare and maintain a manual for the use and guidance of operations personnel which contains full information necessary to guide flight and ground personnel in the conduct of flight operations and to inform such personnel regarding their duties and responsibilities. It must be in a form approved by the Administrator and furnished to all persons designated by the Administrator or Board. All copies in the hands of company personnel must be kept up to date.

(b) Any changes issued by the Administrator shall be promptly incorporated in the manual. Other changes not inconsistent with any Federal regulation, the air carrier operating certificate, or safe operating practice may be made without the prior approval of the Administrator.

§ 41.121 *Admission to pilot compartment.* (a) No person except a member of the operating crew or an air carrier inspector of the Administrator may be admitted to the pilot compartment during flight unless his admission is approved by the pilot in command after he has identified himself as one of the following:

(1) An employee of the Federal Government, of an air carrier, or other aeronautical enterprise whose duties are such that his presence in the compartment is necessary or advantageous to the conduct of safe air carrier operations or the improvement of the safety of such operations;

NOTE: Federal employees who deal responsibly with matters relating to air carrier safety and such air carrier employees as pilots, dispatchers, meteorologists, communication operators, and mechanics whose efficiency would be increased by familiarity with flight conditions in the pilot compartment may be considered eligible for admission to the pilot compartment under this requirement. Employees of traffic, sales, and other air carrier departments not directly related to flight operations cannot be considered eligible unless authorized under § 41.121 (a) (2).

(2) A person whose presence in such compartment has been specifically authorized by the management of the air carrier operating the aircraft and by the Administrator.

(b) No person may occupy a seat in the pilot compartment or the companionway thereto unless such seat is securely attached to the structure of the aircraft and is provided with a safety belt which shall be kept fastened by the occupant throughout his occupancy of such seat.

(c) Unless a seat is also available for his use in the passenger compartment, no person may be admitted to the pilot compartment during flight except:

(1) Air carrier inspectors engaged in checking flight operations; and

(2) Certificated airmen of the air carrier and certificated airmen of another air carrier who have been authorized by the air carrier concerned and the Administrator to make specific trips over the route.

(d) An air carrier inspector of the Administrator must be admitted to the pilot compartment of an air carrier aircraft at any time while performing his official duty.

§ 41.122 *Manipulation of controls.* No person other than a qualified pilot of the air carrier may manipulate the flight controls of an air carrier aircraft while in scheduled flight, except that at the discretion of the pilot in command such restriction will not apply to other pilots as follows:

(a) Authorized air carrier inspectors of the Administrator, or

(b) Properly qualified pilot personnel of another air carrier, if the pilot in command is at one set of controls.

§ 41.123 *Smoking rules.* No smoking will be permitted in an aircraft:

(a) While on the ground or water,

(b) During take-offs and landings,

(c) In the berths of sleeper planes, or

(d) Elsewhere, unless suitable ash containers are provided.

§ 41.124 *Passenger information signs.* Aircraft shall be equipped with the following signs so located as to be plainly visible to passengers:

(a) "No smoking" signs located in the cabin and in individual berths,

(b) "Fasten seat belt" signs located in cabin,

(c) "Use oxygen equipment" signs located in the cabin of aircraft not having pressurized cabins when operated at altitudes in excess of 12,000 feet above sea level for any period of time, unless a competent cabin attendant is provided to care for passengers.

§ 41.125 *Marking door handles.* The latched and unlatched positions of door handles shall be plainly marked.

§ 41.126 *Marking emergency exits.* Emergency exits shall be clearly marked as such with luminous paint in letters not less than three-fourths of an inch high, such markings to be located either on or immeditely adjacent to the pertinent exits and readily visible to passengers. The location and method of operation of the handles shall be marked with luminous paint.

§ 41.127 *Use of emergency equipment.* The emergency equipment required by § 41.23 must be periodically inspected and tested in accordance with specifications issued by the Administrator. The crew of aircraft used in overwater flights shall be drilled periodically in "abandon ship" procedures. Passengers shall be acquainted with the location of emergency exits, with emergency equipment provided for individual use, and with the procedure to be followed in the case of an emergency landing on the water.

§ 41.128 *Route operation proving flights.* Before passengers are carried on any new route or any extension of over 100 miles of a route previously authorized, the air carrier shall demonstrate ability to conduct a safe operation by making such flights over the route as the Administrator may require in the interest of safety.

§ 41.129 *Aircraft proving tests.* (a) A new type of air carrier aircraft shall have at least 100 hours of proving tests under the supervision of an authorized representative of the Administrator before authority for carying passengers is issued. At least 50 hours of such tests shall be flown over authorized routes and shall include at least 10 hours of night operation.

(b) In a case of major changes on aircraft previously proved, or the use of the same aircraft on a substantially different operation, 50 hours of tests similar to those outlined in paragraph (a) of this section shall be required, of which at least 25 hours shall be flown over authorized routes, unless deviations are specifically authorized by the Administrator on the ground that the special circumstances of a particular case make a literal observance of the requirements of this paragraph unnecessary for safety.

(c) During the tests specified in paragraphs (a) and (b) of this section no person shall be carried other than those essential to the tests. Mail, express, and cargo may be carried at the discretion of the Administrator.

§ 41.130 *Reports.* Each air carrier shall furnish the Administrator the following reports:

(a) A monthly operations report shall be submitted on and in accordance with the form supplied or approved by the Administrator for the purpose not later than the 20th day of the next succeeding month.

(b) A mechanical interruption report shall be submitted on the form supplied for the purpose not later than 10 days after the return of the aircraft to its operating base. Any partial or complete instrument or equipment mechanical failure which occurs during flight shall be reported. The records of such mechanical failure must be made available to any authorized representative of the Administrator or Board on request.

§ 41.131 *Irregularity report.* All airmen, including flight and ground personnel, shall immediately report to the operations manager any irregularity or hazard which in their opinion makes for unsafe operation. If such report is found to be justified, notice of the irregularity or hazard must be submitted to the Administrator at once.

§ 41.132 *Communiation priority.* Where a communications channel serves point-to-point contacts in addition to ground-to-plane, priority shall be given to plane-to-ground and ground-to-plane communications.

§ 41.133 *Flight records.* The air carrier shall maintain and make available to any authorized representative of the Administrator or Board, for not less than 1 year from the date of flight, the records pertaining to any flight which was interrupted because of weather conditions and failed to land at the point to which it was originally cleared. Such records shall include the flight plan, flight log, clearance, and any other data necessary to complete the record of the operation.

DEFINITIONS

§ 41.137 *Definitions.* As used in this part, terms shall be defined as follows:

Alternate airport. An alternate airport is one listed in the clearance as a point to which a flight may be directed if, subsequent to departure, a landing at the point to which the flight is cleared becomes undesirable.

Broken clouds. The term "broken clouds" means a condition where more than 50 but less than 90 percent of the sky is covered by clouds.

Category. Category shall indicate a classification of aircraft such as airplane, helicopter, glider, etc.

Ceiling. The term "ceiling" means the height of the base of the lowest cloud layer reported as "broken clouds" or "overcast."

Check pilot. A check pilot is a pilot authorized by the Administrator to check pilots of the air carrier for familiarity with route procedures and for piloting technique.

Class. Class shall indicate a difference in basic design of aircraft within a category, such as single-engine land, multiengine sea, etc.

Contact operation. A contact operation is an operation conducted under contact flight rules as prescribed in Part 60 of this subchapter.

Crew member. Crew member means any individual assigned by an air carrier for the performance of duty on the aircraft other than as flight crew member during flight time.

Flight crew member. Flight crew member means a pilot, flight radio operator, flight engineer, or flight navigator assigned to duty on the aircraft during flight time.

Flight time. Flight time shall mean the total time from the moment the aircraft first moves under its own power for the purpose of flight until the moment it comes to rest at the end of the flight (block to block).

Instrument operation. An instrument operation is an operation conducted under instrument flight rules as prescribed in Part 60 of this subchapter.

Long distance operation. A long distance operation is one in which the time interval between stops is of sufficient duration to require that the dispatch be based entirely on forecasts of weather expected at the intended destination and alternates.

Pilot compartment. The term "pilot compartment" means that part of the aircraft designed for the use of the flight crew.

Pilot in command. Pilot in command shall mean the pilot responsible for the operation and safety of the aircraft during the time defined as flight time.

Point-of-no-return. The term "point-of-no-return" means that point at which the aircraft no longer has sufficient fuel, under existing conditions, to return to the point of departure or any alternate for that point.

Provisional airport. A provisional airport is an airport approved for the purpose of providing adequate service to a community when the regular airport serving that community is not available.

Refueling and holding airport. A refueling and holding airport is an airport approved as a point to which flights may be cleared for refueling.

Regular airport. A regular airport is an airport used as a regular stop on a route.

Route. A route is a path through the navigable airspace identified by an area on the surface of the earth, the boundaries of which are designated or approved by the Administrator.

Route segment. A route segment is a portion of a route, the boundaries of which are identified by:

(1) A continental or insular geographic location;

(2) A point at which some specialized aid to air navigation is located; or

(3) A point at which a definite radio fix is located.

Second in command. Second in command shall mean a pilot other than the pilot in command who is designated by the air carrier to act as second in command of an aircraft.

Short distance operation. A short distance operation is one which involves intermediate stops of sufficient frequency to permit the dispatch from each such stop to be based on spot weather reports or a combination of spot weather reports and forecasts.

Type. Type shall mean all aircraft of the same basic design including all modifications thereto except those modifications which result in a change in handling or flight characteristics.

[F. R. Doc. 55-3206; Filed, Apr. 18, 1955; 8:53 a. m.]

Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 111]

PART 608—RESTRICTED AREAS

NEW YORK

The restricted area alteration appearing hereinafter has been coordinated with the civil operators involved, the Army, the Navy, and the Air Force, through the Air Coordinating Committee, Airspace Subcommittee, and is adopted to become effective when indicated in order to promote safety of the flying public. Since a military function of the United States is involved, compliance with the notice, procedure, and effective date provisions of section 4 of the Administrative Procedure Act is not required.

Part 608 is amended as follows:

In § 608.40, the Montauk Point, Long Island, New York, area (R-487) is added to read:

Name and location (chart)	Description by geographical coordinates	Designated altitudes	Time of designation	Using agency
MONTAUK POINT, Long Island, N. Y. (R-487) (New York-Boston).	That portion of the area described herein which lies within 3 nautical miles of the shoreline [1] beginning at latitude 41°06'10", longitude 71°29'00"; thence to latitude 41°03'38", longitude 71°26'15"; thence to latitude 40°50'43", longitude 72°07'48"; thence to latitude 40°51'40", longitude 72°11'10"; thence to latitude 40°55'45", longitude 72°12'37"; thence to latitude 41°06'10", longitude 71°41'48"; thence to point of beginning.	Surface to 7,950 feet mean sea levels.	0830 to 1630 local time, Monday through Friday inclusive, when weather conditions are better than 6,000-foot ceiling and 5 statute miles visibility.	First Army, Montauk Point, Long Island, N. Y.

[1] That portion which lies beyond 3 nautical miles of the shoreline is established as a Warning Area (W-487).

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interprets or applies sec. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

This amendment shall become effective on May 19, 1955.

[SEAL] F. B. LEE,
Administrator of Civil Aeronautics.

TITLE 30—MINERAL RESOURCES

Chapter I—Bureau of Mines, Department of the Interior

Subchapter B—Respiratory Protective Apparatus; Tests for Permissibility; Fees

[Bureau of Mines Schedule 19B]

PART 12—SUPPLIED-AIR RESPIRATORS

Part 12 is hereby amended to read as follows:

Preliminary statement. The Bureau of Mines is prepared at its Central Experiment Station, Pittsburgh, Pennsylvania, to conduct tests of supplied-air respirators to determine their permissibility for use in air containing contaminants such as harmful gases, vapors, fumes, dusts, smokes, and mists, and in air containing insufficient oxygen for respiration. For the purpose of this schedule, supplied-air respirators include devices commonly referred to as hose-masks, air-line respirators, compressed-air respirators, sand-blast helmets and hoods, and others, which provide protection by conveying respirable air through a hose or a combination of piping system and hose line.

The authority for conducting such tests and investigations is contained in the act of February 25, 1913 (37 Stat. 681), as amended June 30, 1932 (47 Stat. 410), and in Executive Order No. 6611, February 22, 1934 (30 U. S. C. secs. 3, 5, 7). The act, as so amended, contains the following provision:

> For tests or investigations authorized by the Secretary of the Interior under the provisions of this Act, as amended and supplemented, except those performed for the Government of the United States or State governments within the United States, a fee sufficient in each case to compensate the Bureau of Mines for the entire cost of the services rendered shall be charged, according to a schedule prepared by the Director of the Bureau of Mines and approved by the Secretary of the Interior, who shall prescribe rules and regulations under which such tests and investigations may be made. All moneys received from such sources shall be paid into the Treasury to the credit of miscellaneous receipts.

This document, consisting of §§ 12.1 to 12.11, inclusive, is Schedule 19B and supersedes Schedule 19, Procedure for Testing Hose Masks for Permissibility, issued April 28, 1927; List of Fees, issued August 3, 1932; the Supplement to Schedule 19, issued August 20, 1934; and Schedule 19A, issued August 9, 1937.

Sec.
12.1 Definition of a permissible supplied-air respirator.
12.2 Types of supplied-air respirators.
12.3 Purpose of testing for permissibility.
12.4 Conditions under which supplied-air respirators will be tested.
12.5 Requirements for Bureau of Mines approval.
12.6 Changing details of test.
12.7 Notifications of approval or disapproval.
12.8 Approval markings.
12.9 Material required for Bureau of Mines record.
12.10 Changes subsequent to approval.
12.11 Withdrawal of approval.

AUTHORITY: §§ 12.1 to 12.11 issued under sec. 5, 36 Stat. 370, as amended; 30 U. S. C. 7. Interpret or apply secs. 2, 3, 36 Stat. 370, as amended 30 U. S. C. 3, 5.

§ 12.1 *Definition of a permissible supplied-air respirator.* (a) A supplied-air respirator is permissible for use in harmful or objectionable atmospheres encountered in its field of industrial usage if all the materials and details of construction are the same as and its performance in all respects is equal to or better than that required by applicable portions of this part.

(b) Bureau of Mines approval applies only to a complete supplied-air respirator and not to the integral parts thereof.

(c) The devices are designated by names other than the usual trade names. This change provides logical nomenclature for such devices, obviating dependence on a multiplicity of trade names, and provides for the naming of devices developed in this field in the future. The manufacturer, of course, may continue to advertise his device as a hose mask, air-line respirator, or abrasive blasting device.

§ 12.2 *Types of supplied-air respirators.* With regard to design and approval, supplied-air respirators are subdivided into the following types:

(a) *Type A supplied-air respirator.* (1) The type A supplied-air respirator is commonly called hose mask. This respirator is designed to require the presence of a man (blower operator) in addition to the wearer; to permit the wearer to inspire air through the hose, connections, and air-supply device (blower) by his lungs alone when the blower is not operated; and to permit the wearer to be drawn to safety by a life line or, if necessary, the hose in case of accident. It is the only supplied-air respirator that will be approved for use in immediately harmful atmospheres or those from which the wearer could not escape without the aid of the respirator.

(2) The principal parts of a type A supplied-air respirator are: A hand operated blower that shall permit free entrance of air to the hose when the blower is not operated; a strong, large-diameter hose having a low resistance to flow of air; a strong harness to which the hose and life line are attached; and a tight-fitting facepiece.

(b) *Type B supplied-air respirator.* (1) The type B supplied-air respirator is similar to the type A, with the main exception that it has no blower.

(2) It will not be approved for use in immediately harmful atmospheres or those from which the wearer could not escape without the aid of the device.

(3) The principal parts of a type B supplied-air respirator are: A strong, large-diameter hose having a low resistance to flow of air; a harness to which the hose is attached; and a tight-fitting facepiece.

(c) *Type C supplied-air respirator.* (1) The type C supplied-air respirator is designed for routine use in protecting workers against harmful or objectionable atmospheres that are not immediately dangerous to life or from which the wearer could escape without the aid of the respirator. It may be used with either a low- or high-pressure air-supply system. It is the responsibility of the user to provide respirable air either by a compressor that does not use an internal lubricant that could produce gases or mists that may be objectionable or injurious to health, or by one that is protected by suitable filters, temperature regulators, and alarms.

(2) Type C supplied-air respirators are divided into two classes: (i) Continuous flow class, and (ii) demand class. Type C respirators of the continuous flow class supply respirable air to the respiratory-inlet covering continuously, even when the wearer exhales. Type C respirators of the demand class supply respirable air to the respiratory-inlet covering only when the wearer inhales.

(3) The principal parts of a type C supplied-air respirator, continuous-flow class, are: A positive-pressure air-supply system; a hose; a detachable coupling; a control valve or orifice; an arrangement for attaching hose to wearer; and a respiratory-inlet covering. Where the supply pressure exceeds 125 pounds per square inch gage, a pressure-release mechanism is required.

(4) The principal parts of a type C supplied-air respirator, demand class, are: A positive pressure air-supply system; a hose; a detachable coupling; a demand valve; an arrangement for attaching the respirator to the wearer; and a tight-fitting respiratory-inlet covering. A maximum air pressure of 125 pounds per square inch gage is allowed at the point of attachment of the air-supply hose to the air-supply system.

(5) The general term "respiratory-inlet covering" is used for the covering worn over the face or head by the wearer of the respirator, when otherwise it would be necessary to use an expression such as "facepiece, half facepiece, helmet, or hood."

(d) *Types AE, BE, and CE supplied-air respirators.* Supplied-air respirators may be modified for use in abrasive blasting. The letter E added to the regular-type letter indicates that the type of respirator designated by the first letter has been modified or provided with additional equipment to make it suitable for use in abrasive blasting. Such changes or additions consist primarily of providing a suitable covering to protect the head and neck against impact and abrasion by the rebounding material.

§ 12.3 *Purpose of testing for permissibility.* (a) The Bureau of Mines conducts tests of supplied-air respirators for the purpose of determining their permissibility for use in air containing contaminants such as harmful gases, vapors, and particulate matter.

(b) This part is for the information and guidance of those who may desire to submit supplied-air respirators for approval and also to inform consumers and other interested persons regarding the qualities the Bureau of Mines believes such devices should have.

§ 12.4 *Conditions under which supplied-air respirators will be tested.*—(a) *Consultation.* Manufacturers or their representatives may visit or communicate with the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pennsylvania, to obtain criticisms of proposed designs or to discuss the requirements of this part in connection with a device to be submitted. No charge is made for this consultation and no written report will be made to the manufacturer.

(b) *Application.* An application for investigation under this part shall be in the form of a letter (in duplicate) addressed to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pennsylvania, which contains: (1) Duplicate descriptions and complete drawings of the device (supplemented with any available printed matter); (2) a statement that the device is completely developed and of the design and materials which the manufacturer believes suitable for a finished marketable device; (3) a statement that the device has been subjected to inspections and tests of the nature described in this Part 12 and that it has met these requirements when tested by the applicant or his testing agency; (4) two copies of the results of the applicant's inspection and tests; (5) a statement describing the nature, adequacy, and continuity of control of the quality of the respirator (see paragraph (e) of this section); (6) a request that the necessary inspections and tests leading to approval be made; and (7) a check, draft, or money order, payable to the United States Bureau of Mines, to cover the fee for inspection and tests. The fee will be placed on special deposit in the Treasury of the United States, pending disposal as hereinafter specified. No supplied-air respirator will be accepted for permissibility tests unless it is substantially in the completed form in which it is to be marketed. Application for tests shall be indicative of this understanding by the applicant. One complete specimen of the device, for which approval is desired, shall be sent to the Central Experiment Station. On receipt of this application, fee, descriptive material, test data, and specimen to be tested, the manufacturer will be notified by the Bureau of its action on the application, the material required for test, and any additional information or specifications that are deemed necessary.

(c) *Fees for testing supplied-air respirators.* The following fees are charged for testing respirators under this part:

(1) Types A or AE supplied-air respirators (complete)	$250
(i) Blower, single outlet	85
(ii) Each blower outlet more than one (at time of blower testing)	10
(iii) Air-supply line (hose)	90
(iv) Body harness	15
(v) Respiratory-inlet covering (facepiece)	80
(2) Types B or BE supplied-air respirators (complete)	205
(i) Air-supply line (hose)	70
(ii) Body harness	15
(iii) Respiratory-inlet covering (facepiece)	80
(3) Types C or CE supplied-air respirators, continuous-flow class (complete)	215
(i) Air-supply line (hose)	65
(ii) Respiratory-inlet covering (facepiece)	85
(4) Types C or CE supplied-air respirators, demand class (complete)	225
(i) Air-supply line (hose)	75
(ii) Respiratory-inlet covering (facepiece)	85
(5) Additional examination and tests of respirator in connection with other tests, per man-day required	30
(6) Fees for tests of unusually complicated apparatus or for unusual tests or other tests not included in this list or for portions of tests that may be required for extensions of approval will be based on the actual costs of testing, which shall be determined by the Bureau, and the applicant will be notified of the fee before the tests are begun.	

If a respirator fails to pass any of the specified tests and the applicant notifies the Bureau to terminate further consideration of the device, the Bureau will return the fee to the applicant, less such portion of the fee as the Bureau determines is sufficient to cover the work done. If the applicant resubmits the respirator for approval after the necessary improvements have been made, an additional fee will be required. The amount of the fee charged will be proportional to the additional tests that must be made and will be specified in writing to the applicant in advance of further testing of the respirator.

(d) *Drawings and specifications required.* (1) Respirators submitted for approval will not be inspected or tested until a complete description and two full sets of drawings showing all the details of construction have been delivered to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pennsylvania.

(2) The Bureau of Mines will not be responsible for any disclosures of ideas, principles, or patentable features because, under the terms of the application for tests, it is understood that the device is ready for release to public market. Caution will be exercised to prevent disclosure of details of the device to the public during approval testing.

(e) *Control-test requirements.* To maintain the quality of protection equal to that required by this part, the manufacturer must maintain adequate control of the production of the device and make tests of assembled devices to insure the fit of parts, freedom from air leakage, and general suitability. Each application for permissibility tests shall be accompanied by a statement showing the nature, adequacy, and continuity of the control provided by the applicant. Upon request of the Bureau, the applicant shall grant permission for a representative of the Bureau, to inspect the con-

trol-test equipment and control-test records and to interview the personnel conducting the control tests. Tests for approval will be made only after the Bureau is satisfied that such control is effective, and approvals once granted will remain in force only while the control is sustained.

(f) *Material required for approval testing.* The number of complete respirators and replacement parts required will depend on the type and design of the device. After application for test is received, the applicant will be notified concerning the material that it will be necessary for him to submit. All materials for tests shall be delivered gratis, with transportation charges prepaid by the applicant to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pennsylvania. The Bureau of Mines may retain as its own property any or all material submitted by the applicant that may be required for record. Material not required for record will be available to the applicant and will be returned at his expense on shipping instructions made in writing to the Central Experiment Station.

(g) *Where investigations will be conducted.* All investigations are conducted at the Bureau of Mines Central Experiment Station, 4800 Forbes Street, Pittsburgh 13, Pennsylvania.

(h) *Date for conducting tests.* The tests will be made in the order of fulfillment of pretest conditions. The applicant will be notified of the date on which tests will be begun. If a device fails to meet any of the requirements it shall lose its order of precedence. Tests will be resumed following completion of other approval work which is in progress at the time both the request and the material for retesting are received. Exceptions may be made only for minor tests and inspections which may be performed simultaneously with other work in the laboratory.

(i) *Observers at formal investigations and demonstrations.* No one shall be present during any part of the formal investigation conducted by the Bureau which leads to approval for permissibility except the necessary Government personnel, representatives of the applicant, and such other persons as may be mutually agreed upon by the applicant and the Bureau. Upon granting approval for permissibility, the Bureau will announce that such approval has been granted to the device and may thereafter conduct, from time to time in its discretion, public demonstrations of the tests conducted on the approved device. Those who attend any part of the investigation, or any public demonstration, shall be present solely as observers; the conduct of the investigation and of any public demonstration shall be controlled wholly by the Bureau's personnel. Results of chemical analyses of materials and all information contained in the drawings, specifications, and instructions shall be deemed confidential and their disclosure will be appropriately safeguarded by the Bureau.

§ 12.5 *Requirements for Bureau of Mines approval.* To obtain the approval of the Bureau of Mines, a supplied-air respirator must pass the following inspection and tests:

(a) *Container and markings.* (1) If deemed necessary for the protection, proper maintenance, and storage of the respirator, a substantial and durable container may be required.

(2) Each respirator and required container shall be marked distinctly with the name of the manufacturer; the type of device, such as "Type A supplied-air respirator"; and the name, letter, or number by which the device is designated for trade purposes.

(b) *Materials.* (1) The respirator must be constructed in all its parts of materials which are suitable for the purpose they must serve; this applies to the fabric, rubber, metal, and other parts. All parts (especially rubber) that come into contact with the skin must be of nonirritating composition. All materials used in the construction of respiratory-inlet coverings and hose shall be of a nature that will withstand disinfection by methods recommended by the manufacturer and approved by the Bureau of Mines. These approved methods for disinfection shall be described in the instructions for use of the device as supplied by the manufacturer.

(2) Metal parts of Type A and Type B supplied-air respirators (except those parts that remain in uncontaminated air) should be of such composition or structure as to minimize the possibility of ignition of flammable atmospheres by sparks.

(c) *Design and construction.* Excellence of design, mechanical construction, durability, and workmanship will be considered with regard to the safety of the wearer, the freedom of his movements, his range and clearness of vision, the fit of the respiratory-inlet covering, and the comfort afforded under all conditions of use. The ease with which parts of necessarily short life or period of use may be replaced by new or reconditioned parts, and the tightness of the whole apparatus, with a view to insuring the wearer against leaks of contaminated air both before and after such changes have been made, will also be considered.

(d) *General requirements.* (1) Each supplied-air respirator, when supplied with respirable air, must protect the wearer in the particular kinds of atmospheres for which it is approved. The Types A and AE supplied-air respirators may be approved for respiratory protection in essentially any atmosphere. The other types of supplied-air respirators may be approved for protection in any atmosphere that is not immediately dangerous to life or from which the wearer could escape without the aid of the device. These devices are approved only when used with respirable air and at the pressures and quantities required.

(2) The main parts of supplied-air respirators are as follows: Air-supply device (except Types B and BE); air-supply line; harness; and respiratory-inlet covering. Since the types AE, BE, and CE respirators for abrasive blasting differ from the corresponding supplied-air respirators only in the kind of respiratory-inlet covering, special requirements for the parts of these respirators are given only in the section on respiratory-inlet covering.

(3) The requirements for the complete respirators of the various types are grouped wherever possible.

(e) *Requirements and tests for air-supply device*—(1) *Type A supplied-air respirator (hose mask).* Each Type A supplied-air respirator shall be provided with a hand-operated air blower. No multiple system, whereby more than one man is supplied by one blower, will be approved unless each hose line is connected directly to a manifold at the blower. Power-driven blowers will not be approved. The blower shall permit free entrance of air to the hose when the blower is not operated, and it shall deliver the amount of air hereinafter specified with either direction of rotation, except when the construction of the blower is such that it cannot be operated in other than the proper direction for delivering the required amount of air.

The blower will be tested by attaching it to a mechanical drive and operating it continuously 6 to 8 hours daily for 100 hours at the speed required to deliver 50 liters of air per minute through the respirator, when assembled with the kind and maximum length of hose for which the device is to be approved, connected to each blower or manifold outlet designed for hose connections. During this test period the blower will be oiled and given attention and care. It must operate throughout the period without failure or indication of excessive wear of bearings or other working parts. The crank speed required to deliver the specified 50 liters of air per minute must not exceed 50 revolutions per minute; the power required must not exceed one-sixtieth horsepower, and the torque must not exceed a force of 5 pounds on an 8-inch crank, the torque and power to be measured as hereinafter stated.

When assembled with the facepiece and 50 feet of the hose for which it is to be approved connected to one outlet, with all other outlets closed, and operated at any practical speed up to 50 revolutions of the crank per minute, the amount of air delivered into the respiratory-inlet covering shall not exceed 150 liters per minute, and the pressure at the hose connection to the blower or manifold shall not exceed the equivalent of 5 inches of water. If relief valves at the blower are employed to fulfill this requirement they must operate automatically and be simple in design, durable, and foolproof against failure to operate.

(i) *Method of measuring power and torque required to operate blowers.* As shown in figure 1, the blower crank is replaced by a wooden drum, *a* (5 inches in diameter is convenient). This drum is wound with about 40 feet of No. 2 picture cord, *b*. A weight, *c*, of sufficient mass to rotate the blower at the desired speed is suspended from this wire cord. A mark is made on the cord about 10 to 15 feet from the weight, *c*. Another mark is placed at a measured distance (20 to 30 feet is convenient) from the first. These are used to facilitate timing.

To determine the torque or horsepower required to operate the blower the drum is started in rotation manually at or slightly above the speed at which the power measurement is to be made. The blower is then permitted to assume constant speed, and then as the first mark on the wire leaves the drum a stopwatch is started. The watch is stopped when the second mark leaves the drum. From these data the foot-pounds per minute and the torque may be calculated readily.

(2) *Type B supplied-air respirator.* No Type B supplied-air respirator will be approved for use with a blower or for connection to an air-supply device at positive pressures. Instead, the inlet to the hose shall have a terminal fitting or chamber which provides for drawing the air through a suitable arrangement that will remove material larger than 0.149 mm. in diameter (149 microns, 100-mesh, U. S. standard sieve of corrosion resisting material). This terminal fitting shall be provided also with means for fastening or anchoring it to a fixed position in a zone of respirable air.

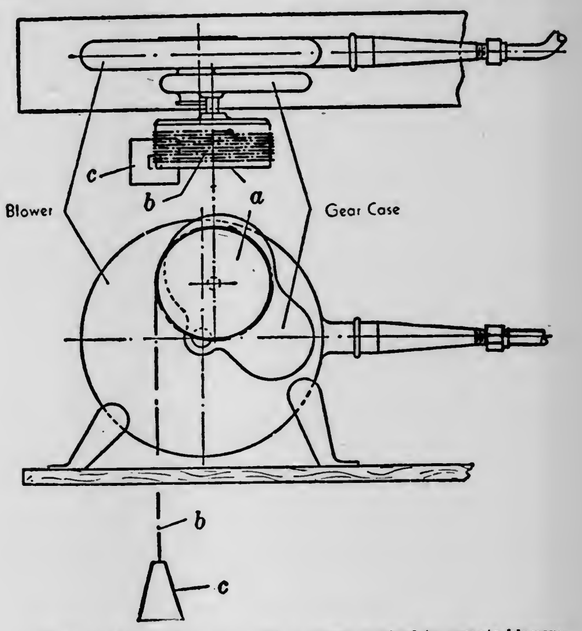

FIGURE 1—Apparatus for measuring power required to operate blowers.

(3) *Type C supplied-air respirators, continuous-flow class.* The air-supply device is the responsibility of the user. The respirators are approved, however, only when used with respirable air and at the pressures and quantities required. The pressure at the hose connection to the blower or manifold shall not exceed 125 pounds per square inch gage. If, however, the pressure at any point in the supply system exceeds 125 pounds per square inch gage, the user must provide a pressure-release mechanism that will prevent the pressure at the hose connection from exceeding 125 pounds per square inch gage under any conditions.

(4) *Type C supplied-air respirators, demand class.* (i) The air supply is the responsibility of the user. It may be an air-compressing system or a reservoir of compressed air. The respirator is approved, however, only when used with respirable air at the pressures and quantities required.

(ii) The manufacturer may specify the range of air pressure at the point of attachment of the air-supply hose to the air-supply system, and the range of hose length for the respirator. For example, he might specify that the respirator be used with compressed air at pressures ranging from 40 to 80 pounds per square inch with from 15 to 250 feet of air-supply hose. The specified air pressure at the point of attachment of the hose to the air-supply system shall not exceed 125 pounds per square inch gage. Should the pressure in the air-supply system exceed this value, the user must provide a pressure-reducing and pressure-release mechanism that will prevent the pressure at this point from exceeding this value. However, the pressure-release mechanism may be set to operate at a pressure not more than 20 percent above the manufacturer's highest specified pressure. For example, if the highest specified pressure is 80 or 125 pounds per square inch, the pressure-release mechanism would be set to operate at 96 or 150 pounds per square inch, respectively.

(f) *Requirements and tests for air-supply lines.* The requirements and tests of the air-supply lines are given in table 1 of this section.

(g) *Requirements and tests for harness.* Each supplied-air respirator shall be provided with a harness, the primary purpose of which is to prevent a pull on the connecting hose from exerting a pull on the face or head covering. The secondary purpose of the harness of the Type A supplied-air respirator is to hold the wearer while he is drawn to safety. The harness of supplied-air respirators having rigid or semi-rigid head coverings may be used to assist in holding the cover in place.

(1) *Type A supplied-air respirators.* The harness may be made of leather, fabric webbing, or equivalent material. Shoulder straps will be tested for strength of material and of joints or seams and must separately withstand a pull of 250 pounds without failure. Belts, rings, and attachments for life lines must withstand a pull of 300 pounds without failure. The hose must be firmly attached to the harness so as to withstand a pull of 250 pounds without separating, and the hose attachments must be arranged so that the pull or drag of the hose behind an advancing wearer does not disarrange the harness or exert pull upon the facepiece. Harness should be adjustable to various sizes. The arrangement and suitability of the accessories and fittings will be considered.

(2) *Type B supplied-air respirators.* (i) The harness shall consist of at least a belt made of leather, fabric webbing, or equivalent material. The harness shall not interfere with the movements of the wearer, and it shall not be disturbing or uncomfortable to wear. It shall be adjustable to various sizes. The arrangement and suitability of the accessories and fittings will be considered.

(ii) The hose must be attached to the harness in a manner that will withstand a pull of 100 pounds without separating or showing signs of failure. The design of the harness and attachment of the line shall permit dragging the maximum length of hose considered for approval over a concrete floor without disarranging the harness or exerting a pull on the facepiece.

(3) *Type C supplied-air respirators.* (i) The harness for this respirator may be similar to that of the type B, or it may consist of a simple arrangement for attaching the hose to a part of the wearer's clothing in a practical manner that prevents a pull equivalent to dragging the maximum length of the hose over a concrete floor from exerting pull upon the respiratory-inlet covering.

(ii) In the case of supplied-air respirators having rigid or partly rigid head coverings a suitable harness may be required to assist in holding this covering in place.

(h) *Requirements and tests for breathing tubes*—(1) *Type A supplied-air respirator.* One or two flexible rubber breathing tubes of the nonkinking type shall extend from the facepiece to a connecting hose coupling attached to the belt or harness. These tubes shall permit free head movement and freedom from closing off by kinking or by chin or arm pressure, and they shall not create a pull that will loosen the facepiece or disturb the wearer.

(2) *Type B supplied-air respirator.* Same as for type A.

(3) *Type C supplied-air respirator, continuous flow class.* Same as for type A, except that an extension of the connecting hose may take the place of the previously described breathing tubes.

(4) *Type C supplied-air respirator, demand class.* A flexible rubber breathing tube of the nonkinking type shall extend from the facepiece to the demand valve. This tube shall permit free head movement and freedom from closing off by kinking or by chin or arm pressure, and shall not create a pull that will loosen the facepiece or disturb the wearer.

(i) *Requirements and tests for respiratory-inlet covering*—(1) *Type A supplied-air respirator.* (i) Only full- or Tissot-type facepieces that form a pocket over the face and allow breathing through the nose and mouth will be approved. Head coverings or hoods that require a continuous stream of air to prevent inhalation of irrespirable atmospheres will not be approved. The eyeglasses shall not interfere with satisfactory vision, and they shall be of the nonshatter type. The air shall enter the facepiece in a manner that will keep the eyeglasses free of moisture. Elastic headbands shall be adjustable and replaceable.

(ii) An exhalation valve or valves shall be provided in the facepiece to allow escape of exhaled air and any excess air delivered by the blower. The exhalation valve or valves shall be guarded to prevent distortion and injury.

(iii) A check valve shall be included in the connection to the facepiece or in the hose fitting near the facepiece to allow flow of fresh air toward the facepiece only.

(2) *Type AE supplied-air respirator.* The requirements for the respiratory-inlet covering of this respirator are similar to those for type A, with the exception that a suitable additional covering shall be provided to protect the head and neck against impact and abrasion by the rebounding material. The window or windows in the respiratory-inlet covering shall be shielded with such material as glass, woven wire, or perforated sheet metal that does not interfere unduly with vision. This shield shall be mounted and attached in a manner that will permit easy access to the external surface of eyeglasses or windows for cleaning. All shields and windows subject to abrasion shall be easily replaceable.

(3) *Type B supplied-air respirator.* (i) Full- or Tissot-types, or half-mask type facepieces that allow breathing through the nose and mouth, may be approved. Half-mask facepieces must not interfere with the use of goggles. The eyeglasses in Tissot-type masks shall not interfere with satisfactory vision, and they shall enter the facepiece in a manner that will keep the eyeglasses free of moisture. Elastic headbands shall be adjustable and replaceable.

(ii) An exhalation valve shall be provided in the facepiece to allow escape of exhaled air.

(iii) A check valve shall be provided in the facepiece or facepiece connection to the breathing tubes to allow flow of air toward the facepiece only.

(4) *Type BE supplied-air respirator.* The requirements for respiratory-inlet covering of this respirator are similar to those for the type B, with the exceptions that a suitable additional covering shall be provided to protect the head and neck against impact and abrasion by the rebounding material, and window or windows in the respiratory-inlet covering shall be shielded with such material as glass, woven wire, or perforated sheet metal that does not interfere unduly with vision. This shield shall be mounted and attached in a manner that will permit easy access to the external surface of eyeglasses or windows for cleaning.

(5) *Type C supplied-air respirator, continuous flow class.* Respiratory-inlet coverings of the full- or half-mask facepiece type, the head-covering type, or combinations of these types, may be approved. No covering with a direct mouth or nose connection will be approved. Half-mask facepieces must not interfere with the use of goggles. The velocity of the air at the point of delivery and the distribution within the covering shall not cause discomfort to the wearer. Windows in full facepieces and head coverings shall meet the quality and design requirements referred to under the preceding types of supplied-air respirators. Air shall enter the covering in a manner that will keep the windows free of moisture. Elastic headbands shall be adjustable and replaceable.

(6) *Type C supplied-air respirator, demand class.* Respiratory-inlet coverings of the full- or half-mask facepiece type only may be approved. No covering with a direct mouth or nose connection will be approved. Half-mask facepieces must not interfere with the use of goggles. The velocity of the air at the point of delivery and the distribution within the facepiece shall not cause discomfort to the wearer. Windows in full facepieces shall not interfere with satisfactory vision and shall be of the nonshatter type. Air shall enter the facepiece in a manner that will keep the windows free of moisture. Elastic headbands shall be adjustable and replaceable.

(7) *Type CE supplied-air respirator.* The requirements for the respiratory-inlet covering of this respirator are similar to those for type C, with the exceptions that a suitable covering for protecting the head and neck against impact and abrasion by rebounding material must be provided and window or windows in the respiratory-inlet covering shall be shielded with such material as glass, woven wire, or perforated sheet metal that does not interfere unduly with vision. This shield shall be mounted and attached in a manner that will permit easy access to the external surface of windows for cleaning. All shields and windows subject to abrasion shall be easily replaceable.

(j) *Requirements and tests for complete respirator*—(1) *Resistance to air flow*—(i) *Types A and AE supplied-air respirators.* (*a*) These respirators completely assembled with the respiratory-inlet covering, the air-supply device, and the maximum length of air-supply line to be considered for approval coiled for one-half its length in loops 5 to 7 feet in diameter, must not show resistance in excess of 63.5 mm. (2.5 inches) of water-column height to air flowing at the rate of 85 liters (3 cubic feet) per minute when the blower is not operating or under any practical condition of blower operation. Resistance of the exhalation valve shall not exceed 25 mm. (1 inch) of water column height.

(*b*) If inlet valves at the blower are used to meet the requirements for resistance to inhalation through the hose, they must operate automatically and be simple in design, durable, and foolproof against failures that would tend to close the inlet. Inlet valves and blower inlets must be provided with durable guards that will protect against fouling.

(ii) *Types B and BE supplied-air respirators.* These respirators completely assembled with the respiratory-inlet covering and the hose in the maximum length to be considered for approval, coiled in loops 5 to 7 feet in diameter, must not show resistance exceeding 38 mm. (1.5 inches) of water-column height to air flowing at the rate of 85 liters (3 cubic feet) per minute. The resistance of the exhalation valve shall not exceed 25 mm. (1.0 inch) of water-column height.

(iii) *Types C, continuous-flow class, and CE supplied-air respirators.* The resistance to exhalation shall not exceed 25 mm. (1 inch) of water-column height when the air flow into the respiratory-inlet covering is 170 liters (6 cubic feet) per minute.

(iv) *Type C supplied-air respirator, demand class.* The resistance to inhalation shall not exceed 50 millimeters (2 inches) of water at an air flow of 115 liters (4 cubic feet) per minute. The exhalation resistance to a flow of air at a rate of 85 liters (3 cubic feet) per minute shall not exceed 25 millimeters (1 inch) of water.

(2) *Protection against gases (direct leakage and man tests).* The direct leakage and man tests will be made in duplicate. A man will enter a gas chamber containing room air. He will put on the respirator to be tested. Gas-tight goggles will be used where necessary to protect the eyes against irritation by ammonia. The hose of the respirator will be arranged in accordance with the specific directions given in the following sections on the different respirators. After the respirator is properly fitted and air is supplied in accordance with the directions in the following sections, ammonia gas will be introduced into the gas chamber until the concentration is 1±0.25 percent by volume. The man will then spend 10 minutes in work to provide observations on freedom of the device from leakage. The freedom and comfort allowed the wearer will also be considered. The time will be divided as follows:

5 minutes	Walking, turning head, diping chin.
5 minutes	Pumping air with a tire pump into a 1-cubic-foot cylinder to a pressure of 25 pounds per square inch or equivalent work.

To meet the requirements of this test no ammonia shall be detected in the air breathed, and undue encumbrance and discomfort shall not be experienced because of the fit, air delivery, or other features of the respirator.

(i) *Types A and AE supplied-air respirators.* (*a*) The complete respirator with the maximum length of hose for which approval may be granted will be so arranged that the respiratory-inlet covering with 75 percent of the length of the hose will be in the gas chamber. The intake of the hose will be connected to the blower which is to be located in ammonia-free air.

(*b*) The man in the atmosphere of ammonia in the test chamber will draw his inspired air through the hose, connections, and all parts of the air device by means of his lungs alone (blower not operated).

(*c*) The 10-minute work test will be repeated with the blower in operation at any practical speed up to 50 revolutions of the crank per minute.

(ii) *Types B and BE supplied-air respirators.* (*a*) The complete respirator, with the maximum length of hose, for which approval may be granted, will be

TABLE 1—AIR-SUPPLY LINE REQUIREMENTS AND TESTS

Specific requirements	Requirements for the air-supply lines of the indicated types of supplied-air respirators		
	Type A	Type B	Type C
Length of hose	Maximum of 150 feet, in multiples of 25-foot sections.	Maximum of 75 feet, in multiples of 25-foot [1] sections.	Maximum of 250 feet in multiples of 25-foot [1] sections.
Air flow	None	None	The air-supply hose with air-regulating valve or orifice must permit a minimum flow of at least 115 liters (4 cubic feet) per minute to tight-fitting, and 170 liters (6 cubic feet) per minute to loose-fitting respiratory-inlet coverings through the maximum length of hose for which approval is granted and at the minimum specified air supply pressure. The maximum flow shall not exceed 566 liters (20 cubic feet) per minute at the maximum specified supply pressure, with the minimum length of hose approved.
Air-regulating valve	None	None	The air-supply hose, detachable coupling, and demand valve of the type C supplied-air respirator, demand class, must be capable of delivering respirable air at a rate of at least 115 liters (4 cubic feet) of air per minute to the respiratory-inlet covering at an inhalation resistance not in excess of 50 millimeters (2 inches) of water column height measured at the respiratory-inlet covering with any combination of air-supply pressure and length of hose within the manufacturer's specified range of pressure and hose length. The air-flow rate and resistance to inhalation shall be measured while the demand valve is being actuated 20 times per minute by a source of intermittent suction. The maximum rate of flow to the respiratory-inlet covering shall not exceed 566 liters (20 cubic feet) of air per minute under the specified operating conditions. If an air-regulating valve is provided, it must be of a design that will remain at a particular adjustment unaffected by ordinary movement of the wearer. The friction between packing and a valve stem will not satisfy this requirement. The valve must be so constructed that the air supply with the maximum length of hose and minimum specified air supply pressure will not be less than 2 cubic feet per minute for any adjustment of the valve.

[1] It will be permissible for the manufacturer to supply hose of the approved type of shorter length than 25 feet provided it meets the requirements of this part.

TABLE 1—AIR-SUPPLY LINE REQUIREMENTS AND TESTS—Continued

Specific requirements	Requirements for the air-supply lines of the indicated types of supplied-air respirators		
	Type A	Type B	Type C
Air-regulating valve—Con.	None	None	The demand valve takes the place of the air-regulating valve. It shall be connected to the air supply at the maximum requested air pressure by means of the minimum requested length of air-supply hose. The exit of the demand valve shall be connected to a source of intermittent suction, so that the demand valve is actuated at a nominal rate of 20 times per minute for a total of 100,000 inhalations. To expedite this test, the actuation rate may be increased if mutually agreeable to the manufacturer and the Bureau. During this test the valve shall function without failure and there shall be no undue wear of the moving parts. The demand valve shall not be damaged in any way when it is subjected to a pressure or suction of 10 inches of water, gage, at the outlet for 2 minutes.
Noncollapsibility	The hose must not collapse or show apparent permanent deformation when a force of 200 pounds is applied between 2 planes 3 inches wide on opposite sides of the hose.	Same as for type A	None.
Nonkinkability	None	None	A 25-foot section of the hose will be placed on a horizontal plane surface and shaped into a one-loop coil with one end of the hose connected to an air-flow meter supplied with air at the minimum specified supply pressure. The connection shall be in the plane of the loop. The other end of the hose will be pulled tangentially to the loop and in the plane of the loop until the hose takes the form of a straight line. To meet the requirements of this test the loop shall maintain a uniform near-circular shape and ultimately unfold as a spiral, without any localized deformation that decreases the flow of air to less than 90 percent of the flow when the hose is tested as a straight section.
Strength of hose and couplings	Hose and couplings must not show any separation or failure when tested with a pull of 250 pounds.	Same as for type A	Hose and couplings must not show any separation or failure when tested with a pull of 100 pounds and when tested by subjecting them to an internal air pressure of 2 times the maximum respirator supply pressure specified by the manufacturer or at 25 pounds per square inch, whichever is the greater value.
Tightness	No leakage shall appear when the hose and couplings joined with average care are immersed in water and subjected to an internal air pressure of 5 pounds per square inch gage.	None	No leakage, except a maximum of 50 cc. per minute at each coupling, will be permitted when the hose and couplings joined with average care are immersed in water and air is allowed to flow through the respirator with the air pressure applied to the inlet end of the air-supply hose being 25 pounds per square inch gage or twice the maximum respirator supply pressure specified by the manufacturer, whichever is the greater value.
Permeation of hose by gasoline	The permeation of the hose by gasoline will be tested by immersing 25 feet of hose and a coupling in a bath of gasoline. Air will be passed through the hose at the rate of 8 liters per minute for 6 hours. The air from the hose must not show more than 0.01 percent of gasoline vapor by volume in air at the end of this period.	Same as for type A	Same as for Type A, except test period will be 1 hour.
Detachable coupling	None	None	A hand-operated detachable coupling by means of which the wearer can easily and quickly attach or detach the connecting hose shall be provided at a handy and readily accessible position. This coupling shall be durable, remain connected under all conditions of reasonable use of the respirator, and meet the preceding tests for strength of hose and couplings and for tightness.

so arranged that the respiratory-inlet covering with 75 percent of the length of the hose will be in the gas chamber. The intake of the hose will be located outside the chamber in ammonia-free air.

(*b*) The man in the chamber wearing the respirator in the atmosphere of ammonia will draw his inspired air through the hose and connections by means of his lungs alone.

(iii) *Types C, continuous-flow class, and CE supplied-air respirators.* The complete respirator, with the maximum length of hose for which approval may be granted, will be so arranged that the respiratory-inlet covering with 75 percent of the length of the hose will be in the gas chamber. The remainder of the hose will be outside the gas chamber. The end of the hose will be connected to a suitable source of ammonia-free air under proper pressure. The minimum flow of air required to maintain a positive pressure in the respiratory-inlet covering throughout the entire breathing cycle will be supplied to the wearer, provided this flow is not less than 115 liters per minute for tight-fitting and 170 liters per minute for loose-fitting respiratory-inlet coverings. The test will then be repeated with the maximum rate of flow attainable within the specified operating pressures.

(iv) *Type C supplied-air respirator, demand class.* (*a*) The complete respirator, with the maximum length of hose for which approval is requested, will be so arranged that the respiratory-inlet covering with 75 percent of the length of the hose will be in the gas chamber. The end of the hose will be connected to a suitable source of ammonia-free air at the minimum air pressure requested. The test will be repeated with the minimum hose length and the maximum air pressure requested.

(*b*) A similar test using 100 parts per million of isoamyl acetate vapor may be substituted for the above test if the respirator is equipped with a half-mask facepiece.

(3) *Protection against particulate matter.* Types A, B, and C, but not types AE, BE, and CE, supplied-air respirators will be tested under the following conditions in an atmosphere containing particulate matter. Details of the test atmosphere are:

Humidity: 40–70 percent relative humidity.
Temperature: Room temperature (approximately 25° C.).
Test suspension: 50±10 mg. per cubic meter of ground flint, air-floated (99+ percent through 325 standard mesh sieve), and consisting of 99+ percent free silica (SiO_2).

The particle size distribution of the test suspension shall not exceed a geometric mean of 0.6 micron and a standard geometric deviation of 1.90.

Two respirators will be tested against particulate matter. They may be tested consecutively or simultaneously. The respirators will be worn in the test atmosphere for 30 minutes while the person or persons carry out the following schedule:

5 minutes	Walking, turning head, and dipping chin.
5 minutes	Pumping air with a tire pump into a 1-cubic-foot cylinder to a pressure of 25 pounds per square inch, or equivalent work.
5 minutes	Resting.
5 minutes	Walking, turning head, and dipping chin.
5 minutes	Pumping air with a tire pump into a 1-cubic-foot cylinder to a pressure of 25 pounds per square inch, or equivalent work.
5 minutes	Resting.

During the test period air will be withdrawn continuously at the rate of 32 liters (1.13 cubic feet) per minute from the respiratory-inlet covering at a point as near as convenient to the wearer's nostrils and also from the source of air entering the intake to the hose of the respirator. Particulate matter will be collected from these air streams by electrical precipitation.

To meet the requirements of these tests: Undue encumbrance and discomfort shall not be experienced because of the fit, air delivery, or other features of the respirator; and the amount of particulate matter collected from the air withdrawn from the respiratory-inlet covering of the respirators shall not exceed that collected from the air withdrawn simultaneously from the source of air supplied to the respirator by more than 0.5 mg. for the 30-minute test period.

(i) *Type A supplied-air respirator.* (*a*) The respirator will be arranged as directed in subparagraph (2) (i) of this paragraph.

(*b*) The person wearing the respirator will draw his inspired air through the hose connections and all parts of the air device by means of his lungs alone (blower not operated).

(*c*) The 30-minute test will be repeated with the blower in operation at any practical speed up to 50 revolutions of the crank per minute.

(ii) *Type B supplied-air respirator.* (*a*) The respirator will be arranged as directed in subparagraph (2) (ii) of this paragraph.

(*b*) The person wearing the respirator will draw his inspired air through the hose connections and all parts of the air device by means of his lungs alone.

(iii) *Type C supplied-air respirator, continuous flow class.* The respirator will be arranged as directed in subparagraph (2) (iii) of this paragraph. The rates of air flow will be the same as in the tests for protection against gases, except that the minimum rates will be increased by 32 liters per minute.

(iv) *Type C supplied-air respirator, demand class.* No specific test will be made to determine the protection afforded by the Type C supplied-air respirator, demand class, against particulate matter. However, two men will wear the respirator at both extremes of the specified ranges of air pressure and hose length, while performing the schedule of exercise, in order to check on the comfort and practicability of the respirator.

(4) *Protection during abrasive blasting.* The only types of supplied-air respirators that will be considered for approval for use in abrasive blasting are Types AE, BE, and CE supplied-air respirators. Accordingly, they are the only types of supplied-air respirators that will be subjected to the tests described in this section.

Duplicate tests will be made under conditions of typical abrasive-blasting operation. The person wearing the respirator will sandblast the inside surface of a common iron kettle of approximately hemispherical shape, about 30 inches in diameter, and 30-gallon capacity. The kettle will be placed with the plane of the opening inclined 45° from a vertical position and with the lowest point of the rim at about the height of the person's hips. The person will stand at one position in front of the kettle and lean over until the upper part of the body is inclined to parallel the face of the kettle. He will blast the entire inner surface, with the blast at all times directed approximately at right angles to the surface, with the nozzle of the gun about 6 inches from the surface, and with his head approximately 18 inches from the nozzle. He will move his head forward, backward, and sideways during the blasting operation. Further details on the test conditions are:

Kind of abrasive-blasting outfit used: Suction-feed blast.
Diameter of air jet: 3/16 inch.
Air pressure: 40–70 pounds per square inch.
Composition of abrasive to be used: 99+ percent free silica (SiO_2).
Size properties of abrasive: The sand shall be a mixture of 90 percent by weight of essentially No. 1 sand-blast sand and 10 percent air-floated fines. The No. 1 sand shall meet a size specification of not more than 10 percent on a 20-mesh sieve and not more than 10 percent through a 35-mesh sieve; 99+ percent of the fines must be able to pass through a 325-mesh sieve. All size determinations shall be made by standard-mesh sieves.
Length of test period: 30 minutes continuously or in 5-, 10-, or 15-minute intervals with 5-minute periods between these work periods.

Air will be withdrawn continuously during test at the rate of 32 liters (1.13 cubic feet) per minute from the respiratory-inlet covering at a point as near as convenient to the wearer's nostrils. Simultaneously air shall be drawn at the same rate from the source of intake air to the respirator. The particulate matter will be collected from these air streams by electrical precipitation and the collected material will be determined by weight. The amount of particulate matter in the air withdrawn from the respiratory-inlet covering shall not exceed that from the respirator intake air by more than 0.5 mg. for the 30-minute test period.

The wearer of the respirator in this test must not experience undue encumbrance and discomfort because of the fit, air delivery, or other features of the respirator. The head and shoulder covering shall protect him from discomfort or injury from impact and abrasion by the rebounding material.

(i) *Type AE supplied-air respirator.* (*a*) The respirator will be arranged as directed in subparagraph (2) (i) of this paragraph.

(*b*) The person wearing the respirator will draw his inspired air through the hose, connections, and all parts of the air device by means of his lungs alone (blower not operated).

(*c*) The test will then be repeated with the blower in operation at any practical speed up to 50 revolutions per minute of the crank.

(ii) *Type BE supplied-air respirator.* (*a*) The respirator will be arranged as directed in subparagraph (2) (ii) of this paragraph.

(*b*) The person wearing the respirator will draw his inspired air through the hose, connections, and all parts of the air device by means of his lungs alone.

(iii) *Type CE supplied-air respirator.* The respirator will be arranged as directed in subparagraph (2) (iii) of this paragraph. The rates of air flow will be the same as in the tests for protection against gases, except that the minimum rates will be increased by 32 liters per minute.

§ 12.6 *Changing details of tests.* If it is advisable to omit any of the tests or part of a test previously described or to perform accessory tests, the Bureau may modify the test in such manner as to obtain substantially the same information and degree of safety as is provided by the tests described. The manufacturer will be notified of any changes that may be necessary.

§ 12.7 *Notification of approval or disapproval.* (a) After the Bureau has considered the results of the inspection and tests, a formal written notification of approval or disapproval of the respirator will be supplied to the applicant by the Bureau. If the device meets all requirements of this part, the notification will not be accompanied by test data or detailed results of tests. If the respirator fails to meet any of the requirements of this part, notification of such failure will be accompanied by details of the failure with a view to possible remedy of the defect or defects in respirators submitted in the future. Otherwise, results of tests of respirators that fail to meet the requirements will not be made public by the Bureau.

(b) No verbal reports of the Bureau's decisions concerning the investigations will be given, and no informal approvals will be granted.

§ 12.8 *Approval markings.* (a) With formal notification of approval the applicant will receive a photograph of the design of an approval label. This label shall bear the seal of the Bureau of Mines and be inscribed substantially as follows:

Permissible _____
(Type A, B, C, AE, BE, or CE supplied-air respirator)
for _____
(Purpose)
U. S. Bureau of Mines Approval No._____
Issued to _____
(Name of manufacturer)
Approved only when assembled with _____
_____
(Name and approval number of part)

(b) Appropriate instruction and caution statements will be included in this label.

(c) The approval plate shall be suitably reproduced in the form of a plate or by stamping, stenciling, or labeling in a legible and permanent manner and placed on the device or on the outside of the container as recommended by the Bureau.

(d) To be able to identify the approved respiratory inlet coverings, hose, harness, couplings, and other parts of approved respirators the Bureau requires a symbol as "B. M. 1900" stamped or stenciled on each part in bold, waterproof letters and figures at least one-eighth inch high, placed in a position plainly visible.

(e) Full-scale designs or reproductions of the approval label and markings and a sketch or description of their position shall be submitted to the Central Experiment Station, for approval before final adoption.

(f) Permission to place the Bureau's marks of approval on his respirator obligates a manufacturer to maintain the quality of his product and to have each respirator and all parts thereof constructed strictly according to the drawings and records that have been accepted by the Bureau for that respirator and are in the Bureau's files. Respirators that exhibit changes in design or include parts that have not been approved for use with the respirator are not permissible respirators and must not bear the Bureau's approval label.

§ 12.9 *Material required for Bureau of Mines record.* In order that the Bureau may know exactly what it has tested and approved, detailed records of each investigation are kept. These include drawings and actual equipment as follows:

(a) *Drawings and specifications.* Drawings and specifications submitted with application for the tests and the final drawings and specifications that the applicant must submit to the Bureau before approval is granted to show the details of the supplied-air respirator as approved, will be retained by the Bureau. The company receiving the approval shall keep an exact duplicate of the set of drawings and specifications that are in the Bureau's records. These are to be adhered to in commercial production of the approved device.

(b) *Actual equipment.* (1) Parts of the supplied-air respirator or a complete device used in the tests may be retained by the Bureau as a permanent record of the investigation and of the respirator submitted. Material not required for record will be returned to the applicant at his expense on written shipping instructions to the Central Experiment Station.

(2) If the supplied-air respirator is approved, the applicant shall deliver to the Central Experiment Station, gratis, one complete supplied-air respirator in the form in which it is to be sold, to serve as a record of the commercial product.

§ 12.10 *Changes subsequent to approval.* All approvals are granted with the understanding that the manufacturer will make his supplied-air respirator according to final drawings and specifications submitted to the Bureau. Therefore, before making any change in an approved supplied-air respirator the manufacturer shall first obtain the Bureau's approval of the change. This procedure is as follows:

(a) The manufacturer shall write to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pennsylvania, requesting an extension of his original approval and stating the change or changes desired. He shall send two sets of revised drawings and specifications showing the changes in detail, and one of each of the supplied-air respirator parts affected to the Central Experiment Station.

(b) The Bureau will consider the application and inspect the drawings and parts to determine whether it will be necessary to make tests.

(c) If tests are unnecessary, the applicant will be advised formally by the Bureau of the approval or disapproval of the change.

(d) If tests are necessary the applicant will be advised of the fee and material required.

§ 12.11 *Withdrawal of approval.* The Bureau reserves the right to rescind for cause any approval granted under the regulations of this part.

DOUGLAS MCKAY,
Secretary of the Interior.

APRIL 12, 1955.

[F. R. Doc. 55-3184; Filed, Apr. 18, 1955; 8:49 a. m.]

[Bureau of Mines Schedule 21A]

PART 14—FILTER-TYPE, DUST, FUME, AND MIST RESPIRATORS

Part 14 is hereby amended to read as follows:

Preliminary statement. The Bureau of Mines is prepared at its Central Experiment Station, Pittsburgh, Pennsylvania, to conduct tests of respirators designed for the removal of atmospheric particulate matter from inhaled dust by mechanical filtration to determine their permissibility for use in air containing certain dusts, fumes, and mists.

The authority for conducting such tests and investigations is contained in the act of February 25, 1913 (37 Stat. 681), as amended June 30, 1932 (47 Stat. 410), and in Executive Order No. 6611, February 22, 1934 (30 U. S. C. secs. 3, 5, 7). The act, as so amended, contains the following provision:

> For tests or investigations authorized by the Secretary of the Interior under the provisions of this Act, as amended and supplemented, except those performed for the Government of the United States or State governments within the United States, a fee sufficient in each case to compensate the Bureau of Mines for the entire cost of the services rendered shall be charged, according to a schedule prepared by the Director of the Bureau of Mines and approved by the Secretary of the Interior, who shall prescribe rules and regulations under which such tests and investigations may be made. All moneys received from such sources shall be paid into the Treasury to the credit of miscellaneous receipts.

This document, consisting of §§ 14.1 to 14.11, inclusive, is Schedule 21A and supersedes Schedule 21, Procedure for Testing Filter-Type Dust, Fume, and

Mist Respirators for Permissibility, issued August 20, 1934.

Sec.

14.1 Definition of a permissible dust, fume, or mist respirator.
14.2 Classes of respirators.
14.3 Purpose of testing for permissibility.
14.4 Conditions under which respirators will be tested.
14.5 Requirements for Bureau of Mines approval.
14.6 Changing details of tests.
14.7 Notification of approval or disapproval.
14.8 Approval markings.
14.9 Material required for Bureau of Mines record.
14.10 Changes subsequent to approval.
14.11 Withdrawal of approval.

AUTHORITY: §§ 14.1 to 14.11 issued under sec. 5, 36 Stat. 370, as amended, 30 U. S. C. 7. Interpret or apply secs. 2, 3, 36 Stat. 370, as amended, 30 U. S. C. 3, 5.

§ 14.1 *Definition of a permissible dust, fume, or mist respirator.* (a) A respirator is permissible for use in air containing certain dusts, fumes, or mists if all of the materials and details of construction of the respirator and the filtering characteristics of the filter are the same in all respects as those of the respirators and filters that meet the requirements and pass the inspection and tests of the Bureau of Mines, as described in this part.

(b) Bureau of Mines approval applies only to a complete respirator and not to integral parts thereof.

§ 14.2 *Purpose of testing for permissibility.* (a) The Bureau of Mines conducts tests of respirators designed for the removal of atmospheric particulate matter from inhaled air for the purpose of determining their permissibility for use in air containing certain dusts, fumes, and mists.

(b) This part is for the information and guidance of those who may desire to submit respirators for approval and also to inform consumers and other interested persons regarding qualities the Bureau believes such devices should have.

§ 14.3 *Classes of respirators.* As regards their design and approval, respirators are subdivided into the following classes, according to the type of particulate matter against which they are designed to protect:

(a) Respirators for mechanically generated dusts resulting principally from the disintegration of a solid, such as the dust clouds produced in the various processes of mining, quarrying, and tunneling and the various industrial operations of grinding, crushing, and general processing of minerals and other materials.

(b) Respirators for fumes of various metals (usually their chemical compounds as oxides or carbonates) such as lead, mercury (except mercury vapor), manganese, copper, chromium, iron, cadmium, zinc, magnesium, aluminum, antimony, and arsenic resulting from sublimation or the condensation of their vapor, or from the chemical reactions between their vapor and gases.

(c) Respirators for mists as produced by spray-coating with vitreous enamels, chromic acid mists as produced in chromium plating, and other mists of materials whose liquid vehicle does not produce harmful gases or vapors.

(d) Respirators for various combinations of the preceding types of particulate matter.

§ 14.4 *Conditions under which respirators will be tested.*—(a) *Consultation.* Manufacturers or their representatives may visit or communicate with the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pennsylvania, to obtain criticisms of proposed designs or to discuss the requirements of this part in connection with a respirator to be submitted. No charge is made for this consultation and no written report will be made to the manufacturer.

(b) *Application.* An application for investigation under this part shall be in the form of a letter (in duplicate) addressed to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pennsylvania, which contains: (1) Duplicate descriptions and complete drawings of the device (supplemented with any available printed matter); (2) a statement that the device is completely developed and of the design and materials which the manufacturer believes suitable for a finished marketable device; (3) a statement of the purpose of the respirator, naming the types and specific kinds of the atmospheric particulate matter against which it is designed to provide respiratory protection; (4) a statement that the device has been subjected to inspections and tests of the nature described in this part and that it has met these requirements when tested by the applicant or his testing agency; (5) a statement describing the nature, adequacy, and continuity of control of the quality of the respirator (see paragraph (e) of this section); (6) two copies of the results of the applicant's inspection and tests; (7) a request that the necessary inspections and tests leading to approval be made; and (8) a check, draft, or money order, payable to the United States Bureau of Mines, to cover the fee for inspections and tests. The fee will be placed on special deposit in the Treasury of the United States, pending disposal as hereinafter specified. No respirator will be accepted for permissibility tests unless it is substantially in the completed form in which it is to be marketed. Application for tests shall be indicative of this understanding by the applicant. One complete specimen of the device for which approval is desired shall be sent to the Central Experiment Station. On receipt of this application, fee, descriptive material, test data, and specimen to be tested, the applicant will be notified by the Bureau of its action on the application, the material required for test, and any additional information or specifications that are deemed necessary.

(c) *Fees for testing dispersoid respirators.* The following fees are charged for testing dispersoid respirators under this part:

1. Pneumoconiosis-producing and nuisance dusts, single-used filter, complete respirator	$160
2. Pneumoconiosis-producing and nuisance dusts, reusable filter, complete respirator	195
3. Toxic dusts, single-use filter, complete respirator	175
4. Toxic dusts, reusable filter, complete respirator	215
5. Dusts, single-use filter, complete respirator	195
6. Dusts, reusable filter, complete respirator	275
7. Fumes, complete respirator	205
8. Silica mist, complete respirator	175
9. Chromic acid mist, complete respirator	215
10. Facepiece, dust or mist respirator	40
11. Facepiece, fume respirator	50
12. Additional examination and tests of respirator in connection with other tests, per man-day required	30
13. Fees for tests of unusually complicated apparatus or for unusual tests or other tests not included in this list or for portions of tests that may be required for extensions of approval will be based on the actual costs of testing, which shall be determined by the Bureau, and the applicant will be notified of the fee before the tests are begun.	

If a respirator fails to pass any of the specified tests and the applicant notifies the Bureau to terminate further consideration of the device, the Bureau will return the fee to the applicant, less such portion of the fee as the Bureau determines is sufficient to cover the work done. If the applicant resubmits the respirator for approval after the necessary improvements have been made, an additional fee will be required. The amount of fee charged will be proportional to the additional tests that must be made and will be specified in writing to the applicant in advance of further testing of the respirator.

(d) *Drawings and specifications required.* (1) Respirators submitted for approval will not be inspected or tested until a complete description and two full sets of drawings showing all the details of construction have been delivered to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pennsylvania. The description of the respirator shall include a statement of the nature of the filtering medium.

(2) The Bureau of Mines will not be responsible for any disclosure of ideas, principles, or patentable features apparent from visual inspection, because under the terms of the application for tests it is understood that the device is ready for release to public market. Caution will be exercised to prevent disclosure of details of the device to the public during approval testing.

(e) *Requirement concerning control of filtering characteristics.* The filtering characteristics of filters for dusts, fumes, and mists may vary over wide limits, depending on the materials used and the conditions under which each lot is manufactured. To maintain the quality of protection equal to that required by this part, each lot of filter materials produced or obtained by a manufacturer must have been adequately sampled and tested for filtering characteristics before being used in approved respirators. Each application for permissibility tests shall be accompanied by a statement showing the nature, adequacy, and continuity of the control provided by the applicant. Upon request of the Bureau, the applicant shall grant permission for a representative of the Bureau to inspect the control-test equipment and control-test records and to interview the personnel conducting the control tests. Tests for approval will be made only after the Bureau is satisfied that such control is effective, and approvals once granted will remain in force only while the control is sustained.

(f) *Material required for investigation.* The number of complete respirators and replacement parts required will depend on the type and design of the device. After application for test is received, the applicant will be notified concerning the material that it will be necessary for him to submit. All materials for test shall be delivered gratis, with transportation charges prepaid by the applicant, to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pennsylvania. The Bureau of Mines may retain as its own property any or all material submitted by the applicant that may be required for record. Material not required for record will be available to the applicant and will be returned at his expense on shipping instructions made in writing to the Central Experiment Station.

(g) *Where investigations will be conducted.* All investigations are conducted at the Bureau of Mines Central Experiment Station, 4800 Forbes Street, Pittsburgh 13, Pennsylvania.

(h) *Date for conducting tests.* The tests will be made in the order of fulfillment of pretest conditions. The applicant will be notified of the date on which tests will be begun. If a device fails to meet any of the requirements it shall lose its order of precedence. Tests will be resumed following completion of other approval work which is in progress at the time both the request and material for retesting are received. Exceptions may be made only for minor tests and inspections which may be performed simultaneously with other work in the laboratory.

(i) *Observers at formal investigations and demonstrations.* No one shall be present during any part of the formal investigation conducted by the Bureau which leads to approval for permissibility except the necessary Government personnel, representatives of the applicant, and such other persons as may be mutually agreed upon by the applicant and the Bureau. Upon granting approval for permissibility, the Bureau will announce that such approval has been granted to the device and may thereafter conduct, from time to time in its discretion, public demonstrations of the tests conducted on the approved device. Those who attend any part of the investigation, or any public demonstration, shall be present solely as observers; the conduct of the investigation and of any public demonstration shall be controlled wholly by the Bureau's personnel. Results of chemical analyses of material and all information contained in the drawings, specifications, and instructions shall be deemed confidential and their disclosure will be appropriately safeguarded by the Bureau.

§ 14.5 *Requirements for Bureau of Mines approval.* To obtain the approval of the Bureau of Mines a respirator must pass the following inspections and tests:

(a) *Container and markings.* (1) Each respirator shall have a substantial and durable container suitable for protecting and keeping the respirator clean when not in use. Also, replacement filter units shall have protective containers such as a sealed envelope, a cardboard box, or a bag. The number of replacement units of the paper or felt disc types, or similar types, shall not exceed fifty in each container. The permitted number of other types will be decided after inspection of the device.

(2) Each respirator and required container shall be marked distinctly with the name of the manufacturer, the type of devise, and the name, letter or number by which the device is designated for trade purposes.

(b) *Materials.* All parts of the respirator and equipment must be constructed of materials obviously suitable for the purpose they must serve. This applies to the fabric, rubber, metal, and other parts. All rubber parts which come into contact with the skin must be of a nonirritating composition. All materials used in the construction of facepieces shall be of a composition that will withstand repeated disinfection by methods recommended by the applicant and accepted by the Bureau of Mines. These accepted methods for disinfection shall be described in the instructions supplied by the manufacturer for use of the device.

(c) *Design and construction.* Excellence of design, mechanical construction, and durability, as well as workmanship, will be considered. This will be done with regard to the wearer's safety, the freedom of his movements and his vision, the fit of the facepiece, and the comfort afforded under all conditions of use. The ease with which filters or other parts of necessarily short life may be replaced by fresh parts, and the tightness of the whole apparatus, with a view to insuring the wearer against leaks of unpurified air after such changes have been made, will also be considered.

(d) *Requirements and tests for facepiece*—(1) *General requirements.* (i) The facepiece may be either the full facepiece, half-mask, or the mouthpiece type, and shall be so constructed as to assure a quick, dispersoid-tight fit on persons of widely varying facial shapes and sizes. Half-mask facepieces must not interfere with the use of goggles. Mouthpiece types must have a means of preventing nasal inhalation.

(ii) The use of inhalation check valve or valves is desirable, but optional. An exhalation valve shall be provided.

(iii) The elastic headband shall be adjustable and replaceable.

(2) *Pressure tightness test.* The complete respirator shall be fitted to the faces of from 15 to 20 men having a wide variety of facial shapes and sizes. To test the suitability of the fit of the respirator on these subjects, the exhalation valve and the inhalation port or ports shall be held closed and each subject shall exhale gently into the facepiece until a slight but definite positive pressure is built up in the facepiece. The absence of outward leakage of air between the facepiece and the wearer's face shall be indicative of a satisfactory fit of the facepiece.

(3) *Coal dust tightness test.* (i) Three subjects having full, average, and lean facial features shall wear the respirators while a high concentration of finely-divided bituminous coal dust (through 200-mesh) is blown gently into their breathing zone for a minimum of three minutes. At the end of this dusting period, the excess dust shall be removed from the periphery of the facepieces, and the facepieces carefully removed from the faces of the wearers.

(ii) To meet the requirements of this test, the forced nasal discharge at the end of the test period (as shown on a white cloth), the sputum, the nasal cavities as examined by aid of a speculum and illumination, and that part of the face covered by the facepiece of the respirator must not show appreciably more black particulate matter than similar observations made before the test.

(4) *Isoamyl acetate tightness test (additional test applicable only to respirators designed for respiratory protection against fumes).* The respirator shall be modified in such a manner that all of the air that normally would be inhaled through the inhalation ports is drawn through an efficient activated charcoal-filled canister, without interference with the face-contacting portion of the facepiece. Modified in this manner, the facepiece shall be worn by 15 to 20 men for at least two minutes each in a test chamber containing 100 parts of isoamyl acetate vapor per million parts of air by volume. To meet the requirements of this test, the odor of isoamyl acetate shall not be detected by the test subjects while wearing the modified respirator in the test atmosphere.

(5) *Requirements and tests for covering for face cushion.* If cloth coverings for the face-contacting portion of the face cushion are provided for the respirator, they shall be assembled with the respirator according to the manufacturer's instructions and the assembly shall be tested as prescribed in subparagraph (3) of this paragraph. Cloth coverings for the face-contacting portion of the face cushion will not be approved as part of a respirator designed for respiratory protection against fumes.

(e) *Requirements and tests for complete respirator*—(1) *Resistance to airflow.* The resistance to flow of air of the complete respirator on inhalation and on exhalation will be measured on a mechanical apparatus before and after the tests described in the following subparagraphs of this paragraph. The rate of air flow shall be 85 liters per minute, continuous flow. The resistance to inhalation must not exceed 50 millimeters

of water-column height, and the resistance to exhalation must not exceed 25 millimeters of water-column height.

(2) *Silica-dust tests of respirators designed for respiratory protection against pneumoconiosis-producing and nuisance dusts*—(i) *Single-use filters.* Three respirators will be tested on a mechanical testing apparatus under the following conditions:

Relative humidity—40–70 percent.
Temperature—room temperature (approximately 25° C.)
Rate of air flow—32 liters per minute, continuous flow.
Test-suspension—50±10 milligrams per cubic meter of ground flint, air-floated (99+ percent through 325 standard-mesh sieve), which consists of 99+ percent free silica (SiO_2).
The particle size distribution of the test suspension shall not exceed a geometric mean of 0.6 micron, and a standard geometric deviation of 1.90.
Length of sampling period—one 90-minute period for each respirator.

Tested under these conditions, the total amount of the test suspension unretained must not exceed 9.0 milligrams for the three respirators or 4 milligrams for any one of the three respirators.

(ii) *Reusable filters.* (a) Respirators with filter elements designed for cleaning and resuse will be subjected to the tests described in subdivision (i) of this subparagraph, each filter element being tested three times, once as received, once after cleaning, and once after recleaning. Three respirators shall be tested in this manner. The manufacturer's directions for cleaning the filter element will be followed not more than once for each of the three tests.

(b) Tested under these conditions, the total amount of the test suspension unretained must not exceed 9.0 milligrams for the three tests or 4 milligrams for any of the tests.

(3) *Lead dust tests for respirators designed for respiratory protection against dusts that are not significantly more toxic than lead*—(i) *Single-use filters.* Three respirators will be tested on a mechanical testing apparatus under the following conditions:

Relative humidity—40–70 percent.
Temperature—room temperature (approximately 25° C.).
Rate of air flow—32 liters per minute, continuous flow.
Test-suspension—15±5 milligrams per cubic meter of lead (Pb) in a test suspension of National Lead Company's Negative Battery Mixture No. 111–R, which has the following approximate composition: Litharge, about 75 percent; free metallic lead, about 25 percent; carbon black, blanc fixe, and organic matter for expander purposes, 0.25–0.3 percent.
The particle size distribution of the test suspension shall not exceed a geometric mean of 0.6 micron, and a standard geometric deviation of 1.90.
Length of sampling period—one 90-minute period for each respirator.

Tested under these conditions, the total amount of the test suspension unretained, analyzed and calculated as lead (Pb), must not exceed 0.43 milligram for any one of the three respirators.

(ii) *Reusable filters.* (a) Respirators with filter elements designed for cleaning and reuse will be subjected to the tests described in subdivision (i) of this subparagraph, each filter element being tested three times, once as received, once after cleaning, and once after recleaning. Three respirators shall be tested in this manner. The manufacturer's directions for cleaning the filter element will be followed not more than once for each of the three tests.

(b) Tested under these conditions, the total amount of the test suspension unretained, analyzed and calculated as lead (Pb), shall not exceed 0.43 milligram on any one of the tests.

(4) *Lead fume test for respirators designed for respiratory protection against fumes that are not significantly more toxic than lead.* Three respirators will be tested on a mechanical testing apparatus under the following conditions:

Relative humidity—40–70 percent.
Temperature—room temperature (approximately 25° C.).
Rate of air flow—32 liters per minute, continuous flow.
Test suspension—15±5 milligrams per cubic meter of freshly generated lead oxide fume, calculated as lead (Pb). The fume shall be generated by impinging an oxygen-gas flame on a pool of molten lead.
Length of sampling period—Two 156-minute periods for each respirator. Samples of the test suspension shall be taken between these two periods.

Tested under these conditions, the total amount of the test suspension unretained, analyzed and calculated as lead (Pb), must not exceed 1.5 milligrams for any one of the three respirators.

(5) *Silica mist test for respirators designed for respiratory protection against pneumoconiosis-producing and nuisance mists.* Three respirators will be tested on a mechanical testing apparatus under the following conditions:

Temperature—Room temperature (approximately 25° C.).
Rate of air flow—32 liters per minute, continuous flow.
Test suspension—10±5 milligrams per cubic meter of silica mist, weighed as silica dust, produced by spraying a 2-percent aqueous suspension of ground flint, air-floated (99+ percent, through 325 standard-mesh sieve), which consists of 99± percent free silica (SiO_2).
Length of sampling period—Two 156-minute periods for each respirator. Samples of the test suspension shall be taken between these two periods.

Tested under these conditions, the total amount of silica mist unretained, weighed as silica dust, must not exceed 5 milligrams for any one of the three respirators.

(6) *Chromic acid mist test for respirators designed for respiratory protection against chromic acid mist.* Three respirators will be tested on a mechanical testing apparatus under the following conditions:

Temperature—room temperature (approximately 25° C.).
Rate of air flow—32 liters per minute, continuous flow.
Test-suspension—15±5 milligrams per cubic meter of chromic acid mist, analyzed and calculated as chromic acid anhydride (CrO_3), produced by electrolyzing an aqueous solution of chromic acid containing 200–500 grams of chromic acid anhydride per liter.
Length of sampling period—Two 156-minute periods for each respirator. Samples of the test suspension shall be taken between these two periods.

Tested under these conditions, the total amount of chromic acid unretained, analyzed and calculated as chromic acid anhydride (CrO_3), must not exceed 1 milligram for any one of the three respirators.

(7) *Tests for respirators designed for respiratory protection against more than one type of dispersoid.* Respirators designed for respiratory protection against more than one type of dispersoid (dust, fume, or mist) must meet all the separate requirements for the types of dispersoids involved.

§ 14.6 *Changing details of tests.* If it is advisable to omit any of the tests or part of a test previously described, or to perform accessory tests, the Bureau may modify the test in such a manner as to obtain substantially the same information and degree of safety as is provided by the tests described. The applicant will be notified of any changes that may be necessary.

§ 14.7 *Notification of approval or disapproval.* (a) After the Bureau has considered the results of the inspection and tests, a formal written notification of approval or disapproval of the respirator will be supplied to the applicant by the Bureau. If the device meets all requirements of this part, the notification will not be accompanied by test data or detailed results of tests. If the device fails to meet any of the requirements of this part, notification of such failure will be accompanied by details of the failure with a view to possible remedy of the defect or defects in respirators submitted in the future. Otherwise, results of tests of respirators that fail to meet the requirements will not be made public by the Bureau.

(b) No verbal reports of the Bureau's decisions concerning the investigations will be given, and no informal approvals will be granted.

§ 14.8 *Approval markings.* With formal notification of approval, the applicant will receive photographs of designs of the official approval labels, one for the complete respirator and one for the container for extra filters. These labels will bear the seal of the Bureau of Mines and be inscribed substantially as follows:

Permissible Respirator or Permissible Respirator Filter for (name of type or types of dispersoids for protection against which the respirator or filter is approved). U. S. Bureau of Mines Approval No. ---. Issued to (name of manufacturer). Approved for protection against the inhalation of (name of type or types of dispersoid). The approved assembled respirator consists of: BM-- facepiece and BM-- filter.

(a) Appropriate instruction and caution statements on the use and limitations of the respirator will be included in the labels.

(b) The respirator label shall be reproduced legibly on the container for the respirator. The filter label shall be reproduced on the container of extra filters.

(c) The facepiece shall be marked in a legible and permanent manner with the facepiece approval number that is shown on the respirator approval label. The filter shall be marked with the filter approval number that is shown on the filter approval label and with the type of dispersoid for which the filter is approved.

(d) Full scale designs or reproductions of approval labels and markings and a sketch or description of their position shall be submitted to the Central Experiment Station, for approval before final adoption.

(e) Permission to place the Bureau's marks of approval on his respirator obligates a manufacturer to maintain the quality of his product and to have each respirator, and all parts thereof, constructed strictly according to the drawings and records that have been accepted by the Bureau for that respirator and are in the Bureau's files. Respirators that exhibit changes in design or include parts that have not been approved for use with the respirator are not permissible respirators and must not bear the Bureau's approval label.

§ 14.9 *Material required for Bureau of Mines record.* In order that the Bureau may know exactly what it has tested and approved, detailed records of each investigation are kept. These include drawings and actual equipment, as follows:

(a) *Drawings and specifications.* Drawings and specifications submitted with application for tests, and final drawings and specifications that the applicant must submit to the Bureau before approval is granted to show the details of the respirator as approved, will be retained by the Bureau. The company receiving the approval shall keep an exact duplicate of the set of drawings and specifications that are in the Bureau's records. These are to be adhered to in commercial production of the approved device.

(b) *Actual equipment.* (1) Parts of the respirator or a complete respirator used in the tests may be retained by the Bureau as a permanent record of the investigation and of the respirator submitted. Material not required for record will be returned to the applicant at his expense on written shipping instructions to the Central Experiment Station.

(2) If the respirator is approved, the applicant shall deliver to the Central Experiment Station, gratis, one complete respirator in the form in which it is to be sold, to serve as a record of the commercial product.

§ 14.10 *Changes subsequent to approval.* All approvals are granted with the understanding that the manufacturer will make his respirator according to final drawings and specifications submitted to the Bureau. Therefore, before making any change in an approved respirator the manufacturer shall first obtain the Bureau's approval of the change. This procedure is as follows:

(a) The manufacturer shall write to the Central Experiment Station, Bureau of Mines, 4800 Forbest Street, Pittsburgh 13, Pennsylvania, requesting an extension of his original approval and stating the change or changes desired. He shall send two sets of revised drawings and specifications showing the changes in detail, and one of each of the parts affected to the Central Experiment Station.

(b) The Bureau will consider the application and inspect the drawings and parts to determine whether it will be necessary to make tests.

(c) If tests are unnecessary the applicant will be advised formally by the Bureau of the approval or disapproval of the change.

(d) If tests are necessary, the applicant will be advised of the fee and material required.

§ 14.11 *Withdrawal of approval.* The Bureau reserves the right to rescind for cause any approval granted under this part.

DOUGLAS MCKAY,
Secretary of the Interior.

APRIL 12, 1955.

Subchapter D—Electrical Equipment, Lamps, Methane Detectors; Tests for Permissibility; Fees

[Bureau of Mines Schedule 8C, Supp. 1]

PART 22—PORTABLE METHANE DETECTORS

MISCELLANEOUS AMENDMENTS

Part 22 is hereby amended as follows:

1. Section 22.2 is amended by the addition of another paragraph (c) as follows:

§ 22.2 *Definitions.* * * *

(c) *Permissible.* Completely assembled and conforming in every respect with the design formally approved by the Bureau of Mines under this part. (Approvals under this part are given only to equipment for use in gassy and dusty mines.)

2. Section 22.3 (a) is amended to read as follows:

§ 22.3 *Fees charged.* (a) The fee for a complete investigation of a methane detector under this part is $280.

3. Section 22.3 (e) is amended by deleting the words "Director of the Bureau" and substituting the words "Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pa."

4. Section 22.4 is amended by revising to read as follows:

§ 22.4 *Applications.* Before the Bureau of Mines will undertake the active investigation leading to approval of any methane detector, the manufacturer shall make application by letter for an investigation leading to approval of his detector. This application in duplicate, accompanied by a check, bank draft, or money order, payable to the United States Bureau of Mines, to cover all the necessary fees, shall be sent to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pa., together with the required drawings, one complete detector, and instructions for its operation.

5. The title of § 22.5 is amended to read as follows: *"Conditions governing investigations".*

6. Section 22.5 (a) is amended by deleting the words "to the Pittsburgh Experiment Station" and substituting the words "prepaid to the Central Experiment Station, Bureau of Mines, Pittsburgh 13, Pa."

7. Section 22.5 is amended by the addition of paragraph (c) as follows:

(c) *Observers at formal investigations and demonstrations.* No one shall be present during any part of the formal investigation conducted by the Bureau which leads to approval for permissibility except the necessary Government personel, representatives of the applicant, and such other persons as may be mutually agreed upon by the applicant and the Bureau. Upon granting approval for permissibility, the Bureau will announce that such approval has been granted to the device and may thereafter conduct, from time to time in its discretion, public demonstrations of the tests conducted on the approved device. Those who attend any part of the investigation, or any public demonstration, shall be present solely as observers; the conduct of the investigation and of any public demonstration shall be controlled wholly by the Bureau's personnel. Results of chemical analyses of material and all information contained in the drawings, specifications, and instructions shall be deemed confidential and their disclosure will be appropriately safeguarded by the Bureau.

8. Section 22.9 is amended by deleting the words "through the office of the Director of the Bureau of Mines at Washington 25, D. C." and substituting the words "by official letter from the Bureau of Mines," and by changing the word "schedule" to "part."

9. Section 22.11 (a) is amended by deleting the words "Director of the Bureau of Mines at Washington 25, D. C." and substituting the words "Central Experiment Station, Bureau of Mines, Pittsburgh 13, Pa." in the first sentence; also, by rewording the second sentence to read as follows: "with this request, he should submit a revised drawing or drawings showing changes in detail, together with one of each of the parts affected."

10. Section 22.11 (c) is amended by deleting the words "through the Director's office," and by adding "by letter from the Bureau of Mines."

(Sec. 5, 36 Stat. 370, as amended; 30 U. S. C. 7. Interpret or apply secs. 2, 3, 36 Stat. 370, as amended, 30 U. S. C. 3, 5)

DOUGLAS MCKAY,
Secretary of the Interior.

APRIL 12, 1955.

[F. R. Doc. 55–3182; Filed, Apr. 18, 1955; 8:48 a. m.]

[Bureau of Mines Schedule 16B, Supp. 1]

PART 25—MULTIPLE-SHOT BLASTING UNITS

MISCELLANEOUS AMENDMENTS

Part 25 is hereby amended as follows:

1. Section 25.1 is amended by the addition of a new paragraph (c) as follows:

§ 25.1 *Purpose.* • • •

(c) *Definition of permissible.* Completely assembled and conforming in every respect with the design formally approved by the Bureau of Mines under this part. (Approvals under this part are given only to equipment for use in gassy and dusty mines.)

2. Section 25.2 (a) is amended to read as follows, and the footnote thereto would be deleted:

§ 25.2 *Fees charged.* (a) The fee for a complete investigation of a multiple-shot blasting unit under this part is $250.

3. Section 25.2 (d) is amended by deleting the words "Director of the Bureau" and substituting the words "Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pa."

4. Section 25.3 is amended by rewording as follows:

§ 25.3 *Applications.* Before the Bureau of Mines will undertake the active investigation leading to approval of any blasting unit, the manufacturer shall make application by letter for an investigation leading to approval of his device. This application in duplicate, accompanied by a check, bank draft, or money order, payable to the United States Bureau of Mines, to cover all the necessary fees, shall be sent to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pa., together with the required drawings, one complete blasting unit, and instructions for its operation.

5. Section 25.4 (d) is amended by rewording as follows:

§ 25.4 *Conditions governing investigations.* • • •

(d) Observers at formal investigations and demonstrations: No one shall be present during any part of the formal investigation conducted by the Bureau which leads to approval for permissibility except the necessary Government personnel, representatives of the applicant, and such other persons as may be mutually agreed upon by the applicant and the Bureau. Upon granting approval for permissibility, the Bureau will announce that such approval has been granted to the device and may thereafter conduct, from time to time in its discretion, public demonstrations of the tests conducted on the approved device. Those who attend any part of the investigation, or any public demonstration, shall be present solely as observers; the conduct of the investigation and of any public demonstration shall be controlled wholly by the Bureau's personnel. Results of chemical analyses of material and all information contained in the drawings, specifications, and instructions shall be deemed confidential and their disclosure will be appropriately safeguarded by the Bureau.

6. Section 25.4 (g) is amended by deleting the words "Director of the."

7. Section 25.8 is amended by revising the first sentence to read: "All approvals are granted by official letter from the Bureau of Mines", also, by deleting the words "from Washington has been received" and substituting the words "has been received from the Bureau of Mines" in the last sentence.

8. Section 25.10 (a) is amended by deleting the words "Director of the Bureau of Mines at Washington 25, D. C," and substituting the words "Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pa.," in the first sentence; also, by revising the second sentence to read as follows: "With this request he should submit a revised drawing or drawings showing the changes in detail, together with one of each of the parts affected."

9. Section 25.10 (c) is amended by deleting the words "issued through the Director's office" and substituting the words "in writing from the Bureau of Mines."

10. Section 25.10 (d) is amended by deleting the words "through the Director's office" and substituting the words "by letter from the Bureau of Mines."

(Sec. 5, 36 Stat. 370, as amended, 30 U. S. C. 7. Interpret or apply secs. 2, 3, 36 Stat. 370, as amended, 30 U. S. C. 3, 5)

DOUGLAS MCKAY,
Secretary of the Interior.

TITLE 43—PUBLIC LANDS: INTERIOR

Chapter I—Bureau of Land Management, Department of the Interior

Appendix C—Public Land Orders

[Public Land Order 1117]

FLORIDA

WITHDRAWING PUBLIC LAND FOR USE OF DEPARTMENT OF THE ARMY IN CONNECTION WITH JIM WOODRUFF RESERVOIR PROJECT

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

Subject to valid existing rights, the following-described public land in Florida is hereby withdrawn from all forms of appropriation under the public-land laws, including the mining and mineral-leasing laws, and reserved for use in connection with the Jim Woodruff Reservoir Project, under the supervision of the Department of the Army, as authorized by the Rivers and Harbors Act of July 24, 1946 (60 Stat. 634):

TALLAHASSEE MERIDIAN

T. 7 N., R. 8 W.,
Sec. 36, N½ of lot 3.

The tract described contains 40 acres.

ORME LEWIS,
Assistant Secretary of the Interior.

APRIL 12, 1955.

[F. R. Doc. 55-3174; Filed, Apr. 18, 1955; 8:46 a. m.]

[Public Land Order 1118]

UTAH

PARTIALLY REVOKING EXECUTIVE ORDER OF MARCH 9, 1914, CREATING PUBLIC WATER RESERVE NO. 16, UTAH NO. 7

By virtue of the authority vested in the President by section 1 of the act of June 25, 1910 (36 Stat. 847; 43 U. S. C. 141), and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

The Executive order of March 9, 1914, creating Public Water Reserve No. 16, Utah No. 7, as construed by Department of the Interior Interpretation No. 17, of June 9, 1925, is hereby revoked so far as it affects the following-described public land:

SALT LAKE MERIDIAN

T. 5 S., R. 24 E.,
Sec. 29, SW¼SW¼.

The area described contains 40 acres.

This revocation is made in furtherance of an exchange under the act of March 11, 1948 (62 Stat. 72) by which the offered lands will benefit a Federal land program. This restoration is, therefore, not subject to the provisions contained in the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284) as amended, granting preference rights to veterans of World War II and the Korean conflict, and others.

ORME LEWIS,
Assistant Secretary of the Interior.

APRIL 12, 1955.

[F. R. Doc. 55-3177; Filed, Apr. 18, 1955; 8:47 a. m.]

[Public Land Order 1119]

NEW MEXICO

RESERVING LANDS WITHIN THE GILA NATIONAL FOREST FOR USE OF THE FOREST SERVICE AS ADMINISTRATIVE SITES AND RECREATION AREAS

By virtue of the authority vested in the President by the act of June 4, 1897 (30 Stat. 34, 36; 16 U. S. C. 473) and otherwise, and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

Subject to valid existing rights, the following-described public lands within the Gila National Forest in New Mexico are hereby withdrawn from all forms of appropriation under the public-land laws, including the mining but not the mineral-leasing laws, and reserved for use of the Forest Service, Department of Agriculture, as administrative sites and recreation areas:

NEW MEXICO PRINCIPAL MERIDIAN

BEN LILLY RECREATION AREA

T. 10 S., R. 17 W. (unsurveyed),
Sec. 33, N½NE¼SE¼, SW¼NE¼SE¼, S½NW¼SE¼, NW¼SW¼SE¼;
Sec. 34, SW¼SW¼NW¼, NW¼NW¼SW¼.

The areas described aggregate 80 acres.

BEN LILLY MONUMENT RECREATION AREA

T. 16 S., R. 14 W.
Sec. 24, E½SE¼SW¼, W½SW¼SE¼.

The area described contains 40 acres.

CAMP TUFF MOSES RECREATION AREA (BOY SCOUT CAMP)

T. 15 S., R. 13 W.,
Sec. 27, SW¼SW¼;
Sec. 34, E½NW¼NW¼, W½NE¼NW¼.

The areas described aggregate 80 acres.

GLENWOOD RANGER STATION ADMINISTRATIVE SITE

T. 11 S., R. 20 W.,
Sec. 26, lot 6;
Sec. 27, lot 5;
Sec. 34, NE¼NE¼.

The areas described aggregate 114.73 acres.

INDIAN CREEK RECREATION AREA

T. 10 S., R. 17 W. (unsurveyed),
Sec. 28, SW¼SW¼;
Sec. 29, S½S½SE¼, S½SE¼SW¼;
Sec. 32, N½N½NW¼, N½NW¼NE¼.

The areas described aggregate 160 acres.

IRON CREEK FOREST CAMP RECREATION AREA

T. 16 S., R. 9 W. (unsurveyed),
Sec. 17, W½SW¼SW¼;
Sec. 18, S½SE¼;
Sec. 19, N½N½N½NE¼;
Sec. 20, NW¼NW¼NW¼.

The areas described aggregate 130 acres.

LITTLE DRY FOREST CAMP RECREATION AREA

T. 13 S., R. 19 W.,
Sec. 8, S½SE¼NE¼, N½NE¼SE¼.

The area described contains 40 acres.

LITTLE WALNUT PICNIC GROUND RECREATION AREA

T. 17 S., R. 14 W.,
Sec. 3, S½SE¼, S½N½SE¼;
Sec. 10, N½N½NE¼.

The areas described aggregate 160 acres.

NEGRITO TOWER PICNIC GROUND RECREATION AREA

T. 10 S., R. 17 W. (unsurveyed),
Sec. 2, S½S½SE¼.

The area described contains 40 acres.

PINE FLAT RECREATION AREA

T. 15 S., R. 13 W.,
Sec. 29, NW¼NW¼.

The area described contains 40 acres.

SIGNAL PEAK ADMINISTRATIVE SITE

T. 16 S., R. 13 W.,
Sec. 15, NE¼NW¼.

The area described contains 40 acres.

SNOW CREEK ADMINISTRATIVE SITE

T. 15 S., R. 14 W. (unsurveyed),
Sec. 18, SW¼NE¼.

The area described contains 40 acres.

SOUTHWESTERN BAPTIST ASSOCIATION, INC., ORGANIZATION CAMP (RECREATION AREA)

T. 11 S., R. 20 W.,
Sec. 23, lots 6 and 9.

The area described contains 71.12 acres.

UPPER AND LOWER BLACK CANYON CAMPGROUND RECREATION AREA

T. 13 S., R. 11 W.,
Sec. 7, lots 1 and 2.
T. 13 S., R. 12 W.,
Sec. 12, S½N½NE¼, S½NE¼.

The areas described aggregate 206.44 acres.

WHITE CREEK ADMINISTRATIVE SITE

T. 12 S., R. 16 W. (unsurveyed),
Sec. 1, E½SW¼, W½SE¼.

The area described contains 160 acres.

WHITEWATER FOREST CAMP RECREATION AREA

T. 11 S., R. 19 W.,
Sec. 6, lots 14, 15, 18 and 19.

The area described contains 155.05 acres.

WILLOW CREEK ADMINISTRATIVE SITE

T. 10 S., R. 17 W (unsurveyed),
Sec. 34, E½SW¼NW¼, SE¼NW¼, S½NE¼NW¼, SW¼NW¼NE¼, W½SW¼NE¼.

The areas described aggregate 110 acres.

WILLOW CREEK RECREATION AREA

T. 10 S., R. 17 W. (unsurveyed),
Sec. 26, W½SW¼, W½NE¼SW¼, S½SW¼NW¼, SW¼SE¼NW¼, N½SE¼NW¼;
Sec. 34, E½SW¼NE¼, NW¼SE¼NE¼, SE¼NW¼NE¼, NE¼NE¼;
Sec. 35, N½NW¼NW¼.

The areas described aggregate 250 acres.

WRIGHT'S CABIN FOREST CAMP RECREATION AREA

T. 16 S., R. 9 W. (unsurveyed),
Sec. 16, SE¼SE¼NW¼, E½NE¼SW¼, S½SW¼NE¼, SW¼SE¼NE¼, W½NE¼SE¼, NW¼SE¼.

The areas described aggregate 120 acres.

This order shall take precedence over but not otherwise affect the existing reservation of the lands for national forest purposes and shall be subject to existing reservations of the lands for power site purposes.

ORME LEWIS,
Assistant Secretary of the Interior.

APRIL 12, 1955.

[Public Land Order 1120]

NEW MEXICO

RESERVING LANDS WITHIN CARSON NATIONAL FOREST FOR USE OF THE FOREST SERVICE AS ADMINISTRATIVE SITES, RECREATION AREAS, OR FOR OTHER PUBLIC PURPOSES

By virtue of the authority vested in the President by the act of June 4, 1897 (30 Stat. 34, 36; 16 U. S. C. 473) and otherwise, and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

Subject to valid existing rights, the following-described public lands within the Carson National Forest in New Mexico are hereby withdrawn from all forms of appropriation under the public-land laws, including the mining but not the mineral-leasing laws, and reserved for use of the Forest Service, Department of Agriculture, as administrative sites, recreation areas, or for other public purposes as indicated:

NEW MEXICO PRINCIPAL MERIDIAN

AGUA PIEDRA WINTER SPORTS AREA

T. 22 N., R. 13 E.,
Sec. 14, lots 2, 3, 4, and those portions of SE¼SW¼, SW¼SE¼, SE¼SE¼ within the Santa Barbara Grant Survey;
Sec. 23, lot 1, NE¼NW¼, N½SE¼NW¼, NW¼NE¼, N½SW¼NE¼, NW¼SE¼NE¼, SW¼NE¼NE¼, including that portion of the N½NE¼NE¼ within the Santa Barbara Grant Survey;
Sec. 24, lot 2 and that portion of the NW¼NW¼NW¼ within the Santa Barbara Grant Survey.

The tracts described aggregate approximately 305 acres.

CAPULIN, LA SOMBRA AND CAVE RECREATION AREA

T. 25 N., R. 14 E.,
Sec. 29, S½NE¼SW¼, S½NW¼SW¼, NW¼NW¼SW¼;
Sec. 30, N½SE¼, S½SW¼NE¼.

The tracts described aggregate 150 acres.

COMALES FOREST CAMP

T. 22 N., R. 13 E.,
Sec. 7, lot 1 and those portions of the E½NW¼NE¼, NE¼NE¼, N½SE¼NE¼, SE¼SE¼NE¼ located within the Santa Barbara Grant Survey;
Sec. 8, That portion of the W½SW¼NW¼ located within the Santa Barbara Grant Survey.

The tracts described aggregate approximately 110 acres.

DIVISADERO PEAK PICNIC GROUND

T. 25 N., R. 13 E.,
Sec. 14, S½SE¼SW¼;
Sec. 23, N½NE¼NW¼.

The tracts described aggregate 40 acres.

EAGLE ROCK FOREST CAMP

T. 29 N., R. 13 E. (unsurveyed),
Sec. 33, SW¼SE¼.

The tract described contains 40 acres.

ELEPHANT ROCK FOREST CAMP

T. 29 N., R. 14 E.,
Sec. 33, SW¼NE¼.

The tract described contains 40 acres.

FLECHADO FOREST CAMP

T. 22 N., R. 13 E.,
Sec. 10, lot 4 and those portions of the S½SE¼ located within the Santa Barbara Grant Survey.

The tracts described aggregate approximately 80 acres.

FOREST CAMP B—CUCHILLO DEL MEDIO

T. 27 N., R. 13 E.,
Sec. 22, N½SW¼SE¼, E½NW¼SE¼, W½NE¼SE¼.

The tracts described aggregate 60 acres.

GOAT HILL FOREST CAMP

T. 28 N., R. 13 E.,
Sec. 3, SE¼SE¼NW¼, SW¼SW¼NE¼, NW¼NW¼SE¼, NE¼NE¼SW¼.

The tracts described aggregate 40 acres.

JUNE BUG MILL FOREST CAMP

T. 29 N., R. 14 E.,
Sec. 34, SE¼NW¼.

The tract described contains 40 acres.

LA BOBITA FOREST CAMP

T. 29 N., R. 14 E.,
Sec. 32. S½NW¼SE¼, N½SW¼SE¼.

The tracts described aggregate 40 acres.

LEROUX AND TWINNING FOREST CAMP

T. 27 N., R. 14 E. (unsurveyed),
Sec. 4, S½S½SW¼, S½S½SE¼;
Sec. 5, SE¼SW¼SE¼, S½SE¼SE¼;
Sec. 8, N½NE¼NE¼, NE¼NW¼NE¼, except 0.52 acre in conflict with HES 82;
Sec. 9, NW¼NW¼NE¼, N½N½NW¼.

The tracts described aggregate 189.48 acres.

LOWER HONDO FOREST CAMP A

T. 27 N., R. 13 E.,
Sec. 27, S½NW¼NW¼, N½SW¼SW¼.

The tracts described aggregate 40 acres.

MALLETTE CANYON PUBLIC SERVICE SITE

T. 29 N., R. 14 E.,
Sec. 24, unsurveyed, SE¼SE¼SW¼, SW¼SW¼SE¼;

Sec. 25, NW¼NW¼NE¼, E½NW¼, S½NW¼SE¼, W½NE¼SE¼, SW¼SE¼, E½SW¼, except area in conflict with Ethel Lode and Mary Ann Lode Mining Claims;
Sec. 36, NE¼NW¼, excepting that portion in conflict with Ethel Lode Mining Claim, lots 1 and 2, SE¼NW¼NW¼.

The tracts described aggregate approximately 350 acres.

MANZANITA FOREST CAMP C

T. 27 N., R. 13 E.,
Sec. 13, SE¼NW¼, SE¼NE¼NW¼, SW¼NW¼NE¼, NW¼SW¼NE¼,
Excepting approximately 16.40 acres of private land.

The tracts described aggregate 53.60 acres.

SANTA BARBARA FOREST CAMP

T. 22 N., R. 12 E (unsurveyed),
Sec. 36, E½E½SE¼, E½SE¼NE¼, NW¼SE¼NE¼, SW¼NE¼NE¼.
T. 22 N., R. 13 E.,
Sec. 31, W½SW¼.

The tracts described aggregate 160 acres.

TAOS CANYON RECREATION AREA

T. 25 N., R. 13 E.,
Sec. 22, S½SE¼SE¼, S½SW¼SE¼;
Sec. 23, N½SW¼SE¼, N½SE¼SW¼, SW¼SE¼SW¼, SW¼SW¼;
Sec. 27, NW¼NE¼, NE¼NW¼, S½NW¼NW¼.

The tracts described aggregate 230 acres.

TRUCHA VISTA POINT

T. 21 N., R. 11 E. (unsurveyed),
Sec. 18, SE¼NE¼NE¼, NE¼SE¼NE¼.

The tracts described aggregate 20 acres.

JICARILLA RANGER STATION

T. 29 N., R. 4 W.,
Sec. 1, lots 7, 8, 12, 13, 15, S½NE¼SE¼, SE¼SE¼;
Sec. 12, lot 1, N½N½NE¼.

The tracts described aggregate 261.84 acres.

This order shall take precedence over but not otherwise affect the existing reservation of the lands for national forest purposes.

ORME LEWIS,
Assistant Secretary of the Interior.

[Public Land Order 1121]

MISSOURI

REVOKING EXECUTIVE ORDER OF SEPTEMBER 19, 1898 WHICH RESERVED LANDS FOR USE OF WAR DEPARTMENT AS TARGET RANGE FOR TROOPS AT JEFFERSON BARRACKS, MISSOURI

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

The Executive Order of September 19, 1898, reserving the following-described lands in Iron County, Missouri for use of the War Department as a target range for troops stationed at Jefferson Barracks, Missouri, is hereby revoked:

FIFTH PRINCIPAL MERIDIAN

T. 33 N., R. 4 E.,
Sec. 15, S½SE¼, SE¼NE¼;
Sec. 22, NW¼NE¼.

The lands are within the boundaries of the Clark National Forest as established by Proclamation No. 2363 of September 11, 1939, and upon the signing of this order will become subject to administration by the Department of Agriculture as a part of the Clark National Forest, in accordance with the provisions of said Proclamation.

The lands shall become subject to the public-land laws relating to national forest lands at 10:00 a. m. on the 35th day after the date of this order.

ORME LEWIS,
Assistant Secretary of the Interior.

APRIL 12, 1955.

TITLE 50—WILDLIFE

Chapter I—Fish and Wildlife Service, Department of the Interior

Subchapter F—Alaska Commercial Fisheries

MISCELLANEOUS AMENDMENTS

Basis and purposes. On the basis of information developed at public hearings and scientific data secured by Fish and Wildlife Service personnel, it has been determined that the following amendments to the Alaska Commercial Fisheries Regulations are necessary to provide for proper utilization and conservation of the fishery resources of the Territory.

These changes shall become effective immediately upon publication in the FEDERAL REGISTER.

Since immediate action is necessary, notice and public procedure on these amendments are impracticable (60 Stat. 237; 5 U. S. C. 1001 et seq.).

Public law 12, 84th Congress, 69 Stat. 12, having been approved March 16, 1955, exempting gill nets which have been set, anchored or staked, from the distance interval requirement for fixed gear in section 3 of the act of June 6, 1924, as amended, no changes in regulations with respect to the distance interval between set nets are required.

PART 104—BRISTOL BAY AREA

Section 104.3 is amended in text in paragraphs (a), (b), (c), (d), and (e) by inserting "12:00 noon" immediately prior to "June 25" wherever it appears.

PART 105—ALASKA PENINSULA AREA

Section 105.5 is amended in paragraph (b) to read as follows:

(b) Except Port Moller and Bear River districts, from 6 o'clock postmeridian Tuesday to 6 o'clock antemeridian Thursday prior to July 5.

PART 107—CHIGNIK AREA

Section 107.14 is amended by suspending paragraphs (a), (b), (c), and (d) through December 31, 1955.

PART 109—COOK INLET AREA

1. Section 109.4a is amended in text by changing the period to a colon, and adding the following proviso: "*Provided*, That this shall not apply to Chinitna Bay".

2. Section 109.15 is hereby deleted.

3. A new section designated § 109.15a is added to read as follows:

§ 109.15a *Sites open to traps, Northern district.* The use of any trap is prohibited except at the following sites describing the location of the tailhold and direction of the lead, and at such sites no other type of gear may be fished after 6 o'clock antemeridian June 25:

(a) Along the western shore:

(1) At 61 degrees 09 minutes 27 seconds north latitude, 151 degrees 02 minutes 59 seconds west longitude; Direction of lead, south 65 degrees 00 minutes east.

(2) At 61 degrees 07 minutes 46 seconds north latitude, 151 degrees 04 minutes 43 seconds west longitude; Direction of lead, south 65 degrees 01 minute east.

(3) At 61 degrees 00 minutes 48 seconds north latitude, 151 degrees 23 minutes 44 seconds west longitude; Direction of lead, south 3 degrees 50 minutes west.

(4) At 61 degrees 00 minutes 43 seconds north latitude, 151 degrees 22 minutes 39 seconds west longitude; Direction of lead, south 0 degrees 20 minutes west.

(b) Along the eastern shore:

(1) At 61 degrees 01 minute 11 seconds north latitude, 150 degrees 26 minutes 39 seconds west longitude; Direction of lead, north 32 degrees west.

(2) At 60 degrees 55 minutes 37 seconds north latitude, 150 degrees 44 minutes 03 seconds west longitude; Direction of lead, north 34 degrees west.

4. A new section designated § 109.15b is added to read as follows:

§ 109.15b *Sites open to traps, North Central district.* The use of any trap is prohibited except at the following sites describing the location of the tailhold and Direction of the lead, and at such sites no other type of gear may be fished after 6 o'clock antemeridian June 25:

(a) Along the western shore:

(1) At 60 degrees 46 minutes 02 seconds north latitude, 151 degrees 44 minutes 32 seconds west longitude; Direction of lead, north 60 degrees 30 minutes east.

(2) At 60 degrees 24 minutes 11 seconds north latitude, 152 degrees 15 minutes 13 seconds west longitude; Direction of lead, north 32 degrees 30 minutes east.

(b) On Kalgin Island:

(1) At 60 degrees 30 minutes 33 seconds north latitude, 151 degrees 56 minutes 53 seconds west longitude; Direction of lead, south 80 degrees west.

(2) At 60 degrees 30 minutes 36 seconds north latitude, 151 degrees 54 minutes 35 seconds west longitude; Direction of lead, north 33 degrees east.

(3) At 60 degrees 30 minutes 05 seconds north latitude, 151 degrees 52 minutes 59 seconds west longitude; Direction of lead, north 25 degrees east.

(4) At 60 degrees 26 minutes 49 seconds north latitude, 151 degrees 53 minutes 09 seconds west longitude; Direction of lead, south 75 degrees east.

(5) At 60 degrees 21 minutes 44 seconds north latitude, 152 degrees 03 minutes 51 seconds west longitude; Direction of lead, north 10 degrees west.

(c) Along the eastern shore:

(1) At 60 degrees 45 minutes 58 seconds north latitude, 151 degrees 15 minutes 28 seconds west longitude; Direction of lead, north 84 degrees west.

(2) At 60 degrees 44 minutes 44 seconds north latitude, 151 degrees 17 minutes 21 seconds west longitude; Direction of lead, north 28 degrees west.

(3) At 60 degrees 44 minutes 30 seconds north latitude, 151 degrees 18 minutes 16 seconds west longitude; Direction of lead, north 26 degrees west.

(4) At 60 degrees 39 minutes 58 seconds north latitude, 151 degrees 22 minutes 28 seconds west longitude; Direction of lead, south 60 degrees 30 minutes west.

(5) At 60 degrees 39 minutes 33 seconds north latitude, 151 degrees 21 minutes 57 seconds west longitude; Direction of lead, south 56 degrees west.

(6) At 60 degrees 38 minutes 56 seconds north latitude, 151 degrees 21 minutes 24 seconds west longitude; Direction of lead, south 70 degrees west.

(7) At 60 degrees 38 minutes 15 seconds north latitude, 151 degrees 20 minutes 59 seconds west longitude; Direction of lead, south 73 degrees 30 minutes west.

(8) At 60 degrees 37 minutes 46 seconds north latitude, 151 degrees 20 minutes 45 seconds west longitude; Direction of lead, south 78 degrees 40 minutes west.

(9) At 60 degrees 37 minutes 09 seconds north latitude, 151 degrees 20 minutes 33 seconds west longitude; Direction of lead, south 79 degrees 15 minutes west.

(10) At 60 degrees 36 minutes 27 seconds north latitude, 151 degrees 20 minutes 25 seconds west longitude; Direction of lead, south 81 degrees 40 minutes west.

(11) At 60 degrees 35 minutes 51 seconds north latitude, 151 degrees 20 minutes 12 seconds west longitude; Direction of lead, south 80 degrees west.

(12) At 60 degrees 29 minutes 05 seconds north latitude, 151 degrees 16 minutes 44 seconds west longitude; Direction of lead, north 87 degrees 35 minutes west.

(13) At 60 degrees 28 minutes 28 seconds north latitude, 151 degrees 16 minutes 49 seconds west longitude; Direction of lead, north 85 degrees 20 minutes west.

(14) At 60 degrees 27 minutes 49 seconds north latitude, 151 degrees 16 minutes 51 seconds west longitude; Direction of lead, north 87 degrees 56 minutes west.

(15) At 60 degrees 27 minutes 17 seconds north latitude, 151 degrees 16 minutes 52 seconds west longitude; Direction of lead, north 84 degrees 50 minutes west.

(16) At 60 degrees 26 minutes 47 seconds north latitude, 151 degrees 16 minutes 53 seconds west longitude; Direction of lead, north 81 degrees 30 minutes west.

(17) At 60 degrees 26 minutes 18 seconds north latitude, 151 degrees 17 minutes 02 seconds west longitude; Direction of lead, north 84 degrees 05 minutes west.

5. A new section designated § 109.15c is added to read as follows:

§ 109.15c *Sites open to traps, South Central district.* The use of any trap is prohibited except at the following sites describing the location of the tailhold and direction of the lead, and at such sites no other type of gear may be fished:

(a) On Chisik Island:

(1) At 60 degrees 08 minutes 21 seconds north latitude, 152 degrees 33 minutes 29 seconds west longitude; Direction of lead, north 71 degrees east.

(b) Along the eastern shore:

(1) At 60 degrees 20 minutes 00 seconds north latitude, 151 degrees 22 minutes 57 seconds west longitude; Direction of lead, north 83 degrees west.

(2) At 60 degrees 16 minutes 43 seconds north latitude, 151 degrees 23 minutes 02 seconds west longitude; Direction of lead, north 81 degrees 25 minutes west.

(3) At 60 degrees 16 minutes 10 seconds north latitude, 151 degrees 23 minutes 13 seconds west longitude; Direction of lead, north 75 degrees 30 minutes west.

(4) At 60 degrees 14 minutes 58 seconds north latitude, 151 degrees 23 minutes 38 seconds west longitude; Direction of lead, north 71 degrees 10 minutes west.

(5) At 60 degrees 13 minutes 09 seconds north latitude, 151 degrees 24 minutes 51 seconds west longitude; Direction of lead, north 61 degrees 34 minutes west.

(6) At 60 degrees 12 minutes 41 seconds north latitude, 151 degrees 25 minutes 25 seconds west longitude; Direction of lead, north 50 degrees 25 minutes west.

(7) At 60 degrees 11 minutes 20 seconds north latitude, 151 degrees 27 minutes 27 seconds west longitude; Direction of lead, north 53 degrees 35 minutes west.

(8) At 60 degrees 10 minutes 22 seconds north latitude, 151 degrees 28 minutes 47 seconds west longitude; Direction of lead, north 48 degrees 51 minutes west.

(9) At 60 degrees 09 minutes 45 seconds north latitude, 151 degrees 29 minutes 36 seconds west longitude; Direction of lead, north 55 degrees west.

(10) At 60 degrees 09 minutes 19 seconds north latitude, 151 degrees 30 minutes 10 seconds west longitude; Direction of lead, north 54 degrees west.

(11) At 60 degrees 08 minutes 54 seconds north latitude, 151 degrees 30 minutes 42 seconds west longitude; Direction of lead, north 54 degrees west.

(12) At 60 degrees 07 minutes 57 seconds north latitude, 151 degrees 32 minutes 06 seconds west longitude; Direction of lead, north 47 degrees west.

(13) At 60 degrees 07 minutes 05 seconds north latitude, 151 degrees 33 minutes 57 seconds west longitude; Direction of lead, north 45 degrees west.

(14) At 60 degrees 06 minutes 32 seconds north latitude, 151 degrees 35 minutes 05 seconds west longitude; Direction of lead, north 40 degrees west.

(15) At 60 degrees 06 minutes 07 seconds north latitude, 151 degrees 36 minutes 04 seconds west longitude; Direction of lead, north 40 degrees west.

(16) At 60 degrees 05 minutes 26 seconds north latitude, 151 degrees 37 minutes 19 seconds west longitude; Direction of lead, north 68 degrees 22 minutes west.

(17) At 60 degrees 04 minutes 56 seconds north latitude, 151 degrees 37 minutes 49 seconds west longitude; Direction of lead, north 58 degrees 50 minutes west.

(18) At 59 degrees 59 minutes 41 seconds north latitude, 151 degrees 43 minutes 14 seconds west longitude; Direction of lead, north 80 degrees west.

(19) At 59 degrees 54 minutes 16 seconds north latitude, 151 degrees 46 minutes 00 seconds west longitude; Direction of lead, north 70 degrees west.

(20) At 59 degrees 51 minutes 15 seconds north latitude, 151 degrees 48 minutes 03 seconds west longitude; Direction of lead, north 74 degrees west.

6. A new section designated § 109.15d is added to read as follows:

§ 109.15d *Sites open to traps, Southern district.* The use of any trap is prohibited except at the following sites describing the location of the tailhold and direction of the lead, and at such sites no other type of gear may be fished:

(a) Along the eastern shore:

(1) At 59 degrees 41 minutes 49 seconds north latitude, 151 degrees 46 minutes 22 seconds west longitude; Direction of lead, south 43 degrees west.

(2) At 59 degrees 28 minutes 56 seconds north latitude, 151 degrees 34 min-

utes 40 seconds west longitude; Direction of lead, north 43 degrees west.

(3) At 59 degrees 26 minutes 50 seconds north latitude, 151 degrees 45 minutes 56 seconds west longitude; Direction of lead, north 26 degrees east.

(4) At 59 degrees 19 minutes 47 seconds north latitude, 151 degrees 57 minutes 38 seconds west longitude; Direction of lead, north 69 degrees west.

7. A new section designated § 109.15e is added to read as follows:

§ 109.15e *Areas open to set nets, Northern district.* The use of any set net is prohibited, except in the following areas: *Provided*, That in the period prior to 6 o'clock antemeridian June 25 such nets may be used in all waters of the district open to commercial fishing:

(a) Waters along the north and west coast:

(1) From Point Mackenzie to 61 degrees 09 minutes 32 seconds north latitude, 151 degrees 02 minutes 54 seconds west longitude.

(2) From 61 degrees 09 minutes 22 seconds north latitude, 151 degrees 03 minutes 07 seconds west longitude, to 61 degrees 07 minutes 52 seconds north latitude, 151 degrees 04 minutes 38 seconds west longitude.

(3) From 61 degrees 07 minutes 41 seconds north latitude, 151 degrees 04 minutes 47 seconds west longitude, to 61 degrees 00 minutes 50 seconds north latitude, 151 degrees 23 minutes 56 seconds west longitude.

(4) From 61 degrees 00 minutes 47 seconds north latitude, 151 degrees 23 minutes 32 seconds west longitude, to 61 degrees 00 minutes 44 seconds north latitude, 151 degrees 22 minutes 51 seconds west longitude.

(5) From 61 degrees 00 minutes 42 seconds north latitude, 151 degrees 22 minutes 27 seconds west longitude, to the southern boundary of the district at the latitude of Boulder Point at approximately 60 degrees 46 minutes 25 seconds north latitude.

(b) Waters along the west coast of Fire Island from North Point to West Point:

(c) Waters along the east coast:

(1) From Point Possession to 61 degrees 01 minute 14 seconds north latitude, 150 degrees 26 minutes, 30 seconds west longitude.

(2) From 61 degrees 01 minute 07 seconds north latitude, 150 degrees 26 minutes 48 seconds west longitude, to 60 degrees 55 minutes 40 seconds north latitude, 150 degrees 43 minutes 53 seconds west longitude.

(3) From 60 degrees 55 minutes 34 seconds north latitude, 150 degrees 44 minutes 13 seconds west longitude, to the southern boundary of the district at the latitude of Boulder Point.

8. A new section designated § 109.15f is added to read as follows:

§ 109.15f *Areas open to set nets, North Central district.* The use of any set net is prohibited, except in the following areas: *Provided*, That in the period prior to 6 o'clock antemeridian June 25 such nets may be used in all waters of the district open to commercial fishing:

(a) Waters along the west coast:

(1) From the northern boundary of the district at the latitude of Boulder Point at approximately 60 degrees 46 minutes 25 seconds north latitude, to 60 degrees 46 minutes 08 seconds north latitude, 151 degrees 44 minutes 37 seconds west longitude.

(2) From 60 degrees 45 minutes 56 seconds north latitude, 151 degrees 44 minutes 27 seconds west longitude, to 60 degrees 24 minutes 14 seconds north latitude, 152 degrees 15 minutes 23 seconds west longitude.

(3) From 60 degrees 24 minutes 08 seconds north latitude, 152 degrees 15 minutes 03 seconds west longitude, to the southern boundary of the district at the latitude of the marker at the south limit of the closed area at Kasilof River.

(b) Waters along the coast of Kalgin Island:

(1) From 60 degrees 30 minutes 39 seconds north latitude, 151 degrees 56 minutes 57 seconds west longitude, to 60 degrees 30 minutes 39 seconds north latitude, 151 degrees 54 minutes 45 seconds west longitude.

(2) From 60 degrees 30 minutes 33 seconds north latitude, 151 degrees 54 minutes 25 seconds west longitude, to 60 degrees 30 minutes 07 seconds north latitude, 151 degrees 53 minutes 10 seconds west longitude.

(3) From 60 degrees 30 minutes 03 seconds north latitude, 151 degrees 52 minutes 48 seconds west longitude, to 60 degrees 26 minutes 55 seconds north latitude, 151 degrees 53 minutes 09 seconds west longitude.

(4) From 60 degrees 26 minutes 43 seconds north latitude, 151 degrees 53 minutes 12 seconds west longitude, to 60 degrees 21 minutes 45 seconds north latitude, 152 degrees 04 minutes 03 seconds west longitude.

(5) From 60 degrees 21 minutes 44 seconds north latitude, 152 degrees 03 minutes 39 seconds west longitude, to 60 degrees 30 minutes 28 seconds north latitude, 151 degrees 56 minutes 48 seconds west longitude.

(c) Waters along the east coast:

(1) From the northern boundary of the district at the latitude of Boulder Point at approximately 60 degrees 46 minutes 25 seconds north latitude, to 60 degrees 46 minutes 04 seconds north latitude, 151 degrees 15 minutes 28 seconds west longitude.

(2) From 60 degrees 45 minutes 52 seconds north latitude, 151 degrees 15 minutes 27 seconds west longitude, to 60 degrees 44 minutes 46 seconds north latitude, 151 degrees 17 minutes 10 seconds west longitude.

(3) From 60 degrees 44 minutes 41 seconds north latitude, 151 degrees 17 minutes 31 seconds west longitude, to 60 degrees 44 minutes 32 seconds north latitude, 151 degrees 18 minutes 05 seconds west longitude.

(4) From 60 degrees 44 minutes 29 seconds north latitude, 151 degrees 18 minutes 28 seconds west longitude, to 60 degrees 40 minutes 03 seconds north latitude, 151 degrees 22 minutes 34 seconds west longitude.

(5) From 60 degrees 39 minutes 53 seconds north latitude, 151 degrees 22 minutes 21 seconds west longitude, to 60 degrees 39 minutes 38 seconds north latitude, 151 degrees 22 minutes 02 seconds west longitude.

(6) From 60 degrees 39 minutes 28 seconds north latitude, 151 degrees 21 minutes 51 seconds west longitude, to 60 degrees 39 minutes 02 seconds north latitude, 151 degrees 21 minutes 27 seconds west longitude.

(7) From 60 degrees 38 minutes 50 seconds north latitude, 151 degrees 21 minutes 20 seconds west longitude, to 60 degrees 38 minutes 21 seconds north latitude, 151 degrees 21 minutes 02 seconds west longitude.

(8) From 60 degrees 38 minutes 09 seconds north latitude, 151 degrees 20 minutes 56 seconds west longitude, to 60 degrees 37 minutes 52 seconds north latitude, 151 degrees 20 minutes 47 seconds west longitude.

(9) From 60 degrees 37 minutes 40 seconds north latitude, 151 degrees 20 minutes 42 seconds west longitude, to 60 degrees 37 minutes 15 seconds north latitude, 151 degrees 20 minutes 33 seconds west longitude.

(10) From 60 degrees 37 minutes 03 seconds north latitude, 151 degrees 20 minutes 33 seconds west longitude, to 60 degrees 36 minutes 33 seconds north latitude, 151 degrees 20 minutes 26 seconds west longitude.

(11) From 60 degrees 36 minutes 21 seconds north latitude, 151 degrees 20 minutes 22 seconds west longitude, to 60 degrees 35 minutes 57 seconds north latitude, 151 degrees 20 minutes 14 seconds west longitude.

(12) From 60 degrees 35 minutes 45 seconds north latitude, 151 degrees 20 minutes 10 seconds west longitude, to the northern Fish and Wildlife Service marker at the mouth of the Kenai River.

(13) From the southern Fish and Wildlife Service marker at the mouth of the Kenai River to 60 degrees 29 minutes 11 seconds north latitude, 151 degrees 16 minutes 43 seconds west longitude.

(14) From 60 degrees 28 minutes 59 seconds north latitude, 151 degrees 16 minutes 44 seconds west longitude, to 60 degrees 28 minutes 34 seconds north latitude, 151 degrees 16 minutes 48 seconds west longitude.

(15) From 60 degrees 28 minutes 22 seconds north latitude, 151 degrees 16 minutes 49 seconds west longitude, to 60 degrees 27 minutes 55 seconds north latitude, 151 degrees 16 minutes 51 seconds west longitude.

(16) From 60 degrees 27 minutes 43 seconds north latitude, 151 degrees 16 minutes 51 seconds west longitude, to 60 degrees 27 minutes 23 seconds north latitude, 151 degrees 16 minutes 51 seconds west longitude.

(17) From 60 degrees 27 minutes 11 seconds north latitude, 151 degrees 16 minutes 52 seconds west longitude, to 60 degrees 26 minutes 53 seconds north latitude, 151 degrees 16 minutes 51 seconds west longitude.

(18) From 60 degrees 26 minutes 41 seconds north latitude, 151 degrees 16 minutes 54 seconds west longitude, to 60 degrees 26 minutes 24 seconds north latitude, 151 degrees 17 minutes 00 seconds west longitude.

(19) From 60 degrees 26 minutes 12 seconds north latitude, 151 degrees 17 minutes 04 seconds west longitude to the northern Fish and Wildlife Service marker at the mouth of the Kasilof River.

(20) West of the Kasilof River mouth at least 1 statute mile.

9. A new section designated § 109.15g is added to read as follows:

§ 109.15g *Areas open to set nets, South Central district.* The use of any set net is prohibited, except in the following areas:

(a) Waters along the west coast:

(1) Mainland shore.

(2) Chisik Island, except between 60 degrees 08 minutes 27 seconds north latitude, 152 degrees 33 minutes 29 seconds west longitude, and 60 degrees 08 minutes 14 seconds north latitude, 152 degrees 33 minutes 34 seconds west longitude.

(b) Waters along the east coast:

(1) From the southern Fish and Wildlife Service marker at the mouth of the Kasilof River to 60 degrees 20 minutes 06 seconds north latitude, 151 degrees 22 minutes, 56 seconds west longitude.

(2) From 60 degrees 19 minutes 54 seconds north latitude, 151 degrees 22 minutes 18 seconds west longitude, to 60 degrees 16 minutes 49 seconds north latitude, 151 degrees 23 minutes 01 second west longitude.

(3) From 60 degrees 16 minutes 37 seconds north latitude, 151 degrees 23 minutes 03 seconds west longitude, to 60 degrees 16 minutes 16 seconds north latitude, 151 degrees 23 minutes 10 seconds west longitude.

(4) From 60 degrees 16 minutes 04 seconds north latitude, 151 degrees 23 minutes 16 seconds west longitude, to 60 degrees 15 minutes 04 seconds north latitude, 151 degrees 23 minutes 35 seconds west longitude.

(5) From 60 degrees 14 minutes 52 seconds north latitude, 151 degrees 23 minutes 40 seconds west longitude, to 60 degrees 13 minutes 14 seconds north latitude, 151 degrees 24 minutes 45 seconds west longitude.

(6) From 60 degrees 13 minutes 04 seconds north latitude, 151 degrees 24 minutes 56 seconds west longitude, to 60 degrees 12 minutes 46 seconds north latitude, 151 degrees 25 minutes 19 seconds west longitude.

(7) From 60 degrees 12 minutes 36 seconds north latitude, 151 degrees 25 minutes 32 seconds west longitude, to 60 degrees 11 minutes 25 seconds north latitude, 151 degrees 27 minutes 20 seconds west longitude.

(8) From 60 degrees 11 minutes 15 seconds north latitude, 151 degrees 27 minutes 34 seconds west longitude, to 60 degrees 10 minutes 27 seconds north latitude, 151 degrees 28 minutes 41 seconds west longitude.

(9) From 60 degrees 10 minutes 17 seconds north latitude, 151 degrees 28 minutes 53 seconds west longitude, to 60 degrees 09 minutes 50 seconds north latitude, 151 degrees 29 minutes 30 seconds west longitude.

(10) From 60 degrees 09 minutes 40 seconds north latitude, 151 degrees 29 minutes 42 seconds west longitude, to 60 degrees 09 minutes 24 seconds north latitude, 151 degrees 30 minutes 04 seconds west longitude.

(11) From 60 degrees 09 minutes 14 seconds north latitude, 151 degrees 30 minutes 16 seconds west longitude, to 60 degrees 08 minutes 59 seconds north latitude, 151 degrees 30 minutes 35 seconds west longitude.

(12) From 60 degrees 08 minutes 49 seconds north latitude, 151 degrees 30 minutes 49 seconds west longitude, to 60 degrees 08 minutes 01 second north latitude, 151 degrees 31 minutes 58 seconds west longitude.

(13) From 60 degrees 07 minutes 53 seconds north latitude, 151 degrees 32 minutes 14 seconds west longitude, to 60 degrees 07 minutes 09 seconds north latitude, 151 degrees 33 minutes 48 seconds west longitude.

(14) From 60 degrees 07 minutes 01 second north latitude, 151 degrees 34 minutes 06 seconds west longitude, to 60 degrees 06 minutes 36 seconds north latitude, 151 degrees 34 minutes 57 seconds west longitude.

(15) From 60 degrees 06 minutes 28 seconds north latitude, 151 degrees 35 minutes 15 seconds west longitude, to 60 degrees 06 minutes 11 seconds north latitude, 151 degrees 35 minutes 56 seconds west longitude.

(16) From 60 degrees 06 minutes 03 seconds north latitude, 151 degrees 36 minutes 13 seconds west longitude, to 60 degrees 05 minutes 31 seconds north latitude, 151 degrees 37 minutes 13 seconds west longitude.

(17) From 60 degrees 05 minutes 20 seconds north latitude, 151 degrees 37 minutes 24 seconds west longitude, to 60 degrees 05 minutes 01 second north latitude, 151 degrees 37 minutes 43 seconds west longitude.

(18) From 60 degrees 04 minutes 51 seconds north latitude, 151 degrees 37 minutes 55 seconds west longitude, to 59 degrees 59 minutes 47 seconds north latitude, 151 degrees 43 minutes 12 seconds west longitude.

(19) From 59 degrees 59 minutes 35 seconds north latitude, 151 degrees 43 minutes 16 seconds west longitude, to 59 degrees 54 minues 21 seconds north latitude, 151 degrees 45 minutes 55 seconds west longitude.

(20) From 59 degrees 54 minutes 11 seconds north latitude, 151 degrees 46 minutes 06 seconds west longitude, to 59 degrees 51 minutes 21 seconds north latitude, 151 degrees 48 minutes 00 seconds west longitude.

(21) From 59 degrees 51 minutes 09 seconds north latitude, 151 degrees 48 minutes 06 seconds west longitude to the southern boundary of the district at Anchor Point.

10. A new section designated § 109.15h is added to read as follows:

§ 109.15h *Areas open to set nets, Southern district.* The use of any set net is prohibited, except in the following areas:

(a) Waters along the west coast from the nothern boundary of the district at the latitude of Anchor Point to Tignagvik Point.

(b) Waters along the east coast:

(1) From the northern boundary of the district at Anchor Point to 59 degrees 41 minutes 53 seconds north latitude, 151 degrees 46 minutes 31 seconds west longitude.

(2) From 59 degrees 41 minutes 45 seconds north latitude, 151 degrees 46 minutes 13 seconds west longitude, to 59 degrees 29 minutes 00 seconds north latitude, 151 degrees 34 minutes 31 seconds west longitude.

(3) From 59 degrees 28 minutes 52 seconds north latitude, 151 degrees 34 minutes 49 seconds west longitude, to 59 degrees 26 minutes 48 seconds north latitude, 151 degrees 45 minutes 46 seconds west longitude.

(4) From 59 degrees 26 minutes 52 seconds north latitude, 151 degrees 46 minutes 06 seconds west longitude, to 59 degrees 19 minutes 53 seconds north latitude, 151 degrees 57 minutes 35 seconds west longitude.

(5) From 59 degrees 19 minutes 41 seconds north latitude, 151 degrees 57 minutes 42 seconds west longitude, to the southern boundary of the district.

11. A new section designated § 109.15i is added to read as follows:

§ 109.15i *Areas open to set nets, outer district.* All waters of the district otherwise open to fishing.

(Sec. 1, 43 Stat. 464, as amended; 48 U. S. C. 221)

DOUGLAS MCKAY,
Secretary of the Interior.

Chapter I—Interstate Commerce Commission

Subchapter B—Carriers by Motor Vehicle

[Ex Parte MC-40]

PART 190—GENERAL

QUALIFICATIONS AND MAXIMUM HOURS OF SERVICE OF EMPLOYEES OF MOTOR CARRIERS AND SAFETY OF OPERATION AND EQUIPMENT

At a general session of the Interstate Commerce Commission, held at its office in Washington, D. C., on the 4th day of April A. D. 1955.

Upon consideration of the record in the above-entitled proceeding, and of:

(1) Petition of Local Cartage National Conference, dated June 1, 1953, as amended June 25, 1953, for modification of and partial exemption from parts of § 190.33;

(2) Petition of Association of Team and Truck owners of the State of Missouri, dated July 17, 1953, for modification of and exemption from § 190.33;

and good cause appearing therefor:

It is ordered, That the applicability table which is a part of § 190.33 of the Motor Carrier Safety Regulations be, and it is hereby, amended as follows: Delete paragraphs A and B thereof and substitute the following in lieu thereof:

	Applicable parts of regulations						
	191	192	193	194 [1]	195	196	197
A. Vehicles and drivers used wholly within a municipality or the commercial zone thereof as defined by the Commission:							
1. When transporting explosives or other dangerous articles of such type and in such quantity as to require the vehicle to be specially marked or placarded under the Explosives and other Dangerous Articles Regulations, 49 CFR 77.823, or when operating without cargo under conditions which require the vehicle to be so marked or placarded under the cited regulations	Yes	Yes	Yes	Yes	Yes	Yes	Yes.
2. When operating under such conditions that special marking or placarding is not required under the regulations cited in paragraph A1 of this table	No	No	No	No	Yes	No	No.
B. Vehicles and drivers used beyond a municipality or the commercial zone thereof as defined by the Commission:							
1. When transporting explosives or other dangerous articles	Yes	Yes	Yes	Yes	Yes	Yes	Yes.
2. When not transporting explosives or other dangerous articles	Yes	Yes	Yes	Yes	Yes	Yes	No.

[1] Part 194 does not apply to private carriers.

It is further ordered, That except to the extent relief is being granted by the modifications set forth above, that the above-described petitions be, and they are hereby, denied.

And it is further ordered, That this order shall become effective May 20, 1955.

[1] This affects §§ 1470.3 (c) and 1467.4 (d).

Notice of this order shall be given to the general public by depositing a copy thereof in the office of the Secretary of the Commission, Washington, D. C., and by filing a copy thereof with the Director, Division of the Federal Register.

(49 Stat. 546, as amended; 49 U. S. C. 304)

By the Commission.

[SEAL] HAROLD D. McCOY,
Secretary.

[F. R. Doc. 55-3188; Filed, Apr. 18, 1955; 8:50 a. m.]

PART 203: DESTRUCTION OF RECORDS [1]

PART 203—CARRIERS AND BROKERS

CLASS I MOTOR CARRIERS

At a session of the Interstate Commerce Commission, Division 1, held at its office in Washington, D. C., on the 5th day of April A. D. 1955.

The matter of regulations to govern the destruction of carrier records being under consideration pursuant to provisions of section 220 (d) of the Interstate Commerce Act, as amended (49 Stat. 563, 54 Stat. 927, 49 U. S. C. 320); and,

It appearing that a notice dated February 21, 1955, was published in the FEDERAL REGISTER on March 3, 1955 (20 F. R. 1319) pursuant to section 4 of the Administrative Procedure Act, to the effect that revised regulations to govern the destruction of records of Class I motor carriers which were attached to the notice had been approved, and full consideration having been given to all views and comments received on or before March 31, 1955, as provided in the notice;

It is ordered, That the order of May 22, 1951, prescribing "Regulations to govern the preservation of records of Class I motor carriers, Issue of 1951," be and it is hereby vacated and set aside effective June 1, 1955; and,

It is further ordered, That:

(1) Regulations prescribed: Effective June 1, 1955, all Class I common and contract motor carriers of property and passengers which are subject to provisions of the Interstate Commerce Act are required to comply with the "Regulations to govern the destruction of records of Class I motor carriers, Issue of 1955," which are set forth below and made a part hereof, before destroying operating, accounting, or financial papers, records, books, blanks, tickets, stubs, correspondence, or documents.

(2) Notice: A copy of this order with the regulations set forth below shall be served on all Class I motor carriers subject to the act and upon every trustee, receiver, executor, administrator, or assignee of any such motor carrier, and notice shall be given to the general public by depositing a copy of the order and attached regulations in the office of the Secretary of the Commission at Washington, D. C., and by filing them with the Director of the Division of the Federal Register.

By the Commission, Division 1.

[SEAL] HAROLD D. McCOY,
Secretary.

[1] The heading "Part 203: Preservation of Records" is amended to read "Part 203: Destruction of Records."

CLASS I MOTOR CARRIERS

Sec.
203.301 Introduction.
203.302 Authority to destroy records.
203.303 Photographic copies.
203.304 Supervision of destruction.
203.305 Record of destroyed records.
203.306 Carriers going out of business.
203.307 Prescribed periods of retention.

AUTHORITY: §§ 203.301 to 203.307 issued under 49 Stat. 546, as amended; 49 U. S. C. 304. Interpret or apply secs. 220, 222, 49 Stat. 563, 564, as amended; 49 U. S. C. 320, 322.

§ 203.301 *Introduction.* Sections 203.301 to 203.307 specify the records and documents which may be destroyed and prescribe the length of time the same shall be preserved, but mention of a record or document hereinafter imposes no requirement that it shall be installed if its purpose is otherwise being adequately served. Compliance with §§ 203.301 to 203.307 will not exempt a carrier from statutory requirements, other than provisions of the Interstate Commerce Act, for retention of records or documents for periods longer than those prescribed in §§ 203.301 to 203.307.

§ 203.302 *Authority to destroy records*—(a) *General authority.* Class I motor carriers may destroy records or documents named or described in §§ 203.301 to 203.307 after they have been preserved for the prescribed periods of time. Permanent records are those which may not be destroyed without special authority.

(b) *Special authority.* A carrier proposing to destroy records or documents which are not named or described in §§ 203.301 to 203.307, or which if named or described have not been retained for the period required by the regulations, may request special authority to destroy them. Applications for such special authority shall describe in detail the records or documents to be destroyed and shall explain why their continued retention is unnecessary.

§ 203.303 *Photographic copies.* (a) Certain records and documents may be preserved on microfilm and the film retained in lieu of the original record or document, subject to the following limitations:

(1) The records listed in § 203.307 with a permanent retention period may not be destroyed after being photographed for preservation unless special authority is first secured as provided in § 203.302 (b).

(2) All records and documents listed in § 203.307, other than those excluded in subparagraph (1) of this paragraph, may be destroyed after they have been suitably photographed for preservation.

(b) To be acceptable in lieu of original records, photographic copies must meet the following minimum requirements:

(1) Photographic copies shall be no less readily accessible than the original record or document as normally filed or preserved would be, and suitable means or facilities shall be available to locate, identify, read, or reproduce such photographic copies. Photographic copies shall be preserved until the end of the period prescribed for the original records or documents.

(2) Any significant characteristic, feature, or other attribute of the original record or document, which photography in black and white will not preserve, shall be clearly indicated before the photograph is made.

(3) The reverse side of printed forms need not be copied if nothing has been added to the printed matter common to all such forms, but an identified specimen of such form shall be on the film for reference.

(4) Film used for photographing copies shall be of permanent record type meeting in all respects the minimum specifications of the National Bureau of Standards, and all processes recommended by the manufacturer shall be observed to protect it from deterioration or accidental destruction.

§ 203.304 *Supervision of destruction.* Within six months after the effective date of §§ 203.301 to 203.307, or within six months after becoming subject to this provision, each carrier shall appoint an officer or other responsible employee to supervise the destruction of records and documents. Such appointment shall be by formal corporate act or, if the carrier is not incorporated, by such formal act as would be necessary to execute a contract binding on the carrier.

§ 203.305 *Record of destroyed records.* The supervising officer or other designated employee shall maintain, or shall cause to be maintained, a record of all carrier records and documents which have been destroyed pursuant to §§ 203.301 to 203.307 except those the retention of which is optional with the carrier. The record shall be in such detail that the destroyed records or documents may be identified and the time, place, and method of destruction can be established. If the destruction is by accident or at the hand of someone not subject to the carrier's control, then the record shall include a statement of the relevant circumstances.

§ 203.306 *Carriers going out of business.* The records and documents relating to operations of a carrier subject to §§ 203.301 to 203.307 may be destroyed without regard to the prescribed periods of retention after carrier status is abandoned for purposes of the Interstate Commerce Act; provided however, (a) if the carrier is a corporation being dissolved by act of the authority which created it, the records may not be destroyed until dissolution is otherwise complete, and (b) if the carrier is not incorporated or is being kept alive for purposes other than carrier operations, records relating to former carrier operations may not be destroyed until all transactions relating to such operations are completed.

§ 203.307 *Prescribed periods of retention.* The following list describes the purpose for which a record is necessary and the prescribed periods shall be observed even if a record by some other name serves the described purpose. If identical copies of the same document serve more than one such described purpose, only one copy is required to be retained by §§ 203.301 to 203.307.

Item	Description of records, etc.	Period to be retained
	I. GENERAL AND FINANCIAL	
1	Minute books of directors, executive committees, stockholders, and other corporate meetings.	Permanent.
2	Capital stock records:	
	(a) Capital stock ledger	Permanent.
	(b) Capital stock certificates, records of or stubs of	Permanent.
	NOTE: If the information shown on the stubs is recorded in permanent records the stubs are required to be retained only for a period of 3 years.	
	(c) Stock transfer register	Permanent.
	(d) Memoranda and bills of sale or of transfer of capital stock	3 years.
	(e) Capital stock subscription notices and requests for allotment	3 years.
	(f) Canceled capital stock certificates (see item 5).	
3	Bond records:	
	(a) Registered bond ledger	Permanent.
	(b) Records or stubs of bonds	Permanent.
	NOTE: If the information shown on the stubs is recorded in permanent records the stubs are required to be retained only for a period of 3 years.	
	(c) Memoranda and bills of sale or of transfer of registered bonds	3 years.
	(d) Records of interest coupons paid and unpaid	7 years after payment.
	(e) Long term debt subscription notices and requests for allotment	3 years.
	(f) Canceled bonds. Paid interest coupons and unissued bonds (see item 5).	
4	Corporate elections:	
	(a) Proxies of holders of voting securities	2 years.
	(b) Lists of holders of voting securities presented at meetings	6 years.
	(c) Qualification oaths of judges of election	Optional.
	(d) Qualification oaths of directors	Optional.
	(e) Ballots cast and tabulations of vote	2 years.
	(f) Judges' reports of election results	2 years.
5	Retired securities: Stock certificates, bonds, notes, interest coupons, receivers' certificates, and temporary certificates taken up and canceled.	Optional.
6	Ledgers:	
	(a) General and auxiliary ledgers and indexes thereto	Permanent.
	(b) Trial balance sheets of general and auxiliary ledgers	4 years.
7	Record of securities owned, in treasury, or with custodians	Permanent.
8	General journals:	
	(a) General journal entries	Permanent.
	(b) Supporting papers not otherwise provided for	6 years.
9	Cash receipts records:	
	(a) General cash receipts journals	Permanent.
	(b) Detailed records supporting totals recorded in item (9a)	6 years.
	(c) Bank deposit slips	3 years.

Item	Description of records, etc.	Period to be retained
	I. GENERAL AND FINANCIAL—continued	
10	Records summarizing the results of noncarrier operations for entry in general books.	6 years.
	NOTE: Ledgers, journals, abstracts, reports vouchers, etc., shall be retained for the same periods as are provided for similar documents elsewhere in these regulations.	
11	Deeds and other title papers; franchises; applications to and certificates or permits from regulatory bodies authorizing operations or extensions of operations and all papers, memoranda and correspondence in connection therewith.	Permanent unless transferred to others in connection with sale of physical property and operating rights.
12	Contracts and agreements:	
	(a) Card or book records of contracts, property leases, and agreements made, and of expirations and renewals.	3 years after expiration.
	(b) Equipment leases, owner-operator agreements and records thereof.	See note.
	(c) Other contracts, leases, and agreements	See note.
	NOTE: 3 years after expiration or cancellation or transfer to others in connection with sale of physical property and operating rights.	
13	Tax records:	
	(a) Taxes based on income	6 years.
	(b) Real estate and personal property tax	6 years.
	(c) Taxes based on payrolls	6 years.
	(d) Federal excise taxes	6 years.
	(e) Highway use taxes	6 years.
	(f) Corporate privilege tax	6 years.
14	Treasurer's records:	
	(a) Statements and summaries of balances on hand and with depositories.	Optional.
	(b) Statements from depositories of funds received, disbursed, and transferred.	3 years.
	(c) Bank reconciliations; checks, drafts, etc., issued and not presented.	3 years.
	(d) Copies of deposit slips	3 years.
	(e) Agents' remittance slips	3 years.
15	General office records relating to establishment of credit arrangements with shippers.	2 years after discontinuance of credit arrangement.
16	Reports of examinations, audits and transfers by special accountants, traveling auditors, time inspectors, weight inspectors, etc., and supporting papers.	2 years.
17	Reports to Interstate Commerce Commission and other regulating bodies:	
	(a) Annual financial, operating, and statistical reports, file copies of, and supporting papers.	Permanent.
	(b) Reports of operating revenues, expenses, and statistics, file copies, and supporting papers.	3 years.
	(c) Accident reports, file copies of, and supporting papers	3 years.
	(d) Reports of hours of service, file copies of, and supporting papers:	
	(1) Drivers' logs (Form BMC 59)	For period prescribed in safety regulations.
	(2) Hours of service report (Forms BMC 60 and BMC 62)	3 years.
	(3) Monthly report of excess hours (Form BMC 61)	3 years.
	(e) Reports to regulating bodies regarding expenditures of proceeds from sale of authorized securities, file copies of, and supporting papers.	5 years.
	(f) Other reports to regulatory bodies not provided for by items (a) to (e).	3 years.
	(g) Copies of applications to and authorities from regulating bodies for the issuance of stocks, bonds, and other securities (see item (e) above).	Permanent.
	NOTE: The supporting papers referred to in item 17 are those requisite to support the reports named, and not elsewhere provided for in these regulations. If figures for such reports are assembled on memorandum sheets, such sheets constitute a part of the supporting papers and shall be retained accordingly.	
18	Annual reports or statements to stockholders, file copies of	Permanent.
19	Miscellaneous statistical reports, statements and summaries (not otherwise provided for herein) used for administrative purposes only and not entering the accounts of the company.	Optional.

Item	Description of records, etc.	Period to be retained
	II. TRANSPORTATION	
40	Tariffs and other rate authorities:	
	(a) Tariffs, classifications, division sheets, and circulars in which the carriers are interested relative to the transportation of persons or property, in the general files of the traffic or other department in which the complete official file is maintained.	3 years after expiration or cancellation.
	(b) Tariffs, classifications, division sheets, and circulars in other departments and at agencies, if copies of the same issues of such tariffs, etc., are preserved in the general files referred to in (a) above.	Optional after expiration or cancellation.
	(c) Contracts and minimum rate schedules of contract motor carriers.	3 years after expiration or cancellation.
	(d) Requests and receipts from agents and others for tariffs, classifications, division sheets, and circulars.	Optional.
	(e) Written requests on carrier from persons and companies for quotations of rates, and copies of carrier's quotations.	Optional.
	(f) Copies of concurrences and powers of attorneys filed with the Interstate Commerce Commission and with other regulating bodies.	3 years after cancellation.
	(g) Authorities for the transportation of property, free or at reduced rates and supporting papers.	3 years.
	(h) Correspondence and working papers in connection with the making of rates and compilation of tariffs, classifications, division sheets, and circulars affecting the transportation of persons or property.	3 years after cancellation of tariff.
	(i) Records, circulars, and settlements, regarding conventions, excursions, traffic promotions, and similar matters.	3 years.
	(j) Public timetables and literature, correspondence or records relating to them.	Optional.
41	Records pertaining to the diversion or reconsignment of freight, including requests, tracers, and correspondence in connection therewith.	2 years.
42	Market quotations and weather reports received from agents and others, when not affecting claims.	Optional.
43	Records and reports pertaining to embargoes, congested traffic and similar matters.	3 years.
44	Journals, summaries or other records of freight revenues	6 years.
45	Journals, summaries, or other records of passenger revenues	6 years.
46	Passes, reduced fares, and free tickets:	
	(a) Copies of orders for printing pass stock	Optional.
	(b) Records of pass stock	3 years.
	(c) Records and reports of passes issued or requested from other carriers.	3 years.
	(d) Records and reports of tickets issued free or at reduced rates, and of such tickets requested from other carriers.	3 years.
	(e) All other records and documents relating to the issuance or use of passes and tickets at reduced rates or free.	1 complete calendar year.
	(f) Canceled passes and tickets issued free or at reduced rates	2 years.
47	Journals, summaries, or other records of transportation revenues other than freight and passenger.	6 years.
48	Journals, summaries or other records of revenues from operations other than transportation.	6 years.
49	Bills of lading and releases:	
	(a) Consignors' shipping orders, consignors' shipping tickets, and copies of bills of lading, freight bills from other carriers and other similar documents furnished the carrier for movement of freight.	3 years.
	(b) Contracts covering risk of carriers to transportation and storage.	4 years.
50	Freight bill:	
	(a) Origin station copy	Optional.
	(b) Delivery receipt, records of and receipt for delivery of freight to consignees and connecting carriers.	3 years.
	(c) Settlement copy receivable, paid copy of freight bill retained by carrier to support the receipt of freight charges.	3 years.
	(d) Settlement copy payable, paid copy of freight bill retained by carrier to support payment of freight charges to other carriers.	3 years.
	(e) Unsettled copy, records of unsettled freight bills, freight bills in suspense and supporting papers.	1 year after settlement or other final disposition.
	(f) All other copies	Optional.
	NOTE: A freight bill is a document which shows shipper, consignee, origin of shipment and destination, number of pieces, description of the commodity weight, rate, freight and any other connecting carrier involved in the transportation of the shipment and shows the total charges to be paid by the customer. See § 203.306.	

Item	Description of records, etc.	Period to be retained
	II. TRANSPORTATION—continued	
51	Freight corrections:	
	(a) Correction notices	3 years.
	(b) Undercharge and overcharge freight statements	3 years.
	(c) Records and reports of correction notices	3 years.
52	Records and reports pertaining to import and export freight, bonded freight and baggage, steamships' engagements, etc.	3 years.
53	Records and reports pertaining to the operation of marine and floating equipment.	3 years.
54	Mail service:	
	(a) Records and reports of mail weighing, mail failures, and detentions, fines, deductions, and irregularities.	3 years.
	(b) Records and reports of mail pouches received and distributed	1 year.
55	Revenue equipment movements:	
	(a) Dispatchers' sheets, registers, and other records pertaining to the movement of buses, trucks, tractors and trailers.	3 years.
	(b) Records and reports of trailers, buses, and other vehicles interchanged.	3 years.
	(c) Books and circulars of instructions to agents, drivers and others in the general file of the carrier.	3 years after expiration or cancellation.
56	Records, reports, orders and tickets pertaining to the weighing of truckloads and less-than-truckload shipments.	3 years.
57	Freight loading and unloading records:	
	(a) Freight checkers' records	2 years.
	(b) Reports, manifests, load sheets and abstract of shipments made and received.	2 years.
	(c) Orders for the reconsignment of freight	2 years.
	(d) Reports of shipments received and transported by contract carriers not covered by freight bills.	3 years.
	(e) Records of vehicles iced and ventilated	2 years.
	(f) Records of unloading, feeding and watering live stock	2 years.
58	Copies of notices to consignees of arrival of freight	2 years.
59	Pickup and delivery records:	
	(a) All records detailing shipments picked up from or delivered to a carrier by consignor, drayman, carrier's own equipment or any other source.	3 years.
	(b) Notice to consignees of tender of delivery	2 years.
	(c) Pickup service call sheets	1 year.
	(d) Patron's authority for service desired (cartage authorities)	1 year after cancellation.
	(e) Record of c. o. d. collections and remittances	3 years.
	(f) Contracts for pickup, delivery, and transfer service (see 12 (c)).	2 years.
60	Drivers' reports not provided for elsewhere	3 years.
61	Records and reports of tickets and ticket stock, whether in station or general office.	3 years.
62	Records and reports of baggage checks issued, sold, and on hand, whether in station or general office.	3 years.
63	Agents' balance sheets	6 years.
64	Agency cash books	Optional.
65	Used and canceled tickets, cash fare slips, baggage checks, etc., reports of which showing their sale and use have been audited (except as otherwise provided in item 46 (f)).	3 years.
66	All records, reports, and documents at stations and terminals not otherwise provided for in these regulations.	
	III. EXPENDITURES	
70	Cash disbursements (cash, checks and drafts):	
	(a) Check and cash disbursement journals (check registers)	Permanent.
	(b) Duplicate copies of checks or check stubs if detail is not shown in item (a).	Permanent.
	(c) Reports of petty cash disbursed	3 years.
	(d) Checks paid and cancelled:	
	1. Payroll checks	3 years.
	2. All other checks	6 years.
	(e) Reports of drafts issued by agents and officers	1 year.
71	Invoices and vouchers:	
	(a) Invoice registers and voucher registers	15 years.
	(b) Paid and cancelled vouchers and supporting papers, except as otherwise provided in item 72 (a) and 99 (a).	6 years.
	(c) Invoices for material and supplies purchased not attached to vouchers or paid checks and supporting details. For expenditures relating to property see item 72.	6 years.
72	Records of terminal property and highway equipment:	
	(a) Records, reports, statements, and memoranda showing the details of all debits and credits on account of the cost of property.	5 years after sale or retirement.
	(b) Records and memoranda pertaining to depreciation, retirements, and replacements of property.	5 years after sale or retirement.
	(c) Contracts and other agreements relating to the construction, acquisition, or sale of property.	5 years after sale or retirement.

Item	Description of records, etc.	Period to be retained
	III. EXPENDITURES—continued	
72	Records of terminal property and highway equipment—Continued	
	(d) Plans, specifications, estimates of work, records of engineering studies, construction bids, and similar records pertaining to addition and betterment projects which have been put in execution.	5 years after sale or retirement.
	(e) Plans, specifications, estimates of work, records of engineering studies, construction bids, and similar records pertaining to addition and betterment projects which have been abandoned.	5 years.
	(f) Patent records and related data	5 years after expiration of patent.
73	Records and reports of repairs and renewals of buildings and other structures.	6 years.
74	Payroll records:	
	(a) Original source documents used in preparation of payrolls—namely, time cards, trip records, work orders, etc.	3 years.
	(b) Payroll registers and related payroll records	6 years.
	(c) Applications and authorities for changes in payroll	1 year.
	(d) Records and memoranda pertaining to deductions from payrolls for social security taxes.	6 years.
	(e) Records of employees—applications for employment, reports and certificates of physical and other examinations, service records, efficiency tests, employees' rosters and other similar records pertaining to employees.	3 years after termination of employment.
	(f) Provident department records: Records of provident departments, such as employees' relief, hospital, insurance and savings departments, other than records pertaining to the receipt and disbursement of funds.	1 year.
75	Assignments, attachments, and garnishments:	
	(a) Record of assignments, attachments, and garnishment of employees' salaries.	2 years.
	(b) Files containing assignments, attachments, garnishments, notices of suits, notices of release, and correspondence relating thereto.	2 years.
76	Purchase and sales:	
	(a) Copies of orders for the purchase of material and supplies	3 years.
	(b) Bids and offers for the sale or purchase of material and supplies	1 year.
	(c) Contracts for the purchase or sale of material and supplies	3 years after expiration.
	(d) Advices or requisitions from storekeepers and others for the purchase of material and supplies.	Optional.
	(e) Price records of purchases, file copies of	3 years.
77	Inventories of materials and supplies:	
	(a) General inventories of materials and supplies on hand including fuel, oil and tires.	6 years.
	(b) Stock cards, inventory cards, and other detail records	1 year.
	(c) Records and reports of materials and supplies received and issued except as otherwise provided in item 72.	6 years.
	(d) Requisitions and receipts for materials and supplies issued, the totals of which have been transcribed into other records for retention.	1 year.
	(e) Price records of materials and supplies issued, file copies	3 years.
	IV. SHOPS AND GARAGES	
80	Records and reports of repairs to automotive vehicles and other equipment.	3 years.
81	Records and reports of motor changes	3 years.
82	Inspection records:	
	(a) Certificates and test data on new tank motor vehicles used to transport inflammable liquids, corrosive liquids, compressed gases or liquid poisons.	3 years after retirement or disposition.
	(b) Certificates of inspection of other automotive equipment inspected.	3 years after retirement or disposition.
	(c) Records and reports of automotive equipment purchased	3 years after retirement or disposition.
83	Records and reports of automotive equipment light-weighed and stenciled.	3 years after retirement or disposition.
84	Records and reports of equipment numbers changed	3 years after retirement or disposition of vehicle.
85	Records and reports of automotive equipment in and out of service	3 years.
86	Records and reports of automotive equipment failures	3 years.
	V. INSURANCE AND SAFETY	
90	Fidelity and indemnity bonds:	
	(a) Records and files relating to expired, terminated, and canceled fidelity bonds of employees, including the bonds.	3 years after liability of bonding company has expired.
	(b) Records and files relating to expired, terminated, and canceled indemnity bonds incident to transportation and other charges, including the bonds.	3 years after liability of bonding company has expired.

Item	Description of records, etc.	Period to be retained
	V. INSURANCE AND SAFETY—continued	
97	Insurance records:	
	(a) Schedules of fire, cargo, public liability and property damage, and other insurance.	4 years.
	(b) Insurance policies	Optional after expiration of liability of insurer.
	(c) Letter and telegraphic reports of damages by fire, collision, etc.	3 years.
	(d) Reports of minor losses by fire, collision, etc., not covered by insurance or less than minimum amount collectible.	2 years.
	(e) Schedules of risks covered by self-insurance reserves	2 years.
98	Claim registers:	
	(a) Claim registers, card or book indexes and other records in connection with the recording of overcharge, loss and damage, personal injury, fire, and other claims presented against carriers.	6 years.
	(b) Records showing the details of authorities issued to agents, carriers, and others for participation in freight claims.	6 years.
99	Claim papers:	
	(a) All papers substantiating overcharge, loss and damage, personal injury, fire, and other claims whether such papers are filed separately or attached to vouchers.	3 years after settlement or rejection.
	(b) Claim jackets, if all information thereon appears in records covered by (a) above.	Optional.
100	Records of fire and other damages to property of others: (Reports and statements of employees regarding injuries by fire or otherwise, to property of others, when not necessary to support claims or vouchers.)	3 years.
101	Reports and statements regarding personal injuries, when not necessary to support claims or vouchers.	3 years.
102	Records of unclaimed, over, short, damaged, and refused freight:	
	(a) Tracers, reports, and other records pertaining to unclaimed, over, short, damaged, and refused freight, when not necessary to support claims or vouchers.	3 years.
	(b) Authorities for disposal of unclaimed, damaged and refused freight.	3 years.
103	Vechicle accidents:	
	(a) Record of automotive vehicle accidents	3 years.
	(b) Reports of accidents by drivers or others	3 years.
	(c) Reports of damage to equipment by accidents	3 years.
104	Records of hours of service of transportation employees (see item 17 (d) for reports of hours of service.)	Period prescribed in safety regulations.
105	Reports and records in connection with policing the motor carriers' detective service, investigations of robberies, and attempts to defraud when not the subject of claim against the carrier.	Optional.
106	Reports and records in connection with the prevention of loss and damage to freight shipments.	Optional.
	VI. MISCELLANEOUS	
120	Tabulating cards and codes:	
	(a) When the results are transcribed to other records covered by these regulations.	Destroy at option after appropriate summaries have been made.
	(b) When the results are not transcribed to other records covered by these regulations.	For the period prescribed for the specific records.
	(c) Records of code numbers and the periods during which they were effective.	For the period prescribed for the specific records.
121	Duplicate accounts, records, and memoranda listed in these regulations when they are not provided for otherwise and when they contain no information other than that shown on the originals.	Optional.
122	Books and circulars of instructions to agents and others, in the general file of the department in which the complete official file is maintained.	3 years after expiration or cancellation.
123	Data relating to the destruction of records	20 years.
124	Correspondence:	
	(a) Correspondence and records thereof relating to subjects listed in items 1 to 123, inclusive.	For the period prescribed for the records to which the correspondence relates.
	(b) Operators' copies of telegrams, including relay copies, if the original or other copies of such messages are retained as provided for in (a) above.	Optional.
	(c) Stenographers' notebooks and phonograph and other mechanical device records, if transcripts thereof are retained, as provided for in (a) above.	Optional.
	(d) Transcripts of teletype messages	For the period prescribed for the records to which the correspondence relates.

INDEX TO RECORDS

Accident reports; to regulating bodies, 17c; vehicle accidents, 103a, b, c.
Agency cash books, 64.
Agents' balance sheets, 63.
Applications; to regulating bodies, 17g; for payroll changes, 74c; for special rate orders, 40g; for employment, 74e; for extension of operations, 11.
Assignments, attachments and garnishments, 75.
Attachments of employees' pay, 75.
Audits, 16.
Authorities; for security issues, 17g; for payroll changes, 74c; for claim participation, 98b; for disposal of unclaimed, damaged and refused freight, 102b; for rates, 40g; for destruction of records, 123.
Baggage checks; records, 62; used and canceled, 65.
Balance sheets; general and auxiliary ledgers, 6b; agents, 63.
Bank deposit slips, 9c; copies, 14d; statements from depositories, 14b.
Bills of lading and releases, 49.
Bill of sale and transfer of securities, 2d, 3c.
Bonded freight and baggage, 52.
Bond records, 3.
Bonds; issues and transfers, 3, 17g; retirement, 5.
Call sheets (pick-up service), 59c.
Capital stock records; issues and transfers, 2; retirement, 5.
Cartage authorities (patrons' authority for service desired), 59d.
Cash disbursements, 70.
Cash fare slips, 65.
Cash receipts records, 9.
Certificates; stock, 2b, f; receiver's, 5.
Checks (financial); outstanding, 14c; paid, 70d.
Claim papers, 99.
Claim registers; overcharge, loss and damage, personal injury, fire, and other, 98a.
Classifications (freight), 40a; 40b.
C. o. d. collections and remittances, 59e.
Codes for tabulating cards, 120.
Concurrences in rates, 40f.
Congestion of traffic, data concerning, 43.
Consignees' notices; orders for freight delivery, 59d; notice of freight arrival, 58; notice of tender of delivery, 59b.
Construction; records, 72a; contracts, 72c.
Contracts and agreements, 12.
Contracts; rate, of contract motor carriers, 40c; covering risk of carriers to transportation and storage, 49b; with contract carriers not covered by freight bill, 57d; relating to construction, acquisition or sale of property, 72c; for purchase or sale of material and supplies, 76c.
Corporate elections, 4.
Corrections; freight, 51a.
Correspondence, 124; extensions of operations, 11; tariffs and rates, 40h; public timetables and literature, 40j; assignments, attachments and garnishments, 75b; diversion and reconsignments, 41.
Coupons, interest payment, 3, 5.
Credit extension records, 15.
Damage claim records, 98; claim papers, 99.
Damaged freight, 102.
Damage to property of others, 100.
Deductions; from payrolls, 74d; in mail service, 54a.
Deeds, 11.
Delivery records; for freight, 50b.
Deposit slips, bank, 9c.
Depreciation records, 72b.
Destruction of records, 123.
Detective service, 105.
Detentions of mail, 54a.
Director's minutes, 1.
Dispatching records, 55a.
Division sheets, 40a, b.
Drafts, issued by agents and officers, 70e.
Drivers' reports, 60.
Diversion of freight, 41.
Duplicate accounts, records and memoranda, 121.
Embargoes, 43.
Equipment failures, 86.
Equipment, in and out of service, 85.
Equipment, light-weighed and stenciled, 83.
Equipment numbers changed, 84.
Estimates; for expenditures, 72d, e; for engineering projects, 72d, e.
Examinations and audits, reports of, 16.
Executive committee minutes, 1.
Export freight, 52.
Feeding of livestock, 57f.
Fidelity and indemnity bonds, 96a, b.
Fines for faulty mail service, 54.
Floating equipment operation records, 53.
Franchise records, 11.
Free tickets or passes, 46d, e, f.
Freight; insurance, 97; over and short freight, 102; damaged freight, 102; unclaimed freight, 102; refused freight, 102; diversion, 41; revenue, 44; reconsignment, 41; import, export and bonded freight, 52; freight transferred, 50; freight delivered, 50; checkers' records, 57; freight transported by contract carriers not covered by waybills, 57d; bills of lading, 49a; releases, 46b; weighing, 56; loading, 57; icing, 57e; handling livestock, 57f; freight bills, 50; arrival notices, 58; corrections, 51; unloading, 57.
Freight bills, 50; unsettled, 50e.
Garnishments of employees' pay, 75.
General journals, 8; general cash receipts journal, 9a.
Hours of service; reports to regulating bodies, 17d; records, 104.
Icing; of vehicles, 57e.
Import freight, 52.
Indemnity bonds, 96b.
Inspection records, equipment, 82.
Interest coupons, 3d; retired securities, 5.
Instructions; to agents, drivers and others (books and circulars), 55c.
Insurance records, 97; policies, 97b.
Interchange of equipment, 55b.
Interest coupons; paid, 3f; canceled, 5.
Inventories; material and supplies, 77.
Invoices and vouchers, 71; registers, 71a; paid and canceled, 71b; invoices for material and supplies not attached to vouchers, 71c.

Journals; general office, 8; journal entries, 8a; for noncarrier operations, 10, note; freight revenue, 44; passenger revenue, 45; revenues other than freight and passenger, 47; revenues from operations other than transportation, 48; general cash receipts journal, 9a.
Ledgers; of capital stock, 2a; of registered bonds, 3a; general and auxiliary, 6a; for noncarrier operations, 10 note; of agents' accounts, 6a.
Livestock; unloaded, fed and watered, 57f.
Loading vehicles; records, 57 a, b, f; collections, 48.
Loss and damage; claim records, 98a; claim papers, 99a.
Mail; revenue records, 47; service and penalty records, 54.
Manifests, load sheets and abstract of shipments made and received, 57b.
Marine equipment operation, 53.
Market quotations from agents and others, 42.

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 969]

[Docket No. AO 254-A1]

HANDLING OF AVOCADOS GROWN IN SOUTH FLORIDA

NOTICE OF RECOMMENDED DECISION AND OPPORTUNITY TO FILE WRITTEN EXCEPTIONS WITH RESPECT TO PROPOSED AMENDMENTS TO MARKETING AGREEMENT AND ORDER

Pursuant to the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900; 19 F. R. 57), notice is hereby given of the filing with the Hearing Clerk of the recommended decision of the Deputy Administrator. Agricultural Marketing Service, United States Department of Agriculture, with respect to proposed amendments to the marketing agreement and Order No. 69 (7 CFR Part 969), hereinafter referred to as "marketing agreement" and "order," respectively, regulating the handling of avocados grown in South Florida, to be made effective pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.; 68 Stat. 906, 1047), hereinafter referred to as the "act." Interested parties may file written exceptions to this recommended decision with the Hearing Clerk, United States Department of Agriculture, Room 112 Administration Building, Washington 25, D. C., not later than the close of business of the tenth day after publication hereof in the FEDERAL REGISTER. Exceptions should be filed in quadruplicate.

Preliminary statement. The public hearing, on the record of which the proposed amendments to the marketing agreement and order are formulated, was initiated by the Agricultural Marketing Service as a result of proposals submitted by the Avocado Administrative Committee, the administrative agency established pursuant to the marketing agreement and order. In accordance with the applicable provisions of the aforesaid rules of practice and procedure, a notice that a public hearing would be held on February 28, 1955, in the Auditorium, Redlands Farm Labor Camp, Homestead (Modello), Florida, was published in the FEDERAL REGISTER (20 F. R. 866) on February 10, 1955.

Material issues. The material issues presented on the record of the hearing were concerned with amending the marketing agreement and order to:

(a) Change the definition of "act" to include the amendments thereto contained in the Agricultural Act of 1954;

(b) Change the definition of "production area" to include the counties of Orange and Lake;

(c) Change the definition of "handle" to make regulations applicable to all export shipments;

(d) Provide for the establishment by the Avocado Administrative Committee, with approval of the Secretary, of marketing research and development projects designed to assist, improve, or promote the marketing, distribution, and consumption of avocados; and

(e) Provide for the fixing of the size, capacity, weight, dimensions, or pack of the container or containers which may be used in the packaging and the transportation, sale, shipment, or other handling of avocados.

Findings and conclusions. The findings and conclusions on the material issues, all of which are based upon the evidence adduced at the hearing and the record thereof, are as follows:

(a) The present definition of "Act," as contained in the existing marketing agreement and order includes all of the amendments to the Agricultural Mar-

keting Agreement Act of 1937 which were in effect at the time the marketing agreement and order were made effective. The Agricultural Act of 1954, which became effective subsequently, contains further amendments to the Act of 1937, providing among other things, for incorporating into marketing agreements and orders provisions authorizing the establishment of marketing research and development projects, and the regulation of the size, capacity, weight, dimensions, or pack of containers used in the handling of a commodity. Inasmuch as the avocado industry desires to avail itself of the authority contained in these two provisions, and it is proposed to include such authority in the regulatory program it is concluded that the definition of "act" should be amended to provide such authority.

(b) At the time of the original hearing, data from the 1950 census indicated that there were only 708 avocado trees in Lake County and only 214 in Orange County. It has since developed that these data excluded certain smaller plantings, commonly referred to as "door yard trees," which are responsible for substantial commercial production. It has been estimated by the County Agricultural Agents of these counties that, in addition to the trees reported by the census, Lake County contains 5,000 trees, and Orange 3,000 trees, or a total including that reported by the census, of approximately 9,000 trees for the two counties. Customarily, surplus production from these trees (i. e., fruit in excess of that which is consumed by the person on whose property it is produced) is sold to a shipper or to an itinerant trucker who assembles truckloads and hauls them to a central location for preparation for shipment. It has been estimated that in a heavy producing year as much as 10,000 bushels of avocados could be marketed from these trees and under the present limitation of production area, without regulation. Furthermore, at the time of the original hearing, it was assumed that avocados produced within the presently defined production area were packed for shipment within that area. This however, has not proved to be entirely correct, since it has been found that fruit produced in the northern perimeter of the production area customarily has moved to assembly points within the adjacent counties of Orange and Lake for packing.

Since it is impractical to prepare any substantial quantity of fruit in the grove to comply with provisions of the order, producers have been required to change normal patterns of marketing in order to comply with such regulations, or else have violated such regulations in order to move their fruit in customary marketing channels. Moreover, it has been found that the present limitation of the production area serves to encourage violation of the order due to the difficulty of obtaining inspection in the typically isolated sections of the northern part of the production area. The enforcement problem is further complicated by the fact that once fruit has moved from the production area and mingled with fruit produced in the adjacent counties of Orange and Lake it has been impossible to ascertain which fruit was subject to regulation and which was not.

It was testified that there is no appreciable quantity of avocados produced in counties of Florida, other than Orange and Lake, which are not now included in the present definition of production area. It therefore appears that the production area as proposed to be enlarged would constitute the smallest regional production area which is practicable for the effective operation of this avocado program.

In view of the foregoing circumstances it is therefore concluded that in order to remove the barrier to movement of avocados to customary assembly points, to facilitate inspection, to bring within regulation all commercial production of avocados, and to facilitate enforcement of regulations, the marketing agreement and order should be amended to include the counties of Orange and Lake within the production area.

(c) The current definition of "handle" as contained in the marketing agreement and order contains a provision which restricts the regulation of shipments to those destined to be marketed within the continental United States or Canada. Such a restriction permits the shipment or export of poorer grades of avocados to all countries not specified.

The Agricultural Act of 1954 contains a provision which makes it mandatory that the Secretary apply to certain imported commodities the same or equivalent grade, size, quality, and maturity regulations as that applied to the domestically produced commodity for which there is in effect a marketing agreement and order. Under this provision avocados imported into the United States are required to comply with these regulations, or the equivalent of such regulations, which are in effect for avocados grown in South Florida.

During this past season avocados which did not comply with the quality regulation in effect, under the agreement and order, for market within the United States and Canada were marketed in countries where these restrictions did not apply. It is probable that this practice will grow, if not restricted, as production increases and the pressure of increased supplies is felt.

Some of the countries to which cull avocados were shipped in the past season, particularly those constituting the Greater and Lesser Antilles, produce avocados which mature at a season not competing directly with production in South Florida. It was testified that these countries have a combined population of some twenty million people and that avocados, in season, are an important item in their diet. Since demand for avocados is already established and Florida avocados mature at a season when local fruit is not available in these countries, they constitute an excellent potential market for the Florida fruit.

Marketing of South Florida avocados in the Bahamas and Cuba is already established and it is anticipated that as transportation become more rapid, cheaper, and easier, development of markets, not only in the remaining countries of the Antilles but in the countries of Europe will be practicable. As the production in South Florida increases, further development of markets outside of the United States and Canada will be necessary and desirable. Experience has shown that dumping of immature and off grade avocados in a market will not result in the development of demand sufficient to return a fair price to the grower. It is felt that if such demand is to be encouraged the people of other countries must be assured of the same good quality mature fruit that is now assured to the people of the United States and Canada. Moreover, it was pointed out that since avocados imported into the United States are required to comply with regulations imposed by a marketing agreement and order it would seem to be proper to require avocados for export to comply with the same regulation. It is concluded that insuring shipment of only mature good grade fruit to all export markets will bring about a more desirable development of demand and that growers prices will be enhanced thereby. Therefore, the marketing agreement and order should be amended as hereinafter set forth.

The aforementioned amendment will also entail, as a conforming amendment, the deletion of the following from the first sentence of § 969.55: "(c) for export other than to Canada." Said § 969.55 enumerates four types of dispositions, of which the indicated export is one, which are permitted to be handled free from regulation (except the filing of application by the seller and appropriate certification from the intended purchaser may be required). Such an exemption for exports other than to Canada would, of course, not apply in the event all exports should be regulated.

(d) The Agricultural Act of 1954 amended the Agricultural Marketing Agreement Act of 1937 so as to authorize the inclusion in marketing agreements and orders for certain fruits or vegetables of authority to establish marketing research and development projects designed to assist, improve, or promote the marketing, distribution, and consumption of such commodities or the products thereof, the expense of such projects to be paid from funds collected pursuant to the particular marketing order. This statutory amendment became effective after the existing avocado program was put into effect.

It was testified at the hearing that such authority is needed particularly by the avocado industry, since it is a relatively new industry and has many production, handling, and marketing problems which are in urgent need of being resolved. Some of the more pressing problems concern the further development of measures of maturity so that shipment by varieties may be more intelligently regulated; others concern the determination of proper handling and packing procedures, types and sizes of containers, arrangement in containers, means of stimulating consumer demand for avocados, holding and shipping temperatures, and utilization of avocados of grades and qualities not suitable for

fresh shipment. It is not possible at the present time to foresee and enumerate all of the projects which might be desirable and appropriate in the future. It is expected that the nature and need for such research will vary from time to time depending upon prevailing economic influences, production prospects, or other factors affecting the marketing of avocados.

Up to the present time, certain agencies of the Federal Government and of the State of Florida have provided limited assistance to the avocado industry in resolving some of its problems. However, it was pointed out that due to the fact that the industry has not had the authority to attack its problem on an organized basis, the industry as a whole has not been able to participate effectively with these agencies in the solution of its problems. It was stated that such industry participation has heretofore been confined primarily to voluntary assistance on the part of a few of the industry's individual members.

Experience in the operation of the avocado marketing agreement and order up to this time has demonstrated that avocado growers and shippers can sit down together and discuss their mutual problems. In so doing they have learned that many problems which were previously considered to be primarily of only one segment were actually industry wide. It has been concluded that if these problems are to be solved it must be through the facilities and cooperation of the entire industry, rather than by the voluntary efforts of a few of the individual members.

The proposal as set forth in the notice of hearing provides that the exercise of this authority by the administrative committee shall be "with the approval of the Secretary." The opinion was expressed at the hearing that it might be well to leave the exercise of such authority to the free and untrammeled discretion of the committee. It was stated in that regard that the requiring of the specific approval of the Secretary for the expenditure of "each and every individual little item" might constitute an unnecessary burden to him and entail such undue delay as to militate against the most effective use of the authority. It was generally agreed, however, that the approval had in mind, and the one which would be most feasible and practicable, would be for the Secretary to act on the basis of whether proposed projects of a specified nature and the overall expenditure proposed to be made in connection therewith would be appropriate and desirable, leaving the handling of the administrative details, including payments of individual items of expense, to the committee. It is believed that such general approval authority is necessary in order that the Secretary may remain in a position to continue to exercise the general supervisory authority over regulatory programs of this nature which is imposed upon him by law.

It is not intended or anticipated that the proposed authorization, if adopted, will be used to operate advertising programs for avocados, either by radio, television, or through other media. Nor is it expected that the funds likely to become available from assessment collections will be sufficient to enable the avocado industry, through the committee, to operate large research or development projects directly, but the industry will be enabled thereby to cooperate more effectively in such projects as may be conducted by Federal and State agencies, colleges, and universities, and private research organizations as well as to operate directly such lesser projects as may appear to be necessary and feasible. It is contemplated that such cooperation with others may be either in the form of granting of funds to others to assist in the particular projects, the furnishing of materials or equipment, the lending of personnel, facilities or equipment, or by such other means as may appear to be appropriate to expedite conduct of the work.

Inasmuch as there has been shown a need for greater effort and participation of the industry as a whole in the solution of its common problems, that authority to establish research and development projects under the marketing agreement and order would provide a means for such greater effort and participation, and the solution of the industry's problems would contribute to more orderly marketing of avocados and enhance returns to producers, it is concluded that such authorization as set forth in the statutory amendment should be incorporated in the provisions of this regulatory program.

(e) Much confusion has existed in the avocado industry and in the trade due to the large number of shipping containers being used, and the constant shifting from one container to another of a slightly smaller size, in an attempt to gain a competitive advantage. Moreover the practice of keeping the number of avocados constant in a given type of container and varying the size, or the arrangement of the avocados in the container further adds to the confusion as does the fact that there is no standard net weight required for any of the containers being used in the industry. It was also pointed out that it is a general practice in the industry to use excelsior as packing material to prevent damage to avocados packed in the small containers known as "flats" in which about 73 percent of the fruit is shipped, and that by varying the amount of this material used it is possible to influence the volume of avocados packed in a given container.

A survey made in 1951 by the Dade County Agricultural Agent's Office disclosed that at least 14 different containers were being used in the shipment of avocados. Among these were 9 kinds or types of flats of slightly differing dimensions holding from 10 to 14 pounds, 3 different kinds of ⅘ bushel boxes, bushel baskets, and a field crate, the capacity of which is 1 1/10 bushels. It was stated that since completion of the survey further improvisations in containers had been made and there are now in use containers which appear at first sight to be ⅘ bushels but are smaller.

It was pointed out in the evidence of the hearing that sudden changes and lack of uniformity, the variation in the size, weight, capacity, dimensions, and pack of containers causes a great deal of dissatisfaction among buyers since they may not know the exact size of the container, or the size of the avocados within, or the arrangement of the fruit within the container for which a price is being quoted. Buyers who contract on the basis of the number of fruit in a container may on delivery find the specified number complied with but of a smaller size than expected. Others may buy by net weight and find the size unsuitable for their customers. Dissatisfaction thus created has resulted in lack of trade confidence and reluctance to promote Florida avocados. Such lack of trade support in promoting the Florida fruit in the markets has had a detrimental effect on prices to growers.

It was reported that buyers who are familiar with the slight differences in packages use these differences to their advantage in bargaining. For example, the price quoted by one shipper for a particular container of avocados is often used as a lever to bargain for a price reduction for a slightly larger container of avocados of another shipper. The multiplicity of containers and the variation of pack in these containers makes it virtually impossible for a shipper to judge the value of his container and pack in relation to that of another or, in fact, to know just what competing container a buyer may be referring to when negotiating a price. This has oftentimes resulted in unjustifiable price concessions being made to buyers with consequent detrimental effects upon returns of producers and in general has contributed to disorder in the marketing of avocados. As a result the tendency has been for shippers to reduce the size of their containers to try to conform with the smallest size being used, or to get one a shade smaller. This facilitates reducing either the size or the number of avocados packed in the new container as compared with the one it replaced. This not only results in increased costs of packaging due to the larger number of packages needed to pack a given quantity of fruit and the loss of efficiency in packaging and handling, but creates the situation wherein buyers may use the unsettled condition to bargain for lower prices. Such lower prices ultimately fall on the grower.

Furthermore, it was stated that in the change to containers of smaller size or different dimension, shippers usually are left with stocks of unused containers on hand. In the final analysis the cost of these obsolete containers are borne by producers. Also in this connection the testimony indicates that container manufacturers would be disposed to supply containers at reduced prices if standardized and ordered in quantity.

It was testified at the hearing that there is an indication that some of the containers in use are not suitable for getting the fruit to the market in the best possible condition from the standpoint of maintaining quality in transporting to market, insuring a reasonable shelf life after arrival at the retail store, and providing the consumer with the

best possible product. In this connection it was stated that it would be desirable to have authority to specify in the regulation of containers such factors as strength of material, provisions of ventilation, and design of containers as these influence to a large extent the degree of protection afforded by a container to the avocados packaged therein, since it is obvious that such protection constitutes an important factor in insuring the quality of product delivered to the consumer.

Members of the avocado industry have recognized for some time the ill effects of constantly shifting from one container to another. Efforts to reach a "gentlemen's agreement" concerning some degree of standardization have been made, but to no avail. Prior to organization of the industry under the marketing agreement and order many members felt that it was futile to try to come to an agreement on a specific container or containers, or to standardize the size, weight, capacity, dimension or pack of such containers since no authority for enforcing compliance existed. At present the marketing agreement and order for avocados do not contain such authority. Authority became available in the form of an amendment to the Agricultural Marketing Agreement Act of 1937, in the Agricultural Act of 1954. This was passed after the marketing agreement and order for avocados were made effective.

It was stated that considerable study will be necessary before the avocado industry will be in a position to make specific recommendations as to containers, or pack in order to achieve the full benefits that may be expected to accrue from container standardization. (In this connection the necessity for specifying in regulation the arrangement, size, and number of avocados in a container, the amount and use of packing material, and the net weight of different containers was stressed as otherwise these could be varied to make container regulation ineffective.) However, it was evident at the hearing that there is general agreement in the industry that standardization is necessary, can be agreed upon, and that the committee should be empowered to recommend and the Secretary to establish standards in regard to containers used in the handling of avocados in order to achieve orderly marketing conditions and increase prices to producers.

The evidence of this hearing indicates that the adoption of standard containers for avocados would permit shippers to order containers in such quantities as to effect a saving; result in less confusion in the trade with consequent fewer demands for price concessions by buyers; make possible greater efficiency in the packing and handling of avocados; and, through reduction of costs, increase returns to producers. Therefore, the marketing agreement and order should be amended to provide authority to regulate containers as hereinafter set forth.

In addition to the proposals discussed heretofore, three additional proposals, numbered 4, 5, and 8, were set forth in the notice of hearing. No testimony in regard to such proposals was presented.

It was testified at the hearing that such changes should also be made in other provisions of the marketing agreement and order as may be necessary to make such provisions conform with any specific amendments which are so adopted as the result of this proceeding. Any such conforming changes should, of course, be limited strictly to those which are obviously necessary and appropriate, and, other than to that extent, should not affect the present meaning of such provisions. Other than the conforming change in § 969.55, referred to under (c) of the findings and conclusions of this decision, it does not appear to be necessary to make any such conforming changes.

General findings. (a) The marketing agreement, as hereby proposed to be amended, and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(b) The marketing agreement, as hereby proposed to be amended, and the order, as hereby proposed to be amended, regulate the handling of avocados grown in South Florida in the same manner as, and are applicable only to persons in the respective classes of industrial and commercial activity specified in, the marketing agreement upon which hearings have been held;

(c) The marketing agreement, as hereby proposed to be amended, and the order, as hereby proposed to be amended, are limited to their application to the smallest regional production area that is practicable, consistently with carrying out the declared policy of the act; and the issuance of several orders applicable to subdivisions of such regional production area would not effectively carry out the declared policy of the act; and

(d) The marketing agreement, as hereby proposed to be amended, and the order, as hereby proposed to be amended, prescribe, so far as practicable, such different terms, applicable to different parts of the production area, as are necessary to give due recognition to differences in the production and marketing of the avocados covered thereby.

Rulings on proposed findings and conclusions. March 14, 1956, was fixed as the latest date for the filing of briefs with respect to the facts presented in evidence at the hearing and the conclusions which should be drawn therefrom. No such documents were filed within the prescribed time.

Recommended amendments to the marketing agreement and order. The following amendments to the marketing agreement and order are recommended as the detailed means by which the aforesaid conclusions may be carried out:

1. Immediately preceding the closing of the parenthesis at the end of § 969.2 *Act* insert the following: "; 68 Stat. 906, 1047".

2. Revise § 969.4 *Production area* to read as follows:

§ 969.4 *Production area.* "Production area" means the counties of Brevard, Orange, Lake, Polk, Hillsborough, and Pinellas in the State of Florida, and all of the counties of that State situated south of such counties.

3. Delete from the first sentence of § 969.10 *Handle* the words "in the continental United States and Canada."

4. Add, after § 969.42 *Accounting*, the following new section; preceded by a main heading entitled "Research and Development":

§ 969.45 *Marketing research and development.* The committee, with the approval of the Secretary, may establish or provide for the establishment of marketing research and development projects designed to assist, improve, or promote the marketing, distribution, and consumption of avocados. The expense of such projects shall be paid from funds collected pursuant to § 969.41.

5. Delete the word "and" appearing at the end of subparagraph (1) of paragraph (a) of § 969.51 *Issuance of regulations*, and insert the word "and" at the end of subparagraph (2) of such section after changing the period to a semicolon.

6. Add, after subparagraph (2) of paragraph (a) of § 969.51 *Issuance of regulations*, the following new subparagraph (3):

(3) Fix the size, capacity, weight, dimensions, or pack of the container or containers which may be used in the packaging, and the transportation, sale, shipment or other handling of avocados.

7. Delete paragraph (c) from § 969.55 *Avocados not subject to regulation*, and redesignate paragraphs (d) and (e) as paragraphs (c) and (d), respectively.

Dated: April 14, 1955.

[SEAL] ROY W. LENNARTSON,
Deputy Administrator.

[7 CFR Part 1001]

[Docket No. AO-267]

HANDLING OF LIMES GROWN IN FLORIDA

NOTICE OF RECOMMENDED DECISION AND OPPORTUNITY TO FILE WRITTEN EXCEPTIONS WITH RESPECT TO A PROPOSED MARKETING AGREEMENT AND ORDER

Pursuant to the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900; 19 F. R. 57), notice is hereby given of the filing with the Hearing Clerk of the recommended decision of the Deputy Administrator, Agricultural Marketing Service, United States Department of Agriculture, with respect to a proposed marketing agreement and order regulating the handling of limes grown in Florida. Such marketing agreement and order would be effective pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.; 68 Stat. 906, 1047). Interested parties may file written exceptions to this recommended decision with the Hearing Clerk, United States Department of Agriculture, Room 112, Administration Building, Washington 25, D. C. Any such exceptions should be filed in quadruplicate, and must be received prior to the close of business on the tenth day after publication of this recommended decison in the FEDERAL REGISTER.

Preliminary statement. A public hearing, on the record of which the proposed marketing agreement and marketing order were formulated, was held at Homestead (Modella), Florida, from March 1 to March 3, 1955, both dates inclusive. Such hearing was held pursuant to a notice thereof which was published in the FEDERAL REGISTER (20 F. R. 744) on February 3, 1955. Said notice contained a proposed marketing agreement and order which had been presented to the Department of Agriculture by the Florida Fruit and Vegetable Association, with a petition for a hearing thereon. The objective of the proposed marketing agreement and order is to bring to the lime industry of Florida the benefits of the Agricultural Marketing Agreement Act of 1937, as amended (hereinafter referred to as the "act").

Material issues. The material issues presented on the record of the hearing are as follows:

(1) The need for the proposed regulatory program to effectuate the declared purposes of the act;

(2) The existence of the right to exercise Federal jurisdiction in this instance;

(3) The definition of the commodity and determination of the production area to be affected by the marketing agreement and order;

(4) The identity of the persons and transactions to be regulated;

(5) The specific terms and provisions to be incorporated in the marketing agreement and order, if adopted, such as:

(a) The definitions of such terms as "Secretary," "act," "person," "committee," "fiscal year," "grower," and "district";

(b) The establishment and maintenance of an administrative agency, to be known as the Florida Lime Administrative Committee (hereinafter referred to as the "committee") for conducting marketing agreement and order operations, the powers and duties of such committee, and its manner of doing business;

(c) The incurring of expenses by the committee and the levying of assessments;

(d) The need for authorizing marketing research and development projects to assist, improve, or promote the marketing, distribution, and consumption of limes;

(e) The methods for regulating shipments of limes grown in the production area;

(f) The granting of exemptions in connection with such regulations;

(g) The requirement for inspection and certification of all limes handled;

(h) The specification of the purposes for which limes may be handled free from regulation;

(i) The keeping of records and filing of reports by handlers;

(j) The requirement of compliance with all provisions of the marketing agreement and order and with regulations issued pursuant thereto; and

(k) Additional terms and conditions as set forth in §§ 1001.62 through 1001.71 and published in the FEDERAL REGISTER (20 F. R. 744) on February 3, 1955, which are common to marketing agreements and orders, namely, right of the Secretary, effective time, termination, proceedings after termination, effect of termination or amendment, duration of immunities, agents, derogation, personal liability, and separability, and certain other terms and conditions as set forth in §§ 1001.72 through 1001.74, and also published in the said issue of the FEDERAL REGISTER, which are common to marketing agreements only, namely, counterparts, additional parties, and order with marketing agreement.

Findings and conclusions. The findings and conclusions on the foregoing material issues, all of which are based on the evidence adduced at the hearing and the record thereof, are as follows:

(1) Limes are produced in four states in the United States, namely Arizona, California, Texas, and Florida. However, only in the latter State is lime production of any commercial significance. Most of the production of limes in Florida is confined to the southern and central portions of the State. Slightly more than 80 percent of the Florida limes marketed are grown in Dade County with the remaining commercial production centered in Highlands and Polk Counties at the lower end of the so-called "Ridge" area of the State. Additional commercial lime plantings have been made at scattered locations throughout the State, particularly in the central and coastal areas, where soil and temperature conditions are favorable for the growing of limes. The production of limes in Florida has increased rapidly since 1950 and will undoubtedly continue to increase unless existing lime groves are severely damaged by adverse weather, or other conditions. Florida lime production for 1950–51 season totaled 280,000 boxes (1-3/5 bushels) and had reached a total of 380,000 boxes for the 1954–55 season, an increase of approximately 35 percent. Records of lime trees moved from Florida nurseries to destinations within the State indicate an increasing rate of plantings each year since 1950. Of the 7,400 acres of lime groves presently established in Florida, it is estimated that approximately 15 percent have not reached bearing age. Also at least one-third of the bearing lime groves have yet to reach their maximum productive capacity.

One of the factors which contributed to the increase in the production of limes in Florida was the development of frozen concentrate for limeade. The demand for limes for the manufacture of this product has been such that despite the increase in production of limes during the seasons 1950–51 through 1953–54, the volume of shipments in fresh market channels was relatively constant. During the latter season, 46 percent of crop was processed. Returns to the producers of limes generally have been favorable during this period. The average price received by Florida producers for limes shipped for fresh consumption during the 1953–54 season was $6.40 per box, on-tree, or 150 percent of the January 15, 1955 parity price for such limes. However, processors experienced difficulty in disposing of the large 1953–54 pack of lime products and substantially reduced their purchases of limes during the 1954–55 season. As a consequence, the 1954–55 season's shipments of limes to the fresh markets were the largest of record, and returns to lime producers declined sharply. Since the marketing of the 1954–55 lime crop would not be completed until March 31, 1955, the season average price could not be computed at the time of the hearing. However, the average equivalent on-tree prices received by producers for Florida limes shipped in fresh market channels during the first 10 months of the 1954–55 marketing season ranged from $8.10 per box in April 1954 to $0.70 per box in December 1954. For the four-month period June–September 1954, the period when approximately two-thirds of the fresh lime shipments usually are made, such prices averaged as follows: June, $3.15 per box; July, $2.00 per box; August and September, $1.20 per box. These prices were 74, 47, and 28 percent, respectively, of the January 15, 1955, parity price for such limes. Obviously, therefore, the 1954–55 returns to Florida producers of limes will average substantially below parity. Moreover, barring unforeseen circumstances such as adverse weather, it is anticipated that the available supplies of limes will be large in relation to the total market demand and lime prices will continue to average below parity for some time.

The growers and handlers of Florida limes have endeavored to bring about some uniformity in the marketing of their commodity. In this connection, they have been successful in establishing State legislation, making it mandatory for all Persian or Tahiti limes, the principal type produced, to have a juice content averaging not less than 42 percent, by volume, in order to be marketed in fresh or processed outlets. However, this requirement is not applicable to other limes nor is there any requirement or uniformity in regard to the grade, size, or other quality factors, of the limes shipped to the fresh market or the containers in which such shipments are made. Thus, except as indicated, the handlers of Florida limes individually have made their decisions concerning the marketing of the supplies available to them. Most of these handlers have endeavored to fix so-called "house grades" for their individual packs and to sell their limes on the basis of such grades. It is not unusual, however, for handlers to vary their individual standards with the variations in the supply, quality, and demand for limes in a particular season. Hence, Florida limes of undesirable quality frequently have been marketed in a manner designed to indicate that such limes were of desirable quality. In addition, some handlers have, from time to

time, changed slightly the dimensions or size of the containers in which their limes are shipped, presumably in order to gain a competitive advantage over others. Usually, such advantage, if any, has been temporary since the other handlers also would soon adjust the size of their shipping containers. The existence of the foregoing disorganized situation within the Florida lime industry has resulted in generally disordered marketing conditions and has tended to alienate buyers and hence to reduce the demand and the market prices received for Florida limes.

Prices for Florida limes, and total returns to the growers of such fruit, could be augmented by restricting shipments in fresh market channels to limes of desirable grade, size, and quality, and limiting the containers used in making such shipments. When supplies of limes are heavy, fruit of inferior grades and qualities, or of undesirable size, may be sold only at discounts; and, since competition in the marketing of limes is based to a considerable extent upon price, such discount sales tend to depress prices for all limes being marketed. Restrictions on the shipment of such discounted fruit would, therefore, increase prices for the good quality limes of desirable size. Moreover, shipments of limes which are of inferior grades and qualities, or of undesirable size, often do not sell at prices covering the cash costs of harvesting and marketing. Restrictions on the shipments of such fruit would not only improve the grade, size, and quality of the limes marketed and promote buyer confidence in Florida limes but would also improve the average returns to growers by preventing losses incurred through shipment of undesirable fruit.

The large number of containers used in the marketing of Florida limes and the constant shifting of the size, capacity, dimensions, and pack of these containers has confused greatly the trading in this commodity. Handlers and buyers alike often do not know the exact quantity of limes covered by the various prices quoted. Restrictions on the containers used in the packaging and handling of limes would tend to correct this situation and also would make possible greater efficiency in the marketing of limes.

Therefore, it is concluded that a marketing agreement and order, providing for the regulation of the grade, size, and quality of shipments of Florida limes and for the establishment of uniform containers to be used for such shipments, are needed to effectuate the declared policy of the act. The objective to be followed under such marketing agreement and order is the tailoring of the supply of limes available for sale in fresh market channels to the demand in such outlet so that the fruit thus made available to buyers will be packaged uniformly and be of desirable grade, size, and quality. Such limitations on shipments of Florida limes would contribute to the establishment of more orderly marketing conditions for such fruit and would tend to increase the demand therefor.

(2) Any handling of Florida limes in fresh market channels exerts an influence on all other handling of such limes in fresh form. Sellers of limes, as of other commodities, endeavor to transact their businesses so as to obtain the highest possible return for the quantities of limes they have available for sale. In effecting these transactions, the sellers continually survey all accessible markets in order to take advantage of the best opportunity to market the fruit. Markets within the State of Florida provide opportunities to dispose of limes in the same manner as the markets outside the State; and the sale of a quantity of Florida limes in a market within the State of Florida exerts the same influence on all other sales of such limes as a like quantity sold in another market.

Shipments of Florida limes may be scheduled originally for delivery to markets within the State of Florida and then be diverted en route to markets outside the State. For example, truck lots of limes often are shipped to Tampa or Jacksonville and then diverted to markets outside the State of Florida. In addition, itinerant truckers acquiring limes at packinghouses or from growers dispose of such limes wherever they can obtain the best price. Thus, such a trucker may intend to sell the limes he acquires within the State of Florida, but may, if he is dissatisfied with the price obtainable in such in-state markets, transport all or a portion of such fruit to out-of-state markets. Also, dealers in limes in the markets within the State of Florida purchase limes from packinghouses and growers and resell such fruit to consumers, retailers, or others doing business within the State and to truckers who dispose of the fruit in out-of-state markets. Furthermore, both local and national chain stores maintain buying agencies within the production area. Some of such agencies have all or part of the limes purchased delivered to warehouses within the State and thereafter the fruit is distributed by truck to their retail outlets in Florida and other southeastern states. It is not possible, therefore, always to ascertain, at the time limes are first handled, whether such limes will be marketed within the State of Florida or at some point or points outside thereof.

If shipments of limes to markets outside the State of Florida were regulated, while at the same time shipments of limes to markets within the State of Florida were not regulated, growers and handlers would endeavor to market within the State all limes which could not otherwise be shipped under such regulation. Prices for limes sold in intrastate markets would thereby be depressed below those prevailing in the markets outside the State. The existence of such lower price level for limes being marketed within the State of Florida would tend to depress the prices for limes sold in the interstate markets. Furthermore, with large quantities of poor quality limes available for sale in markets within the State of Florida, there would be little opportunity to sell in such markets limes meeting the requirements of the regulations established. The larger quantity of limes, which would be required to be sold in the interstate markets under such circumstances, would also tend to lower the level of prices in the interstate markets. The Florida markets are extremely important to the growers and handlers of limes as a significant portion of the crop is marketed in such intrastate markets. Data presented at the hearing show that 15 to 20 percent of the total fresh shipments of Florida limes usually are sold in markets within the State.

In these circumstances, it is concluded that (a) all handling of limes grown in the production area is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects such commerce, and (b) the handling of such limes within the State of Florida and such handling in interstate and foreign commerce are so inextricably intermingled that it would be impracticable to regulate the handling of such limes as is in interstate and foreign commerce without regulating all handling of such limes.

(3) The term "limes" should be defined in the marketing agreement and order to identify the commodity to be regulated thereunder. Such term, as used in the marketing agreement and order, refers to all varieties and classes of acid limes grown in the production area, as hereinafter defined, classified botanically as Citrus aurantifolia, including the group known as the true limes, commonly called the "Key" or "Mexican" limes, and the group known as large fruited limes, commonly called "Persian" or "Tahiti" limes. These two classes of limes possess similar characteristics, the principal differences being in the size of the individual fruits and in the presence or absence of seeds. The Key and Persian limes mature at the same time and are used interchangeably by consumers. In the production area, approximately 75 percent of both classes are harvested during the months of May to September, inclusive.

There are other acid citrus fruits grown in the production area and some of such fruits, such as the Lakeland and Eustis varieties of limequats, often are referred to as "limes". It was shown at the hearing that these other acid citrus fruits are lemons and crosses of either lemons or limes and some other type of citrus fruit and have characteristics sufficiently dissimilar from the Key and Persian limes that they may be readily distinguished from them. The production of such other acid citrus fruits in Florida is relatively small and such fruits should not be subject to regulation under the marketing agreement and order inasmuch as such regulation is not necessary at this time to attain the objectives of the program.

A definition of the term "production area" should be incorporated into the marketing agreement and order as a means of delineating the area within which limes must be grown for the handling thereof to be subject to regulation. Such term should embrace all of the State of Florida except the area west of the Suwannee River. Such area would include all of the commercial production of limes in Florida. Production of limes in Florida is concentrated in Dade and Monroe Counties and in the "Ridge" area but there is lime production in most central and coastal areas of the State. The limes produced for market within these areas are of the same types, are marketed at approximately the same time, and compete with each other in the markets. Because of these facts, the exclusion of any part of such production from the program would tend to make its operation ineffective.

It is desirable to fix the boundaries of the production area so as to coincide with established check points employed by the State in connection with its maturity regulations on Persian lime shipments. Practically all of the shipments of Florida limes are made by truck and there has been established so-called road guard stations to check the truck shipments of limes and other commodities. These stations are located near the highway crossings of the Suwannee River and on the two major roads east of the Suwannee River leading out of the State. Thus there is available an ideal situation for checking all out-of-area shipments of limes for compliance with the program regulations. The exclusion of any portion of the State other than that west of the Suwannee River from the production area would increase the number of routes by which limes could be transported by truck from such area and would increase correspondingly the difficulties and expense of enforcing such regulations.

It is concluded, therefore, that the production area, as defined, is the smallest regional production area which is practicable, consistently with carrying out the declared policy of the act.

(4) The term "handler" should be defined in the marketing agreement and order to identify those persons who are regulated under the program. The term "handler," therefore, should include all persons who "handle" limes in the manner described hereinafter or who cause limes to be so handled. Common or contract carriers of limes transporting to market limes owned by another person should not be considered the "handler" of such limes, however, as in such instances the carrier is performing services for hire and is not responsible for the grade, size, or quality of the commodity it transports.

The term "handle" should be defined to identify those activities which it is necessary to regulate in order to effectuate the declared policy of the act. Such activities are those which place or continue limes in commerce and include the selling, consigning, delivering, or transporting of limes within the production area or from the production area to any point outside thereof. The performance of any one or more of these activities, either directly or indirectly through others, should constitute handling. Limes are frequently transported, sold, or otherwise placed or continued in commerce by more than one person. In order to effectuate the declared policy of the act, each such person should be required to limit such handling of limes to fruit which conforms to the applicable regulations established under the marketing agreement and order.

The handling of limes for specified outlets or uses enumerated in § 1001.56 of the proposed marketing agreement and order should be excepted from regulation, however, for the reasons set forth in connection with issue 5 (h) of this decision. Also, the term "handle" should be limited by particular exceptions to make its applicability specific and to simplify the administration of the program.

The sorting, grading, packing, and other acts in the preparation of limes for market should not be covered as handling subject to regulation. These actions, whenever they are performed, are, of necessity, preliminary to the handling—i. e., selling, consigning, delivering, or transporting—of limes. Moreover, it would unnecessarily complicate the administration of the program to require persons engaged in the preparation of limes for market to meet the requirements of regulations under the marketing agreement and order prior to such preparation. Therefore, such activities should not be included within the definition of handle.

It is common practice for growers to sell or deliver their limes to persons having facilities for packing and otherwise preparing the fruit for market. The grower, in such instances, properly relies on the person preparing the limes for market to see that the fruit which is thereafter shipped meets all applicable requirements for marketing. Thus, there should be excepted the movement of limes from the groves to the place where the fruit will be prepared for market. It is necessary, however, to limit the scope of this exception in order to assure compliance with the regulations established under the program. Hence, it should be required that the facilities, where the limes are to be prepared for market, be located within the production area. Otherwise, it would not be possible for the administrative committee, established under the provisions of the proposed marketing agreement and order, effectively to check on the disposition of the limes delivered to the packing facilities which did not meet the program requirements. Also, this exception should apply only in case the person engaged in the preparation of limes for market has registered with the committee in accordance with such rules as it may prescribe with the approval of the Secretary. This registration is necessary because some limes are prepared for market in sheds or other buildings located at or near the groves and it is necessary that the committee have knowledge of these locations for enforcement purposes; and also to afford the committee an opportunity to check on the handler-applicant's statements regarding his manner of doing business and his facilities for the preparation of limes for market. It is intended that the committee, under its rules, will register each handler-applicant who it is reasonable to believe will conduct his packing and handling operations in accordance with the program requirements.

There are some growers who deliver their limes to the packing house of handlers where the fruit is prepared for market, for a fee, for the person making such delivery. Also, a handler may, in some instances, have another handler pack limes for him. Transactions of this nature are generally referred to by the industry as "custom packing." After the limes are so packed they are returned to the person for whom the custom packing was performed who thereafter markets the limes in any manner he desires. As the custom packer is merely performing services for a fee and has no control over the disposition of the fruit which is custom packed, he should not be considered as the handler of the limes. Conversely, the person for whom the limes are custom packed is the handler of the limes, unless he sells them to a registered handler, and is responsible for compliance with the program terms, provisions, and regulations which are applicable at the time he sells, consigns, delivers, or transports the fruit so packed. In the event, however, that the custom packer retains any of such limes, for example the fruit sorted out in the packing process, and disposes of this fruit, such packer would be the handler of the fruit unless such disposition was in channels not subject to regulation under the program.

With the exceptions stated heretofore, all activities from the time the limes are severed from the tree until they are moved outside the production area are included in the process of handling. Any person who handles limes, as "handle" is defined in the marketing agreement and order, should be subject to regulation thereunder as to such handling transactions. Hence, if a producer of limes sells or delivers limes to an itinerant trucker or any other person not registered with the committee, in the manner heretofore described, the regulation should apply at the time of such sale or delivery. Under such circumstances, the producer is the first handler of such limes and is responsible for complying with the marketing agreement and order restrictions applicable at the time of such sale or delivery. Likewise, the same restrictions would apply to each person who subsequently handles such limes.

(5) (a) Certain terms applying to specific individuals, agencies, legislation, concepts, or things are used throughout the proposed marketing agreement and order. These terms should be defined for the purpose of designating specifically their applicability, and establishing appropriate limitations on their respective meanings wherever they are used.

The definition of "Secretary" should include not only the Secretary of Agriculture of the United States, the official charged by law with the responsibility for programs of this nature, but also, in order to recognize the fact that it is physically impossible for him to perform personally all functions and duties imposed upon him by law, any other officer or employee of the United States Department of Agriculture who is, or who may hereafter be authorized to act in his stead.

The definition of "act" provides the correct legal citations for the statute pursuant to which the proposed regulatory program is to be operative and avoids the need for referring to these citations.

The definition of "person" follows the definition of that term as set forth in the act, and will insure that it will have the same meaning as it has in the act.

The term "fiscal year" should be defined to identify the 12-month period with respect to which the financial records of the Florida Lime Administrative Committee—the agency which will administer the program locally—are to be maintained. The establishment of such period is necessary for businesslike administration of the marketing agreement and order and is desirable as a basis for establishing the terms of office of committee members and alternates. The date marking the end of one fiscal year and the beginning of the next should be fixed at a time of relative inactivity in the marketing of the lime crop and should allow sufficient time, prior to volume shipments in the new marketing season, for the committee to organize and develop information necessary to its functioning during the ensuing year. While Florida limes are harvested and marketed during each month of the year, the fresh shipments of such limes in each of the months of March and April have averaged, over the past 11 years, less than two percent of the season's total, and heavy shipments are not made until the latter part of May. Hence, March 31 of each year is an appropriate date, for the ending of each fiscal year. This term should be defined, therefore, as hereinafter set forth.

A definition of "committee" should be incorporated in the marketing agreement and order to identify the administrative agency established under the provisions of the program. Such committee is authorized by the act and the definition thereof, as hereinafter set forth, is merely to avoid the necessity of repeating its full name each time it is referred to.

The term "grower" should be synonymous with "producer" and should be defined to mean any person who is engaged, within the production area, in the production of limes for market and who has a proprietary interest therein. A definition of such term is necessary for such determinations as eligibility to vote for, and to serve as, a grower member or alternate grower member of the Florida Lime Administrative Committee, and for other reasons. The term should be limited to those who have a proprietary interest in the limes produced. It should not include laborers or others who perform work for a fee or for hire in producing the limes. Each business unit (such as a corporation, partnership, or community property arrangement) engaged in the production of limes for market should, when voting for nominees for membership on the committee, be entitled to only one vote.

A definition of "district" should be incorporated in the marketing agreement and order to delineate the geographical divisions of the production area for the purpose of electing nominees for membership on the committee. As stated heretofore, approximately 80 percent of the production of limes in Florida is in Dade and Monroe Counties. These two counties are contiguous and are the southernmost counties in the production area. Limes produced in Dade and Monroe Counties generally are prepared for marketing in such counties whereas limes produced in the remainder of the production area are marketed primarily through one handler and may be hauled considerable distances to the packing facilities. Hence, the designation, as hereinafter set forth, of Dade and Monroe Counties as District 1 and of the remainder of the production area as District 2 provides a logical division of the production area.

(b) It is necessary to establish an agency to act in administering the proposed marketing agreement and order under and pursuant to the act, as an aid to the Secretary in carrying out the declared policy of the act. The term "Florida Lime Administrative Committee" is a proper identification of the agency and reflects the administrative character thereof. It should be composed of nine members, of whom five should represent producers and four should represent handlers. Alternate members should be provided to act in the place and stead of the members. Such a committee would be large enough to provide representation to all segments of the industry. At the same time, it is of such size that it can operate effectively and efficiently. The foregoing division of the members between producers and handlers would provide suitable producer representation and handler experience and information. A majority of the committee should consist of producers because the program is designed to benefit producers. The provision for handler members tends to give balance to the committee by providing the handler experience and marketing information necessary to the development of economically sound regulation of lime shipments. Each handler member should be either a handler or an employee of a handler, as handlers often are corporations and would be precluded from having representation on the committee unless employees were authorized to serve as members of the committee. One handler member and one grower member should represent District 2 and the other members of the committee should represent District 1. Such division of the representation on the committee is representative of the volume of production of limes in the two districts.

Each producer or handler member of the committee, and his alternate, should be a producer or handler, as the case may be, of limes in the district for which he is selected. A person with such qualifications should be intimately acquainted with the problems of producing or marketing limes grown in such district and may be expected to present accurately the problems incident to the production or handling of limes grown in that district. The producer members and alternates should be growers who are not handlers or employees of handlers. Such provision is necessary to assure that the interests of the majority of the committee are primarily the growing of limes.

A term of office for committee members should be provided in the marketing agreement and order to establish an orderly procedure for changing the membership of the committee. The term of office should be for one year and should cover the same period as the fiscal year for reasons discussed heretofore in connection with the definition of that term. The provision for one year terms of office is desirable as producers and handlers will thus have an opportunity at the close of each marketing season to indicate whether they desire the incumbent members to represent them for another year. As appointment of the new committee members and alternates may not always be made in time for them to take office immediately upon the expiration of the term of office of the existing committee, provision should be made in the marketing agreement and order for members and alternates to serve in such position during the term of office for which they are selected and until their respective successors have been selected and qualified. Such provision will assure continuous functioning of the committee. Evidence presented at the hearing indicated that it would be desirable to assure that the same committee members would not serve continuously. Accordingly, provision should be made so that a member would be precluded from serving continuously on the committee for longer than three consecutive terms of office. This provision should not apply to alternate members as alternates actually serve on the committee only when the member for whom he is an alternate is unable to serve.

A procedure for the election by growers and handlers of nominees for membership on the committee should be prescribed in the marketing agreement and order to assist the Secretary in his selection of members and alternate members of the committee. The nomination of prospective members and alternate members at meetings of growers and handlers in the respective districts is a practical method of providing the Secretary with the names of the persons which the industry desires to serve on the committee.

Nomination meetings for the purpose of electing nominees for members of the committee and their alternates should be held or caused to be held by the committee on or before February 15 of each year. Such date is approximately six weeks prior to the end of the fiscal year. By having such nomination meetings not later than February 15 each year, the committee will be in a position to prepare and submit nomination lists to the Secretary in time for the Secretary to select the members and alternate members of the new committee prior to the expiration of the terms of office of the existing committee members.

As the administrative committee will not come into existence until after the selection by the Secretary of its initial members, the marketing agreement and order should provide a procedure for the selection of the initial members. The Secretary may appropriately select the initial grower and handler committee members and alternates from nominations which may be made by growers and handlers, respectively, or appropriate groups thereof, or from other persize, weight, capacity, dimensions, and order should so provide. In order that the initial membership of the committee may be selected as soon as possible after the approval of the program, it should be required that such nominations be submitted not later than the effective date thereof.

Each producer should be limited, at nomination meetings, to casting only one vote for each grower position as a committee member and one vote for each grower position as a committee alternate to be filled at such meeting. While growers who are also handlers or employees of handlers would not be eligible to serve as grower members of the committee, it is not necessary for this restriction to be applicable to voting for nominees for such positions. Voting on such basis, rather than on the basis of relative tonnages produced, is in accordance with the procedure followed in democratic elections and will prevent domination of the nominations by large growers. If more than one vote were permitted, based upon volume of production or number of groves owned, large growers would be in a position to nominate growers who might not be favored by a majority of the growers. The grower who operates in more than one district should be permitted to select the district in which he desires to participate in nomination meetings so that he may cast his ballot for nominees where he believes his principal interest lies. There are a considerable number of lime growers who do not reside in the production area and conduct their growing operations through others. In order to provide the broadest possible opportunity for all growers to participate in the election of nominees, growers residing outside the production area who are represented at nomination meetings by duly authorized agents, as well as the resident growers present at such meetings, should be permitted to vote.

Identical limitations and requirements should be applied to handler participation in meetings to nominate the handler members and alternate members of the committee for reasons similar to the application of such limitations to grower nomination procedure. However, the vote of handlers should be weighted by the volume of limes which he has handled during the applicable fiscal year. If handlers were limited to one vote, truckers and other small handlers who have little or no investment in the industry might be in a position to nominate the handler representation on the committee. This could result in the nomination of handlers who would not have the handler experience needed for the effective functioning of the committee.

In order that there will be an administrative agency in existence at all times to administer the marketing agreement and order, the Secretary should be authorized to select committee members and alternates without regard to nomination if, for any reason, nominations are not submitted to him in conformance with the procedure prescribed herein. Such selection should, of course, be on the basis of the representation provided in the marketing agreement and order so that the composition of the committee will at all times continue as prescribed therein.

Each person selected by the Secretary as a committee member or alternate should qualify by filing with the Secretary a written acceptance of his willingness and intention to serve in such capacity. This requirement is necessary so that the Secretary will know whether or not the position has been filled. Such acceptance should be filed within 10 days after the notification of appointment so that the composition of the committee will not be delayed unduly. Provision should be made for the filling of any vacancies on the committee, including selection by the Secretary without regard to nominations where such nominations are not made as prescribed, in order to provide for maintaining a full membership on the committee.

The committee should be given those specific powers which are set forth in section 8c (7) (C) of the act. Such powers are necessary to enable an administrative agency of this character to function.

The committee's duties, as set forth in the marketing agreement and order, are necessary for the discharge of its responsibilities. These duties are generally similar to those specified for administrative agencies under other programs of this character. It is intended that any activities undertaken by the members of the committee will be confined to those which reasonably are necessary for the committee to carry out its responsibilities as prescribed in the program. It should be recognized that these specified duties are not necessarily all inclusive in that it may develop that there are other duties which the committee may need to perform.

At least six members of the committee, or their respective alternates, should be present at any meeting in order for the committee to make any decisions; and all decisions of the committee should require a minimum of five concurring votes, with at least one such vote cast by a handler member. These provisions will assure that all actions of the committee will be considered by at least two-thirds of its membership and approved by a majority of the committee. Also, as five of the committee members are growers, these provisions are desirable to assure handler participation in all meetings and actions of the committee. The committee should be authorized to vote by telephone, telegraph, or other means of communication when a matter to be considered is so routine that it would be unreasonable to call an assembled meeting or when rapid action is necessary because of an emergency. Any votes cast in this fashion should be confirmed promptly in writing to provide a written record of the votes so cast. In case of an assembled meeting, however, all votes should be cast in person.

Each member of the committee, and each alternate when acting as a member, should receive compensation at a rate to be determined by the committee, which rate should not exceed $10.00 per day or portion thereof spent performing his duties under the marketing agreement and order, plus his reasonably necessary expenses. Members should be compensated at such rate to prevent them from incurring financial loss which might otherwise result from serving on the committee. Such loss could result from the necessity of employing others to perform work which the members normally would do if they were not performing their duties as committee members. Reimbursement for reasonably necessary expenses is also required to offset actual out-of-pocket expense incurred in performing duties in connection with the program.

Provision should be made whereby each committee will prepare an annual report prior to the expiration of the terms of office of its members. Such reports would provide succeeding committee members, the industry, and the Secretary with a record of the annual operations of the program and would provide a means for evaluation of the program and the need for any changes therein.

(c) The committee should be authorized to incur such expenses as the Secretary finds are reasonable and likely to be incurred by it during each fiscal year for its maintenance and functioning and for such other purposes as the Secretary may, pursuant to the provisions of the marketing agreement and order, determine to be appropriate. The funds to cover the expenses of the committee should be obtained through the levying of assessments on handlers. The act specifically authorizes the Secretary to approve the incurring of such expenses by an administrative agency such as the Florida Lime Administrative Committee, and requires that each marketing program of this nature contain provisions requiring handlers to pay pro rata the necessary expenses. Moreover, in order to assure the continuance of the committee, the payment of assessments should be required even if particular provisions of the marketing agreement and order are suspended or become inoperative.

Each handler should pay to the committee upon demand with respect to all limes handled by him, as the first handler thereof, his pro rata share of such expenses which the Secretary finds will be incurred necessarily by the committee during each fiscal year. Each handler's share of such expenses should be equal to the ratio between the total quantity of limes handled by him as the first handler thereof during the applicable fiscal year and the total quantity of limes so handled by all handlers during the same fiscal year. In this way, payments by handlers of assessments would be proportionate to the respective quantities of limes handled by each handler and assessments would be levied on the same limes only once.

It was advanced at the hearing that the marketing agreement and order should provide that the rate of assessment would not exceed 10 cents per bushel, or an equivalent quantity, of limes. It was contended that the inclusion of such restriction would be desirable in order that handlers would be assured of the maximum assessment

which could be levied against them. It is believed that the inclusion of such a restriction should not present any difficulties from the standpoint of preventing adequate assessments to be levied to cover the operational expenses anticipated at this time. An example of a budget for this program for operation during the first fiscal year was presented in evidence which showed estimated operational expenses for such year of $11,100. It was acknowledged that such budget did not include any provision for the expenditure of funds for the marketing research and development projects authorized under the proposed program and that actual expenses for the items that were shown might vary somewhat from the amounts listed. It was stated that research expense had been omitted solely because it was not possible to ascertain at this time what projects might be undertaken during any particular fiscal year so this expense could not now be estimated with any degree of accuracy. Nevertheless, it was contended that, on the basis of the prospective production and shipments of limes, the proposed restriction should provide sufficient leeway to cover any expenses which may reasonably be expected to arise in the foreseeable future and that if it should later develop that this maximum rate is not sufficient, appropriate amendatory action could then be taken to make whatever change in the restriction as may then seem to be necessary and desirable.

In order to provide funds for the administration of this program, the committee should be authorized to accept advance payments of assessments from handlers and also, when such action is deemed to be desirable, to borrow money in an amount not in excess of 10 percent of the estimated expenses set forth in its budget for the then current year. The inclusion of a provision for the acceptance by the administrative agency of advance assessment payments is included in other marketing agreements and orders, and has been found to be a satisfactory and desirable method of providing funds to cover costs of operation prior to the time when assessment collections are being made in an appreciable amount. There was no objection offered at the hearing to indicate that any person was opposed to the proposal for the committee to borrow a limited sum of money each fiscal year. It was pointed out that the indicated limitation would permit the borrowing of such a relatively insignificant amount that it should not cause any particular problems to arise from the standpoint of the repayment of it. During years of normal growing conditions, revenue available to the committee from assessments would provide the means for the repayment of any such loan. In addition, as hereinafter set forth, provision is made for increasing the rate of assessment in the event it should develop that due to some unforeseen circumstance, the assessment income under the then prevailing rate is not sufficient to cover the expenses incurred. The expenses which had been met from the fund previously borrowed would, of course, constitute a part of the overall cost of operations.

The Secretary should have the authority, at any time during a fiscal year, or thereafter, to increase the rate of assessment when necessary to obtain sufficient funds to cover any later finding by the Secretary relative to the expenses of the committee. Since the act requires that administrative expenses shall be paid by all handlers pro rata, it is necessary that any increased rate apply retroactively against all limes handled during the partciular fiscal year.

If, at the end of any fiscal year, the assessments collected exceed the expenses incurred, each handler's share of such excess should be credited to him against the operations for the following fiscal year; but, if any handler makes a demand for payment thereof, refund should be made to him. The right of every handler to the return of his pro rata share of the excess funds would be recognized by providing for the payment of such share to him in case he requests it. However, good business practice requires that any such refund may be applied by the committee first to any outstanding obligations due the committee from any person who has paid in excess of his pro rata share of expenses and requests the return of such excess payment.

All assessment monies received by the committee should be used solely for the purposes, and accounted for in the manner, specified in the marketing agreement and order.

The Secretary should be authorized to require the committee, at any time, to account for all receipts and disbursements. Such authority would aid in assuring careful administration of assessment funds.

(d) The marketing agreement and order should provide, as hereinafter set forth, authority for the committee to establish or provide for the establishment of marketing research and development projects for the purpose of improving marketing practices and expanding the distribution and consumption of limes. With the increase in Florida lime production in prospect, it will be incumbent upon the industry to increase the demand for limes through enlarging the existing markets and developing additional outlets for such fruit. In order to accomplish this purpose, it will be necessary to obtain information with which to evaluate the existing harvesting and marketing practices of the Florida lime industry. Such information may be developed through scientific studies concerning matters such as the factors influencing yields and losses under alternative harvesting and marketing methods, the effect of present grading and merchandising practices on the "shelf-life" of limes, and the availability of limes in the various markets. One of the more pressing problems of the lime industry is the further development of outlets for limes of grades and qualities not suitable for fresh shipment. There has been no concerted industry effort along this line and the need for study of this problem became apparent during the past season when processors reduced their purchases of limes. It was stated, also, that limes are one of the few fruits that are marketed when green in color and that educational work in this regard should be undertaken, as well as in connection with the nutritive value and uses for such fruit.

The disorderly situation within the Florida lime industry with respect to the containers used, and the need for correcting this situation, was emphasized at the hearing. It was pointed out, however, that the containers presently used in the marketing of limes had developed largely as the result of individual preferences or from efforts to gain a competitive advantage by adopting a smaller container, varying only slightly in dimensions, from those of most other handlers. Extensive study of the performance of the various containers may be needed, therefore, in order for the industry to determine the optimum containers for the handling of limes.

(e) Evidence presented at the hearing shows that handlers often have shipped in fresh fruit channels limes of poor grade and quality, and of undesirable size. Such limes may be sold only at discounts and the returns from such sales often do not cover the cash costs of harvesting and marketing. In addition, such sales have tended to depress the prices for the entire crop, for the particular year, below the level which otherwise would have existed if only limes of suitable grade, size, and quality, considering the supply and demand conditions for such fruit, had been available in the markets.

The demand for particular grades, sizes, and qualities of limes varies depending upon the volume of supplies available, the grade, size, and quality composition of such supplies, the availability of competing commodities, the trend and level of consumer income, and other factors such as weather conditions. Also, supply and demand conditions for limes are subject to substantial changes during a particular season as the result of weather conditions affecting the production and consumption of limes or competing commodities.

It was proposed in the notice of hearing to provide authority to regulate the maturity of limes as well as the grade, size, and quality thereof. The evidence presented at the hearing discloses, however, that limes are marketed prior to the time such fruit is "mature" within the meaning generally ascribed to such term. That is to say, limes should not be left on the tree until they are fully mature but should be harvested at the time they reach that stage of development when the optimum juice and acid content has been attained. Limes are used primarily as juice in the preparation of beverages and salad dressings and as a condiment for meat dishes. Consequently, limes lacking the desired flavor and juice and acid content do not provide consumer satisfaction. The industry has been accustomed to calling limes mature when they have the desired volume of juice. It does not appear necessary, however, to provide for maturity regulation since regulations prescribing

internal quality standards would provide the control needed to prevent the shipment of the poor quality limes which the industry refers to as "immature." Therefore, the marketing agreement and order should provide for the establishment by the Secretary of regulations by grade, size, quality (including internal quality and juice content), or combinations thereof, based upon limitations recommended by the committee; and such regulations should cover such period or periods as it is determined is warranted by the anticipated supply and demand conditions. In making its recommendations for such regulations the committee should consider the above enumerated supply and demand factors. The committee, because of the knowledge and experience of its members, will be well qualified to evaluate such factors and to develop economically sound and practical recommendations for regulations and to advise the Secretary with respect to the supply and demand conditions under which the lime crop will be marketed.

The existing practices and conditions within the Florida lime industry in regard to the shipping containers used are discussed in some detail under (1) and (5) (d) this decision. Data presented at the hearing revealed that in 1950 there were at least 18 different containers used for shipping limes, not including shipments in field crates; and it was testified that an even greater number of containers are now used. Many of these containers vary only slightly in dimensions. For example, the dimensions of the 3 so-called ⅘-bushel cartons currently being used were given as 11½" x 7½" x 5", 12½" x 10" x 3¾", and 12¼" x 9¾" x 3¾".

Buyers have taken advantage of this situation and obtained price concessions from handlers simply because the handler involved could not ascertain, from the alleged competitive prices quoted by the buyer, whether his asking price was out of line with the market. Hence, a handler often has reduced his price in order to make a sale without knowing what he was competing against. Standardization of the containers used in the handling of limes would correct this situation and tend to establish more orderly marketing conditions. It was pointed out in this connection, however, that to accomplish fully the objective of container regulations, it would be necessary also to provide authority to prescribe specifications of the pack of the containers. Otherwise, handlers would be able to vary the quantity of limes in such containers and thereby make ineffective any container limitations that were established. It is concluded, therefore, that the provisions of the marketing agreement and order should contain authorization for the committee to recommend and the Secretary to issue regulations fixing the size, capacity, weight, dimensions, or pack of the containers which may be used in the packaging and the transportation, sale, shipment or other handling of limes. Initially, such limitations may be directed toward reducing the number of nearly identical containers which are now so used but, as factual data become available, more comprehensive regulations may be necessary and desirable.

The committee should be authorized to recommend, and the Secretary to establish, such minimum standards of quality, when prices for limes are above parity, as will be in the public interest. The shipment of limes with insufficient juice or acid content, having a bitter flavor, or lacking in the quality necessary to assure delivery in satisfactory condition would cause an adverse buyer reaction and would tend to demoralize the market for later shipments of limes. Such undesirable limes have been marketed in the past and undoubtedly would again be marketed in the absence of regulation when average prices are above parity. Hence, the discontinuance of regulations during periods when prices exceed parity could result in dissipation of all benefits from the prior operation of the program.

Large-sized limes tend to develop stylar-end rot in transit or after such fruit has reached the hands of the retailer or consumer. Such defect may, depending upon weather conditions, extend in some seasons to other sizes. Likewise some external defects, such as rust or scab, may or may not indicate the fruit is lacking in quality depending on the conditions in the particular season. It is necessary, therefore, that the provisions of the marketing agreement and order contain the flexibility needed to reflect such conditions. Hence, the specific minimum quality standards that may be made applicable during a particular year should be established by the Secretary from the recommendations of the committee made after review of the existing conditions that year.

Provision should be made for the Secretary to consider and establish regulations on the basis of the recommendations and information submitted by the committee, and, as there may be available to him pertinent information not in possession of the committee, he should be authorized to act on the basis of such available information also. The committee should notify growers and handlers of meetings to consider recommendations for regulation, by mailing such notification to each such person requesting it, as growers and handlers are vitally interested in such recommendations. Authority should be given to the committee to recommend, and the Secretary to issue, a modification, suspension, or termination of any regulation established under the program, since such actions may become necessary as the result of changed conditions which could not be anticipated at the time the regulations were formulated.

In order to facilitate the operation of the program, the committee should each year, and prior to recommending regulation of lime shipments, prepare and adopt a marketing policy for the ensuing marketing season. A report on such policy should be submitted to the Secretary and made available to growers and handlers of limes. The policy so established would serve to inform the Secretary and persons in the industry, in advance of the marketing of the crop, of the committee's plans for regulation and the basis therefor. Handlers and growers could then plan their operations in accordance therewith. The policy also would be useful to the committee and the Secretary when specific regulatory actions were being considered since it would provide basic information necessary to the evaluation of such regulation.

In preparing its marketing policy, the committee should give consideration to the supply and demand factors, hereinafter set forth in the marketing agreement and order, affecting marketing conditions for Florida limes since consideration of such factors is essential to the development of an economically sound and practical marketing policy.

The committee should be permitted to revise its marketing policy so as to give appropriate recognition to the latest known conditions when changes in such conditions since the beginning of the season are sufficiently marked to warrant modification of such policy. Such action is necessary if the marketing policy is to appropriately reflect the probable regulatory proposals of the committee and be of maximum benefit to all persons concerned. A report of each revised marketing policy should be submitted to the Secretary and made available to growers and handlers, together with the data considered by the committee in making the revision.

The proposed program set forth in the notice of hearing contained provisions authorizing the establishment of restrictions applicable to the handling of limes to destinations within the production area different to those applicable to limes handled to destinations outside such area. The only evidence of record supporting such authority is general statements to the effect that the largest sizes of limes have been sold in nearby markets, such as Miami, since there is little demand for large limes in the northern markets and such fruit develops considerable spoilage if it is shipped to the more distant markets. On the other hand, it was shown that it would not be possible effectively to regulate shipments of limes if fruit restricted for out-of-state shipment were permitted to be sold in fresh fruit channels within the production area. Nearly all of the limes shipped for fresh consumption move from the packinghouses by truck. It is not unusual for parts of such truckloads of limes to be delivered to dealers within the production area with the remainder being transported to out-of-state markets. Such dealers may sell all or a portion of the limes they so receive to truckers who then transport the fruit to out-of-state markets. With such commingling of the fruit handled, it appears certain that substantial quantities of fruit eligible only for marketing within the production area would be trucked to other markets. Moreover, since large-sized limes usually may be sold only at discounts, sales of such fruit in markets within the production area would tend to depress the prices for other limes sold in such markets and thus lower the average returns to growers. It is concluded, therefore, that any restrictions made effective under the marketing agreement and order should be applicable to all limes handled, in order to effectuate the

declared policy of the act, and the marketing agreement and order should so provide.

(f) The marketing agreement and order should contain provisions authorizing the committee to issue exemption certificates, under certain conditions, to growers and others who own or otherwise control limes on the tree. Certain hazards are incidental to the production of limes in Florida which are beyond the control of the grower. Such hazards include highly localized winds, hailstorms, moisture conditions, and freezes. These conditions may affect the grade and the quality of the fruit or cause an excessively large or small "set" of fruit with the result that the individual limes may be excessively small or large. Because of a particular grove location, one grower's fruit or that of a few growers may be materially affected by such conditions whereas the majority of crops in the production area are of normal grade, size, and quality. In such circumstances, regulations may be made effective under the marketing agreement and order which would not permit any of such fruit to be shipped in fresh market channels. In order that the growers whose fruit is so affected will not suffer undue hardship as the result of such regulation, growers should be permitted to apply for, and the committee to issue, exemption certificates, authorizing the shipment of such quantity of exempted fruit as may be necessary to enable the applicant to market in regulated channels as large a proportion of his production as the average percentage of the total production which will be so marketed. In order that the committee may not be unduly burdened by applications for exemption certificates, the applicant should be required to furnish to the committee, with his application, proof that his limes did not meet the requirements of the then effective regulation because of conditions beyond his control. As some growers conduct their growing operations through others, persons acting for growers should be permitted to apply for and receive such exemption certificates. Likewise, a purchaser of limes on the tree should be permitted to handle, or have handled, any limes so purchased in the same manner as if the purchaser had grown the fruit. The purchaser of limes on the tree, therefore, should also be permitted to apply for, and receive, exemption certificates if the circumstances so warrant. The committee should adopt, with the approval of the Secretary, procedural rules governing the application and issuance of such exemption certificates so that persons eligible to receive such certificates will be informed concerning the procedure to be followed in connection therewith. Such procedural rules should provide for such safeguards as may be necessary to assure that all limes handled pursuant to an exemption certificate are actually covered by such certificate. Provision should be made for the transfer of exemption certificates to the handler of such limes, as the handler would need the certificate to show that such handling was not in violation of the regulation.

(g) Provision should be made in the marketing agreement and order requiring all limes handled, during any period when handling limitations are effective, to be inspected by the Federal-State Inspection Service and certified as meeting the requirements of the applicable regulation. Inspection and certification of all limes handled during periods of regulation are essential to the effective supervision of the regulations. Evidence of compliance with the regulations issued under the program can be ascertained only through inspection and certification of all limes handled during the effective period of such regulations. As the handler of limes is the person responsible for compliance with such regulations, it is reasonable and necessary to require handlers to submit each lot of limes handled to inspection and certification and to file a copy of the certificate with the committee. It was testified that the Federal-State Inspection Service has been the agency usually used for such inspection in the past, that its services have been satisfactory, and the use of it as the inspection agency under this program is desired by the industry.

In instances where any lot of limes previously inspected are regraded, resorted, repackaged, or in any other way subjected to further preparation for market, such limes should be required to be inspected following such preparation, and certified as meeting the requirements of the applicable regulations, since the identity of the lot is lost in such preparation and the validity of the prior inspection certificate and the information shown thereon destroyed.

(h) The marketing agreement and order should provide for the exemption from its provisions of such handling of limes which it is not necessary to regulate in order to effectuate the declared purposes of the act. Insofar as practicable, such exempted handling should be stated explicitly in the marketing agreement and order so that handlers will have knowledge of such handling as is not subject to the provisions of the program.

Limes which are handled for consumption by charitable institutions, for distribution by relief agencies, or for commercial processing into products have little influence on the level of prices for limes sold in the domestic and export markets. Hence, limes handled for such purposes should be exempted from compliance with the regulations issued under the marketing agreement and order.

In addition, provision should be made to authorize the committee, with the approval of the Secretary, to exempt the handling of specified small quantities or types of shipments of limes, or shipments made for such specified purposes as it is not necessary to regulate in order to effectuate the declared purposes of the act. Such authorization is necessary to enable the committee to exempt such handling which is found not feasible administratively to regulate and which does not materially affect marketing conditions in commercial channels. It would be impractical to set forth these exemptions in detail in the marketing agreement and order, because to do so would destroy the flexibility which is necessary to reflect conditions affecting the handling of limes in the production area. Therefore, it should be discretionary with the committee, subject to the approval of the Secretary, whether small quantities or types of shipments, or shipments made for specified purposes, should be exempted from regulation and the period during which such exemptions should be in effect.

The allowance of such exceptions may be found to result in avenues of escape from regulation which, if they are found to exist, should be closed. Hence, the committee should be authorized to prescribe, with the approval of the Secretary, such rules, regulations, and safeguards as are necessary to prevent limes handled for any of the exempted purposes from entering into regulated channels of trade and thereby tend to defeat the objective of the program. For example, should it be found that a portion of the limes moving to commercial processors were being diverted to fresh fruit markets, it may be necessary for the committee to establish procedures to govern the movement of fruit for processing even though such limes could not be required to meet the grade, size, quality and other limitations. These procedures might include such requirements as filing applications for authorization to move limes in exempted channels and certification by the receiver that such limes would be used for the purpose indicated, if it is found that such requirements are necessary to the effective enforcement of the program regulations.

It was provided in the marketing agreement and order set forth in the notice of hearing that limes exported other than to Canada would be exempted from regulation. The evidence presented at the hearing was to the effect that all limes marketed in fresh fruit channels should be required to meet the limitations prescribed under the proposed program. Currently, there are very few limes shipped to destinations outside the United States and Canada. However, the shipment of limes not meeting such limitations to the export markets would not be conducive to the development of the demand for limes in such markets. Since such development would be desirable, it is concluded that the marketing agreement and order provisions should be applicable to all fresh shipments of limes.

(i) Handlers should be required to submit certain reports to the committee so that it will have available the information which is necessary for administering the program. Handlers have such necessary information in their possession, and the requirement that they furnish such information to the committee in the form of reports would not constitute an undue burden. Moreover, since handlers are the only persons subject to regulation under the program, they are the only persons who could be required to furnish such information.

Testimony presented at the hearing was to the effect that each handler should file with the committee certified reports showing the quantities of each variety of limes he received during that week, a complete record of the quantities disposed of by him, segregated by varieties into the quantities subject to regulation and otherwise disposed of, and the quantities on hand at the end of the period. It was indicated that such reports should include, for each quantity disposed of, the date of such disposition, and identification of the carrier transporting the fruit and of the inspection certificate or exemption certificate, if any, pursuant to which the fruit was handled, together with the destination of each such disposition in nonregulated channels. All of such information will be needed at times to enable the committee to ascertain whether the regulatory provisions of the program are properly complied with and to provide the basis for collecting assessments. It would be impractical, however, to impose rigid reporting requirements upon handlers which possibly would require the periodic submission of information since the committee would not need this information at all times in order to perform its functions. Hence, the reporting requirements prescribed in the marketing agreement and order should reflect the flexibility that is necessary so that reports required thereunder, and the time and manner of filing such reports, may be adjusted readily in the light of operating experience. It is concluded, therefore, that the marketing agreement and order should provide for the submission to the committee by handlers of such reports covering their transactions in limes, as heretofore discussed, as the committee may request and are needed in the administration of the program.

Upon the request of the committee, approved by the Secretary, handlers should furnish such other reports and information as the committee needs to perform its functions under the marketing agreement and order. It is impossible to anticipate every type of report, or kind of information, which the committee may need in administering the program; but it should have the authority to obtain such reports and information if needed. Handlers should be required to maintain such records as may be necessary to verify the information so reported. So that this requirement may not be unduly burdensome, such records need be retained for only two succeeding fiscal years.

Reports furnished to the committee should be submitted in such manner and upon such forms as may be designated by the committee. It is impractical to specify such reporting procedures in the marketing agreement and order, because changing conditions may warrant changes in the forms or methods of reporting to the committee.

It was testified at the hearing that the nature of the reports, which a handler may be required to file with the committee, is such that disclosure of the information therein to his competitors may seriously affect his operations. Therefore, handlers should be protected, insofar as is consistent with the requirements of the program, from disclosure of the information contained in the reports they submit to the committee. This objective may be attained by providing in the marketing agreement and order that all reports required of handlers shall be received by, and at all times be in custody of, one or more designated employees of the committee and providing that the committee's employees shall handle the reported information in such a manner that the identity of the individual handlers shall not be revealed. Nevertheless, such information should be made available to the Secretary, upon request, for his use in discharging his responsibilities and also should be revealed to any extent necessary when a question of compliance with the program provisions is involved. The limitation on disclosure of information contained in handler's reports should not be construed as prohibiting in any way the making of reports to the committee and the industry which summarize the information contained in all handlers' reports for a particular period or periods.

(j) Except as provided in the marketing agreement and order, no handler should be permitted to handle limes, the handling of which is prohibited pursuant to the marketing agreement and order, and no handler should be permitted to handle limes except in conformity with the marketing agreement and order. If the program is to be effective, no handler should be permitted to evade its provisions since such action on the part of one handler, although possibly of small impact on the industry measured by the proportion of limes handled by him, would be demoralizing to other handlers and would tend to impair operation of the program.

(k) The provisions of §§ 1001.62 through 1001.71, as hereinafter set forth, are, except as indicated below with respect to § 1001.64 (c), provisions similar to those which are included in other marketing agreements and orders now operating. The provisions of §§ 1001.72 through 1001.74, as hereinafter set forth, are also included in other marketing agreements now operating. All such provisions are incidental to and not inconsistent with the act and are necessary to effectuate the other provisions of the recommended marketing agreement and order and to effectuate the declared policy of the act. Testimony at the hearing supports the inclusion of each such provision.

Those provisions which are applicable to both the proposed marketing agreement and order, identified by both section number and heading, are as follows: § 1001.62 *Right of the Secretary;* § 1001.63 *Effective time;* § 1001.64 *Termination;* § 1001.65 *Proceedings after termination;* § 1001.66 *Effect of termination or amendment;* § 1001.67 *Duration of immunities;* § 1001.68 *Agents;* § 1001.69 *Derogation;* § 1001.70 *Personal liability;* and § 1001.71 *Separability.*

Those provisions which are applicable to the proposed marketing agreement only, identified by both section number and heading, are as follows: § 1001.72 *Counterparts;* § 1001.73 *Additional parties;* and § 1001.74 *Order with marketing agreement.*

In addition to the basis for termination of the marketing agreement and order contained in § 1001.64 (a), (b), and (d) thereof, termination of the program should be required at the end of any fiscal year whenever the Secretary finds that continuation of the marketing agreement and order is not favored by the majority of producers. The requirements of the act in this connection, with respect to the mandatory termination of the marketing agreement and order, provides that such majority shall have produced more than 50 percent of the volume of the commodity produced during the determined representative period. It was the general consensus of those participating in the hearing, however, that a program of this nature could not be operated effectively unless a majority of the producers favored its continuance in operation and that it would be desirable, therefore, to base any such determination as to the continuance or termination of the program on whether a majority of the producers favored such action without consideration of the relative volume of limes produced by them. In order to give producers and other interested parties adequate notice of any such termination action, provisions should be made to announce the termination prior to March 15 to be effective at the end of the fiscal year.

The proposal upon which the hearing was held also provided that, (1) after the close of the fiscal year ending March 31, 1957, there shall be conducted a referendum of producers and a poll of handlers to determine whether the continuation of the marketing agreement and order is favored by them and (2) if less than two-thirds of the producers, by number or volume of production, voting in such referendum favor the continuation of the program or if handlers representing more than fifty percent of the volume of limes handled favor its termination, the Secretary shall thereupon terminate the marketing agreement and order. The period to be used in connection with such referendum and poll is the fiscal year ending March 31, 1957. It was indicated at the hearing that the effective operation of this program will be dependent upon the cooperation of both producers and handlers, of limes and that it would be desirable to incorporate the proposed requirement into the marketing agreement and order so as to provide both growers and handlers with an opportunity, at the end of the first two years of operation, to express their views on the continuance or termination of the program. The provision for holding the referendum and poll after two years of operations should provide a reasonable period for the evaluation of the program. Such provision should promote awareness of the interest of both producers and handlers in the program and thereby contribute to its successful operation.

Rulings on proposed findings and conclusions. March 14, 1955, was set by the Presiding Officer at the hearing as the latest date by which briefs would have to be filed by interested parties with respect to facts presented in evidence at the hearing and the conclusions which should be drawn therefrom. No briefs were filed.

General findings. Upon the basis of the evidence introduced at such hearing, and the record thereof, it is found that:

(1) The marketing agreement and order, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) Such marketing agreement and order regulate the handling of limes grown in the production area in same manner as, and are applicable only to persons in the respective classes of commercial and industrial activities specified in, the proposed marketing agreement and order upon which the hearing has been held;

(3) The said marketing agreement and order are limited in their application to the smallest regional production area which is practicable, consistently with carrying out the declared policy of the act, and the issuance of several orders applicable to subdivisions of the production area would not effectively carry out the declared policy of the act;

(4) There are no differences in the production and marketing of limes grown in the production area covered by the said marketing agreement and order that make necessary different terms and provisions applicable to different parts of such area; and

(5) All handling of limes, as defined in said marketing agreement and order, is in the current of interstate or foreign commerce, or directly burdens, obstructs, or affects such commerce.

Recommended marketing agreement and order. The following proposed marketing agreement and order [1] are recommended as the detailed means by which the foregoing conclusions may be carried out;

DEFINITIONS

§ 1001.1 *Secretary.* "Secretary" means the Secretary of Agriculture of the United States, or any officer or employee of the Department to whom authority has heretofore been delegated, or to whom authority may hereafter be delegated, to act in his stead.

§ 1001.2 *Act.* "Act" means Public Act No. 10, 73d Congress (May 12, 1933), as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.; 68 Stat. 906, 1047).

§ 1001.3 *Person.* "Person" means an individual, partnership, corporation, association or any other business unit.

§ 1001.4 *Production area.* "Production area" means all of the State of Florida, except the area west of the Suwannee River.

§ 1001.5 *Limes.* "Limes" means all varieties and clones of acid limes, grown in the production area, classified botanically as Citrus Aurantifolia (Christm.) Swingle, and includes the group known as true limes (also known as Mexican, West Indian, and Key limes and by other synonyms) and the group known as large fruited or Persian limes (including Tahiti, Bearss, and similar varieties).

§ 1001.6 *Fiscal year.* "Fiscal year" means the twelve-month period ending March 31 of each year.

§ 1001.7 *Committee.* "Committee" means the Florida Lime Administrative Committee established pursuant to § 1001.20.

§ 1001.8 *Grower.* "Grower" is synonymous with producer and means any person who produces limes for market and who has a proprietory interest therein.

§ 1001.9 *Handler.* "Handler" is synonymous with shipper and means any person (except a common or contract carrier transporting limes owned by another person) who handles limes or causes limes to be handled.

§ 1001.10 *Handle.* "Handle" means to sell, consign, deliver, or transport limes within the production area or between the production area and any point outside thereof: *Provided,* That such term shall not include: (a) The sale or delivery of limes to a handler, registered as such with the committee in accordance with such rules and regulations as it may prescribe with the approval of the Secretary, who has facilities within the production area for preparing limes for market; (b) the delivery of limes to such a handler solely for the purpose of having such limes prepared for market; or (c) the transportation of limes by a handler, so registered with the committee, from the grove to his packing facilities within the production area for the purpose of having such limes prepared for market. In the event a grower sells his limes to a handler who is not so registered with the committee, such grower shall be the first handler of such limes.

§ 1001.11 *District.* "District" means the applicable one of the following described subdivisions of the production area, or such other subdivisions as may be prescribed pursuant to § 1001.29 (n):

(a) "District 1" shall include Dade and Monroe counties.

(b) "District 2" shall include all of the production area except Dade and Monroe counties.

ADMINISTRATIVE BODY

§ 1001.20 *Establishment and membership.* There is hereby established a Florida Lime Administrative Committee consisting of nine members, each of whom shall have an alternate who shall have the same qualifications as the member for whom he is an alternate. Five of the members and their respective alternates shall be growers who shall not be handlers or employees of handlers. Four of the members and their respective alternates shall be handlers or employees of handlers. The five members of the committee who shall be growers and who shall not be handlers, or employees of handlers, are hereinafter referred to as "grower" members of the committee; and the four members who shall be handlers, or employees of handlers, are hereinafter referred to as "handler" members of the committee. Four of the five grower members shall be producers of limes in District 1, and one grower member shall be a producer of limes in District 2. Three of the four handler members shall be handlers, or employees of handlers, of limes in District 1, and one handler member shall be a handler, or an employee of a handler, of limes in District 2.

§ 1001.21 *Term of office.* The term of office of each member and alternate member of the committee shall begin April 1, and shall terminate March 31 of the following year. Members and alternate members shall serve in such capacities for the portion of the term of office for which they are selected and qualify and until their respective successors are selected and have qualified. The consecutive terms of office of members shall be limited to three terms.

§ 1001.22 *Nomination*—(a) *Initial members.* Nominations for each of the five initial grower members and four initial handler members of the committee, together with nominations for the initial alternate members for each position, may be submitted to the Secretary by individual growers and handlers. Such nominations may be made by means of group meetings of the growers and handlers concerned in each district. Such nominations, if made, shall be filed with the Secretary no later than the effective date hereof. In the event nominations for initial members and alternate members of the committee are not filed pursuant to, and within the time specified in, this section, the Secretary may select such initial members and alternate members without regard to nominations, but selections shall be on the basis of the representation provided for in § 1001.20.

(b) *Successor members.* (1) The committee shall hold or cause to be held, not later than February 15 of each year, a meeting or meetings of growers and handlers in each district for the purpose of designating nominees for successor members and alternate members of the committee. At each such meeting a chairman and a secretary shall be selected by the growers and handlers eligible to participate therein. The chairman shall announce at the meeting the number of votes cast for each person nominated for member or alternate member and shall submit promptly to the committee a complete report concerning such meeting. The committee shall, in turn, promptly submit a copy of each such report to the Secretary.

(2) Only growers who are present at such nomination meetings, or who reside outside the production area and are represented at such nomination meetings by duly authorized agents, shall participate in the nomination and election of nominees for grower members and their alternates. Each grower shall be entitled to cast only one vote for each nominee to be elected in the district in which he produces limes. No grower shall participate in the election of nominees in more than one district in any one fiscal year.

(3) Only handlers who are present at such nomination meetings, or represented at such meetings by duly authorized agents, shall participate in the nomination and election of nominees for handler members and their alternates. Each handler shall be entitled to cast only one vote for each nominee to be elected in the district in which he handles limes, which vote shall be weighted by the volume of limes shipped by such handler during the then current fiscal year. No handler shall participate in the election of nominees in more than one district in any one fiscal year.

§ 1001.23 *Selection.* From the nominations made pursuant to § 1001.22, or from other qualified persons, the Secretary shall select the five grower members of the committee, the four handler members of the committee, and an alternate for each such member.

§ 1001.24 *Failure to nominate.* If nominations are not made within the time and in the manner prescribed in § 1001.22, the Secretary may, without regard to nominations, select the members and alternate members of the committee on the basis of the representation provided for in § 1001.20.

§ 1001.25 *Acceptance.* Any person selected by the Secretary as a member or as an alternate member of the committee shall qualify by filing a written acceptance with the Secretary within ten days after being notified of such selection.

§ 1001.26 *Vacancies.* To fill any vacancy occasioned by the failure of any person selected as a member or as an alternate member of the committee to qualify, or in the event of the death, removal, resignation, or disqualification of any member or alternate member of the committee, a successor for the unexpired term of such member or alternate member of the committee shall be nominated and selected in the manner specified in §§ 1001.22 and 1001.23. If the names of nominees to fill any such vacancy are not made available to the Secretary within fifteen days after such vacancy occurs, the Secretary may fill such vacancy without regard to nominations, which selection shall be made on the basis of representation provided for in § 1001.20.

§ 1001.27 *Alternate members.* An alternate member of the committee, during the absence or at the request of the member for whom he is an alternate, shall act in the place and stead of such member. In the event of the death, removal, resignation, or disqualification of a member, his alternate shall act for him until a successor for such member is selected and has qualified.

§ 1001.28 *Powers.* The committee shall have the following powers:

(a) To administer the provisions of this part in accordance with its terms;

(b) To receive, investigate, and report to the Secretary complaints of violations of the provisions of this part;

(c) To make and adopt rules and regulations to effectuate the terms and provisions of this part; and

(d) To recommend to the Secretary amendments to this part.

§ 1001.29 *Duties.* The committee shall have, among others, the following duties:

(a) To select a chairman and such other officers as may be necessary, and to define the duties of such officers;

(b) To appoint such employees, agents, and representatives as it may deem necessary, and to determine the compensation and to define the duties of each;

(c) To submit to the Secretary as soon as practicable after the beginning of each fiscal year a budget for such fiscal year, including a report in explanation of the items appearing therein and a recommendation as to the rate of assessment for such fiscal year;

(d) To keep minutes, books, and records which will reflect all of the acts and transactions of the committee and which shall be subject to examination by the Secretary;

(e) To prepare periodic statements of the financial operations of the committee and to make copies of each such statement available to growers and handlers for examination at the office of the committee;

(f) To cause its books to be audited by a certified public accountant at least once each fiscal year, and at such other times as the Secretary may request;

(g) To act as intermediary between the Secretary and any grower or handler;

(h) To investigate and assemble data on the growing, handling, and marketing conditions with respect to limes;

(i) To submit to the Secretary such available information as he may request;

(j) To notify, as provided in this part, producers and handlers of all meetings of the committee to consider recommendations for regulation;

(k) To give the Secretary the same notice of meetings of the committee as is given to its members;

(l) To consult with such representatives of growers or groups of growers as may be deemed necessary and to pay the travel expenses incurred by such representatives in attending committee meetings at the request of the committee: *Provided,* That the committee shall not pay the travel expenses of more than three such representatives in connection with any one meeting of the committee;

(m) To investigate compliance with the provisions of this part; and

(n) With the approval of the Secretary, to redefine the districts into which the production area is divided, and to reapportion the representation of any district on the committee: *Provided,* That any such changes shall reflect, insofar as practicable, shifts in lime production within the districts and the production area.

§ 1001.30 *Procedure.* (a) Six members of the committee, or alternates acting for members, shall constitute a quorum and any action of the committee shall require at least five concurring votes: *Provided,* That at least one handler member shall approve the action.

(b) The committee may vote by telegraph, telephone, or other means of communication, and any votes so cast shall be confirmed promptly in writing: *Provided,* That if an assembled meeting is held, all votes shall be cast in person.

§ 1001.31 *Expenses and compensation.* The members of the committee, and their respective alternates when acting as members, shall be reimbursed for expenses necessarily incurred by them in the performance of their duties under this part and shall also receive compensation, as determined by the committee, which shall not exceed $10.00 per day or portion thereof spent in performing such duties.

§ 1001.32 *Annual report.* The committee shall, prior to March 31 of each fiscal year, prepare and mail an annual report to the Secretary and to each handler and grower who requests a copy of the report. This annual report shall contain at least: (a) A complete review of the regulatory operations during the fiscal year; (b) an appraisal of the effect of such regulatory operations upon the lime industry; and (c) any recommendations for changes in the program.

EXPENSES AND ASSESSMENTS

§ 1001.40 *Expenses.* The committee is authorized to incur such expenses as the Secretary finds are reasonable and may be necessary to enable the committee to exercise its powers and perform its duties in accordance with the provisions of this part during each fiscal year. The funds to cover such expenses shall be acquired by the levying of assessments as provided for in § 1001.41.

§ 1001.41 *Assessments.* (a) Each person who first handles limes shall, with respect to the limes so handled by him, pay to the committee upon demand such person's pro rata share of the expenses which the Secretary finds will be incurred by the committee during each fiscal year. Each such person's share of such expenses shall be equal to the ratio between the total quantity of limes handled by him as the first handler thereof during the applicable fiscal year and the total quantity of limes so handled by all persons during the same fiscal year. The payment of assessments for the maintenance and functioning of the committee may be required under this part throughout the period it is in effect irrespective of whether particular provisions thereof are suspended or become inoperative.

(b) The Secretary shall fix the rate of assessment to be paid by each such person. At any time during or after the fiscal year, the Secretary may increase the rate of assessment in order to secure sufficient funds to cover any finding by the Secretary relative to the expense which may be incurred: *Provided,* That, in no case, shall the rate of assessment exceed 10 cents per bushel, or equivalent quantity, of limes. Such increase shall be applied to all limes handled during the applicable fiscal year. In order to provide funds for the administration of the provisions of this part, the committee may accept the payment of assessments in advance, and may borrow money in any amount not to exceed 10 percent of the estimated expenses set

[1] The provisions identified with an asterisk (*) apply only to the proposed marketing agreement and not to the proposed order.

forth in its budget for the then current fiscal year.

§ 1001.42 *Accounting.* (a) If, at the end of a fiscal year, the assessments collected are in excess of the expenses incurred, each person entitled to a proportionate refund of the excess assessment shall be credited with such refund against the operations of the following fiscal year. Any handler may demand payment of such a refund, and the refund shall be paid to him: *Provided,* That any sum paid by a person in excess of his pro rata share of the expenses during any fiscal year may be applied by the committee at the end of such fiscal year to any outstanding obligations due the committee from such person.

(b) All funds received by the committee pursuant to the provisions of this part shall be used solely for the purposes specified in this part, and shall be accounted for in the manner provided in this part. The Secretary may, at any time, require the committee and its members to account for all receipts and disbursements.

RESEARCH

§ 1001.45 *Marketing research and development.* The committee, with the approval of the Secretary, may establish or provide for the establishment of marketing research and development projects designed to assist, improve, or promote the marketing, distribution, and consumption of limes. The expense of such projects shall be paid from funds collected pursuant to § 1001.41.

REGULATIONS

§ 1001.50 *Marketing policy.* Each season prior to making any recommendations pursuant to § 1001.51, the committee shall submit to the Secretary a report setting forth its marketing policy for the ensuing season. Such marketing policy report shall contain information relative to (a) the estimated total production of limes within the production area; (b) the expected general quality and size of limes in the production area and in other areas, including foreign competing areas; (c) the expected demand conditions for limes in different market outlets; (d) the expected shipments of limes produced in the production area and in other areas, including foreign competing areas; (e) supplies of competing commodities; (f) trend and level of consumer income; (g) other factors having a bearing on the marketing of limes; and (h) the type of regulations expected to be recommended during the season. In the event it becomes advisable, because of changes in the supply and demand situation for limes, to modify substantially such marketing policy, the committee shall submit to the Secretary a revised marketing policy report setting forth the information prescribed in this section. The committee shall publicly announce the contents of each marketing policy report and copies thereof shall be maintained in the offices of the committee where they shall be available for examination by growers and handlers.

§ 1001.51 *Recommendations for regulation.* (a) Whenever the committee deems it advisable to regulate the handling of any variety or varieties of limes in the manner provided in § 1001.52, it shall so recommend to the Secretary.

(b) In arriving at its recommendations for regulation pursuant to paragraph (a) of this section, the committee shall give consideration to current information with respect to the factors affecting the supply and demand for limes during the period or periods when it is proposed that such regulation should be made effective. With each such recommendation for regulation, the committee shall submit to the Secretary the data and information on which such recommendation is predicated, and such other available information as the Secretary may request.

(c) All meetings of the committee held for the purpose of formulating recommendations for regulations shall be open to growers and handlers. The committee shall give notice of such meetings to growers and handlers by mailing such notice to each grower and handler who has filed his address with the committee and requested such notice.

§ 1001.52 *Issuance of regulations.* (a) The Secretary shall regulate, in the manner specified in this section, the handling of limes whenever he finds, from the recommendations and information submitted by the committee or from other available information, that such regulations will tend to effectuate the declared policy of the act. Such regulations may:

(1) Prohibit, during any specified period or periods, the handling of any variety or varieties of limes which do not meet such grade, size, and quality (including internal quality and juice content) standards as shall be prescribed;

(2) Prescribe minimum standards of quality for any variety or varieties of limes and limit the handling thereof to those meeting such minimum standards; and

(3) Fix the size, capacity, weight, dimensions, or pack of the container or containers which may be used in the packaging, and the transportation, sale, shipment, or other handling of limes.

(b) The committee shall be informed immediately of any such regulations issued by the Secretary and the committee shall promptly give notice thereof to growers and handlers.

§ 1001.53 *Modification, suspension, or termination of regulations.* (a) In the event the committee at any time finds that, by reason of changed conditions, any regulations issued pursuant to § 1001.52 should be modified, suspended, or terminated, it shall so recommend to the Secretary.

(b) Whenever the Secretary finds, from the recommendations and information submitted by the committee or from other available information, that a regulation should be modified, suspended, or terminated with respect to any or all shipments of limes in order to effectuate the declared policy of the act, he shall modify, suspend, or terminate such regulation. If the Secretary finds that a regulation obstructs or does not tend to effectuate the declared policy of the act, he shall suspend or terminate such regulation. On the same basis and in like manner the Secretary may terminate any such modification or suspension.

§ 1001.54 *Exemption certificate.* In the event the handling of limes is regulated pursuant to § 1001.52, the committee shall issue one or more exemption certificates to any person who furnishes evidence satisfactory to the committee that, by reason of conditions beyond his control, he will be prevented, because of such regulation, from having as large a proportion of a particular variety of his limes handled as the average proportion of all such limes which may be handled. Such exemption certificates shall authorize the person to whom the certificates are issued to handle, or have handled, a percentage of his crop of the particular variety of limes equal to the percentage determined as aforesaid. The committee shall adopt, with the approval of the Secretary, procedural rules by which such exemption certificates will be issued and the limes covered thereunder may be handled. Exemption certificates shall be transferred to the handler of the limes covered by such certificates at the time the limes are delivered to such handler.

§ 1001.55 *Inspection and certification.* Whenever the handling of any variety of limes is regulated pursuant to § 1001.52, each handler who handles limes shall, prior thereto, cause each lot of limes handled to be inspected by the Federal-State Inspection Service and certified by it as meeting the applicable requirements of such regulation: *Provided,* That such inspection and certification shall be required when the limes previously have been so inspected and certified only if such limes have been regraded, resorted, or repackaged after the prior inspection and certification. Promptly thereafter, each such handler shall submit, or cause to be submitted, to the committee a copy of the certificate of inspection with respect to such handling.

§ 1001.56 *Limes not subject to regulations.* Except as otherwise provided in this section, any person may, without regard to the provisions of §§ 1001.41, 1001.52, and 1001.55, and the regulations issued thereunder, handle limes (a) for consumption by charitable institutions; (b) for distribution by relief agencies; (c) for commercial processing into products; or (d) in such minimum quantities or types of shipments, or for such specified purposes as the committee, with the approval of the Secretary, may prescribe. The committee shall, with the approval of the Secretary, prescribe such rules, regulations, and safeguards as it may deem necessary to prevent limes handled under the provisions of this section from entering channels of trade for other than the specific purposes authorized by this section. Such rules, regulations, and safeguards may include the requirements that handlers shall file applications with the committee for authorization to handle limes pursuant to this section, and that such applications be accompanied by a certification by the intended purchaser or receiver that the limes will not be used for any purpose not authorized by this section.

REPORTS

§ 1001.60 *Reports.* (a) Each handler shall furnish to the committee, at such times and for such periods as the committee may designate, certified reports covering, to the extent necessary for the committee to perform its functions, the following: (1) The quantities of each variety of limes he received; (2) a complete record of the quantities disposed of by him, segregated as to varieties and as to the respective quantities subject to regulation and not subject to regulation; (3) the date of each such disposition and the identification of the carrier transporting such fruit; (4) identification of the inspection certificates and the exemption certificates, if any, pursuant to which the fruit was handled, together with the destination of each such exempted disposition, and of all fruit handled pursuant to § 1001.56; and (5) the quantity of each variety held by him at the end of the period.

(b) Upon request of the committee, made with the approval of the Secretary, each handler shall furnish to the committee, in such manner and at such times as it may prescribe, such other information as may be necessary to enable the committee to perform its duties under this part.

(c) Each handler shall maintain for at least two succeeding fiscal years, such records of the limes received and disposed of by him as may be necessary to verify the reports he submits to the committee pursuant to this section.

(d) All reports and records submitted by handlers pursuant to the provisions of this section shall be received by, and at all times be in custody of, one or more designated employees of the committee. No such employee shall disclose to any person, other than the Secretary upon request therefor, data or information obtained or extracted from such reports and records which might affect the trade position, financial condition, or business operation of the particular handler from whom received: *Provided,* That such data and information may be combined, and made available to any person, in the form of general reports in which the identities of the individual handler furnishing the information is not disclosed and may be revealed to any extent necessary to effect compliance with the provisions of this part and the regulations issued thereunder.

MISCELLANEOUS PROVISIONS

§ 1001.61 *Compliance.* Except as provided in this part, no person shall handle limes, the shipment of which has been prohibited by the Secretary in accordance with the provisions of this part; and no person shall handle limes except in conformity with the provisions of this part and the regulations issued under this part.

§ 1001.62 *Right of the Secretary.* The members of the committee (including successors and alternates), and any agents, employees, or representatives thereof, shall be subject to removal or suspension by the Secretary at any time. Each and every regulation, decision, determination, or other act of the committee shall be subject to the continuing right of the Secretary to disapprove of the same at any time. Upon such disapproval, the disapproved action of the committee shall be deemed null and void, except as to acts done in reliance thereon or in accordance therewith prior to such disapproval by the Secretary.

§ 1001.63 *Effective time.* The provisions of this part, and of any amendment thereto, shall become effective at such time as the Secretary may declare above his signature to this part, and shall continue in force until terminated in one of the ways specified in § 1001.64.

§ 1001.64 *Termination.* (a) The Secretary may at any time terminate the provisions of this part by giving at least one day's notice by means of a press release or in any other manner in which he may determine.

(b) The Secretary shall terminate or suspend the operation of any and all of the provisions of this part whenever he finds that such provisions do not tend to effectuate the declared policy of the act.

(c) The Secretary shall terminate the provisions of this part at the end of any fiscal year whenever he finds that continuance is not favored by the majority of producers who, during a representative period determined by the Secretary, were engaged in the production of limes for market: *Provided,* That such termination is announced on or before March 15 of the then current fiscal year. The Secretary shall, as soon as practicable after the close of the fiscal year ending March 31, 1957, conduct a referendum of producers and a poll of handlers to determine whether the continuation of this part is favored by them. Producers entitled to vote in such referendum shall be those who, during the fiscal year ending March 31, 1957, were engaged in producing limes for market and the poll shall be confined to handlers who handled limes in that same fiscal year. If it develops from said referendum and poll that (1) less than two-thirds of the producers, by number or volume of production represented in said referendum, favor the continuance of this part, or (2) handlers representing more than one-half the volume of limes handled favor termination of this part, the Secretary shall thereupon terminate this part.

(d) The provisions of this part shall, in any event, terminate whenever the provisions of the act authorizing them cease to be in effect.

§ 1001.65 *Proceedings after termination.* (a) Upon the termination of the provisions of this part, the committee shall, for the purpose of liquidating the affairs of the committee, continue as trustees of all the funds and property then in its possession, or under its control, including claims for any funds unpaid or property not delivered at the time of such termination.

(b) The said trustees shall (1) continue in such capacity until discharged by the Secretary; (2) from time to time account for all receipts and disbursements and deliver all property on hand, together with all books and records of the committee and of the trustees, to such persons as the Secretary may direct; and (3) upon the request of the Secretary, execute such assignments or other instruments necessary or appropriate to vest in such person, full title and right to all of the funds, property, and claims vested in the committee or the trustees pursuant thereto.

(c) Any person to whom funds, property, or claims have been transferred or delivered, pursuant to this section, shall be subject to the same obligation imposed upon the committee and upon the trustees.

§ 1001.66 *Effect of termination or amendment.* Unless otherwise expressly provided by the Secretary, the termination of this part or of any regulation issued pursuant to this part, or the issuance of any amendment to either thereof, shall not (a) affect or waive any right, duty, obligation, or liability which shall have arisen or which may thereafter arise in connection with any provision of this part or any regulation issued under this part, or (b) release or extinguish any violation of this part or of any regulation issued under this part, or (c) affect or impair any rights or remedies of the Secretary or of any other person with respect to any such violation.

§ 1001.67 *Duration of immunities.* The benefits, privileges, and immunities conferred upon any person by virtue of this part shall cease upon its termination, except with respect to acts done under and during the existence of this part.

§ 1001.68 *Agents.* The Secretary may, by designation in writing, name any officer or employee of the United States, or name any agency or division in the United States Department of Agriculture, to act as his agent or representative in connection with any of the provisions of this part.

§ 1001.69 *Derogation.* Nothing contained in this part is, or shall be construed to be, in derogation or in modification of the rights of the Secretary or of the United States (a) to exercise any powers granted by the act or otherwise, or (b) in accordance with such powers, to act in the premises whenever such action is deemed advisable.

§ 1001.70 *Personal liability.* No member or alternate member of the committee and no employee or agent of the committee shall be held personally responsible, either individually or jointly with others, in any way whatsoever, to any person for errors in judgment, mistakes, or other acts, either of commission or omission, as such member, alternate, employee, or agent, except for acts of dishonesty, willful misconduct, or gross negligence.

§ 1001.71 *Separability.* If any provision of this part is declared invalid or the applicability thereof to any person, circumstance, or thing is held invalid,

the validity of the remainder of this part or the applicability thereof to any other person, circumstance, or thing shall not be affected thereby.

§ 1001.72 *Counterparts.* This agreement may be executed in multiple counterparts and when one counterpart is signed by the Secretary, all such counterparts shall constitute, when taken together, one and the same instrument as if all signatures were contained in one original.*

§ 1001.73 *Additional parties.* After the effective date of this part, any handler may become a party to this agreement if a counterpart is executed by him and delivered to the Secretary. This agreement shall take effect as to such new contracting party at the time such counterpart is delivered to the Secretary, and the benefits, privileges, and immunities conferred by this agreement shall then be effective as to such new contracting party.*

§ 1001.74 *Order with marketing agreement.* Each signatory handler hereby requests the Secretary to issue, pursuant to the act, an order providing for the regulating of the handling of limes in the same manner as is provided for in this agreement.*

Dated: April 14, 1955.

[SEAL] ROY W. LENNARTSON,
Deputy Administrator.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 3]

[Docket No. 11361; FCC 55-456]

TELEVISION BROADCAST STATIONS

TABLE OF ASSIGNMENTS

In the matter of amendment of § 3.606, *Table of assignments*, rules governing Television Broadcast Stations; Docket No. 11361.

1. Notice is hereby given that the Commission has received two conflicting proposals for rule making in the above-entitled matter.

2. On December 1, 1954, the Jacksonville Journal Company, Jacksonville, Florida, filed a petition requesting that the Table of Assignments contained in § 3.606 of the rules governing Television Broadcast Stations be amended by adding the assignment of Channel 10—to Bunnell, Florida, a community not presently listed in the Table of Assignments. In support of the requested amendment, the Jacksonville Journal Company urges that Channel 10 may be assigned to Bunnell in conformity with the Commission's rules and standards and without requiring any other changes in the Table of Assignments. It is submitted that such assignment would afford a new television service to the Bunnell area which is presently without satisfactory service and without any prospects for such service. It is represented that an application for a new television broadcast station on Channel 10 in Bunnell will be filed by the Jacksonville Journal Company in the event its proposed amendment is adopted.

3. On January 25, 1955, the Suncoast Cities Broadcasting Corporation, St. Petersburg, Florida, filed a petition requesting that the Television Table of Assignments be amended by assigning Channel 10—to New Port Richey, Florida, a community not presently listed in the Table of Assignments. In support of its requested amendment, Suncoast Cities urges that Channel 10 may be assigned to New Port Richey in conformity with the Commission's Rules and standards without requiring any other changes in the Table of Assignments. It is urged that such assignment would provide service to the "Suncoast" area, including the city of St. Petersburg, and that no commercial VHF channels are available to St. Petersburg. It is urged that this city warrants such an assignment and that the assignment of Channel 10 in New Port Richey would be consistent with the mandate of section 307 (b) of the Communications Act.

4. Since Bunnell and New Port Richey are only about 120 miles apart, the two proposals advanced in this proceeding are mutually exclusive.

5. The Commission is of the view that rule-making proceedings should be instituted in this matter in order that interested parties may have the opportunity of submitting their views to the Commission and the Commission may be apprised of such views prior to taking further action.

6. Authority for the adoption of the proposed amendments is contained in sections 4 (i), 301, 303 (e), (d), (f), and (r) and 307 (b) of the Communications Act of 1934, as amended.

7. Any interested party who is of the opinion that the amendments proposed by petitioners should not be adopted, or should not be adopted in the form set forth, may file with the Commission on or before May 13, 1955, a written statement or brief setting forth his comments. Comments in support of the proposed amendments may also be filed on or before that date. Comments or briefs in reply to the original comments should be filed within 10 days from the last day for filing the original comments or briefs. No additional comments may be filed unless (1) specifically requested by the Commission or (2) good cause for the filing of such additional comments is established. In accordance with the provisions of § 1.764 of the rules, an original and 14 copies of all statements, briefs or comments shall be filed with the Commission.

Adopted: April 13, 1955.

Released: April 14, 1955.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

[F. R. Doc. 55-3195; Filed, Apr. 18, 1955; 8:51 a. m.]

[47 CFR Part 3]

[Docket No. 11362; FCC 55-457]

TABLE OF ASSIGNMENTS FOR TELEVISION BROADCAST STATIONS

NOTICE OF PROPOSED RULE MAKING AND ORDER TO SHOW CAUSE

In the matter of amendment of § 3.606, *Table of assignments*, rules governing Television Broadcast Stations. Docket No. 11362.

1. Notice is hereby given that the Commission has received a proposal for rule making in the above-entitled matter.

2. John H. Poole tr/as John Poole Broadcasting Co., permittee of television Station KBID-TV operating on Channel 53 at Fresno, California, filed a petition on February 25, 1955, requesting that the Table of Assignments contained in § 3.606 of the rules governing Television Broadcast Stations be amended to make Channel 18 in Fresno, California available for commercial use by changing the educational reservation in Fresno from Channel 18 to Channel 53. As an alternative, petitioner requests that Channel 30 presently assigned to Madera, California be interchanged with Channel 53 at Fresno. Petitioner further requests that the Commission order it to Show Cause why the outstanding authorization for Station KBID-TV should not be modified to specify operation on either Channel 18 or Channel 30 in lieu of Channel 53.

3. In support of its request petitioner submits that Station KBID-TV commenced operation on February 13, 1954, but suspended operation on July 14, 1954, due to its failure to obtain network affiliation and other economic factors which precluded sound operation as an independent station. Petitioner states that the station was at a competitive disadvantage with the other UHF stations in the area since receivers are less sensitive at the higher UHF frequencies and since the signals are subject to greater shadow losses. Petitioner urges that the proposals made herein conform to the Commission's rules; that there are no applications on file for either Channel 18 in Fresno or Channel 30 in Madera; and that the Commission has in the past recognized the temporary differences among the UHF channels from an equipment standpoint.

4. The Central California Educational TV Committee on March 7, 1955, and the Joint Committee on Educational Television on March 8, 1955, filed Oppositions to the petition insofar as it would substitute Channel 53 for Channel 18 in Fresno as the assignment to be reserved for an educational station in that community.

5. The Commission is of the view that rule making proceedings should be instituted in this matter in order that interested parties may submit their views to the Commission and the Commission may have the benefit of such views prior to taking final action. The petition of John Poole Broadcasting Co. and the Oppositions of Central California Educational TV Committee and the Joint Committee on Educational Television are hereby made part of this docket.

6. Authority for the adoption of the proposed amendment is contained in sections 4 (i), 301, 303 (c), (d), (f), and (r), 307 (b), and 316 of the Communications Act of 1934, as amended.

7. Any interested party who is of the opinion that the amendments proposed by petitioner should not be adopted, or should not be adopted in the form set forth herein, may file with the Commission on or before May 13, 1955, a written statement or brief setting forth his comments. Comments in suport of the proposed amendments may also be filed on or before the same date. Comments or briefs in reply to the original comments may be filed within 10 days from the last day for filing said original comments or briefs. No additional comments may be filed unless (1) specifically requested by the Commision or (2) good cause for the filing of such additional comments is established. The Commission will consider such comments before taking final action in this matter, and if any comments appear to warrant the holding of a hearing or oral argument, notice of the time and place of such hearing or oral argument will be given.

8. Station KBID-TV is presently authorized to operate on Channel 53 in Fresno, and the amendments proposed in this proceeding would either make Channel 18 available for commercial use in Fresno instead of Channel 53 or would subsititute Channel 30 for Channel 53 in Fresno. Accordingly, John H. Poole tr/as John Poole Broadcasting Co. is ordered to show cause in this proceeding why its outstanding authorization for Station KBID-TV should not be modified to specify operation on either Channel 18 or Channel 30 in lieu of Channel 53. Petitioner should file its reply to the aforesaid Show Cause Order on or before the date specified for filing comments in this proceeding.

9. In accordance with the provisions of § 1.764 of the Commission's rules and regulations, an original and 14 copies of all statements, briefs, or comments shall be furnished the Commission.

Adopted: April 13, 1955.

Released: April 14, 1955.

NOTICES

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[Order 541, Amdt. 6]

REDELEGATIONS OF AUTHORITY WITH RESPECT TO LANDS AND RESOURCES

RIGHT OF APPEAL

APRIL 12, 1955.

Section 5.1 is amended to read as follows:

SEC. 5.1 *Right of appeal.* Any person aggrieved by the action of an area administrator, State supervisor, Eastern States supervisor, field commissioner, land office manager, range manager, district forester or their delegate may appeal to the Director, Bureau of Land Management, and from his decision to the Secretary of the Interior, pursuant to the rules of practice (43 CFR Part 221).

EDWARD WOOZLEY,
Director.

NEW MEXICO

REVOCATION OF DEPARTMENTAL ORDERS OF OCTOBER 14, 1907 AND JANUARY 28, 1908, RESERVING LANDS FOR USE OF THE FOREST SERVICE AS AN ADMINISTRATIVE SITE

APRIL 13, 1955.

Upon request of the Department of Agriculture and pursuant to Departmental Order No. 2583 of August 16, 1950, section 2.22 (a), as amended, it is ordered as follows:

The Departmental orders of October 14, 1907 and January 28, 1908, reserving the following-described lands for use of the Forest Service, Department of Agriculture, as additions to the Little Dry Creek Administrative Site are hereby revoked:

NEW MEXICO PRINCIPAL MERIDIAN

T. 13 S., R. 19 W.
Sec. 10, S½NW¼, N½SW¼.

The tracts described contain 160 acres.

The lands are a part of the Gila National Forest, having been reserved for such use by Presidential Proclamations of June 18, 1908 and March 25, 1909, and shall become subject to the public-land laws relating to national forest lands at 10:00 a. m. on the 35th day from the date or this order.

W. G. GUERNSEY,
Acting Director,

[F. R. Doc. 55-3179; Filed, Apr. 18, 1955; 8:48 a. m.]

[Misc. 2145321]

ARKANSAS

RESTORATION ORDER UNDER THE FEDERAL POWER ACT

APRIL 12, 1955.

Pursuant to a determination of August 15, 1950, of the Federal Power Commission, Docket Numbers DA-52 and DA-53-Arkansas, and in accordance with Order No. 541, section 1.5 (d) and 2.0 (a) of the Director of the Bureau of Land Management, approved April 21, 1954, it is ordered as follows:

Subject to valid existing rights, the following-described lands, so far as they are withdrawn or reserved for power purposes in Power Site Reserve No. 514 and Power Project No. 1, are hereby opened to disposition under the public-land laws, subject to the provisions of section 24 of the Federal Power Act of June 10, 1920 (41 Stat. 1075; 16 U. S. C. 818), as amended, and subject to the stipulation that if and when the lands are required wholly or in part for purposes of power development, any structure, machinery, or improvements placed thereon which shall be found to interfere with such development shall be removed or relocated as may be necessary to eliminate interference with the power development without expense to the United States or its permittees or licensees:

FIFTH PRINCIPAL MERIDIAN

T. 20 N., R. 15 W.,
Sec. 26, NW¼;
Sec. 33, NE¼NE¼.

The areas described aggregate 61.77 acres.

The lands in section 26 extend from the edge of the White River to the top of a 40 foot bluff, the slopes of which are from precipitous to moderate and are generally timber covered. The eastern end of the tract is fairly level and borders on an improved pasture. An unimproved road passes from east to west between the bluff and the river.

The land in section 33 is higher, plateau-like ground surrounded on three sides by the curving White River, but is cut from northwest to southeast by a deep ravine which is generally timber covered.

The soil in both tracts is nonagricultural but has limited grazing value.

Effective on the date of publication of this order in the FEDERAL REGISTER, the public lands affected by this order shall be subject to application by the State of Arkansas for rights-of-way for public highways or as a source of material for the construction and maintenance of such highways pursuant to section 24 of the Federal Power Act, as amended (16 U. S. C. 1946 ed., Supp. V 818).

This order shall not otherwise become effective to change the status of the described lands until 10:00 a. m. on the 91st day after the date of publication. At that time, the said lands shall become subject to application, petition, location and selection, subject to valid existing rights, the provisions of existing withdrawals, the requirements of applicable laws, and the 90-day preference right filing period for veterans and others entitled to preference under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279-284), as amended.

Information showing the periods during which and the conditions under which veterans and others may file application for these lands may be obtained on request from the Supervisor, Eastern States Office, Bureau of Land Management, Washington 25, D. C.

C. R. DREXILIUS,
Supervisor.

FEDERAL POWER COMMISSION

[Docket No. E-6613]

IOWA PUBLIC SERVICE CO.

NOTICE OF APPLICATION

APRIL 13, 1955.

Take notice that on April 11, 1955, an application was filed with the Federal Power Commission, pursuant to section 204 of the Federal Power Act, by Iowa Public Service Company, a corporation organized under the laws of the State of Iowa and doing business in the States of South Dakota, Nebraska and Iowa, with its principal business office at Sioux City, Iowa, seeking an order authorizing the issuance of 270,220 shares of Common Stock, $1,351,100 aggregate par value, of which 270,218 shares are authorized but unissued and two shares are treasury stock heretofore issued and reacquired by the Company. Applicant proposes to offer such shares to the holders of its outstanding Common Stock for subscription on the basis of one share for each ten shares of Common Stock held. Applicant proposes to issue said stock on or before June 2, 1955, and that proceeds from the sale of the additional Common Stock will be used to pay off temporary bank loans incurred to secure funds for construction purposes and to provide a portion of the remaining funds for construction or acquisition of permanent improvements, extensions and additions to Applicant's property; all as more fully appears in the application on file with the Commission.

Any person desiring to be heard, or to make any protest with reference to said application should, on or before the 2d day of May 1955, file with the Federal Power Commission, Washington 25, D. C., a petition or protest in accordance with the Commission's rules of practice and procedure. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
Secretary.

[F. R. Doc. 55-3189; Filed, Apr. 18, 1955; 8:50 a. m.]

[Docket No. G-8389]

TEXAS CO.

NOTICE OF APPLICATION AND DATE OF HEARING

APRIL 13, 1955.

Take notice that The Texas Company (Applicant), a Delaware corporation whose address is Houston, Texas, filed on January 25, 1955, an application for a certificate of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, authorizing Applicant to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant proposes to sell natural gas produced from the Southwest Hutchins Field, Wharton County, Texas, to Tennessee Gas Transmission Company. The gas so purchased will be transported and sold in interstate commerce by Tennessee Gas Transmission Company. The initial sales price is 13.69479 cents per Mcf and the rate of delivery will be 19,600 Mcf per month.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations, and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on May 11, 1955, at 9:30 a. m. e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before April 28, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[SEAL] LEON M. FUQUAY,
Secretary.

[Docket No. G-8508]

W. C. MCBRIDE, INC.

NOTICE OF APPLICATION AND DATE OF HEARING

APRIL 13, 1955.

Take notice that W. C. McBride, Inc. (Applicant), a Delaware corporation whose address is 2101 Missouri Pacific Building, St. Louis, Missouri, filed on February 23, 1955, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing Applicant to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant is operator of leases in the West Weesatche Area of Goliad County, Texas. The leasehold interests are owned by Applicant and H. R. Smith. The natural gas to be produced will be sold at the well head to Texas Eastern Transmission Corporation. The gas sold by the Applicant will be transported and resold in interstate commerce. Deliveries are expected to commence on or about July 1, 1955. The initial price will be 10.4 cents per Mcf and the rate of delivery will be 763 Mcf per day.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations, and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on May 11, 1955, at 9:40 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street, NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before April 28, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

SECURITIES AND EXCHANGE COMMISSION

[File No. 70-3354]

MISSOURI EDISON CO.

ORDER REGARDING ISSUANCE AND SALE OF BANK LOAN NOTES

APRIL 13, 1955.

Missouri Edison Company ("Missouri Edison"), a public-utility subsidiary of Union Electric Company of Missouri, a registered holding company, has filed a declaration, and an amendment thereto, with this Commission pursuant to sections 6 (a) and 7 of the Public Utility Holding Company Act of 1935 ("act") with respect to the following proposed transaction:

Missouri Edison proposes to borrow from The Boatmen's National Bank of St. Louis amounts aggregating up to $600,000 and to evidence said borrowings by the issuance of promissory notes maturing nine months from the dates of the borrowings and bearing interest at the rate of three percent per annum.

The sums to be borrowed, together with cash available in its treasury, will be employed by declarant to finance its necessary and urgent construction program.

The funds necessary to repay the borrowings to be made, to retire a demand note in the principal amount of $138,000 issued and delivered to The Boatmen's National Bank of St. Louis on February 15, 1955, and to provide additional funds for construction purposes will be obtained from the issuance and sale of additional first mortgage bonds or other securities later in 1955.

No State commission and no Federal regulatory agency, other than this Commission, has jurisdiction over the proposed transaction.

No fees, commissions or expenses, other than nominal expenses, will be incurred in connection with the proposed transaction.

Missouri Edison requests that the Commission's action herein be taken not later than April 15, 1955, and that there be no waiting period between the issuance of the Commission's order and the effective date thereof.

Due notice of the filing of said declaration having been given in the manner prescribed by Rule U-23 promulgated under the act, and no hearing having been requested of or ordered by the Commission; and the Commission finding that the applicable provisions of the act and of the rules promulgated thereunder are satisfied; and that the declaration, as amended, should be permitted to become effective forthwith:

It is ordered, Pursuant to Rule U-23 and the applicable provisions of the act, that said declaration, as amended, be, and the same hereby is, permitted to become effective forthwith, subject to the terms and conditions prescribed in Rule U-24.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

INTERSTATE COMMERCE COMMISSION

[Rev. S. O. 562, Taylor's I. C. C. Order 49]

MISSOURI PACIFIC RAILROAD CO.

REROUTING OR DIVERSION OF TRAFFIC

In the opinion of Charles W. Taylor, Agent, the Missouri Pacific Railroad Company (Guy A. Thompson, Trustee), account of an accident to car ferry at Natchez, Mississippi, which caused the Natchez-Vidalia car ferry to be removed from service for repairs, is unable to transport traffic offered to it for movement over the said car ferry: *It is ordered,* That: (a) Rerouting traffic: The Missouri Pacific Railroad Company, (Guy A. Thompson, Trustee), being unable to transport traffic offered to it for movement over the Natchez-Vidalia car ferry, account car ferry out of service due to accident at Natchez, Mississippi, is hereby authorized to divert and reroute such traffic over any available route to expedite the movement regardless of the routing shown on the waybill. The billing covering all such cars rerouted shall carry a reference to this order as authority for the rerouting.

(b) Concurrence of receiving roads to be obtained: The railroad desiring to divert or reroute traffic under this order shall confer with the proper transportation officer of the railroad or railroads to which such traffic is to be diverted or rerouted, and shall receive the concurrence of such other railroads before the rerouting or diversion is ordered.

(c) Notification to shippers: Each carrier rerouting cars in accordance with this order shall notify each shipper at the time each car is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic by said Agent is deemed to be due to carrier's disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to said traffic; divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) Effective date: This order shall become effective at 9:00 a. m., April 13, 1955.

(g) Expiration date: This order shall expire at 11:59 p. m., April 30, 1955, unless otherwise modified, changed, suspended or annulled.

It is further ordered, That this order shall be served upon the Association of American Railroads, Car Service Divi-

FEDERAL POWER COMMISSION

[Docket No. E-6613]

IOWA PUBLIC SERVICE CO.

NOTICE OF APPLICATION

APRIL 13, 1955.

Take notice that on April 11, 1955, an application was filed with the Federal Power Commission, pursuant to section 204 of the Federal Power Act, by Iowa Public Service Company, a corporation organized under the laws of the State of Iowa and doing business in the States of South Dakota, Nebraska and Iowa, with its principal business office at Sioux City, Iowa, seeking an order authorizing the issuance of 270,220 shares of Common Stock, $1,351,100 aggregate par value, of which 270,218 shares are authorized but unissued and two shares are treasury stock heretofore issued and reacquired by the Company. Applicant proposes to offer such shares to the holders of its outstanding Common Stock for subscription on the basis of one share for each ten shares of Common Stock held. Applicant proposes to issue said stock on or before June 2, 1955, and that proceeds from the sale of the additional Common Stock will be used to pay off temporary bank loans incurred to secure funds for construction purposes and to provide a portion of the remaining funds for construction or acquisition of permanent improvements, extensions and additions to Applicant's property; all as more fully appears in the application on file with the Commission.

Any person desiring to be heard, or to make any protest with reference to said application should, on or before the 2d day of May 1955, file with the Federal Power Commission, Washington 25, D. C., a petition or protest in accordance with the Commission's rules of practice and procedure. The application is on file with the Commission for public inspection.

Deliveries are expected to commence on or about July 1, 1955. The initial price will be 10.4 cents per Mcf and the rate of delivery will be 763 Mcf per day.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations, and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on May 11, 1955, at 9:40 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street, NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before April 28, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[SEAL] LEON M. FUQUAY,
Secretary.

SECURITIES AND EXCHANGE COMMISSION

[File No. 70-3354]

MISSOURI EDISON CO.

ORDER REGARDING ISSUANCE AND SALE OF BANK LOAN NOTES

APRIL 13, 1955.

Missouri Edison Company ("Missouri Edison"), a public-utility subsidiary of Union Electric Company of Missouri, a registered holding company, has filed a declaration, and an amendment thereto, with this Commission pursuant to sections 6 (a) and 7 of the Public Utility Holding Company Act of 1935 ("act") with respect to the following proposed transaction:

Missouri Edison proposes to borrow from The Boatmen's National Bank of St. Louis amounts aggregating up to $600,000 and to evidence said borrowings by the issuance of promissory notes maturing nine months from the dates of the borrowings and bearing interest at the rate of three percent per annum.

The sums to be borrowed, together with cash available in its treasury, will be employed by declarant to finance its necessary and urgent construction program.

The funds necessary to repay the borrowings to be made, to retire a demand note in the principal amount of $138,000 issued and delivered to The Boatmen's National Bank of St. Louis on February 15, 1955, and to provide additional funds for construction purposes will be obtained from the issuance and sale of additional first mortgage bonds or other securities later in 1955.

No State commission and no Federal regulatory agency, other than this Commission, has jurisdiction over the proposed transaction.

No fees, commissions or expenses, other than nominal expenses, will be incurred in connection with the proposed transaction.

Missouri Edison requests that the Commission's action herein be taken not later than April 15, 1955, and that there be no waiting period between the issuance of the Commission's order and the effective date thereof.

Due notice of the filing of said declaration having been given in the manner prescribed by Rule U-23 promulgated under the act, and no hearing having been requested of or ordered by the Commission; and the Commission finding that the applicable provisions of the act and of the rules promulgated thereunder are satisfied; and that the declaration, as amended, should be permitted to become effective forthwith:

It is ordered, Pursuant to Rule U-23 and the applicable provisions of the act, that said declaration, as amended, be, and the same hereby is, permitted to become effective forthwith, subject to the terms and conditions prescribed in Rule U-24.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

INTERSTATE COMMERCE COMMISSION

[Rev. S. O. 562, Taylor's I. C. C. Order 49]

MISSOURI PACIFIC RAILROAD CO.

REROUTING OR DIVERSION OF TRAFFIC

In the opinion of Charles W. Taylor, Agent, the Missouri Pacific Railroad Company (Guy A. Thompson, Trustee), account of an accident to car ferry at Natchez, Mississippi, which caused the Natchez-Vidalia car ferry to be removed from service for repairs, is unable to transport traffic offered to it for movement over the said car ferry: *It is ordered,* That: (a) Rerouting traffic: The Missouri Pacific Railroad Company, (Guy A. Thompson, Trustee), being unable to transport traffic offered to it for movement over the Natchez-Vidalia car ferry, account car ferry out of service due to accident at Natchez, Mississippi, is hereby authorized to divert and reroute such traffic over any available route to expedite the movement regardless of the routing shown on the waybill. The billing covering all such cars rerouted shall carry a reference to this order as authority for the rerouting.

(b) Concurrence of receiving roads to be obtained: The railroad desiring to divert or reroute traffic under this order shall confer with the proper transportation officer of the railroad or railroads to which such traffic is to be diverted or rerouted, and shall receive the concurrence of such other railroads before the rerouting or diversion is ordered.

(c) Notification to shippers: Each carrier rerouting cars in accordance with this order shall notify each shipper at the time each car is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic by said Agent is deemed to be due to carrier's disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to said traffic; divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) Effective date: This order shall become effective at 9:00 a. m., April 13, 1955.

(g) Expiration date: This order shall expire at 11:59 p. m., April 30, 1955, unless otherwise modified, changed, suspended or annulled.

It is further ordered, That this order shall be served upon the Association of American Railroads, Car Service Divi-

sion, as agent of all railroads subscribing to the car service and per diem agreement under the terms of that agreement and by filing it with the Director, Division of the Federal Register.

Issued at Washington, D. C., April 13, 1955.

INTERSTATE COMMERCE COMMISSION,
CHARLES W. TAYLOR,
Agent.

TITLE 7—AGRICULTURE

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders), Department of Agriculture

PART 909—ALMONDS GROWN IN CALIFORNIA

CHANGES IN SALABLE AND SURPLUS PERCENTAGES

Notice of proposed rule making with respect to changes in the salable and surplus percentages of almonds for the crop year beginning July 1, 1954, was published in the FEDERAL REGISTER of March 30, 1955 (20 F. R. 1975), pursuant to the provisions of Marketing Agreement No. 119 and Order No. 9 regulating the handling of almonds grown in California (7 CFR, 1953 Rev., Part 909), effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.). In said notice, in which it was proposed to increase the salable percentage from 75 to 85 and to decrease the surplus percentage from 25 to 15 for the aforesaid crop year, opportunity was afforded interested persons to submit to the Department written data, views, or arguments for consideration prior to issuance of the final rule with respect to changing the percentages.

The Department received several letters from interested persons with respect to the proposed percentages. These represented three distinct viewpoints toward the Department's proposal, namely: (1) That the proposed percentages should be rejected and the final percentages made to conform to those supported by the minority group of the Almond Control Board, i. e., establishment of a salable percentage of 83.5 percent, and a surplus percentage of 16.5 percent, (2) that the percentages as proposed by the Department should be adopted, and (3) that the proposed percentages should be rejected and the salable percentage be fixed at 100 percent with a corresponding zero surplus percentage.

Consideration was given to these various views bearing in mind the requirements of § 909.63 of the marketing order which pertain to an increase in the salable percentage. That section reads in part as follows: "The Secretary may . . . after findings of facts based upon such revised and current information as may be pertinent that the almonds available for handling will not be sufficient to supply the trade demand, increase the salable percentage to conform with such new relation as may be found to exist between trade demand and available supply."

Trade demand in this context means the trade demand for domestic almonds after making allowance for estimated imports. Available supply consists of the carryover at the beginning of the crop year plus new crop receipts less the quan-

tity reserved for carryout at the end of the crop year. The factors which the order authorizes to be taken into account in increasing the salable percentage are those involved in the new relationship found to exist between these two factors on a crop year basis. The estimates which are relevant to the increase of the salable percentage, therefore, represent adjustments made in the earlier estimates upon which the present salable and surplus percentages were based. The Department on a number of occasions in the past has increased crop year salable percentages and in each instance the determination of the increase has been made in accordance with the method followed in the instant case.

The argument was presented in several of the letters that the salable percentage should be increased to 83.5 percent since on the average handlers have sold in export 16.5 percent of their 1954–55 crop year receipts. It was argued in this connection that under the procedure for transfer of export credits recently approved by the Department that handlers who had disposed of less than 16.5 percent of their receipts could obtain credits from those who had exported in excess of 16.5 percent of their receipts, thus making possible the release of the entire surplus. It was contended in effect that the increase in the salable percentage should be limited to 83.5 percent since such action would tend to make it possible to offset completely over-export positions with under-export positions among various handlers by the transfer of credits. The Department approved the transfer of export credits procedure for use only on a voluntary and permissive basis.

On the basis of the Board's estimates of production and trade demand, a salable percentage of 85 percent will satisfy domestic trade demand, after making allowance for the quantity sold in export, by permitting the carryover to be reduced to about 6.5 million pounds. In the proposed rule the Department indicated that such a carryover is believed to be sufficient for domestic trade needs during the portion of the 1955–56 crop year prior to new crop deliveries. The increase of the salable percentage to 100 percent is not justified on the basis of the relationship between trade demand and available supply for the current crop year.

Therefore, after consideration of all relevant matters, the administrative rule in respect to such percentages which will supersede the rule (see 19 F. R. 7376) which became effective November 16, 1954, is as follows:

§ 909.204 *Salable and surplus percentages for the crop year beginning July 1, 1954.* The salable and surplus percentage during the crop year beginning July 1, 1954, applicable to almonds, edible kernel weight basis, received by handlers for their own accounts shall be 85 and 15 percent, respectively.

It is hereby determined that good cause exists for making this administrative rule effective upon its publication in the FEDERAL REGISTER, instead of waiting 30 days after publication, for the reasons that (1) it is desirable that almonds be released for sale in domestic markets at the earliest possible date so that users of almonds may obtain needed supplies, and (2) compliance with this administrative rule will not require handlers to make any advance preparation of a special nature.

(Sec. 5, 49 Stat. 753, as amended, 7 U. S. C. 608c)

Issued at Washington, D. C., this 15th day of April 1955, to become effective upon publication of this document in the FEDERAL REGISTER.

[SEAL] FLOYD F. HEDLUND,
Acting Director,
Fruit and Vegetable Division.

[F. R. Doc. 55-3252; Filed, Apr. 19, 1955; 8:53 a. m.]

TITLE 17—COMMODITY AND SECURITIES EXCHANGES

Chapter II—Securities and Exchange Commission

PART 240—GENERAL RULES AND REGULATIONS UNDER THE SECURITIES EXCHANGE ACT OF 1934

OVER-THE-COUNTER MARKETS; RATIO OF AGGREGATE INDEBTEDNESS TO NET CAPITAL

On January 31, 1955, the Commission published a proposal to amend paragraph (c) of its § 240.15c3–1 (Rule X-15C3–1) and invited all interested persons to comment thereon. The Commission has considered the comments and suggestions received and has adopted the amendments in the form set forth below.

Section 240.15c3–1 provides that no broker or dealer shall permit his aggregate indebtedness to all other persons to exceed 2000 percent of his net capital. Generally speaking, paragraph (b) exempts from the rule brokers and dealers who do not extend credit to, or carry money or securities for, customers, and those who are members of specified national securities exchanges. Paragraph (c) defines "aggregate indebtedness", "net capital" and certain other terms used in the rule.

Before the rule was amended it provided that, in the computation of "net capital", there should be deducted 10 percent of the market value of securities which form a part of the capital of the broker or dealer. As amended, this percentage deduction has been increased as follows: 20 percent, in the case of cumulative non-convertible first preferred stock not in arrears as to dividends; 5 percent in the case of undefaulted debt securities having a fixed interest rate and maturity date, unless such securities are selling at a discount of more than 5 percent, in which case the deduction would be determined according to a specified formula; and 30 percent in the case of all other securities. The 30 percent deduction would also be applied to certain commodity future contracts, whether long or short, and to positions in open contractual commitments.

The amendment also specifies certain additional types of indebtedness which may be excluded when computing "aggregate indebtedness" for purposes of the rule. It also defines a "satisfactory subordination agreement" and permits indebtedness under such an agreement to be excluded in computing "aggregate indebtedness" and to be treated as a part of capital in determining "net capital". Certain other provisions of paragraph (c) have also been clarified.

In order to give brokers and dealers subject to the rule an opportunity to reexamine their capital position and, where necessary, to make adjustments to bring themselves into compliance, the Commission has not made the rule effective until May 20, 1955.

Statutory basis. The Securities and Exchange Commission, acting pursuant to the provisions of the Securities Exchange Act of 1934, particularly sections 3 (b), 15 (c) (3) and 23 (a) thereof, and deeming such action necessary and appropriate in the public interest and for the protection of investors, and necessary to carry out its functions under the Act, hereby amends paragraph (c) of § 240.15c3–1 to read as stated below.

The text of paragraph (c), as amended, is as follows:

§ 240.15c3–1 *Ratio of aggregate indebtedness to net capital.* * * *

(c) *Definitions.* For the purpose of this section:

(1) The term "aggregate indebtedness" shall be deemed to mean the total money liabilities of a broker or dealer arising in connection with any transaction whatsoever, including, among other things: money borrowed; money payable against securities loaned and securities "failed to receive"; the market value of securities borrowed (except for delivery against customers' sales) to the extent to which no equivalent value is paid or credited; customers' free credit balances; credit balances in customers' accounts having short positions in securities; and equities in customers' commodities futures accounts; but excluding

(i) Indebtedness adequately collateralized, as hereinafter defined, by securities or spot commodities owned by the broker or dealer;

(ii) Indebtedness to other brokers or dealers adequately collateralized, as hereinafter defined, by securities or spot commodities owned by the broker or dealer;

(iii) Amounts payable against securities loaned which securities are owned by the broker or dealer;

(iv) Amounts payable against securities failed to receive which securities were purchased for the account of, and have not been sold by, the broker or dealer;

(v) Indebtedness adequately collateralized, as hereinafter defined, by exempted securities;

(vi) Amounts segregated in accordance with the Commodity Exchange Act and the rules and regulations thereunder;

(vii) Fixed liabilities adequately secured by real estate or any other asset which is not included in the computation of "net capital" under this section;

(viii) Liabilities on open contractual commitments;

(ix) Indebtedness subordinated to the claims of general creditors pursuant to a satisfactory subordination agreement, as defined in subparagraph (7) of this paragraph;

(2) The term "net capital" shall be deemed to mean the net worth of a broker or dealer (that is, the excess of total assets over total liabilities), adjusted by

(i) Adding unrealized profits (or deducting unrealized losses) in the accounts of the broker or dealer and, if such broker or dealer is a partnership, adding equities (or deducting deficits) in accounts of partners, as defined in subparagraph (4) of this paragraph;

(ii) Deducting fixed assets and assets which cannot be readily converted into cash (less any indebtedness secured thereby), including, among other things, real estate; furniture and fixtures; exchange memberships; prepaid rent, insurance and expenses, good will; organization expenses; all unsecured advances and loans; customers' unsecured notes and accounts; and deficits in customers' accounts, except in bona fide cash accounts within the meaning of section 4 (c) of Regulation T of the Board of Governors of the Federal Reserve System;

(iii) Deducting the percentages specified in this subdivision of the market value of all securities, long and short (except exempted securities) in the capital, proprietary and other accounts of the broker or dealer, including securities loaned to the broker or dealer pursuant to a satisfactory subordination agreement, as defined in subparagraph (7) of this paragraph, and if such broker or dealer is a partnership, in the accounts of partners, as defined in subparagraph (4) of this paragraph:

(*a*) In the case of non-convertible debt securities having a fixed interest rate and a fixed maturity date which are not in default, if the market value is not more than 5 percent below the face value, the deduction shall be 5 percent of such market value; if the market value is more than 5 percent but not more than 30 percent below the face value, the deduction shall be a percentage of market value, equal to the percentage by which the market value is below the face value; and if the market value is 30 percent or more below the face value, such deduction shall be 30 percent;

(*b*) In the case of cumulative, non-convertible preferred stock ranking prior to all other classes of stock of the same issue, which is not in arrears as to dividends, the deduction shall be 20 percent;

(*c*) On all other securities, the deduction shall be 30 percent;

Provided, however, That such deduction need not be made in the case of a security which is convertible into or exchangeable for other securities within a period of 30 days, subject to no conditions other than the payment of money, and the other securities into which such security is convertible, or for which it is exchangeable, are short in the accounts of such broker or dealer or partner, or a security which has been called for redemption and which is redeemable within 90 days.

(iv) Deducting 30 percent of the market value of all "long" and all "short" future commodity contracts (other than those contracts representing spreads or straddles in the same commodity and those contracts offsetting or hedging any "spot" commodity positions) carried in the capital, proprietary or other accounts of the broker or dealer and, if such broker or dealer is a partnership, in the accounts of partners as defined in subparagraph (4) of this paragraph;

(v) Deducting, in the case of a broker or dealer who has open contractual commitments, the respective percentages specified in subdivision (iii) of this subparagraph of the value (which shall be the market value whenever there is a market) of each net long and each net short position contemplated by any existing contractual commitment in the capital, proprietary and other accounts of the broker or dealer and, if such broker or dealer is a partnership, in accounts of partners, as defined in subparagraph (4) of this paragraph: *Provided, however,* That this deduction shall not apply to exempted securities, and that the deduction with respect to any individual commitment shall be reduced by the unrealized profit, in an amount not greater than the percentage deduction provided for in subdivision (iii) of this subparagraph (or increased by the unrealized loss) in such commitment; and that in no event shall an unrealized profit on any closed transactions operate to increase net capital;

(vi) Excluding liabilities of the broker or dealer which are subordinated to the claims of general creditors pursuant to a satisfactory subordination agreement as defined in subparagraph (7) of this paragraph; and

(vii) Deducting, in the case of a broker or dealer who is a sole proprietor, the excess of (*a*) liabilities which have not been incurred in the course of business as a broker or dealer over (*b*) assets not used in the business.

(3) The term "exempted securities" shall mean those securities specifically defined as exempted securities in section 3 (a) of the Securities Exchange Act of 1934;

(4) The term "accounts of partners", where the broker or dealer is a partnership, shall mean accounts of partners who have agreed in writing that the equity in such accounts maintained with such partnership shall be included as partnership property;

(5) The term "contractual commitments" shall include underwriting, when-issued, when-distributed and delayed delivery contracts, endorsement of puts and calls, commitments in foreign currencies, and spot (cash) commodities contracts, but shall not include uncleared regular way purchases and sales of securities and contracts in commodities futures; a series of contracts of purchase or sale of the same security conditioned, if at all, only upon issuance may be treated as an individual commitment;

(6) Indebtedness shall be deemed to be "adequately collateralized" within the meaning of this section, when the difference between the amount of the indebtedness and the market value of the collateral is sufficient to make the loan acceptable as a fully secured loan to banks regularly making comparable loans to brokers or dealers in the community;

(7) The term "satisfactory subordination agreement" shall mean a written agreement between the broker or dealer and a lender, which agreement is binding and enforceable in accordance with its terms upon the lender, his creditors, heirs, executors, administrators, and assigns, and which agreement satisfies all of the following conditions:

(i) It effectively subordinates any right of the lender to demand or receive payment or return of the cash or securities loaned to the claims of all present and future general creditors of the broker or dealer;

(ii) It is not subject to cancellation at the will of either party and is for a term of not less than one year;

(iii) It provides that it shall not be terminated, rescinded or modified by mutual consent or otherwise, if the effect thereof would be to make the agreement inconsistent with the conditions of this rule, or to reduce the net capital of the broker or dealer below the amount required by this section;

(iv) It provides that no default in the payment of interest or in the performance of any other covenant or condition by the broker or dealer shall have the effect of accelerating the maturity of the indebtedness;

(v) It provides that any notes or other written instruments evidencing the indebtedness shall bear on their face an appropriate legend stating that such notes or instruments are issued subject to the provisions of a subordination agreement which shall be adequately referred to and incorporated by reference;

(vi) It provides that any securities or other property loaned to the broker or dealer pursuant to its provisions may be used and dealt with by the broker or dealer as part of his capital and shall be subject to the risks of the business.

(8) The term "customer" shall mean every person except the broker or dealer: *Provided, however,* That partners who maintain "accounts of partners" as herein defined shall not be deemed to be customers insofar as such accounts are concerned.

This action shall be effective May 20, 1955.

(Sec. 23, 48 Stat. 901, as amended; 15 U. S. C. 78w)

By the Commission.

ORVAL L. DUBOIS,
Secretary.

APRIL 8, 1955.

TITLE 19—CUSTOMS DUTIES

Chapter I—Bureau of Customs, Department of the Treasury

[T. D. 53777]

PART 1—CUSTOMS DISTRICTS AND PORTS

HOURS OF BUSINESS

1. Section 1.8 (d), Customs Regulations, is hereby amended to read as follows:

(d) Each customs office shall be open for the transaction of general customs business on all state and local holidays occurring on days other than Saturdays, Sundays, and national holidays. If a state or local holiday interferes with the performance of work in a customs office by any customs employee or employees, the principal field officer may request approval of the Commissioner of Customs to excuse such employees from duty without charge to leave.

(R. S. 161, 251, sec. 624, 46 Stat. 759; 5 U. S. C. 22, 19 U. S. C. 66, 1624)

2. Footnote 7 to § 1.8 is amended by inserting "(E. O. No. 10358, June 9, 1952)" in place of "(E. O. No. 1076, May 22, 1909)".

[SEAL] RALPH KELLY,
Commissioner of Customs.

Approved: April 12, 1955.

H. CHAPMAN ROSE,
Acting Secretary of the Treasury.

[F. R. Doc. 55-3253; Filed, Apr. 19, 1955; 8:53 a. m.]

[T. D. 53780]

PART 10—ARTICLES CONDITIONALLY FREE, SUBJECT TO REDUCED RATE, ETC.

GOVERNMENT IMPORTATIONS; FREE ENTRY

For the purpose of prescribing the procedure and requirements for free entry of source materials purchased abroad as provided for by section 161 (1), Atomic Energy Act of 1954 (42 U. S. C. 2201 (1)), the following amendments are made to §§ 10.103 and 10.104 of the Customs Regulations.

1. Section 10.103 is amended by striking out "and" before "section 602 (d) (6)" and by inserting "and section 161 (1), Atomic Energy Act of 1954 (42 U. S. C. 2201 (1))[98a]," before "such importations", and by adding a new footnote 98a following footnote 98, reading as follows:

[98a] "In the performance of its function the Commission is authorized to—

* * * * * *

"(1) secure the admittance free of duty into the United States of purchases made abroad of source materials, upon certification to the Secretary of the Treasury that such entry is necessary in the interest of the common defense and security;" (42 U. S. C. 2201 (1)).

2. Section 10.104 is amended as follows:

a. The headnote is amended to read:

§ 10.104 *Importations by the Departments of the Army, Navy, and Air Force, the General Services Administration, and the Atomic Energy Commission.* * * *

b. The first sentence of paragraph (a) is amended to read: "Shipments consigned to the Department of the Army, the Department of the Navy, the Department of the Air Force, the General Services Administration, the Atomic Energy Commission, or other party acting for the Atomic Energy Commission, or to an officer or official of any such agency in his official capacity, shall be regarded for purposes of this section as shipments the immediate delivery of which is necessary within the purview of section 448 (b), Tariff Act of 1930."

c. Paragraph (c) is amended by renumbering subparagraph (3) as subparagraph (4) and adding a new subparagraph (3) reading as follows:

(3) Collectors may admit materials free under section 161 (1), Atomic Energy Act of 1954 (42 U. S. C. 2201 (1)), only upon receipt from the Atomic Energy Commission of a certificate specifically identifying the shipment of such materials and executed in the following form by a duly authorized official of the Atomic Energy Commission.

I certify to the Secretary of the Treasury that the above-described materials are source materials purchased abroad, the admittance of which is necessary in the interest of the common defense and security, in accordance with section 161 (1) of the Atomic Energy Act of 1954 (42 U. S. C. 2201 (1)).

(Name)

(Title, who has been authorized to execute free-entry certificates for the Atomic Energy Commission)

d. The citation of authority for § 10.104 is amended to read as follows:

(Sec. 12, 62 Stat. 26, sec. 448 (b), 46 Stat. 714, 38 Stat. 399, sec. 602 (d) (6), 63 Stat. 401, 68 Stat. 948; 5 U. S. C. 219b, 626e, 19 U. S. C. 1448 (b), 34 U. S. C. 568, 40 U. S. C. 474 (6), 42 U. S. C. 2201 (1))

(R. S. 161, 251, sec. 624, 46 Stat. 759; 5 U. S. C. 22, 19 U. S. C. 66, 1624)

[SEAL] RALPH KELLY,
Commissioner of Customs.

Approved: April 13, 1955.

H. CHAPMAN ROSE,
Acting Secretary of the Treasury.

TITLE 43—PUBLIC LANDS: INTERIOR

Chapter I—Bureau of Land Management, Department of the Interior

Appendix C—Public Land Orders

[Public Land Order 1123]

ALASKA

PARTIAL REVOCATION OF EXECUTIVE ORDERS NO. 5289 OF MARCH 4, 1930, NO. 1194 OF APRIL 26, 1910, NO. 1974 OF JULY 2, 1914 AND THE EXECUTIVE ORDER OF MAY 4, 1907

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

1. Executive Order No. 5289 of March 4, 1930, and the unnumbered Executive Order of May 4, 1907 reserving public lands in Alaska for educational purposes, are hereby revoked so far as they affect the following described lands:

EXECUTIVE ORDER NO. 5289

KARLUK

Lands described in U. S. Survey No. 2030.

The area described which contains 0.35 acre, is withdrawn by Public Land Order No. 128 of May 22, 1943.

EXECUTIVE ORDER OF MAY 4, 1907

TANANA

At the junction of the Tanana and Yukon Rivers, latitude 65° longitude 152°, beginning at Corner No. 1 of U. S. School Reserve which is identical with Corner No. 1 of U. S. Survey No. 1107; thence N. 79° 44' E., 1.21 chains to Corner No. 2; N. 10° 16' W., 1.25 chains to Corner No. 3; S. 79° 44' W., 1.21 chains to Corner No. 4; S. 10° 16' E., 1.25 chains to Corner No. 1, the place of beginning.

The area described contains 0.18 acre.

2. Executive Orders No. 1194 of April 26, 1910, and No. 1974 of July 2, 1914, reserving certain public lands in Alaska for use of the Bureau of Education for educational purposes, are hereby revoked so far as they affect the following described lands:

EXECUTIVE ORDER NO. 1194

UGASHIK

Beginning at Corner No. 1, a stake set in the ground, thence in a northerly direction 700 feet to Corner No. 2; thence in a westerly direction 900 feet to Corner No. 3; thence in a southerly direction 700 feet to Corner No. 4; thence in an easterly direction 900 feet to Corner No. 1, the place of beginning.

The area described contains 14.50 acres.

EXECUTIVE ORDER NO. 1974

TANANA

A small tract lying within the survey of the Protestant Episcopal Mission Reserve and adjoining the present Tanana School Reserve on its west line; beginning at a stone marked for Corner No. 1, from which the Corner No. 4 of said Mission survey bears S. 58° 53' W., 23.67 chains distant; running thence S. 79° 44' W., 4 feet to a post; thence N. 10° 16' W., 120 feet to a post; thence N. 79° 44' E., 4 feet to a post; thence S. 10° 16' E., 120 feet to point of beginning. Latitude 65° 8' N., longitude 152° 00' W.

The area described contains 0.01 acre. (U. S. Survey No. 1107.)

At 10:00 a. m. on the 35th day after the date of this order the unappropriated, unreserved, unsurveyed public lands affected by this order shall be opened to settlement under the Homestead Laws or, if nonmineral in character, under the Alaska Home Site Act of May 26, 1934 (48 Stat. 809; 48 U. S. C. 461), or the Small Tract Act of June 1, 1938 (52 Stat. 509; 43 U. S. C. 682a) and to those forms of appropriation only by qualified veterans of World War II for whose services recognition is granted by the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284) as amended, and by other qualified persons entitled to

credit for service under the said act. Commencing at 10:00 a. m. on the 126th day after the date of this order, any of such lands not settled upon by veterans or other persons entitled to credit for service shall become subject to settlement and other forms of appropriation by the public generally in accordance with appropriate laws and regulations. All applications filed pursuant to the Veterans' Preference Act of 1944, on or before 10:00 a. m. of the 35th day after the date of this order shall be treated as though simultaneously filed at that time. All other applications under the public-land laws filed on or before 10:00 a. m. of the 126th day after the date of this order shall be treated as though simultaneously filed at that time.

Inquiries concerning the lands at Ugashik and Karluk shall be addressed to the Manager, Land Office, Anchorage, Alaska, and for the lands at Tanana to the Manager, Land Office, Fairbanks, Alaska.

ORME LEWIS,
Assistant Secretary of the Interior.

APRIL 13, 1955.

[F. R. Doc. 55-3208; Filed, Apr. 19, 1955; 8:45 a. m.]

[Public Land Order 1124]

ALASKA

REVOKING PUBLIC LAND ORDER NO. 585 OF APRIL 14, 1949; WITHDRAWING PORTIONS OF THE RELEASED LANDS FOR PUBLIC SERVICE SITES

By virtue of the authority vested in the President by section 1 of the act of June 25, 1910 (36 Stat. 847; 43 U. S. C. 141) and otherwise, and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

1. Public Land Order No. 585 of April 14, 1949, withholding public lands within certain described areas in Alaska for classification and examination, and in aid of proposed legislation, which was revoked in part by Public Land Orders No. 800 of February 1, 1952, No. 812 of March 10, 1952, No. 820 of April 28, 1952, No. 846 of June 26, 1952, and No. 913 of August 26, 1953, is hereby revoked so far as it affects the remaining lands withdrawn thereby, described as follows:

CHENA RIVER AREA

FAIRBANKS MERIDIAN

All unsurveyed land within two miles north of the Chena River from the range line between Township 1 S., Ranges 1 and 2 E., east to longitude 146° 40' W.;

All unsurveyed land within two miles south of the Chena River from longitude 147° W. to longitude 146° 40' W.; All unsurveyed lands within two miles of the Little Chena River from its mouth, northeasterly to latitude 64° 55' N.

The areas described aggregate approximately 86,000 acres.

2. Subject to valid existing rights, the following-described public lands, which are portions of the land described in paragraph 1 hereof, are hereby withdrawn from all forms of appropriation under the public-land laws, including the mining laws but not the mineral-leasing laws, and reserved under the jurisdiction of the Secretary of the Interior for public service sites:

FAIRBANKS MERIDIAN

T. 1 S., R. 2 E.,
Sec. 10, unsurveyed, NE¼SW¼, E½NW¼SW¼, NW¼NW¼SW¼, SW¼NW¼SW¼, that part lying northeasterly of Chena River.

The area described contains approximately 80 acres.

T. 1 S., R. 3 E., unsurveyed,
Sec. 22, E½SE¼SW¼, that part lying southerly of Chena River; W½SW¼SE¼, that part lying westerly of Chena River;
Sec. 27, NE¼NE¼NW¼, NW¼NW¼NE¼, those parts lying northerly of Chena River.

The area described contains approximately 40 acres.

3. The following described public lands, which are portions of the lands described in paragraph 1 hereof, shall not become subject to the initiation of any rights or to any disposition under the public land laws until it is so provided by an order of classification to be issued by an authorized officer, opening such lands to application under the Small Tract Act of June 1, 1938 (52 Stat. 609; 43 U. S. C. 682a), as amended, with a ninety-one day preference right period for filing such applications by veterans of World War II and the Korean Conflict and other qualified persons entitled to preference under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284), as amended:

FAIRBANKS MERIDIAN

T. 1 S., R. 2 E.,
(a) Sec. 10, unsurveyed, NW¼, W½W½NE¼.

The area described contains 200 acres.

(b) Sec. 13, unsurveyed, SW¼SW¼: S½NW¼SW¼, that part lying south of Chena River;
Sec. 24, unsurveyed, N½NW¼NW¼, that part lying north of Chena River.

The area described contains approximately 55 acres.

T. 1 S., R. 3 E., unsurveyed,
(a) Sec. 30, NW¼SW¼NW¼, that part lying west of Chena River.

The area described contains approximately 8 acres.

(b) Sec. 30, S½N½NW¼NE¼, N½S½NW¼NE¼, those parts lying north and west of Chena River.

The area described contains approximately 12 acres.

(c) Sec. 28, NW¼SW¼SW¼, that part lying within a loop of the right bank of Chena River.

The area described contains approximately 7 acres.

(d) Sec. 28, E½SW¼SE¼, that part lying easterly of Chena River; W½SE¼SE¼, that part lying westerly of Chena River.

The area described contains approximately 25 acres.

(e) Sec. 27, SW¼SW¼NW¼, W½NW¼SW¼; NW¼SW¼NW¼, E½NW¼SW¼, those parts lying westerly of Chena River; NW¼SW¼SW¼, that part lying northwesterly of Chena River.
Sec. 28, E½SE¼NE¼, E½NW¼SE¼NE¼; W½NW¼SE¼NE¼, that part lying south of Chena River; SW¼SE¼NE¼, that part lying northerly of Chena River; E½SW¼NE¼, that part lying easterly of Chena River; E½NE¼SE¼, that part lying northeasterly of Chena River.

The area described contains approximately 95 acres.

(f) Sec. 22, W½NE¼SW¼SE¼; SE¼SW¼NW¼, W½NE¼SW¼, those parts lying east of Chena River; SW¼SE¼NW¼, NW¼SE¼, those parts lying southwesterly of Chena River; E½NE¼SW¼, that part lying south of Chena River; N½N½SE¼SW¼, that part lying north of Chena River; NW¼SW¼SE¼, that part lying northeasterly of Chena River.

The area described contains approximately 65 acres.

(g) Sec. 14, SE¼SW¼SW¼, that part lying southeasterly of Chena River; SW¼SE¼SW¼, that part lying southwesterly of Chena River.
Sec. 23, W½NE¼NW¼, that part lying southwesterly of Chena River; E½NW¼NW¼, that part lying east of Chena River; NE¼SW¼NW¼, that part lying northeasterly of Chena River.

The area described contains approximately 27 acres.

(h) Sec. 13, E½SW¼NE¼; NW¼NE¼, that part lying southerly of Chena River; W½NE¼NE¼, that part lying westerly of Chena River; W½SE¼NE¼, that part lying southwesterly of Chena River.

The area described contains approximately 77 acres.

T. 1 S., R. 4 E., unsurveyed,
Sec. 9, E½SW¼NE¼, that part lying easterly of Chena River; SE¼NE¼, that part lying north of Chena River.
Sec. 10, SW¼NW¼, W½SE¼NW¼, those parts lying westerly of Chena River; W½NE¼SW¼, that part lying northwesterly of Chena River; NW¼SW¼, that part lying northeasterly of Chena River.

The area described contains approximately 122 acres.

4. Portions of the lands described in paragraph 1 of this order aggregating approximately 190 acres, are withdrawn by Public Land Order No. 733 of July 18, 1951, for use of the Department of the Army, and other portions are included in allowed entries or settlement claims, or have been patented.

5. Portions of the lands described in paragraph 1 of this order, aggregating approximately 2,790 acres, are included in an application for withdrawal by the Department of the Air Force, (Fairbanks 010082), with respect to which lands, applications under the public land laws will be suspended in accordance with 43 CFR 295.10 until action on the application for withdrawal has been taken.

6. At 10:00 a. m. on the 35th day after the date of this order the unappropriated, unreserved, unsurveyed public lands affected by this order shall, subject to valid existing rights and the provisions of existing withdrawals, be opened to settlement under the homestead laws, or, if nonmineral in character, under the Alaska Home Site Act of May 26, 1934 (48 Stat. 809; 48 U. S. C. 461) or the Small Tract Act of June 1, 1938 (52 Stat. 609; 43 U. S. C. 682a) as amended, and to those forms of appropriation only by qualified veterans of World War II and the Korean Conflict for whose service recognition is granted by the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284) as amended, and by other qualified persons entitled to credit for service under the said act. Commencing at 10:00 a. m. on the 126th day after the date of this order, any of such lands not settled upon by veterans or other persons entitled to credit for service shall become subject to settlement and other forms of appropriation by the public generally in accordance with appropriate laws and regulations.

7. At 10:00 a. m. on the 35th day after the date of this order the surveyed public lands released by this order shall, subject to valid existing rights and the provisions of existing withdrawals, become subject to application, petition, location, and selection as follows:

(a) *Ninety-one day period for preference-right filings.* For a period of 91 days, commencing at the hour and on the day specified above, the public surveyed lands affected by this order shall be subject only to (1) application under the homestead laws or the Alaska Home Site Act of May 26, 1934 (48 Stat. 809; 48 U. S. C. 461), or the Small Tract Act of June 1, 1938, 52 Stat. 609 (43 U. S. C. 682a), as amended, by qualified veterans of World War II and the Korean Conflict and other qualified persons entitled to preference under the act of September 27, 1944, 58 Stat. 747 (43 U. S. C. 279–284), as amended, subject to the requirements of applicable law, and (2) application under any applicable public-land law, based on prior existing valid settlement rights and preference rights conferred by existing laws or equitable claims subject to allowance and confirmation. Applications under subdivision (1) of this paragraph shall be subject to applications and claims of the classes described in subdivision (2) of this paragraph. All applications filed under this paragraph either at or before 10:00 a. m. on the 35th day after the date of this order shall be treated as though filed simultaneously at that time. All applications filed under this paragraph after 10:00 a. m. on the said 35th day shall be considered in the order of filing.

(b) *Date for non-preference-right filings.* Commencing at 10:00 a. m. on the 126th day after the date of this order, any lands remaining unappropriated shall become subject to such application, petition, location, selection, or other appropriation by the public generally as may be authorized by the public-land laws. All such applications filed either at or before 10:00 a. m. on the 126th day after the date of this order, shall be treated as though filed simultaneously at the hour specified on such 126th day. All applications filed thereafter shall be considered in the order of filing.

8. A veteran shall accompany his application with a complete photostatic, or other copy (both sides), of his certificate of honorable discharge, or of an official document of his branch of the service which shows clearly his honorable discharge as defined in § 181.36 of Title 43 of the Code of Federal Regulations, or constitutes evidence of other facts upon which the claim for preference is based and which shows clearly the period of service. Other persons claiming credit for service of veterans must furnish like proof in support of their claims. Persons asserting preference rights, through settlement or otherwise, and those having equitable claims, shall accompany their applications by duly corroborated statements in support thereof, setting forth in detail all facts relevant to their claims.

9. Applications for these lands, which shall be filed in the Land Office, Bureau of Land Management, Fairbanks, Alaska, shall be acted upon in accordance with the regulations contained in § 295.8 of Title 43 of the Code of Federal Regulations, to the extent that such regulations are applicable. Applications under the homestead laws shall be governed by the regulations contained in Parts 65 and 66 inclusive, of Title 43 of the Code of Federal Regulations, and applications under the said Alaska Home Site Act of May 26, 1934, and the said Small Tract Act of June 1, 1938, shall be governed by the regulations contained in §§ 64.6 to 64.10 inclusive, and Part 257 of that title.

Inquiries concerning these lands shall be addressed to the Manager, Land Office, Bureau of Land Management, Fairbanks, Alaska.

ORME LEWIS,
Assistant Secretary of the Interior.

APRIL 14, 1955.

[F. R. Doc. 55-3209; Filed, Apr. 19, 1955; 8:45 a. m.]

TITLE 47—TELECOMMUNICATION

Chapter I—Federal Communications Commission

[Docket No. 11265; FCC 55-468]

[Rules Amdt. 8-19]

PART 8—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

RADIOTELEPHONE INSTALLATIONS ON CARGO SHIPS

In the matter of amendment of Part 8 of the Commission's rules for the purpose of implementing Title III, Part II of the Communications Act and the Safety Convention with respect to radiotelephone installations required to be carried by cargo ships; Docket No. 11265.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 14th day of April 1955;

The Commission having under consideration its proposal in the above-entitled matter to amend Part 8 of the Commission's rules for the purpose of implementing Title III, Part II of the Communications Act and the Safety Convention with respect to radiotelephone installations required to be carried by cargo ships; and

It appearing that in accordance with the requirements of section 4 (a) of the Administrative Procedure Act, notice of proposed rule making in this matter which made provision for submission of written comments by interested parties, was duly published in the FEDERAL REGISTER on February 9, 1955 (20 F. R. 835); and

It further appearing that, although no objection, as such, was filed to the proposed amendments, the American Merchant Marine Institute, Inc. and the Central Committee on Radio Facilities of the American Petroleum Institute commented that the installation of an emergency source of energy with respect to new installations, as prescribed by § 8.531 (a) of the proposed regulations might be impossible or impracticable, or inadvisable with respect to certain types of vessels and "assumed" that with respect to such vessels, the FCC would grant exemptions from this requirement, and

It further appearing that the requirement in § 8.531 (a) referred to above merely reflects specific requirements contained in the Communications Act and the Safety Convention, and that the exemption provisions of the act and the Convention are a separate matter, making it inappropriate in this proceeding to make any finding with respect to exemption from requirements of the act or the Convention; and

It further appearing that the public interest, convenience and necessity will be served by the amendments herein ordered, the authority for which is contained in section 303 (n) and (r) and Title III, Part II of the Communications Act of 1934, as amended;

It is ordered, That, effective May 23, 1955, Part 8 of the Commission's rules is amended as set forth below.

(Sec. 4, 48 Stat. 1066, as amended; 47 U. S. C. 154. Interprets or applies sec. 303, 48 Stat. 1082 as amended; 47 U. S. C. 303)

Released: April 14, 1955.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

1. Section 8.8 is amended by adding two new paragraphs as follows:

(o) *Existing installation.* The term "existing installation", as used in this part solely in reference to requirements of Part II of Title III of the Communications Act or of the Safety Convention, means an installation installed on a ship prior to November 19, 1952, in the case of a United States ship subject to the radio provisions of the Safety Convention, or one installed on a ship prior to August 13, 1955, in the case of other ships subject to Part II of Title III of said act.

(p) *New installation.* The term "new installation", as used in this part solely in reference to requirements of Part II of Title III of the Communications Act or of the Safety Convention, means an installation which replaces an existing installation or, in the case of a United States ship subject to the radio provisions of the Safety Convention, one installed on a ship subsequent to November 19, 1952, and in the case of other ships subject to Part II of Title III of

said act, one which is installed subsequent to August 13, 1955.

2. Section 8.152 is amended by addition of new paragraph (d) as follows:

(d) Each cargo ship of the United States required by Part II of Title III of the Communications Act to be fitted with a radiotelephone installation and not exempt therefrom by the Commission, shall, for safety purposes, carry at least one qualified operator holding an operator's license issued by the Commission which is appropriate for the purpose under the provisions of Part 13 of this chapter.

3. Section 8.153 is amended by addition of new paragraph (b) as follows:

(b) Each cargo ship of the United States which is not subject to Part II of Title III of the Communications Act but which is required by the radio provisions of the Safety Convention to be fitted with a radiotelephone installation which has not been exempted therefrom by the Commission, shall, for safety purposes, carry at least one qualified operator holding an operator's license issued by the Commission which is appropriate for the purpose under the provisions of Part 13 of this chapter.

4. Section 8.202 is amended by addition of new paragraph (c) reading as follows:

(c) Each cargo ship of the United States required by Part II of Title III of the Communications Act to be fitted with a radiotelephone installation and not exempt therefrom by the Commission, shall, while being navigated outside a harbor or port, keep a continuous and efficient listening watch on the radiotelephone calling and distress frequency 2182 kc whenever the radiotelephone installation is not being used to transmit on that channel or to transmit or receive on any other channel below 30 Mc authorized for maritime mobile services. Such listening watch shall be performed by at least one officer or member of the crew of the vessel who has been designated by the master to perform the listening watch. The person designated by the master may simultaneously perform other duties relating to the operation or navigation of the vessel, provided such other duties do not interfere with the effectiveness of the listening watch.

5. Section 8.203 is amended by addition of new paragraph (g) reading as follows:

(g) Each cargo ship of the United States required by the Safety Convention to be fitted with a radiotelephone installation and not exempt therefrom by the Commission, shall, for safety purposes, while being navigated, keep a continuous watch on the radiotelephone calling and distress frequency in the manner prescribed by § 8.202 (c).

6. Section 8.368 (a) is amended as follows:

a. Subparagraph (5) is amended to read as follows:

(5) With respect to ship stations which, by reason of the provisions of § 8.202, § 8.203 or § 8.223, are required to keep a watch on the radiotelephone calling and distress frequency, 2182 kc, entries shall be made showing each time this watch is begun, suspended, or concluded, without any requirement, however, of making entries solely to show interruption of this listening due to authorized communication with other stations. The required entries shall be made by a licensed operator or by any member of the crew who is designated and authorized by the master to do so; the signature of each person making these entries and each person who actually maintains such watch shall appear in the log and shall be properly related to each particular entry for this purpose.

b. A new subparagraph (8) is added to read as follows:

(8) In the case of ship stations required to be equipped for radiotelephony by reason of the provisions of Part II of Title III of the Communications Act or the radio provisions of the Safety Convention, the following additional entries shall be made by a qualified operator or by any member of the crew who is designated and authorized by the master to do so; the signature of each person making these entries shall appear in the log and be properly related to the particular entry:

(i) The time when storage batteries provided as a part of the required radiotelephone installation are placed on charge and taken off charge.

(ii) Results of any tests of the required radiotelephone installation including hydrometer readings of lead-acid storage batteries and voltage readings of other types of batteries provided as part of that installation.

(iii) A daily entry showing the operating condition of the required radiotelephone equipment as determined by either normal communication or the test communication required by § 8.534.

(iv) Results of inspections and tests made pursuant to § 8.520 (g) of any lifeboat radio equipment which is compulsorily provided in compliance with requirements of law.

7. Subpart R of Part 8 is amended by adding the following centerhead and rules immediately following § 8.525:

RADIOTELEPHONE INSTALLATIONS ON SHIPS SUBJECT TO PART II OF TITLE III OF THE COMMUNICATIONS ACT OR ON U. S. SHIPS SUBJECT TO THE SAFETY CONVENTION

Sec.

8.528 Radiotelephone installations.
8.529 Radiotelephone transmitter.
8.530 Radiotelephone receiving equipment.
8.531 Power supply.
8.532 Radiating system.
8.533 General requirements applicable to radiotelephone installations.
8.534 Test of radiotelephone installation.

§ 8.528 *Radiotelephone installations.* (a) A radiotelephone installation required to be provided on any ship by reason of the provisions of Part II of Title III of the Communications Act or on a United States ship by reason of the Safety Convention, shall comply in an efficient manner with §§ 8.529, 8.530, 8.531, 8.532 and 8.533 in addition to all other applicable requirements of this part. The radiotelephone installation so provided shall include at least the following:

(1) A radiotelephone transmitter and associated radiotelephone receiving equipment;

(2) A main source of power;

(3) An emergency source of power when required by § 8.531;

(4) An antenna and ground system; and

(5) Such other apparatus as may be necessary for the proper operation and use of these components of this installation.

§ 8.529 *Radiotelephone transmitter.* (a) The radiotelephone transmitter shall be capable of transmitting on the radiotelephone calling and distress frequency, 2182 kc, the ship-to-ship working frequency, 2638 kc, and at least two other frequencies within the band 1605 to 2850 kc used for ship-to-shore or ship-to-ship communications.

(b) The transmitter shall be capable of proper technical operation with peak modulation percentage between 75 and 100 percent and shall be so adjusted that the transmission of speech normally produces peak modulation within these limits.

(c) The radiotelephone transmitting installation shall be capable of transmitting clearly perceptible signals from ship to ship during daytime, under normal conditions and circumstances, over a minimum normal range of one hundred and fifty nautical miles. The transmitting apparatus of the radiotelephone transmitting installation shall be considered to comply with this range requirement whenever such apparatus is properly adjusted for use with an actual ship station transmitting antenna meeting the requirements of § 8.532 and has been demonstrated or is of a type which has been demonstrated to the satisfaction of the Commission as capable, with normal operating voltage applied, of delivering not less than 25 watts of unmodulated radio frequency carrier power on each of the frequencies 2182 kc and 2638 kc into an artificial antenna consisting of a series network of 10 ohms effective resistance and 200 micromicrofarads capacitance: *Provided*, That if a type demonstration has been made, an individual demonstration of the power capability of the transmitting apparatus of any individual radiotelephone installation as normally installed on board ship may be required to determine whether it complies with these power requirements.

(d) Transmitters installed after June 1, 1956 and all transmitters after June 1, 1960 regardless of installation date shall be equipped with a device which will provide continuous visual indication that the transmitter is supplying radio-frequency power to the antenna.

(e) The transmitter shall be adequately protected, by suitable devices such as fuses or circuit breakers, from excessive currents and voltages which could cause damage to components thereof.

(f) A durable nameplate shall be mounted on the transmitter or made an integral part thereof showing clearly at least the following:

(1) The name of the manufacturer;

(2) The type or model number.

§ 8.530 *Radiotelephone receiving equipment.* (a) The radiotelephone installation shall include the follcwing receivers.

(1) A receiver capable of reception of A3 emission on 2182 kc, 2638 kc and the receiving frequencies associated with transmitting frequencies required to be provided by § 8.529. The receiver shall be capable of accurate and convenient selection of these frequencies without manual tuning, i. e., it shall be pre-set for reception on each of the required frequencies.

(2) After June 1, 1956, in addition to the receiver required by subparagraph (1) of this paragraph, a receiver capable of manually tuned reception over the entire frequency band 1600 to 3500 kc shall be provided.

(b) One or more loudspeakers capable of effective operation shall be provided so as to permit reception at the principal operating location and at any other location where listening required by § 8.202 (c) or § 8.203 (g) is performed.

(c) Any receiving equipment provided as part of the required radiotelephone installation shall be capable of a sensitivity over the required frequency band on any required reception frequency of at least 50 microvolts. Sensitivity of the receiver is expressed as the radio frequency signal in microvolts modulated 30 percent at 400 cycles per second which must be delivered to the antenna terminals of the receiving apparatus through a suitable artificial antenna in order to produce an audio output of 50 milliwatts of power to the loudspeaker with a signal-to-noise ratio of at least 6 decibels. Evidence of a manufacturer's rating or a demonstration of the sensitivity of a required receiver computed upon this basis shall be furnished upon request of a Commission engineer.

(d) Any receiving equipment provided as part of the required radiotelephone installation shall be provided with a durable nameplate mounted on the receiver or made an integral part thereof showing at least the following:

(1) The name of the manufacturer.

(2) The type or model number.

(e) Required receiving equipment shall be protected by means of suitable devices such as fuses or circuit-breakers from excessive voltages which could cause damage to any component thereof.

§ 8.531 *Power supply.* (a) There shall be readily available for use at all times under normal load conditions, while the vessel is at sea, and when required during inspection of the ship radiotelephone station by an authorized representative of the Commission, a main source of energy, capable of supplying electrical power sufficient to energize simultaneously and efficiently the radiotelephone transmitter at its required power and the required receiver. At all times herein specified the potential of the main source of energy at the power input connections of the radiotelephone installation shall not deviate from its rated electrical potential by more than 10 percent on vessels completed on or after July 1, 1941, nor more than 15 percent on vessels completed before that date. In the case of new installations, an emergency source of energy independent of the vessel's normal electrical system shall be provided, and shall be located in the upper part of the ship, unless the main source of energy is so located, in which case the emergency source of energy is not required. The emergency source of energy when required shall be located as near the radiotelephone transmitter and receiver as is practicable. A power supply shall be deemed to be located in the upper part of the ship when it is located on the same deck as the wheel house or at least one deck above the vessel's main deck.

NOTE: See § 8.113 regarding application of Coast Guard regulations regarding power supply.

(b) Each emergency source of energy and each main source of energy which is provided in order to comply with the power supply requirements of this section and which consists of or includes batteries, have sufficient reserve capacity available at all times while the ship is at sea and during official inspections to permit operation of the radiotelephone installation for at least 6 hours continuously under normal working conditions. If directed by the Commission or its authorized representative, the ship owner, operating company, or station licensee shall prove this capacity by means of a discharge test over the 6-hour period of time when supplying power at the voltage required for normal and effective operation, to an electrical load as prescribed by paragraph (d) of this section, or by such other means as may be deemed necessary.

(c) Each emergency source of energy which is provided in order to comply with the power supply requirements of this section and which consists of or includes an engine-driven generator shall, with respect to such engine-driven generator, have sufficient reserve fuel available at all times while the ship is at sea and during official inspections to permit operation of the radiotelephone installation for at least 6 hours continuously under normal working conditions. If directed by the Commission or its authorized representative, the ship owner, operating company, or station licensee shall prove the adequacy of the fuel supply by demonstration, or by such other means as may be deemed necessary. Proof of the adequacy of the engine fuel supply to operate the unit continuously and effectively over the 6-hour period of time may be established by using as a basis the fuel consumption during a continuous period of 1 hour when supplying power at the voltage required for normal and effective operation, to an electrical load as prescribed by paragraph (d) of this section.

(d) The electrical load to be supplied by a main or an emergency source of energy under the provisions of paragraph (b) or (c) of this section shall be computed as the sum of all loads to which it may supply energy in times of emergency or distress. The radiotelephone transmitting apparatus shall be regarded as having an intermittent power demand amounting in the aggregate to one-half the six-hour period.

(e) At the conclusion of the test specified in paragraphs (b) and (c) of this section, no part of the main or emergency sources of energy shall have an excessive temperature rise, nor shall the specific gravity or voltage of any storage battery be below the 90 percent discharge point as determined from information (such as voltage curves or specific gravity tables) supplied by the manufacturer of the type of battery involved.

(f) Means shall be provided for adequately charging any storage batteries used as a main or emergency source of energy or any part thereof, for the required radiotelephone installation. There shall be provided a device which, during charging of the batteries, will give a continuous indication of the rate and polarity of such charging.

(g) The cooling system of each internal combustion engine used as a part of any required emergency source of energy for the radiotelephone installation shall be adequately protected or treated to prevent freezing or overheating consistent with the season and route to be traveled by the particular vessel involved.

(h) All required power-supply circuits shall be appropriately protected by means of suitable devices such as fuses or circuit-breakers from overloads or short-circuits, which could damage any component thereof.

§ 8.532 *Radiating system.* (a) In each radiotelephone installation an antenna shall be provided which is as nondirectional and as efficient as is practicable for the transmission and reception of radio ground waves over seawater. The installation and construction of this antenna shall be such as to insure, insofar as is practicable, proper operation in time of an emergency.

(b) When an electrical ground connection is used as a necessary element of the radiating system, such connection shall be made in an efficient manner to the hull of a vessel having a metal hull or, in the case of a vessel not having a metal hull, to a bare plate and/or strips of corrosion resistant metal of good electrical conductivity having a total area of at least 12 square feet in the aggregate, permanently attached to the hull below the waterline and insofar as possible located directly under the antenna structure and radio apparatus.

§ 8.533 *General requirements applicable to radiotelephone installations.* (a) Each radiotelephone installation in respect to all components thereof required by reason of Title III, Part II of the Communications Act or the Safety Convention shall meet the following requirements:

(1) The radiotelephone transmitter, receiver and all controls necessary for their proper use and operation shall be located in the upper part of the ship. For this purpose, the upper part of the ship shall be considered to include locations at wheel house level or those which are at least one deck above the vessel's main deck. In the case of installations

made after June 1, 1956, the principal operating location shall be in the room from which the vessel is normally steered while at sea. If the principal operating location is not in such room or not in a room adjacent to and opening directly into such room, an interior two-way voice communication system including an attention signaling system shall be provided between such room and the principal operating location.

(2) If the radiotelephone installation is operated from any other position than the principal operating location, it shall always be possible to take control of the operation of the radiotelephone installation at the principal operating location as follows:

(i) Except as provided in subdivision (ii) of this subparagraph, a method shall be provided for taking control at the principal operating location as herein prescribed which is direct, positive and independent of action by any person not at the principal operating location.

(ii) The use of an interior shipboard communication system between the principal operating location and all other locations at which there is a radiotelephone operating position shall be acceptable as a method for taking control at the principal operating location as herein prescribed on condition that the communication thereby provided is reliable, effective immediately, available at all times, and is usable independently of any other interior communication circuit: *Provided, however,* That in the case of radiotelephone installations first placed in service on or after June 1, 1956 the use of such a method for taking control at the principal operating location shall be acceptable only in the case of those radiotelephone operating positions located in the chart room or master's quarters.

(3) The radiotelephone installation when utilizing the fixed tuned receiver required by § 8.530 (a) (1) shall be so designed that when a qualified operator is present at the principal radiotelephone operating location:

(i) Switching between the calling and distress frequency 2182 kc and any required working frequency or vice versa may be performed within a period of five seconds;

(ii) Changeover from transmission to reception and vice versa may be accomplished within a total period of two seconds on each of the required frequencies under circumstances which do not require a change in operating radio channel at the same time.

(iii) Use of the emergency source of energy, when required by § 8.531, shall be available within 1 minute after any need arises for its use.

(4) The components and assembly of the radiotelephone installation shall be such as to insure safe and effective operation of the equipment and shall be arranged to facilitate proper repair and replacement of parts. Adequate protection shall be provided against the action of saline moisture and the effects of vibration, humidity and temperature encountered on shipboard.

(5) A reliable electric light shall be provided and permanently arranged so as to illuminate satisfactorily the operating controls at the principal operating location. When the principal operating location is in the room from which the vessel is steered, the light shall be so arranged that its illumination is confined substantially to the vicinity of the operating controls so that it may be used at night without interfering with navigation of the vessel. The light shall be energized from the main source of energy, and, if an emergency source of energy for the radiotelephone installation is required, means shall be provided for energizing the light from such source of energy also.

§ 8.534 *Test of radiotelephone installation.* Unless the normal use of a radiotelephone installation required by Title III, Part II of the Communications Act or the Safety Convention demonstrates that the equipment is in proper operating condition for an emergency, a test communication for this purpose shall be made by a qualified operator each day the vessel is navigated. When this test is performed by some person other than the master and the equipment is found not to be in proper operating condition for an emergency, the master shall be notified promptly thereof.

[FCC 55-470]

[Rules Amdt. 12-10]

PART 12—AMATEUR RADIO SERVICE

EXAMINATION CREDIT

In the matter of amendment of Part 12 of the Commission's rules concerning code examination credit for amateur operator license, § 12.46 (b).

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 14th day of April 1955;

The Commission having under consideration its amateur radio operator examination procedure; and

It appearing that amateur operator license applicants, except the Extra Class, have been given credit for the telegraph code element if within five years prior to receipt of application by the Commission applicant held a commercial radio telegraph first or second class operator license issued by the Commission; and

It further appearing that the code test for the commercial radiotelegraph third class operator permit is the same as that for commercial radiotelegraph second class operator license and, thus, holders of such authorization should be given equal code credit toward an amateur operator license; and

It further appearing because the proposed change concerns a matter of agency procedure, no notice of proposed rule making is required by section 4 (a) of the Administrative Procedure Act, and because the proposed change results in relief from certain procedural restrictions which can be to the detriment of no one, there is no requirement of publication or service for thirty days prior to its effective date pursuant to section 4 (c) of the Administrative Procedure Act;

It is ordered, Under the authority contained in sections 4 (i) and 303 (l) and (r) of the Communications Act of 1934, as amended, that effective immediately § 12.46 (b) of Part 12 of the Commission's rules governing Amateur Radio Service is amended as set forth below.

(Sec. 4, 48 Stat. 1066, as amended; 47 U. S. C. 154. Interprets or applies sec. 301, 48 Stat. 1081; 47 U. S. C. 301)

Released: April 14, 1955.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

§ 12.46 *Examination credit.* * * *

(b) An applicant for any class of amateur operator license, except the Extra Class, will be given credit for the telegraph code element if within five years prior to the receipt of his application by the Commission he held a commercial radiotelegraph operator license or permit issued by the Federal Communications Commission.

[F. R. Doc. 55-3239; Filed, Apr. 19, 1955; 8:51 a. m.]

PROPOSED RULE MAKING

DEPARTMENT OF THE TREASURY

Internal Revenue Service

[26 CFR (1954) Part 1]

INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

SPECIAL DEDUCTIONS FOR CORPORATIONS

Notice is hereby given, pursuant to the Administrative Procedure Act, approved June 11, 1946, that the regulations set forth in tentative form below are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury. Prior to the final adoption of such regulations, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing in duplicate to the Commissioner of Internal Revenue, Attention: T:P, Washington 25, D. C., within the period of 30 days from the date of publication of this notice in the FEDERAL REGISTER. The proposed regulations are to be issued under the authority contained in sections 247 (b) (2), 248 (a), and 7805 of the Internal Revenue Code of 1954 (68A Stat. 75, 76, 917; 26 U. S. C. 247 (b) (2), 248 (a), 7805).

[SEAL] T. COLEMAN ANDREWS,
Commissioner of Internal Revenue.

The following regulations are hereby promulgated under sections 241 through 248 of the Internal Revenue Code of 1954:

SPECIAL DEDUCTIONS FOR CORPORATIONS

§ 1.241 *Statutory provisions; allowance of special deductions.*

SEC. 241. *Allowance of special deductions.* In addition to the deductions provided in part VI (sec. 161 and following), there shall be allowed as deductions in computing taxable income the items specified in this part.

§1.241-1 *Allowance of special deductions.* A corporation, in computing its taxable income, is allowed as deductions the items specified in part VIII of subchapter B of chapter 1 (sections 242 through 248) in addition to the deductions provided in part VI (section 161 and following).

§ 1.242 *Statutory provisions; partially tax-exempt interest.*

SEC. 242. *Partially tax-exempt interest*—(a) *Allowance of deduction.* There shall be allowed to a corporation as a deduction the amount received as interest on obligations of the United States or on obligations of corporations organized under Act of Congress which are instrumentalities of the United States, but only if—

(1) Such interest is included in gross income; and

(2) Such interest is exempt from normal tax under the Act authorizing the issuance of such obligations.

(b) *Cross reference.* For reduction of deduction under subsection (a) on account of amortizable bond premium, see section 171.

§ 1.242-1 *Deduction for partially tax-exempt interest.* A corporation is allowed a deduction under section 242 (a) in an amount equal to certain interest received on obligations of the United States, or on obligations of corporations organized under acts of Congress which are instrumentalities of the United States. The interest for which a deduction shall be allowed is interest which is included in gross income and which is exempt from normal tax under the act, as amended and supplemented, which authorized the issuance of the obligations.

§ 1.243 *Statutory provisions; dividends received by corporations.*

SEC. 243. *Dividends received by corporations*—(a) *General rule.* In the case of a corporation, there shall be allowed as a deduction an amount equal to 85 percent of the amount received as dividends (other than dividends described in paragraph (1) of section 244, relating to dividends on the preferred stock of a public utility) from a domestic corporation which is subject to taxation under this chapter.

(b) *Special rules for certain distributions.* For purposes of subsection (a)—

(1) Any amount allowed as a deduction under section 591 (relating to deduction for dividends paid by mutual savings banks, etc.) shall not be treated as a dividend.

(2) A dividend received from a regulated investment company shall be subject to the limitations prescribed in section 854.

§ 1.243-1 *Deduction for dividends received by corporations.* (a) A corporation is allowed a deduction under section 243 (a) for dividends received from a domestic corporation which is subject to taxation under chapter 1 of the Internal Revenue Code of 1954. The deduction for a taxable year, except as provided in subsection (b) of section 243 and in section 246, is an amount equal to 85 percent of such dividends received by the corporation during the taxable year.

(b) The deduction allowed by section 243 shall be determined without regard to any dividends described in paragraph (1) of section 244 (relating to dividends on the preferred stock of a public utility). That is, such deduction shall be determined without regard to any dividends received on the preferred stock of a public utility which is subject to taxation under chapter 1 of the Internal Revenue Code of 1954 and with respect to which a deduction is allowed by section 247 (relating to dividends paid on certain preferred stock of public utilities). For a deduction with respect to such dividends received on the preferred stock of a public utility, see section 244. If a deduction for dividends paid is not allowable to the distributing corporation under section 247 with respect to the dividends on its preferred stock, such dividends received from a domestic public utility corporation subject to taxation under chapter 1 of the Internal Revenue Code of 1954 are includible in determining the deduction allowed by section 243 (a).

§ 1.243-2 *Special rules for certain distributions*—(a) *Dividends paid by mutual savings banks, etc.* In determining the deduction provided in section 243 (a), any amount allowed as a deduction under section 591 (relating to deduction for dividends paid by mutual savings banks, cooperative banks, and domestic building and loan associations) shall not be considered as a dividend.

(b) *Dividends received from regulated investment companies.* In determining the deduction provided in section 243 (a), dividends received from a regulated investment company shall be subject to the limitations provided in section 854.

§ 1.244 *Statutory provisions; dividends received on certain preferred stock.*

SEC. 244. *Dividends received on certain preferred stock.* In the case of a corporation, there shall be allowed as a deduction an amount computed as follows:

(1) First determine the amount received as dividends on the preferred stock of a public utility which is subject to taxation under this chapter and with respect to which the deduction provided in section 247 for dividends paid is allowable.

(2) Then multiply the amount determined under paragraph (1) by the fraction—

(A) The numerator of which is 14 percent, and

(B) The denominator of which is that percentage which equals the sum of the normal tax rate and the surtax rate for the taxable year prescribed by section 11.

(3) Finally ascertain the amount which is 85 percent of the excess of—

(A) The amount determined under paragraph (1), over

(B) The amount determined under paragraph (2).

§ 1.244-1 *Deduction for dividends received on certain preferred stock.* A corporation is allowed a deduction under section 244 for dividends received on certain preferred stock of certain public utility corporations subject to taxation under chapter 1 of the Internal Revenue Code of 1954. The deduction is allowable only for dividends received on the preferred stock of a public utility with respect to which the deduction for dividends paid provided in section 247 (relating to dividends paid on certain preferred stock of public utilities) is allowable to the distributing corporation.

§ 1.244-2 *Computation of deduction.* (a) Section 244 provides a specific rule for the computation of the deduction for dividends received on the preferred stock of a public utility. The deduction computed under section 244 is subject to the limitation provided in section 246.

(b) The computation of the deduction provided in section 244 may be illustrated by the following examples:

Example (1). Corporation A, which files its income tax returns on the calendar year basis, received in 1954 $100,000 as dividends on the preferred stock of Corporation B, a public utility corporation which is subject to taxation under chapter 1 of the Internal Revenue Code of 1954. The deduction provided in section 247 is allowable to Corporation B, the distributing corporation, with respect to these dividends. The corporation normal tax rate and the surtax rate for the calendar year 1954 are 30 percent and 22 percent, respectively. The deduction allowable to Corporation A under section 244 for the year 1954 with respect to these dividends is $62,115.38, computed as follows:

(i) Corporation A in the calendar year 1954 received $100,000 of dividends on the preferred stock of Corporation B, a public utility.

(ii) The sum of the corporation normal tax rate and the surtax rate for the calendar year 1954 is 52 percent (30 percent plus 22 percent). The fraction specified in section 244 (2) accordingly is $\frac{14}{52}$.

(iii) The amount of dividends received (subdivision (i)), $100,000, multiplied by the fraction determined under subdivision (ii), $\frac{14}{52}$, accordingly, is $26,923.08 ($\frac{14}{52}$ times $100,000).

(iv) The amount determined under subdivision (i) minus the amount determined under subdivision (iii) is $73,076.92 ($100,000 minus $26,923.08).

(v) The deduction allowable to Corporation A under section 244 for the calendar year 1954 is 85 percent of $73,076.92 (the amount determined under subdivision (iv)), or $62,115.38.

Example (2). Assume the facts are the same as in example (1) except that the year involved is a taxable year for which the corporation normal tax rate and the surtax rate are 25 percent and 22 percent, respectively. The deduction allowable to Corporation A under section 244 for the year 1956 is $59,680.85, computed as follows:

(i) Corporation A in the calendar year 1956 received $100,000 of dividends on the preferred stock of a public utility.

(ii) The sum of the corporation normal tax rate and surtax rate for the calendar year 1956 is 47 percent (25 percent plus 22 percent). The fraction specified in section 244 (2), accordingly, is $\frac{14}{47}$.

(iii) The amount of the dividends received (subdivision (i)), $100,000, multiplied by the fraction determined under subdivision (ii), $\frac{14}{47}$, accordingly, is $29,787.23.

(iv) The amount determined under subdivision (i) minus the amount determined under subdivision (iii) is $70,212.77 ($100,000 minus $29,787.23).

(v) The deduction allowable to Corporation A under section 244 for such taxable year is 85 percent of $70,212.77 (the amount determined under subdivision (iv)), or $59,680.85.

§ 1.245 *Statutory provisions; dividends received from certain foreign corporations.*

SEC. 245. *Dividends received from certain foreign corporations.* In the case of dividends received from a foreign corporation (other than a foreign personal holding company) which is subject to taxation under this chapter, if, for an uninterrupted period of not less than 36 months ending with the close of such foreign corporation's taxable year in which such dividends are paid (or, if the corporation has not been in existence for 36 months at the close of such taxable year, for the period the foreign corporation has been in existence as of the close of such taxable year) such foreign corporation has been engaged in trade or business within the United States and has derived 50 percent or more of its gross income from soures within the United States, there shall be allowed as a deduction in the case of a corporation—

(1) An amount equal to the percent (specified in section 243 for the taxable year) of the dividends received out of its earnings and profits specified in paragraph (2) of the first sentence of section 316 (a), but such amount shall not exceed an amount which bears the same ratio to such percent of such dividends received out of such earnings and profits as the gross income of such foreign corporation for the taxable year from sources within the United States bears to its gross income from all sources for such taxable year, and

(2) An amount equal to the percent (specified in section 243 for the taxable year) of the dividends received out of that part of its earnings and profits specified in paragraph (1) of the first sentence of section 316 (a) accumulated after the beginning of such uninterrupted period, but such amount shall not exceed an amount which bears the same ratio to such percent of such dividends received out of such accumulated earnings and profits as the gross income of such foreign corporation from sources within the United States for the portion of such uninterrupted period ending at the beginning of such taxable year bears to its gross income from all sources for such portion of such uninterrupted period.

§ 1.245–1 *Deduction for dividends received from certain foreign corporations.* (a) A corporation is allowed a deduction under section 245 for dividends received from a foreign corporation (other than a foreign personal holding company as defined in section 552) which is subject to taxation under chapter 1 of the Internal Revenue Code of 1954 if, for an uninterrupted period of not less than 36 months ending with the close of the foreign corporation's taxable year in which the dividends are paid, such foreign corporation has been engaged in trade or business within the United States and has derived 50 percent or more of its gross income from sources within the United States. If the foreign corporation has been in existence less than 36 months as of the close of the taxable year in which the dividends are paid, then the applicable uninterrupted period to be taken into consideration in lieu of the uninterrupted period of 36 or more months is the entire period such corporation has been in existence as of the close of such taxable year. An uninterrupted period which satisfies the twofold requirement with respect to business activity and gross income may start at a date later than the date on which the foreign corporation first commenced an uninterrupted period of engaging in trade or business within the United States, but the applicable uninterrupted period is in any event the longest uninterrupted period which satisfies such twofold requirement.

(b) The deduction provided in section 245 for a taxable year, except as provided in section 246, is the sum of the amounts computed under paragraphs (1) and (2) of section 245.

(c) The determination of earnings and profits distributed in any taxable year shall be made in accordance with the principles of section 316 (a) of the Internal Revenue Code of 1954. For the determination of the source of income, see part I of subchapter N of chapter 1 (sections 861 through 864) and the regulations thereunder.

(d) The application of section 245 may be illustrated by the following examples:

Example (1). Corporation A (a foreign corporation filing its income tax returns on a calendar year basis) whose stock is 100 percent owned by Corporation B (a domestic corporation filing its income tax returns on a calendar year basis) for the first time engaged in trade or business within the United States on January 1, 1943, and qualifies under section 245 for the entire period beginning on that date and ending on December 31, 1954. Corporation A had accumulated earnings and profits of $50,000 immediately prior to January 1, 1943, and had earnings and profits of $10,000 for each taxable year during the uninterrupted period from January 1, 1943, through December 31, 1954. It derived for the period from January 1, 1943, through December 31, 1953, 90 percent of its gross income from sources within the United States and in 1954 derived 95 percent of its gross income from sources within the United States. During the calendar years 1943, 1944, 1945, 1946, and 1947 Corporation A distributed in each year $15,000; during the calendar years 1948, 1949, 1950, 1951, 1952, and 1953 it distributed in each year $5,000; and during the year 1954, $50,000. For 1954 a deduction under section 245 of $31,025 for dividends received from a foreign corporation is allowable to Corporation B with respect to the $50,000 received from Corporation A, computed as follows:

(i) $8,075, which is $8,500 (85 percent—the percent specified in section 243 for the calendar year 1954—of the $10,000 of earnings and profits of the taxable year) multiplied by 95 percent (the portion of the gross income of Corporation A derived during the taxable year 1954 from sources within the United States), plus

(ii) $22,950, which is $25,500 (85 percent—the percent specified in section 243 for the calendar year 1954—of $30,000, the part of the earnings and profits accumulated after the beginning of the uninterrupted period) multiplied by 90 percent (the portion of the gross income of Corporation A derived from sources within the United States during that portion of the uninterrupted period ending at the beginning of the taxable year 1954).

Example (2). If in example (1) Corporation A for the taxable year 1954 had incurred a deficit of $10,000 (shown to have been incurred before December 31), and if it had distributed $50,000 on December 31, 1954, the deduction under section 245 for dividends received from a foreign corporation allowable to Corporation B for 1954 would be $15,300, computed by multiplying $17,000 (85 percent—the percent specified in section 243 for the calendar year 1954—of $20,000 earnings and profits accumulated after the beginning of the uninterrupted period) by 90 percent (the portion of the gross income of Corporation A derived from United States sources during that portion of the uninterrupted period ending at the beginning of the taxable year 1954).

§ 1.246 *Statutory provisions; rules applying to deductions for dividends received.*

SEC. 246. *Rules applying to deductions for dividends received*—(a) *Deduction not allowed for dividends from certain corporations.* The deductions allowed by sections 243, 244, and 245 shall not apply to any dividend from—

(1) A corporation organized under the China Trade Act, 1922 (see sec. 941); or

(2) A corporation which, for the taxable year of the corporation in which the distribution is made, or for the next preceding taxable year of the corporation, is—

(A) A corporation exempt from tax under section 501 (relating to certain charitable, etc., organizations) or section 521 (relating to farmers' cooperative associations); or

(B) A corporation to which section 931 (relating to income from sources within possessions of the United States) applies.

(b) *Limitation on aggregate amount of deductions*—(1) *General rule.* Except as provided in paragraph (2), the aggregate amount of the deductions allowed by sections 243, 244, and 245 shall not exceed 85 percent of the taxable income computed without regard to the deductions allowed by sections 172, 243, 244, 245, and 247.

(2) *Effect of net operating loss.* Paragraph (1) shall not apply for any taxable year for which there is a net operating loss (as determined under section 172).

§ 1.246–1 *Deductions not allowed for dividends from certain corporations.* The deductions provided in sections 243 (relating to dividends received by corporations), 244 (relating to dividends received on certain preferred stock), and 245 (relating to dividends received from certain foreign corporations), are not allowable with respect to any dividend received from:

(a) A corporation organized under the China Trade Act, 1922 (15 U. S. C. ch. 4) (see section 941); or

(b) A corporation which is exempt from tax under section 501 (relating to certain charitable, etc., organizations) or section 521 (relating to farmers' cooperative associations) for the taxable year of the corporation in which the distribution is made or for its next preceding taxable year; or

(c) A corporation to which section 931 (relating to income from sources within possessions of the United States) applies for the taxable year of the corporation in which the distribution is made or for its next preceding taxable year.

§ 1.246–2 *Limitation on aggregate amount of deductions.*—(a) *General rule.* The sum of the deductions allowed by sections 243 (relating to dividends received by corporations), 244 (relating to dividends received on certain preferred stock), and 245 (relating to dividends received from certain foreign corporations), except as provided in section 246 (b) (2) and in paragraph (b) of this section, is limited to 85 percent of the taxable income of the corporation. The taxable income of the corporation for this purpose is computed without regard to the net operating loss deduction allowed by section 172, the deduction for dividends paid on certain preferred stock of public utilities allowed by section 247, and the deductions provided in sections 243, 244, and 245. For definition of the term "taxable income", see section 63.

(b) *Effect of net operating loss.* If the shareholder corporation has a net operating loss (as determined under section 172) for a taxable year, the limitation provided in section 246 (b) (1) and in paragraph (a) of this section is not applicable for such taxable year. In that event, the deductions provided in sections 243, 244, and 245 shall be allowable for all tax purposes to the shareholder corporation for such taxable year without regard to such limitation. If the shareholder corporation does not have a net operating loss for the taxable year, however, the limitation will be applicable for all tax purposes for such taxable year. In determining whether the shareholder corporation has a net operating loss for a taxable year under section 172, the deductions allowed by sections 243, 244, and 245 are to be computed without regard to the limitation provided in section 246 (b) (1) and in paragraph (a) of this section.

§ 1.247 *Statutory provisions: dividends paid on certain preferred stock of public utilities.*

SEC. 247. *Dividends paid on certain preferred stock of public utilities*—(a) *Amount of deduction.* In the case of a public utility, there shall be allowed as a deduction an amount computed as follows:

(1) First determine the amount which is the lesser of—

(A) The amount of dividends paid during the taxable year on its preferred stock, or

(B) The taxable income for the taxable year (computed without the deduction allowed by this section).

(2) Then multiply the amount determined under paragraph (1) by the fraction—

(A) The numerator of which is 14 percent, and

(B) The denominator of which is that percentage which equals the sum of the normal tax rate and the surtax rate for the taxable year specified in section 11.

For purposes of the deduction provided in this section, the amount of dividends paid shall not include any amount distributed in the current taxable year with respect to dividends unpaid and accumulated in any taxable year ending before October 1, 1942. Amounts distributed in the current taxable year with respect to dividends unpaid and accumulated for a prior taxable year shall for purposes of this subsection be deemed to be distributed with respect to the earliest year or years for which there are dividends unpaid and accumulated.

(b) *Definitions.* For purposes of this section and section 244—

(1) *Public utility.* The term "public utility" means a corporation engaged in the furnishing of telephone service or in the sale of electrical energy, gas, or water, if the rates for such furnishing or sale, as the case may be, have been established or approved by a State or political subdivision thereof or by an agency or instrumentality of the United States or by a public utility or public service commission or other similar body of the District of Columbia or of any State or political subdivision thereof.

(2) *Preferred stock.* The term "preferred stock" means stock issued before October 1, 1942, which during the whole of the taxable year (or the part of the taxable year after its issue) was stock the dividends in respect of which were cumulative, limited to the same amount, and payable in preference to the payment of dividends on other stock. Stock issued on or after October 1, 1942, shall be deemed for purposes of this paragraph to have been issued before October 1, 1942, if it was issued (including issuance either by the same or another corporation in a transaction which is a reorganization (as defined in section 368 (a)), a transaction to which section 371 (relating to insolvency reorganizations) applies, or a transaction subject to part VI of subchapter O (relating to exchanges in SEC obedience orders), or the respectively corresponding provisions of the Internal Revenue Code of 1939) to refund or replace bonds or debentures issued before October 1, 1942, or to refund or replace other preferred stock (including stock which is preferred stock by reason of this sentence), but only to the extent that the par or stated value of the new stock does not exceed the par, stated, or face value of the bonds or debentures issued before October 1, 1942, or the other preferred stock, which such new stock is issued to refund or replace. The determination of whether stock was issued to refund or replace bonds or debentures issued before October 1, 1942, or to refund or replace other preferred stock, shall be made under regulations prescribed by the Secretary or his delegate.

§ 1.247–1 *Deduction for dividends paid on preferred stock of public utilities.*—(a) *Amount of deduction.* (1) A deduction is provided in section 247 for dividends paid during the taxable year by certain public utility corporations (see paragraph (b) of this section) on certain preferred stock (see paragraph (c) of this section). This deduction is an amount equal to the product of a specified fraction times the lesser of (i) the amount of the dividends paid during the taxable year by a public utility on its preferred stock or (ii) the taxable income of the public utility for such taxable year (computed without regard to the deduction allowed by section 247). The specified fraction for any taxable year is the fraction the numerator of which is 14 and the denominator of which is the sum of the corporation normal tax rate and the surtax rate for such taxable year specified in section 11. Since section 11 provides that for the calendar year 1954 the corporation normal tax rate is 30 percent and the surtax rate is 22 percent, the sum of the two tax rates is 52 percent and the specified fraction for the calendar year 1954 is $\frac{14}{52}$. If, for example, section 11 should specify that for the calendar year 1956 the corporation normal tax rate is 25 percent and the surtax rate is 22 percent, the sum of the two tax rates will be 47 percent and the specified fraction for the calendar year 1956 will be $\frac{14}{47}$. If Corporation A, a public utility which filed its income tax returns on the calendar year basis, pays $100,000 dividends on its preferred stock in each of the calendar years 1954 and 1956 and if its taxable income for each of these years is greater than $100,000, the deduction allowable to Corporation A under section 247 for 1954 is $100,000 times $\frac{14}{52}$, or $26,923.08, and for 1956 is $100,000 times $\frac{14}{47}$, or $29,787.23. If in 1954 Corporation A's taxable income, computed without regard to the deduction provided in section 247, had been $90,000 (that is, less than the amount of the dividends which it paid on its preferred stock in that year), the deduction allowable under section 247 for 1954 would have been $90,000 times $\frac{14}{52}$, or $24,230.77.

(2) For the purpose of determining the amount of the deduction provided in section 247 (a) and in subparagraph (1) of this paragraph, the amount of dividends paid in a given taxable year shall not include any amount distributed in such year with respect to dividends unpaid and accumulated in any taxable year ending before October 1, 1942. If any distribution is made in the current taxable year with respect to dividends unpaid and accumulated for a prior taxable year, such distribution will be deemed to have been made with respect to the earliest year or years for which there are dividends unpaid and accumulated. Thus, if a public utility makes a distribution with respect to a prior taxable year, it shall be considered that such distribution was made with respect to the earliest year or years for which there are dividends unpaid and accumulated, whether or not the public utility states that the distribution was made with respect to such year or years and even though the public utility states that the distribution was made with respect to a later year. Even though it has dividends unpaid and accumulated with respect to a taxable year ending before October 1, 1942, a public utility may, however, include the dividends paid with respect to the current taxable year in computing the deduction under section 247. If there are no dividends unpaid and accumulated with respect to a taxable year ending before October 1, 1942, a public utility may include the dividends paid with respect to a prior taxable year which ended after October 1, 1942, in computing the deduction under section 247; such public utility in addition may include the dividends paid with respect to the current taxable year in computing the deduction under section 247. However, if local law or its own charter requires a public utility to pay all unpaid and accumulated dividends before any dividends can be paid with respect to the current taxable year, such public utility may not include any distribution in the current year in computing the deduction under section 247 to the extent that there are dividends unpaid and accumulated with respect to taxable years ending before October 1, 1942.

(3) If a corporation which is engaged in one or more of the four types of business activities (called utility activities in this section) enumerated in section 247 (b) (1) (the furnishing of telephone service or the sale of electrical energy, gas, or water) is also engaged in some other business that does not fall within any of the enumerated categories, the deduction under section 247 is allowable only for such portion of the amount computed under section 247 (a) as is allocable to the income from utility activities. For this purpose, the allocation may be made on the basis of the ratio which the total income from the utility activities bears to total income from all sources (total income being considered either gross income or gross receipts, whichever method results in the higher deduction). However, if such an allocation reaches an inequitable result and the books of the corporation are so kept that the taxable income attribut-

able to the utility activities can be readily determined, particularly where the books of the corporation are required by governmental bodies to be so kept for rate making or other purposes, the allocation may be made upon the basis of taxable income. No such apportionment will be required if the income from sources other than utility activities is less than 20 percent of the total income of the corporation, irrespective of the method used in determining such total income.

(b) *Public utility.* As used in section 247 and this section, public utility means a corporation engaged in the furnishing of telephone service, or in the sale of electric energy, gas, or water if the rates charged by such corporation for such furnishing or sale, as the case may be, have been established or approved by a State or political subdivision thereof or by an agency or instrumentality of the United States or by a public utility or public service commission or other similar body of the District of Columbia or of any State or political subdivision thereof. If a schedule of rates has been filed with any of the above bodies having the power to disapprove such rates, then such rates shall be considered as established or approved rates even though such body has taken no action on the filed schedule. Rates fixed by contract between the corporation and the purchaser, except where the purchaser is the United States, a State, the District of Columbia, or an agency or political subdivision of the United States, a State, or the District of Columbia, shall not be considered as established or approved rates in those cases where they are not subject to direct control, or where no maximum rate for such contract rates has been established by the United States, a State, the District of Columbia, or by an agency or political subdivision thereof. The deduction provided in section 247 will not be denied solely because part of the gross income of the corporation consists of revenue derived from such furnishing or sale at rates which are not so regulated, provided the corporation establishes to the satisfaction of the Commissioner (1) that the revenue from regulated rates and the revenue from unregulated rates are derived from the operation of a single interconnected and coordinated system within a single area or region in one or more States and (2) that the regulation to which it is subject in part of its operating territory is effective to control rates within the unregulated territory so that the rates within the unregulated territory have been and are substantially as favorable to users and consumers as are the rates within the regulated territory.

(c) *Preferred stock.* (1) For the purposes of section 247 and this section, preferred stock means stock (i) which was issued before October 1, 1942, (ii) the dividends in respect of which (during the whole of the taxable year, or the part of the taxable year after the actual date of the issue of such stock) were cumulative, nonparticipating as to current distributions, and payable in preference to the payment of dividends on other stock, and (iii) the rate of return on which is fixed and cannot be changed by a vote of the board of directors or by some similar method. However, if there are several classes of preferred stock, all of which meet the above requirements, the deduction provided in section 247 shall not be denied in the case of a given class of preferred stock merely because there is another class of preferred stock whose dividends are to be paid before those of the given class of stock. Likewise, it is immaterial for the purposes of section 247 and this section whether the stock be voting or nonvoting stock.

(2) Stock issued on or after October 1, 1942, under certain circumstances will be considered as having been issued before October 1, 1942, for purposes of the deduction provided in section 247. If the new stock is issued on or after October 1, 1942, to refund or replace bonds or debentures which were issued before October 1, 1942, or to refund or replace other stock which was preferred stock within the meaning of section 247 (b) (2) (or the corresponding provision of the Internal Revenue Code of 1939), such new stock shall be considered as having been issued before October 1, 1942. If stock is issued to refund or replace stock which was preferred stock within the meaning of section 247 (b) (2) (or the corresponding provision of the Internal Revenue Code of 1939), it shall be immaterial whether the preferred stock so refunded or replaced was issued before, on, or after October 1, 1942. If stock issued on or after October 1, 1942, to refund or replace stock which was issued before October 1, 1942, and which was preferred stock within the meaning of section 247 (b) (2) (or the corresponding provision of the Internal Revenue Code of 1939), is not itself preferred stock within the meaning of section 247 (b) (2) (or the corresponding provision of the Internal Revenue Code of 1939), no stock issued to refund or replace such stock can be considered preferred stock for purposes of the deduction provided in section 247.

(3) In the case of any stock issued on or after October 1, 1942, to refund or replace bonds or debentures issued before October 1, 1942, or to refund or replace other stock which was preferred stock within the meaning of section 247 (b) (2) (or the corresponding provision of the Internal Revenue Code of 1939), only that portion of the stock issued on or after October 1, 1942, will be considered as having been issued before October 1, 1942, the par or stated value of which does not exceed the par, stated, or face value of such bonds, debentures, or other preferred stock which the new stock was issued to refund or replace. In such case no shares of the new stock issued on or after October 1, 1942, shall be earmarked in determining the deduction allowable under section 247, but the appropriate allocable portion of the total amount of dividends paid on such stock will be considered as having been paid on stock which was issued before October 1, 1942.

(4) The provisions of section 247 (b) (2) may be illustrated by the following example:

Example. A public utility has outstanding 1,000 bonds which were issued before October 1, 1942, and each of which has a face value of $100. On or after October 1, 1942, each of such bonds is retired in exchange for $1\frac{1}{10}$ shares of stock issued on or after October 1, 1942, and having a par value of $100 per share. Only $\frac{10}{11}$ of the dividends paid on the stock thus issued in exchange for the bonds will be considered as having been paid on stock which was issued before October 1, 1942. Likewise, if stock which is issued on or after October 1, 1942, has no par value but a stated value of $50 per share and such stock is issued in a ratio of three shares to one share to refund or replace preferred stock having a par value of $100 per share, only two-thirds of the dividends paid on the new shares of stock will be considered as having been paid on stock which was issued before October 1, 1942.

(5) Whether or not stock issued on or after October 1, 1942, was issued to refund or replace bonds or debentures issued before October 1, 1942, or to refund or replace other preferred stock, is in each case a question of fact. Among the factors to be considered is whether such stock is new in an economic sense to the corporation or whether it was issued merely to take the place, directly or indirectly, of bonds, debentures, or other preferred stock of such corporation. It is not necessary that the new stock be issued in exchange for such bonds, debentures, or other preferred stock. The mere fact that the bonds, debentures, or other preferred stock remain in existence for a short period of time after the issuance of the new stock (or were retired before the issuance of the new stock) does not necessarily mean that such new stock was not issued to refund or replace such bonds, debentures, or other preferred stock. It is necessary to consider the entire transaction, including the issuance of the new stock, the date of such issuance, the retirement of the old bonds, debentures, or preferred stock, and the date of such retirement, in order to determine whether such new stock really was issued to take the place of bonds, debentures, or other preferred stock of the corporation or whether it represents something essentially new in an economic sense in the corporation's financial structure. If, for example, a public utility, which has outstanding bonds issued before October 1, 1942, issues new stock on October 1, 1954, in order to secure funds with which to retire such bonds and with the money paid in for such stock retires the bonds on November 1, 1954, such stock may be considered as having been issued to refund or replace bonds issued before October 1, 1942. Whether the money used to retire the bonds can be traced back and identified as the money paid in for the stock will have evidentiary value, but will not be conclusive, in determining whether the stock was issued to refund or replace the bonds. Similarly, whether the amount of money used to retire the bonds was smaller than, equal to, or greater than that paid in for the stock, or whether the entire issue of bonds is retired, will be important, but not decisive, in making such determination.

(6) Stock issued on or after October 1, 1942, by a corporation to refund or replace bonds or debentures of a second corporation which were issued before October 1, 1942, or to refund or replace other preferred stock of such second corporation, may be considered as having been issued before October 1, 1942, if such new stock was issued (i) in a transaction which is a reorganization within the meaning of section 368 (a) or the corresponding provisons of the Internal Revenue Code of 1939; or (ii) in a transaction to which section 371 (relating to insolvency reorganizations), or the corresponding provisions of the Internal Revenue Code of 1939, is applicable; or (iii) in a transaction which is subject to the provisions of part VI of subchapter O (relating to exchanges and distributions in obedience to orders of the Securities and Exchange Commission) or to the corresponding provisions of the Internal Revenue Code of 1939. Whether the stock actually was issued to refund or replace bonds or debentures of the second corporation issued before October 1, 1942, or to refund or replace preferred stock of such second corporation, shall be determined under the same principles as if only one corporation were involved. A corporation may issue stock to refund or replace its own bonds, debentures, or other preferred stock in a transaction which is a reorganization within the meaning of section 368 (a) or the corresponding provisions of the Internal Revenue Code of 1939, in a transaction to which section 371 or the corresponding provisions of the Internal Revenue Code of 1939 is applicable, or in a transaction which is subject to the provisions of part VI of subchapter O or to the corresponding provisions of the Internal Revenue Code of 1939. The provisions of this paragraph, in addition, are applicable in case a corporation issues stock on or after October 1, 1942, to refund or replace its own bonds, debentures, or other preferred stock even though the issuance of such stock may not fall within one of the categories enumerated above.

(7) Even though stock issued on or after October 1, 1942, is considered as having been issued before October 1, 1942, by reason of having been issued to refund or replace bonds or debentures issued before October 1, 1942, or to refund or replace other preferred stock, such stock will not be deemed to be preferred stock within the meaning of section 247 (b) (2), and no deduction will be allowable in respect of dividends paid on such stock, unless the stock fulfills all the other requirements of a preferred stock set forth in section 247 (b) (2) and in this paragraph.

§ 1.248 *Statutory provisions; organizational expenditures.*

SEC. 248. *Organizational expenditures*—(a) *Election to amortize.* The organizational expenditures of a corporation may, at the election of the corporation (made in accordance with regulations prescribed by the Secretary or his delegate), be treated as deferred expenses. In computing taxable income, such deferred expenses shall be allowed as a deduction ratably over such period of not less than 60 months as may be selected by the corporation (beginning with the month in which the corporation begins business).

(b) *Organizational expenditures defined.* The term "organizational expenditures" means any expenditure which—

(1) Is incident to the creation of the corporation;

(2) Is chargeable to capital account; and

(3) Is of a character which, if expended incident to the creation of a corporation having a limited life, would be amortizable over such life.

(c) *Time for and scope of election.* The election provided by subsection (a) may be made for any taxable year beginning after December 31, 1953, but only if made not later than the time prescribed by law for filing the return for such taxable year (including extensions thereof). The period so elected shall be adhered to in computing the taxable income of the corporation for the taxable year for which the election is made and all subsequent taxable years. The election shall apply only with respect to expenditures paid or incurred on or after the date of enactment of this title.

§ 1.248–1 *Election to amortize organizational expenditures.*—(a) *In general.* (1) Section 248 (a) provides that a corporation may elect for any taxable year beginning after December 31, 1953, to treat its organizational expenditures, as defined in subsection (b) of section 248 and in paragraph (b) of this section, as deferred expenses. A corporation which exercises such election must, at the time it makes the election, select a period of not less than 60 months, beginning with the month in which it began business, over which it will amortize its organizational expenditures. The period selected by the corporation may be equal to or greater, but not less, than 60 months, but in any event it must begin with the month in which the corporation began business. The organizational expenditures of the corporation which are treated as deferred expenses under the provisions of section 248 and this section shall then be allowed as a deduction in computing taxable income ratably over the period selected by the taxpayer. The period selected by the taxpayer in making its election may not be subsequently changed but shall be adhered to in computing taxable income for the taxable year for which the election is made and all subsequent taxable years.

(2) If a corporation exercises the election provided in section 248 (a), such election shall apply to all of its expenditures which are organizational expenditures within the meaning of subsection (b) of section 248 and paragraph (b) of this section. The election shall apply, however, only with respect to expenditures paid or incurred on or after August 16, 1954 (the date of enactment of the Internal Revenue Code of 1954) and before the end of the month in which the corporation begins business.

(3) The deduction allowed under section 248 must be spread over a period beginning with the month in which the corporation begins business. The determination of the date the corporation begins business presents a question of fact which must be determined in each case in light of all the circumstances of the particular case. The words "begins business," however, do not have the same meaning as "in existence." Ordinarily, a corporation begins business when it starts the business operations for which it was organized; a corporation comes into existence on the date of its incorporation. Mere organizational activities, such as the obtaining of the corporate charter, are not alone sufficient to show the beginning of business. If the activities of the corporation have advanced to the extent necessary to establish the nature of its business operations, however, it will be deemed to have begun business. For example, the acquisition of operating assets which are necessary to the type of business contemplated may constitute the beginning of business.

(b) *Organizational expenditures defined.* (1) Section 248 (b) defines the term "organizational expenditures." Such expenditures, for purposes of section 248 and this section, are those expenditures which are directly incident to the creation of the corporation. An expenditure, in order to qualify as an organizational expenditure, must be (i) incident to the creation of the corporation, (ii) chargeable to the capital account of the corporation, and (iii) of a character which, if expended incident to the creation of a corporation having a limited life, would be amortizable over such life. An expenditure which fails to meet each of these three tests may not be considered an organizational expenditure for purposes of section 248 and this section.

(2) Examples of organizational expenditures are expenditures for legal and accounting services to obtain the corporate charter, fees paid to the State of incorporation, and expenses of temporary directors of the corporation.

(3) The following expenditures are not organizational expenditures within the meaning of section 248 and this section:

(i) Expenditures connected with issuing or selling shares of stock or other securities, such as commissions, professional fees, and printing costs. This is so even where the particular issue of stock to which the expenditures relate is for a fixed term of years;

(ii) Expenditures connected with the transfer of assets to a corporation.

(4) Expenditures connected with the reorganization of a corporation, unless directly incident to the creation of a corporation, are not organizational expenditures within the meaning of section 248 and this section.

(c) *Time and manner of making election.* The election provided by section 248 (a) and paragraph (a) of this section shall be made in a statement attached to the taxpayer's return for the taxable year in which it begins business. Such taxable year must be one which begins after December 31, 1953. The return and statement must be filed not later than the date prescribed by law for filing the return (including any extensions of time) for the taxable year in which the taxpayer begins business. The statement shall set forth the description and amount of the expenditures involved, the date such expenditures were incurred or paid, the month in which the corporation began business, and the number of months (not less than 60 and beginning with the month in which the taxpayer began business) over which such expenditures are to be deducted ratably.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Parts 2, 3]

[Docket No. 11296; FCC 55-477]

CLASS B FM BROADCAST STATIONS

REVISED TENTATIVE ALLOCATION PLAN

In the matter of amendment of the Revised Tentative Allocation Plan for Class B FM Broadcast Stations; Docket No. 11296.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 14th day of April 1955;

The Commission having under consideration a proposal to amend the Revised Tentative Allocation Plan for Class B FM Broadcast Stations; and

It appearing that notice of proposed rule making (FCC 55-267) setting forth the above amendment was issued by the Commission on March 4, 1955, and was duly published in the FEDERAL REGISTER (20 F. R. 1410), which notice provided that interested parties might file statements or briefs with respect to the said amendment on or before April 1, 1955; and

It further appearing that the only comment received favored adoption of the proposed reallocation;

It further appearing that the immediate adoption of the proposed reallocation would facilitate consideration of a pending application requesting a Class B assignment in Mountain Park, New Mexico;

It further appearing that authority for the adoption of the proposed amendment is contained in sections 4 (i), 301, 303 (c), (d), (f), and (r), and 307 (b) of the Communications Act of 1934, as amended;

It is ordered, That effective immediately, the Revised Tentative Allocation Plan for Class B FM Broadcast Stations is amended as follows in respect to the city of Mountain Park, New Mexico:

General area	Channels	
	Delete	Add
Mountain Park, N. Mex.		250

Released: April 14, 1955.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

[47 CFR Part 8]

[Docket No. 11365; FCC 55-469]

STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

SHIP RADIOTELEGRAPH STATIONS

In the matter of amendment of Part 8 of the Commission's rules for the purpose of reflecting changes in law and treaty, principally with respect to compulsorily installed ship radiotelegraph stations; Docket No. 11365.

1. Notice is hereby given of proposed rule making in the above-entitled matter. The rules proposed to be adopted are set forth below.

2. The need for the proposed amendments arises primarily from changes in ship radio requirements contained in amendments to the Communications Act on August 13, 1954, by Public Law No. 584, 83d Congress. Minor amendments stemming from Public Law No. 590, 83d Congress, and the Safety of Life at Sea Convention (London, 1948) are also included. Public Law No. 584 contained statutory amendments implementing radio provisions of the International Convention for the Safety of Life at Sea. Rule making proceedings with respect to radiotelephone installations required under this law have already been instituted, Docket No. 11265. Therefore, the rules proposed herein deal primarily with radiotelegraph installations. Public Law No. 590, in addition to repealing the Ship Act of 1910, contains provisions to assist the Commission in administering the Agreement for the Promotion of Safety on the Great Lakes by Means of Radio.

3. Primarily the rules proposed herein would accomplish the following:

(a) Change definitions and references in Part 8 of the rules to make them current with respect to changes in radio treaties and the Communications Act.

(b) Reflect changes in the act regarding administrative matters, such as those provisions of the Communications Act whereby the Commission issues certain Safety Convention Certificates formerly issued by the Coast Guard, and the provisions of section 4 (f) (3) of the act regarding compensation of Commission Engineers for overtime work performed in connection with ship inspections.

(c) Provide operator and watch requirements applicable to compulsory radiotelegraph equipped ships between 500 and 1600 gross tons, and also change operator and watch requirements for United States ships subject only to the Safety Convention to make such requirements consistent with those of the Convention.

(d) Make radiotelegraph installation requirements the same for United States ships subject solely to Title III, Part II of the act as for United States ships subject to both Title III, Part II of the act and the Safety Convention. Thus, uniformity of radiotelegraph requirements is achieved with respect to vessels navigated in the open sea only and those navigated in the open sea on international voyages. This would be accomplished by the deletion of Subpart U of Part 8 of the rules and inclusion of the requirements contained therein in other Subparts of Part 8, principally in Subpart R.

(e) Make various editorial changes. These are included in the proposed rule making at this time for purposes of completeness.

4. These proposed amendments are issued under the authority contained in section 303 (n) and (r) and Title III, Part II of the Communications Act of 1934, as amended.

5. Any interested person who is of the opinion that the proposed amendments should not be adopted, or should not be adopted in the form set forth herein, and any person desiring to support this proposal may file with the Commission on or before May 23, 1955, a written statement or brief setting forth his comments. Replies to such comments may be filed within ten days from the last day for filing original comments. The Commission will consider all comments and briefs presented before taking final action in this matter.

6. In accordance with the provisions of § 1.764 of the Commission's rules, an original and fourteen copies of all statements, briefs or comments filed shall be furnished the Commission.

Adopted: April 14, 1955.

Released: April 14, 1955.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

1. Section 8.2 is amended as follows:

a. Delete § 8.2 (b) (2) defining Ship Act and substitute therefor:

(2) [Reserved.]

b. Delete § 8.2 (p) (3) and substitute the following therefor:

(3) *Safety Radiotelegraphy Certificate.* A certificate issued upon application, after inspection by proper authorities, to a cargo ship which complies in an efficient manner with the Safety Convention radio requirements applicable to cargo ships carrying radiotelegraph installations for the purpose of meeting such requirements.

c. Add a new § 8.2 (p) (4) as follows:

(4) *Safety radiotelephony certificate.* A certificate issued upon application, after inspection by proper authorities, to a cargo ship which complies in an efficient manner with the Safety Convention radio requirements applicable to cargo ships carrying radiotelephone installations for the purpose of meeting such requirements.

2. Section 8.47 is amended to read as follows:

§ 8.47 *Application for certificate of compliance with Safety Convention.* Whenever a Safety Certificate, Safety Radiotelegraphy Certificate or Safety Radiotelephony Certificate or a modification or renewal thereof, is required by reason of the applicability to a ship of the radio provisions of the Safety Convention, an application, FCC Form 801, "Application for Ship Radio Inspection", for a required inspection of the radio installation on board and issuance of a Safety Radiotelegraphy or Safety Radiotelephony Certificate, or, in the case of a Safety Certificate, certification of the results of such inspection to the United States Coast Guard for issuance of such certificate, shall be filed with the Commission's engineer in charge at the radio district office nearest the desired port of inspection at least 3 days prior to the date on which such inspection is desired. A service representative of the ship station licensee and (unless otherwise notified by the Commission's representative) sufficient personnel to lower and raise antennas and to launch any required radio-equipped lifeboats shall be available at the ship at the time inspection is to be conducted. In the case of radiotelegraph installations, the service representative shall hold at least a radiotelegraph 2d class operator license. In the case of radiotelephone installations, the service representative shall hold a 2d or higher class of operator license, either radiotelephone or radiotelegraph. Such application shall be filed by the shipowner, the ship operating agency, the ship station licensee, or the shipmaster; and, when appropriate, may be combined with the application for annual inspection prescribed by § 8.46.

3. a. That part of § 8.48 preceding paragraph (a) thereof is amended to read as follows:

§ 8.48 *Extra compensation for overtime services by engineers in charge and radio engineers.* Pursuant to section 4 (f) (3) of the Communications Act, engineers in charge and radio engineers of the Field Engineering and Monitoring Bureau of the Federal Communications Commission, who may be required to remain on duty to perform services in connection with the inspection of ship radio equipment and apparatus for the purposes of Part II of Title III of the Act or the Great Lakes Agreement at night or on Sundays and holidays, shall receive extra compensation, to be paid by the master, owner, or agent of the vessel, under the following regulations:

b. Paragraphs (a), (b), (c), (f) and (j) of § 8.48 are amended by striking out the word "inspector" or "inspectors" wherever it appears therein and inserting in lieu thereof the word "engineer" or "engineers", as appropriate.

4. Section 8.152 is amended as follows: Amend paragraphs (b) and (c) to read as follows:

(b) Each cargo ship of the United States required by Part II of Title III of the Communications Act to be fitted with a radiotelegraph installation and not exempted therefrom by the Commission, which is not fitted with an autoalarm, and each passenger ship required by that statutory provision to be fitted with a radiotelegraph installation and not exempted therefrom by the Commission, shall, for safety purposes, carry at least two qualified operators.

(c) Each cargo ship of the United States required by Part II of Title III of the Communications Act to be fitted with a radiotelegraph installation and not exempted therefrom by the Commission, which is fitted with an autoalarm in accordance with that statutory provision, shall, for safety purposes, carry at least one qualified operator who shall have had at least six months previous service in the aggregate as a qualified operator in a station on board a ship or ships of the United States.

5. Section 8.153 (a) is amended to read as follows and the Note immediately following the section is deleted:

§ 8.153 *Operator required by Safety Convention.* (a) Each ship of the United States which is not subject to Part II of Title III of the Communications Act but which is required by the radio provisions of the Safety Convention to be fitted with a radiotelegraph installation, which has not been exempted therefrom by the Commission, shall, for safety purposes, carry at least the number of qualified operators specified in subparagraphs (1) and (2) of this paragraph. A qualified operator for this purpose is a person holding an operator's license issued by the Commission which is appropriate for the pur-

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[P. & S. Docket No. 1246]

ST. LOUIS NATIONAL STOCKYARDS CO.

NOTICE OF PETITION FOR MODIFICATION OF RATE ORDER

Pursuant to the provisions of the Packers and Stockyards Act, 1921, as amended (7 U. S. C. 181 et seq.), an order was issued on May 12, 1953 (12 A. D. 468), authorizing assessment of the current schedule of rates and charges to and including June 30, 1955, unless changed by further order before the latter date.

On April 4, 1955, respondent, by its attorney, filed a petition requesting authority to make certain modifications in its schedule of rates and charges and that assessment of the modified schedule be authorized to and including June 30, 1957. The proposed modifications are as indicated below.

1. To change the yardage charges on livestock as follows:

YARDAGE CHARGES

	Rate per head	
	Present	Proposed
A. Livestock sold or resold in the Commission Division:		
Cattle (except bulls weighing 800 pounds or over)	$0.81	$0.82
Calves	.47	.48
Hogs	.29	.30
Sheep and goats	.18	.18
Bulls weighing 800 pounds or over	1.25	1.35
B. Livestock received directly by packers from the yards:		
Cattle (except bulls weighing 800 pounds or over)	.41	.41
Calves	.24	.24
Hogs	.15	.15
Sheep and goats	.09	.09
Bulls weighing 800 pounds or over	.63	.63
C. Livestock sold at the yards for local delivery other than livestock resold in the Commission Division:		
Cattle (except bulls weighing 800 pounds or over)	.18	.23
Calves	.12	.15
Hogs	.06	.08
Sheep and goats	.04	.05
Bulls weighing 800 pounds or over	.24	.34
D. Livestock sold at the yards for shipment off the market other than livestock resold in the Commission Division:		
Cattle (except bulls weighing 800 pounds or over)	.08	.10
Calves	.05	.07
Hogs	.03	.04
Sheep and goats	.03	.03
Bulls weighing 800 pounds or over	.11	.16

2. To change the charges for use of covered pens as follows:

COVERED PEN CHARGES

	Rate per pen	
	Present	Proposed
Daily charge	$2.00	$2.00
Monthly charge	10.00	20.00
Yearly charge	100.00	200.00

3. To change the feed charges as follows:

FEED CHARGES

	Present	Proposed
Cost f. o. b. stockyards plus:		
Hay, per hundredweight	$0.60	$0.65
Corn, per bushel	.50	.55

4. To include in the schedule of rates and charges a definition of the term "yardage" as follows:

Definition of Yardage. The term "yardage", as used in the above schedule, shall cover the use of basic stockyard facilities and services furnished by this company and shall only include the following: The use of suitable facilities for the safe and expeditious receiving, handling, feeding, watering, holding, sorting, selling, buying, weighing, delivery, and shipment of livestock; the services necessary and incident to the receiving of livestock at the place of unloading; the furnishing of receipts for livestock to the truck carrier or consignor; the delivery of livestock from rail chutes to commission firm pens; the furnishing of sufficient potable water for livestock; the initial weighing of livestock when sold and delivered to scales; the issuance of scale tickets showing actual weight and other pertinent information concerning the livestock weighed; the removal of livestock after weighing and delivery to holding pens; the holding of livestock for a reasonable time pending delivery or shipment to buyers; the delivery of livestock to buyers at holding pens; and the obtaining of receipts for livestock delivered to buyers. Consignors, market agencies, dealers, packers, buyers, or other users of stockyard facilities and services requiring special facilities or services in addition to the basic facilities and services enumerated above as "yardage", may be required to pay a reasonable charge for such special facilities and services in addition to basic "yardage" charges.

The modifications, if authorized, will produce additional revenue for the respondent and increase the cost of marketing livestock. Accordingly, it appears that this public notice should be given of the filing of the petition and its contents in order that all interested persons may have an opportunity to be heard in the matter.

All interested persons who wish to be heard in the matter shall notify the Hearing Clerk, United States Department of Agriculture, Washington, D. C., within 15 days after the publication of this notice.

Done at Washington, D. C., this 14th day of April 1955.

[SEAL] H. E. REED,
Director, Livestock Division, Agricultural Marketing Service.

[F. R. Doc. 55-3217; Filed, Apr. 19, 1955; 8:47 a. m.]

pose under the provisions of Part 13 of this chapter.

(1) If fitted with an auto-alarm in proper operating condition at least one qualified operator shall be carried, except that at least two qualified operators shall be carried in the case of a passenger ship carrying or certificated to carry more than 250 passengers and engaged on a voyage exceeding 16 hours duration between two consecutive ports.

(2) If not fitted with an auto-alarm at least two qualified operators shall be carried.

6. Section 8.203 is amended to read:

§ 8.203 *Watch required by Safety Convention.* This section is applicable to ships of the United States subject to the radio provisions of the Safety Convention but not at the same time subject to the provisions of Part II of Title III of the Communications Act (for example, certain ships engaged on an international voyage, no part of which is in the open sea).

(a) Each passenger ship of the United States required by the Safety Convention to be fitted with a radiotelegraph installation shall, while at sea, keep continuously an efficient watch on the international distress frequency 500 kc by means of qualified operators, if not fitted with an auto-alarm. If fitted with an auto-alarm, such watch shall be kept while at sea as follows:

(1) If carrying or certificated to carry 250 passengers or less, at least 8 hours watch a day in the aggregate.

(2) If carrying or certificated to carry more than 250 passengers and engaged on a voyage exceeding 16 hours duration between two consecutive ports, at least 16 hours watch a day in the aggregate.

(3) If carrying or certificated to carry more than 250 passengers and engaged on a voyage of less than 16 hours duration between two consecutive ports, at least 8 hours watch a day in the aggregate.

(b) Each cargo ship of the United States of 500 gross tons or more fitted with a radiotelegraph installation for the purpose of complying with the Safety Convention and not exempt therefrom by the Commission shall, while at sea, keep continuously an efficient watch on the international calling and distress frequency 500 kc by means of a qualified radio-telegraph operator, if not fitted with an auto-alarm. If fitted with an auto-alarm, such watch shall be kept by such ships for at least eight hours per day, in the aggregate.

(c) In keeping the watch prescribed in paragraphs (a) and (b) of this section, operators shall be subject to the conditions and limitations prescribed in § 8.204.

(d) Each cargo ship of the United States required by the Safety Convention to be fitted with a radiotelephone installation and not exempt therefrom by the Commission, shall, for safety purposes, while at sea, keep a continuous watch on the radiotelephone calling and distress frequency in the manner prescribed by § 8.202 (c).

7. Section 8.204 (a) is amended to read:

§ 8.204 *Provisions governing safety watch.* (a) For the purpose of maintaining the radiotelegraph watches prescribed in §§ 8.202 and 8.203, the operator shall use an effectively operating main or emergency radio receiver complying with the applicable requirements of § 8.503 or § 8.504, respectively, and either a head receiver or a loudspeaker complying with the applicable requirements of § 8.503 or § 8.504, respectively, on condition that use of the loudspeaker is not less effective than use of the head receiver.

8. Section 8.262 is amended as follows:

a. Amend paragraph (a) (1) to read as follows:

(1) A cargo ship of less than 500 gross tons;

b. Amend paragraph (a) (3) to read as follows:

(3) A foreign ship belonging to a country which is a party to any Safety Convention in force between the United States and that country which ship carries a valid certificate exempting said ship from the radio provisions of that Convention, or which ship conforms to the radio requirements of such Convention or regulations and has on board a valid certificate to that effect, or which ship is not subject to the radio provisions of any such Convention.

9. Section 8.330 is amended as follows: Add new subparagraphs (7), (8) and (9) to paragraph (b) as follows:

(7) A daily entry shall be made while the ship is at sea showing whether the storage batteries forming part of the main installation or the emergency installation were brought up to the normal full charged condition that day.

(8) Entries shall be made stating when each storage battery used as the power supply for the main and emergency installations is placed on charge or off charge.

(9) Entries shall be made stating details of maintenance of lifeboat radio equipment, including a record of charging of any storage batteries supplying power to such equipment. The record of charging shall show when such storage battery is placed on charge and when it is taken off charge.

10. Immediately following the title of Subpart R of Part 8 delete the subtitle reading "Radio Installations on Ships Subject to Part II of Title II of the Communications Act".

11. Section 8.501 is amended to read as follows:

§ 8.501 *Inspection of installation.* (a) In accordance with § 8.101 (a) and pursuant to section 362 of the Communications Act, every ship of the United States, subject to Part II of Title III of the Communications Act, shall have the equipment and apparatus prescribed therein, inspected at least once each year by the Commission. The issuance of an appropriate certificate (see section 361 of the Communications Act) in behalf of any vessel of the United States concerning the radio particulars provided for in the Safety Convention is subject to a finding by the Commission that such vessel complies in an efficient manner with the applicable radio and communication provisions of that Convention or that, pursuant to the provisions of the Safety Convention, such vessel is exempt from those provisions of that Convention. The issuance date of Safety Radiotelegraphy and Safety Radio telephony certificates issued by the Commission shall be the date the installation is found to be in compliance or not later than one business day following such in-compliance date.

(b) In accordance with the Safety Convention, every ship of the United States holding a Safety Certificate, Safety Radiotelegraphy Certificate, Safety Radiotelephony Certificate or Exemption Certificate is subject when in a port of a foreign country which is a party to the Safety Convention, to control by officers duly authorized by the government of that country, insofar as that control is directed towards verifying that there is on board a valid Convention certificate and, if necessary, that the conditions of the vessel's seaworthiness correspond substantially with the particulars of that certificate.

(c) The privileges of the Convention may not be claimed in favor of any ship unless it holds appropriate valid certificates. In the event of control giving rise to intervention of any kind in a foreign port, the officer carrying out the control is required to notify the United States Consul in writing forthwith of all the circumstances in which intervention was deemed to be necessary.

(d) In accordance with the Safety Convention, Safety Certificates, Safety Radiotelegraphy Certificates and Safety Radiotelephony Certificates are required to be posted in a permanent and accessible place in the ship.

12. Immediately following § 8.501 insert the following centerhead: "Radiotelegraph Installations on Ships Subject to Part II of Title III of the Communications Act or on U. S. Ships Subject to the Safety Convention."

13. Section 8.502 is amended as follows:

a. Delete subparagraph (5) of paragraph (a) and substitute the following:

(5) A main antenna and a separate emergency antenna shall be installed: *Provided, however,* That a cargo ship the keel of which was laid prior to June 1, 1954, may be equipped with either an emergency antenna meeting the requirements of § 8.504 (a) (2) or with a spare antenna, consisting of a single wire transmitting antenna (including suitable insulators) of the same linear dimensions as the main transmitting antenna, completely assembled for immediate replacement.

b. Delete paragraph (b) of § 8.502 and the Note immediately following it and substitute the following:

(b) Whenever a main installation only is provided on board a cargo vessel in accordance with the terms of paragraph (a) of section 355 of the Communications Act, this installation shall comply in full with all rules and regulations of the Commission that apply to an emergency or reserve installation on board a vessel subject to Title III, Part II of the Communications Act.

NOTE: Section 355 (a) of the Communications Act (Title III, Part II) provides that "The radio installation shall comprise a main and an emergency or reserve radiotelegraph installation: *Provided,* That, in the case of an existing installation on a cargo ship and a new installation on a cargo ship of five hundred gross tons and upwards but less than one thousand six hundred gross tons, if the main installation complies with all requirements of an emergency or reserve installation, the emergency or reserve installation may be omitted, except that a separate emergency receiver must, in all cases, be provided".

14. Section 8.503 is amended as follows:

a. Amend paragraph (a) (3) of § 8.503 to read as follows:

(3) The main receiver shall be capable of efficiently receiving radiotelegraph signals, classes A1 and A2 emission, on all frequencies within the bands 100 to 200 kilocycles, and 405 to 535 kilocycles, and in addition class B emission within the band 485 to 515 kilocycles. In addition, it shall be fitted with a head receiver capable of effective operation at every audio frequency from 200 to 3000 cycles per second, inclusive. Where a loudspeaker is additionally provided for use in accordance with the provisions of § 8.204, such device also shall be capable of effective operation at every audio frequency from 200 to 3000 cycles per second, inclusive. The main receiver shall have sufficient sensitivity to effectively operate a head receiver or a loudspeaker when the receiver input is as low as 100 microvolts.

b. Amend paragraph (a) (4) of § 8.503 to read as follows:

(4) There shall be readily available for use at all times under normal load conditions, when the vessel is leaving or attempting to leave a harbor or port for a voyage in the open sea, while being navigated in the open sea outside a harbor or port, and when required during inspection of the ship radio station by an authorized representative of the Commission, a main power supply for the main radio installation capable of supplying electrical power sufficient to energize simultaneously and efficiently the main transmitter at its required antenna power (the antenna power specified in § 8.552) and the main receiver; and at the same time to charge, at any required rate, all storage batteries used as the emergency power supply, and any other storage batteries which are charged by connection to this radio room main power supply. Under this load condition and at all times herein specified, any potential of the main power supply at the radio room terminals shall not deviate from its rated electrical potential by more than 10 percent on vessels completed on or after July 1, 1941, nor by more than 15 percent on vessels completed before that date. While at sea, storage batteries forming part of the main installation shall be brought up to the normal fully charged condition daily.

c. Add new subparagraphs (6) and (7) to § 8.503 (a) as follows:

(6) The main installation shall be provided with a device permitting change-over from transmission to reception and vice versa without manual switching.

(7) The main installation shall be capable of being quickly connected with either the main antenna or the emergency antenna if installed.

15. Section 8.504 is amended as follows:

a. Paragraph (a) (4) of § 8.504 is amended to read as follows:

(4) The emergency receiver shall be capable of efficiently receiving radiotelegraph signals, classes A1 and A2 emission, on all frequencies within the band 405 to 535 kilocycles, and class B emission on all frequencies within the band 485 to 515 kilocycles. In addition, it shall be fitted with a head receiver capable of effective operation at every audio frequency from 200 to 3000 cycles per second, inclusive. Where a loudspeaker is additionally provided for use in accordance with the provisions of § 8.204, such device also shall be capable of effective operation at every audio frequency from 200 to 3000 cycles per second, inclusive. The emergency receiver shall have sufficient sensitivity to effectively operate a head receiver or a loudspeaker when the receiver input is as low as 100 microvolts.

b. Paragraph (a) (5) of § 8.504 is amended to read as follows:

(5) There shall be readily available for use at all times under normal load conditions, when the vessel is leaving or attempting to leave a harbor or port for a voyage in the open sea, while being navigated in the open sea outside a harbor or port, and when required during inspection of the ship radio station by an authorized representative of the Commission, an emergency power supply for the emergency installation (independent of the propelling power of the ship, and any other electrical system; and independent of the main power supply where a separate main and emergency or reserve installation is provided for the purpose of compliance with paragraph (a) of section 355 of the Communications Act) capable of supplying electrical power sufficient to energize simultaneously and efficiently the emergency transmitter at its required antenna power (the antenna power specified in § 8.553) and the emergency receiver. Such emergency power supply shall be maintained in readiness to operate effectively and shall have a reserve capacity of at least 6 continuous hours at all times while the vessel is navigated outside a harbor or port and whenever the vessel leaves or attempts to leave a harbor or port of the United States for a voyage in the open sea. While at sea, storage batteries forming part of the emergency installation shall be brought up to normal full charged condition daily.

c. Add new paragraph (a) (11) to § 8.504 as follows:

(11) The emergency installation shall be capable of being quickly connected with either the main antenna or the emergency antenna if installed.

16. Section 8.513 is amended to read as follows:

§ 8.513 *Interior communication system.* (a) Pursuant to paragraph (g) of section 355 of the Communications Act, an efficient interior communication system shall be provided between the bridge of a ship and the radio room, in all cases where the radio room does not adjoin or open onto the navigating bridge structure; further, an efficient interior communication system shall be provided between the bridge and the location of the direction finding apparatus whenever the latter is not located on the bridge or within any compartment adjoining or opening onto the navigating bridge structure. When the operating position of the emergency radio installation is not located in the radio room normally used for operating the main radio installation, an efficient interior communication system shall be separately provided between the bridge and each of these radio operating positions.

(b) If a vessel is provided with more than one location from which it is normally controlled and steered, the interior communication system between the radio room and bridge shall include in the system a point of communication to each such location. The existence at a location of all of the following factors will be considered to be evidence that a point of communication should there be established: (1) Provision of a steering wheel; (2) provision of a compass; (3) provision of an engine order telegraph; (4) provision of apparatus to control the whistle; and (5) enclosure of the location to form a wheelhouse.

(c) The requirement of paragraph (b) of this section shall not apply to locations established solely for emergency use in event of failure of the normal steering facilities or locations used solely while docking or maneuvering a ship while in port or occasionally for brief periods while navigating the ship in close quarters on inland waters.

17. Section 8.515 is amended to read as follows:

§ 8.515 *Radio station clock.* The radio station clock required by § 8.114, when installed on board a vessel subject to Title III, Part II of the Communications Act, shall, in addition to the requirements of § 8.114, have a sweep second hand and a dial not less than 5 inches in diameter. If a ship is provided with a separate emergency radio operating room, such a clock shall also be installed in the emergency operating room.

18. Section 8.516 is amended to read as follows:

§ 8.516 *Direction-finder.* Each ship of 1600 gross tons or over which is subject to the requirement set forth in subparagraph (a) (2) of section 351 of the Communications Act or which is subject

to Regulation 12 of Chapter V of the Safety Convention shall be equipped with an efficient direction-finder (radio compass) properly adjusted in operating condition and approved by the Commission.

19. Delete Subpart U including title and §§ 8.701 through 8.713.

Substitute therefor: Subpart U [Reserved.]

[F. R. Doc. 55-3241; Filed, Apr. 19, 1955; 8:51 a. m.]

FEDERAL TRADE COMMISSION

[16 CFR Part 300]

[File No. 204-6]

RULES AND REGULATIONS UNDER THE WOOL PRODUCTS LABELING ACT OF 1939

COMMON GENERIC NAME OF FIBER

Notice is hereby given to all interested parties that the Federal Trade Commission will on the 6th day of May 1955, at its offices in the City of Washington, District of Columbia, give consideration to an amendment of Rule 8 of the regulations under the Wool Products Labeling Act (16 CFR 300.8).

Interested parties may participate by submitting in writing to the Commission on or before such date their views, arguments or other pertinent data.

Such action is taken pursuant to authority given the Federal Trade Commission under section 6 (a) of the Wool Products Labeling Act (15 U. S. C. A. section 68) "to make rules and regulations for the manner and form of disclosing information required by this act, and for segregation of such information for different portions of a wool product as may be necessary to avoid deception or confusion."

1. The matters to be considered are an amendment of Rule 8 of the regulations (16 CFR 300.8), as presently written, which would thereafter be paragraph (a) reading as follows:

§ 300.8 *Common generic name of fiber.* (a) Except where another name is required or permitted under the act or regulations, the respective common generic name of the fiber shall be used when naming fibers in the required information; as for example, "wool", "reprocessed wool", "reused wool", "cotton", "rayon", "silk", "linen", "acetate", "nylon".

2. And the addition of a new paragraph (b) to read:

(b) The term "fur fiber" may be used to describe the hair or fur fiber or mixtures thereof of any animal or animals other than the sheep, lamb, Angora goat, Cashmere goat, camel, alpaca, llama and vicuna. If the name or depiction of any animal producing the hair or fur fiber is used on the stamp, tag, label, or other means of identification applied or affixed to the wool product, the percentage weight of such hair or fiber in the total fiber weight of the wool product shall be separately stated in the required fiber content designation; as for example:

60 percent Wool
40 percent Fur Fiber
or
60 percent Wool
30 percent Fur Fiber
10 percent Beaver

Issued: April 15, 1955.

By direction of the Commission.

[SEAL] ROBERT M. PARRISH, *Secretary.*

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

MONTANA

NOTICE OF PROPOSED WITHDRAWAL AND RESERVATION OF LANDS

The United States Forest Service, Department of Agriculture has filed an application, Serial No. Montana 014873, for the withdrawal of the lands described below, from all forms of appropriation under the public land laws, including the mining laws but not the mineral-leasing laws. The applicant desires the land for an administrative site.

For a period of thirty days from the date of publication of this notice, persons having cause may present their objections in writing to the undersigned official of the Bureau of Land Management, Department of the Interior, 1245 North Twenty-ninth Street, Billings, Montana.

If circumstances warrant it, a public hearing will be held at a convenient time and place, which will be announced.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

The lands involved in the application are:

MONTANA PRINCIPAL MERIDIAN

BEAVERHEAD NATIONAL FOREST

Notch Administrative Site

T. 11 S., R. 4 W.,
Sec. 18: NE¼NW¼.

Total area 40 acres.

R. D. NIELSON, *State Supervisor.*

FEDERAL COMMUNICATIONS COMMISSION

[Docket Nos. 8258, 8753; FCC 55M-346]

TEXAS STAR BROADCASTING CO. AND KTRH BROADCASTING (KTRH)

ORDER CONTINUING HEARING

In re applications of Roy Hofheinz and W. N. Hooper, d/b as Texas Star Broadcasting Company, Dallas, Texas, Docket No. 8258, File No. BP-5820; KTRH Broadcasting Company (KTRH), Houston, Texas, Docket No. 8753, File No. BP-6525; for construction permits.

The Hearing Examiner having under consideration a petition filed on April 13, 1955, on behalf of KTRH Broadcasting Company (KTRH) and Democrat Printing Company, requesting that the prehearing conference in the above-entitled proceeding now scheduled to be held on Friday, April 15, 1955, be cancelled and that the hearing therein now scheduled to be held on Monday, April 18, 1955, be postponed until Tuesday, April 26, 1955; and

It appearing that sufficient good cause has been set forth in the said petition to warrant a grant of the relief requested herein; and

It further appearing that all of the remaining parties to the proceeding have orally consented to a grant thereof;

It is ordered, This 14th day of April 1955, that the pre-hearing conference in the above-entitled proceeding now scheduled for April 15, 1955, is hereby cancelled, and that the hearing therein now scheduled for April 18, 1955, is hereby postponed until 10:00 a. m., on Tuesday, April 26, 1955, in the offices of this Commission, Washington, D. C.

[Docket Nos. 9243, 11284, 11285; FCC 55M-344]

PACIFIC TELEPHONE & TELEGRAPH CO. ET AL.

ORDER CONTINUING HEARING

In the matter of Harvey E. Seibert and Clinton D. McKinnon and The Pacific Telephone & Telegraph Company, applications for construction permits for coastal harbor stations at San Diego, California (File No. 10257-F1-P-C), and at San Pedro, California (File No. 11682-F1-P-C), respectively, Docket No. 9243; The Pacific Telephone & Telegraph Company application for construction permit to add transmitter to existing Station KOU (File No. 13412-F1-P-G) at San Pedro, California, Docket No. 11284; Radiomarine Corporation of America application for construction permit for new public class II-B coast station at San Diego, California (File No. 17229-F1-P-D), Docket No. 11285.

The Hearing Examiner having under consideration a motion filed April 4, 1955 by Radiomarine Corporation of America (Radiomarine) requesting that the hearing herein now scheduled for May 2, 1955, be continued until June 27, 1955, or to such later date as may meet the convenience of the Hearing Examiner, the Commission's counsel and the other parties; and

It appearing that additional time will be needed by Radiomarine to prepare for the hearing and that there is now pending before the Commission a motion filed by the Chiefs of the Common Carrier Bureau and the Safety and Special Radio Services Bureau to dismiss the applications in Docket No. 9243, which motion has not as yet been acted upon, and that no opposition to a grant of the motion for continuance of the hearing has been filed; and

It further appearing that it may be desirable for the motion to dismiss the applications in Docket No. 9243 to be acted upon before the hearing starts and that the hearing if it is continued should be continued to a date later to be scheduled by the Hearing Examiner;

It is ordered, This 13th day of April, 1955, that the motion is granted; and that the date for the hearing is postponed to a date later to be scheduled by the Hearing Examiner.

CARL F. AND SARAH KNIERIM

ORDER DESIGNATING APPLICATION FOR HEARING ON STATED ISSUES

In re application of Carl F. Knierim and Sarah Knierim (a partnership) Hermiston, Oregon, Docket No. 11336, File No. BP-9330; for construction permit.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 14th day of April 1955;

The Commission having under consideration the above-entitled application of Carl F. Knierim and Sarah Knierim, a partnership, for a construction permit for a new standard broadcast station to operate on 800 kilocycles with a power of 250 watts, daytime only, at Hermiston, Oregon;

It appearing that the applicant is legally, technically, financially and otherwise qualified to operate the proposed station, but that the proposal may cause

interference to and receive interference from Station KPDQ, Portland, Oregon; and because of the interference received from KPDQ may not comply with § 3.28 (c) of the Commission's rules; and

It further appearing that, pursuant to section 309 (b) of the Communications Act of 1934, as amended, the subject applicant was advised by letter dated March 2, 1955 of the aforementioned deficiencies and that the Commission was unable to conclude that a grant of the application would be in the public interest; and

It further appearing that a reply to the Commission's letter was filed by the applicant on March 28, 1955; and

It further appearing that in a reply filed on March 29, 1955 Station KPDQ requested that the subject application be designated for hearing; and

It further appearing that the Commission, after consideration of the replies, is of the opinion that a hearing is necessary;

It is ordered, That, pursuant to section 309 (b) of the Communications Act of 1934, as amended, the said application is designated for hearing, at a time and place to be specified in a subsequent order, upon the following issues:

(1) To determine the areas and populations which would be served by the operation of the subject proposed station, and the availability of other primary service to such areas and populations.

(2) To determine whether the operation of the subject proposed station would involve interference with Station KPDQ, Portland, Oregon, or any other standard broadcast station, and, if so, the nature and extent of such interference.

(3) To determine whether the subject proposed operation is in compliance with § 3.28 (c) of the Commission's rules.

(4) To determine whether, in light of the evidence adduced pursuant to the foregoing issues, the operation of the subject proposed station would serve the public interest, convenience and necessity.

It is further ordered, That John W. Davis, licensee of Station KPDQ, Portland, Oregon, is made a party to the proceeding.

Released: April 15, 1955.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

[F. R. Doc. 55-3246; Filed, Apr. 19, 1955; 8:52 a. m.]

[Docket No. 11363; FCC 55-461]

MID-SOUTH BROADCASTING CO. AND D. R. JAMES, JR.

ORDER DESIGNATING APPLICATION FOR HEARING ON STATED ISSUES

In re application of Leo Howard, tr/as Mid-South Broadcasting Company (assignor) and D. R. James, Jr. (assignee) for assignment of construction permit for Station KPLN, Camden, Arkansas, Docket No. 11363; File No. BAP-178.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 13th day of April 1955;

The Commission having under consideration (a) the above-entitled application filed on October 13, 1952 and granted without hearing on April 1, 1953; (b) a protest against said grant filed on April 24, 1953, pursuant to section 309 (c) of the Communications Act of 1934, as amended, by Camden Radio, Inc., licensee of Station KAMD, Camden, Arkansas; (c) the Commission's memorandum opinion and order dated May 11, 1953 (FCC 53-545) denying the protest on the ground that the protest did not contain such allegations of fact as would show the protestant to be a party in interest; and (d) certified copy of the decision rendered on July 15, 1954 by the United States Court of Appeals for the District of Columbia Circuit in Camden Radio, Inc. v. Federal Communications Commission, No. 11833, and received by the Commission on April 11, 1955, reversing the foregoing memorandum opinion and order and remanding the case for further proceedings (Petition for Rehearing denied March 17, 1955); and

It appearing, that Station KPLN was not in operation on October 13, 1952 when the above-entitled application was granted by the Commission, and that a stay of the effective date of the grant of the above-entitled application will require Station KPLN to cease operation; and

It further appearing that the application of D. R. James, Jr., for license to cover construction permit for Station KPLN (BL-4782) was granted by the Commission on August 24, 1953, subject to the disposition of Camden Radio, Inc. v. Federal Communications Commission, No. 11833, by the United States Court of Appeals; and that the Court's action of July 15, 1954 remanding Camden Radio, Inc. v. Federal Communications Commission to the Commission for further proceedings necessarily requires the Commission to set aside its action of August 24, 1953 granting BL-4782; and

It further appearing that abrupt termination of KPLN's operations under its license granted August 24, 1953, is likely to prevent an orderly disposition of KPLN's affairs and seriously inconvenience the station's employees; and

It further appearing that, for purposes of clarity and coherence, a restatement of protestant's issues, as understood by the Commission, is indicated;

It is ordered, That, effective midnight, April 30, 1955, the effective date of the grant of the above-entitled application is postponed pending a final determination by the Commission after hearing; that the Commission's action of August 24, 1953 granting the application of D. R. James, Jr., for license to cover construction permit for Station KPLN (BL-4782) is set aside; and that Station KPLN cease operation as of midnight, April 30, 1955;

It is further ordered, That the above-entitled application is designated for hearing at the offices of the Commission in Washington, D. C., on the following issues:

1. To determine whether the construction permit granted to Leo Howard for Station KPLN, or the rights and responsibilities incident thereto, have been transferred, assigned or disposed of, directly or indirectly, without the consent of the Commission, in contravention of the Communications Act of 1934, as amended, and, more particularly section 310 (b) thereof, and to secure information concerning, among other things, the following matters:

(a) The method or methods of financing construction and operation of Station KPLN from the date of grant of the construction permit (BP-7888), and the sources of such financing, and whether the aforesaid method or methods so employed deviated from the representations made with respect thereto in the application for the construction permit;

(b) To obtain information as to all contracts, agreements, arrangements or understandings, written or oral, past or present, between Leo E. Howard and Randolph James relating to the construction of KPLN, and its future ownership, operation, management and control;

(c) To obtain full information as to all contracts, agreements, arrangements or understandings, written or oral, past or present, between Leo Howard on the one hand, and George L. Byars, C. T. Mullins and David Crockett on the other hand, collectively or individually, relating to the construction, management, operation and control of Station KPLN;

(d) To obtain full information as to the extent and methods of participation, if any, by Randolph James, George L. Byars, C. T. Mullins, and/or David Crockett in the financing and construction of Station KPLN from the date of grant of the construction permit (BP-7888), and to determine whether Station KPLN has been constructed, controlled or managed by individuals unknown to the Commission, in violation of sections 301 and 310 (b) of the Communications Act of 1934, as amended;

(e) To obtain full information relating to the ownership of the physical facilities of Station KPLN.

2. To determine whether the execution of any of the contracts, agreements, arrangements or understandings, if any, referred to in Issue No. 1, the terms thereof, or any action performed pursuant thereto, are in violation of section 310 (b), referred to above, or in violation of the Commission's rules and regulations, with particular reference to §§ 1.321, 1.342 and 1.343 of said rules and regulations.

3. To determine the authority and control exercised by permittee in the construction, ownership and management of Station KPLN.

4. To determine whether permittee has concealed information from the Commission regarding the construction, ownership, management and control of Station KPLN, or has misrepresented the facts concerning such construction, ownership, management and control in applications, reports and letters which he, from time to time, has filed with the Commission, with particular reference to the following:

(a) Whether permittee concealed or misrepresented the facts concerning his financial qualifications in the application for construction permit (BP-7888) and failed to disclose the agreement between himself and Randolph James concerning the method of financing construction of Station KPLN and James' interest therein;

(b) Whether permittee misrepresented that there were no changes in financing, ownership and control of Station KPLN in his application (BMP-5872) specifying a transmitter site, when, in fact, permittee had executed a power-of-attorney to George L. Byars to construct Station KPLN;

(c) Whether permittee concealed or misrepresented facts relative to the financing, control and ownership of Station KPLN in the above-entitled license application.

5. To determine whether and to what extent, if any, D. R. James, Jr., participated in the construction of Station KPLN.

6. To determine the circumstances under which D. R. James, Jr., became the proposed assignee of Station KPLN and the extent to which this was determined by (1) applicant, (2) D. R. James, Sr., and (3) G. L. Byars, C. T. Mullins, and/or David Crockett.

7. To determine any understanding D. R. James, Jr., has with C. T. Mullins to manage Station KPLN and any other agreements, understandings, or contracts James, Jr., may have concerning operation, or present or future ownership of Station KPLN.

8. To determine the entire understanding, agreements, or contracts, if any, applicant Howard has with James, Jr,. James, Sr., or with Byars, Mullins and Crockett concerning the repayment of the $3,500 advanced by James Sr., to applicant, and not disclosed in the application to assign the construction permit of Station KPLN (BAP-178).

9. To determine whether, in the light of the evidence adduced under the foregoing issues, the grant of the above-entitled assignment application should be vacated.

The burden of proof as to each of the above issues shall be on the protestants.

It is further ordered, That the protestants herein and the Chief, Broadcast Bureau, are hereby made parties to the proceedings herein; and that

(1) The hearing on the above issues commence at 10:00 a. m. on May 16, 1955, before an Examiner to be specified by the Commission; and

(2) The parties to the proceedings herein shall have fifteen (15) days after the issuance of the Examiner's decision to file exceptions thereto and seven (7) days thereafter to file replies to any such exceptions; and

(3) The appearances by the parties intending to participate in the above hearing shall be filed not later than May 2, 1955.

Released: April 15, 1955.

[Docket No. G-3264]

ARGO OIL CO.

NOTICE OF APPLICATION AND DATE OF HEARING

APRIL 14, 1955.

Take notice that Argo Oil Company, (Applicant, a Delaware corporation, whose address is Denver, Colorado, filed on September 27, 1954, an application for a certificate of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, authorizing Applicant to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant produces natural gas from the Brunson Field, Lea County, New Mexico, which is sold in interstate commerce to the Permian Basin Pipeline Company (contract dated August 22, 1952) for resale.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations, and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on May 10, 1955, at 9:30 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however*, That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before May 2, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[SEAL] LEON M. FUQUAY,
Secretary.

[Docket No. G-3326]

H. R. GOODRICH

NOTICE OF APPLICATION AND DATE OF HEARING

APRIL 14, 1955.

Take notice that H. R. Goodrich, Applicant, an individual whose address is Houston, Texas, filed on September 27, 1954, an application for a certificate of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, authorizing Applicant to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant produces natural gas from the Helen Gohlke Field, in Victoria and DeWitt Counties, Texas, which is sold in interstate commerce to Texas Eastern Transmission Corporation (contract dated March 6, 1953; initial price, 10.7 cents per Mcf) for resale.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations, and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on May 12, 1955, at 9:30 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application:

Provided, however, That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of § 1.30 (c) (1) of the Commission's rules of practice and procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before May 2, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

JAMES DOUGHTY

NOTICE OF APPLICATION AND DATE OF HEARING

APRIL 14, 1955.

Take notice that James Doughty, Applicant, with a principal office in Corpus Christi, Texas, filed on October 1, 1954, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing Applicant to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant produces natural gas from the Clayton Field, Live Oak County, Texas, which is sold in interstate commerce to Texas-Illinois Natural Gas Pipeline Company (contract dated September 27, 1954; initial price 12.2 cents per Mcf).

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations, and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on May 11, 1955, at 9:30 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. [Docket No. G-6815]

CITIES SERVICE GAS CO.

NOTICE OF APPLICATION AND DATE OF HEARING

APRIL 14, 1955.

Take notice that Cities Service Gas Company, (Applicant) a Delaware corporation, whose address is Oklahoma City, Oklahoma, filed on December 6, 1954, an aplication pursuant to section 7 of the Natural Gas Act, authorizing Applicant to render service as hereinafter described, and to abandon certain other service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant proposes to acquire from Eastern Kansas Gas Company the Piqua Gas Storage Field in Allen and Woodson Counties, Kansas, together with all gas contained therein. Applicant proposes to enlarge the storage capacity of the field by securing additional leases, drilling 15 wells and installing necessary gathering lines and meters.

Acquisition of the Piqua Gas Storage Feld would require a change in Applicant's service to Eastern Kansas Gas Company. Service under Applicant's Rate Schedule P would be abandoned. However, in order to maintain service to ultimate consumers, Applicant would continue service to Eastern Kansas Gas Company for resale to the towns of Erie, La Harpe, Gas City and Piqua under its F-2 and I-2 Rate Schedules. Applicant would render direct service to the town of Iola under its F-2 Rate Schedule to replace service to Eastern Kansas Gas Company for resale in the town of Iola.

The estimated total cost of the project is $570,500 to be paid for out of treasury cash.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations, and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on May 13, 1955, at 9:30 a. m. e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW, Washington, D. C. concerning the matters involved in and the issues presented by such application. *Provided, however,* That the Commision may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before April 18, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

Secretary.

[F. R. Doc. 55-3227; Filed, Apr. 19, 1955; 8:48 a. m.]

[Docket No. G-7113]

COLORADO INTERSTATE GAS CO.

NOTICE OF APPLICATION AND DATE OF HEARING

APRIL 14, 1955.

Take notice that Colorado Interstate Gas Company (Applicant), a Delaware corporation with its principal place of business in Colorado Springs, Colorado, filed an application on January 17, 1955, for a certificate of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, authorizing Applicant to return to Panhandle Eastern Pipe Line Company (Panhandle) approximately 2,000,000 Mcf of natural gas as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open to public inspection.

Applicant states that Panhandle delivered the 2,000,000 Mcf of natural gas to it in the Panhandle Field during the fall and winter of 1953, at a time when Applicant had over-produced its allowables in the Panhandle Field and was faced with the possibility of having to curtail deliveries to its customers unless additional gas could be obtained from other sources. The situation is now reversed, Panhandle's wells being over-produced with respect to its allowables and Applicant's wells are under-produced in excess of 3,000,000 Mcf. Applicant proposes to return the gas to Panhandle under an X-4 Rate Schedule, which will terminate as soon as delivery and redelivery are in balance, with any overage to be paid for at the rate of 10 cents per Mcf by the party receiving such overage.

Applicant has requested omission of the intermediate decision procedure and that its application be heard under the shortened procedure provided by § 1.32 (b) (18 CFR 1.32 (b)) of the Commission's rules of practice and procedure. The application is on file with the Commission for public inspection.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on May 10, 1955, at 9:30 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before May 2, 1955.

[Docket No. G-8444]

TEXAS EASTERN TRANSMISSION CORP.

NOTICE OF APPLICATION AND DATE OF HEARING

APRIL 14, 1955.

Take notice that Texas Eastern Transmission Corporation (Applicant), a Delaware corporation whose address is Texas Eastern Building, Shreveport, Louisiana, filed on February 7, 1955, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing Applicant to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant proposes to render additional firm natural gas service to Huntingdon Gas Company for one year beginning April 1, 1955. The quantities of natural gas involved are 2805 Mcf on a maximum day and approximately 1,024,000 Mcf during the one year period. Service is to be rendered pursuant to the Applicant's DCQ Rate Schedule. No new facilities are required.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on May 16, 1955, at 9:30 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C. concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before May 2, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[Notice 56]

MOTOR CARRIER APPLICATIONS

APRIL 15, 1955.

Protests, consisting of an original and two copies, to the granting of an application must be filed with the Commission within 30 days from the date of publication of this notice in the FEDERAL REGISTER and a copy of such protest served on the applicant. Each protest must clearly state the name and street number, city and state address of each protestant on behalf of whom the protest is filed (49 CFR 1.240 and 1.241). Failure to seasonably file a protest will be construed as a waiver of opposition and participation in the proceeding unless an oral hearing is held. In addition to other requirements of Rule 40 of the general rules of practice of the Commission (49 CFR 1.40), protests shall include a request for a public hearing, if one is desired, and shall specify with particularity the facts, matters and things, relied upon, but shall not include issues or allegations phrased generally. Protests containing general allegations may be rejected. Requests for an oral hearing must be supported by an explanation as to why the evidence cannot be submitted in the form of affidavits. Any interested person, not a protestant, desiring to receive notice of the time and place of any hearing, prehearing conference, taking of depositions, or other proceedings shall notify the Commission by letter or telegram within 30 days from the date of publication of this notice in the FEDERAL REGISTER.

Except when circumstances require immediate action, an application for approval, under section 210a (b) of the act, of the temporary operation of motor carrier properties sought to be acquired in an application under section 5 (a) will not be disposed of sooner than 10 days from the date of publication of this notice in the FEDERAL REGISTER. If a protest is received prior to action being taken, it will be considered.

APPLICATIONS OF PROPERTY

No. MC 200 Sub 178, filed March 14, 1955, RISS & COMPANY, INC., Riss Building, 15 West 10th Street, Kansas City, Mo. For authority to operate as a *common carrier*, over a regular route, transporting: *General commodities, including Class A and B explosives, household goods as defined by the Commission, commodities in bulk*, and *those requiring special equipment*, but excluding livestock, between Pueblo, Colo., and Kit Carson, Colo., from Pueblo over Colorado Highway 96 to junction U. S. Highway 287, thence over U. S. Highway 287 to Kit Carson, and return over the same route, serving no intermediate points, with no service to or from termini except as otherwise authorized, as an alternate or connecting route, for operating convenience only, in connection with carrier's regular route operations between Kansas City, Mo., and Sterling, Colo., and between Oklahoma City, Okla., and Denver, Colo. Applicant is authorized to conduct operations in Colorado, Connecticut, Illinois, Indiana, Iowa, Kansas, Kentucky, Maryland, Massachusetts, Michigan, Missouri, Nebraska, New Jersey, New York, Ohio, Oklahoma, Pennsylvania, Texas, Virginia, West Virginia, and the District of Columbia.

No. MC 263 Sub 70 (amended), filed March 21, 1955, GARRETT FREIGHTLINES, INC., 2055 Pole Line Road, P. O. Box 349, Pocatello, Idaho. Applicant's attorney: Maurice H. Greene, P. O. Box 1554, Boise, Idaho. For authority to operate as a *common carrier*, over regular and irregular routes, transporting: *Government owned compressed gas trailers*, loaded or empty, from, to and between all points authorized to be served in the performance of (1) regular and alternate route operations in and through Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, and Wyoming. The applicant is authorized to operate over all of the above-referred to regular, alternate, and irregular routes in the transportation of Class A and B explosives, general commodities with certain exceptions, and certain other specifically named commodities, but is not presently specifically authorized to transport the commodities named in this application.

No. MC 1222 Sub 13, filed March 25, 1955, THE REINHARDT TRANSFER COMPANY, a corporation, 1410 Tenth Street, Portsmouth, Ohio. Applicant's attorney: Herbert Baker, 50 West Broad Street, Columbus 15, Ohio. For authority to operate as a *common carrier*, over irregular routes, transporting: *Fertilizer compounds*, dry, *urea feed mixtures*, and *urea*, from South Point, Ohio to points in Indiana, except those located as follows: points on U. S. Highway 52 between the Ohio-Indiana State line and Brookville, those on Indiana Highway 1 between Brookville and Connersville, those on Indiana Highway 44 between Connersville and Rushville, those on U. S. Highway 52 between Rushville and Kentland, those on U. S. Highway 41 between Kentland and the Indiana-Illinois State line, those on Indiana Highway 1 between Connersville and Cambridge City, those on Indiana Highway 44 between Connersville and Liberty, those on U. S. Highway 27 between Liberty and the Indiana-Ohio State line, those on U. S. Highway 40 between Indianapolis and the Indiana-Ohio State line, those points in Indiana in the Louisville, Ky. Commercial Zone as defined by the Commission, and those points in Indiana in the Chicago, Ill. Commercial Zone as defined by the Commission, and *empty containers or other such incidental facilities* (not specified) used in transporting the commodities specified in this application, on return movement. Applicant is authorized to conduct operations in Ohio, West Virginia, Kentucky, Illinois and Indiana.

No. MC 7075 Sub 13, filed March 14, 1955, NEMASKET TRANSPORTATION COMPANY, INC., 58 West Grove St., Middleboro, Mass. Applicant's attorney: Theodore E. Shasta, 60 State St., Boston 9, Mass. For authority to operate as a *common carrier*, transporting: *General commodities*, except those of unusual value, Class A and B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading, serving Woods Hole, Mass. and all points located on the Massachusetts Islands of Martha's Vineyard, and Nantucket, as off-route points, in connection with regular route operations between Boston, Mass., and Provincetown, Mass., over U. S. Highway 6, and Massachusetts Highways 3, 18, and 28. Applicant is authorized to conduct regular route operations in Massachusetts and Rhode Island, and irregular route operations in Massachusetts, New York, and Rhode Island.

No. MC 16554 Sub 3, filed March 31, 1955, PERTH AMBOY TRUCKING CORP., Post Office Box 206, Woodbridge, N. J. Applicant's representative: Bert Collins, 140 Cedar Street, New York 6, N. Y. For authority to operate as a *common carrier*, over irregular routes, transporting: *Pitch, asphalt*, and *asphalt emulsion*, in bulk, in tank vehicles, from points in Westchester, Nassau,, and Suffolk Counties, N. Y., to points in New Jersey. Applicant is authorized to conduct operations in New Jersey, New York, and Pennsylvania.

No. MC 18129 Sub 2, filed March 21, 1955, ANCHOR TRANSFER & STORAGE COMPANY, a corporation, 43 John Street, Fond du Lac, Wis. For authority to operate as a *common carrier*, over regular routes, transporting: *General commodities*, except those of unusual value, Class A and B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment and those injurious or contaminating to other lading, serving St. Cloud, Calvary and Mt. Calvary, Wis., as off-route points in connection with carrier's regular route operations between Fond du Lac and Sheboygan, Wis., over Wisconsin Highway 23. Carrier is authorized to conduct operations in Wisconsin.

No. MC 28901 Sub 3, filed March 21, 1955, SILVER WHEEL MOTOR FREIGHT, INC., 300 East First Avenue, Albany, Oreg. Applicant's attorney: John M. Hickson, Yeon Building, Portland, Oreg. For authority to operate as a common carrier, over regular routes, transporting: *General commodities*, except those of unusual value, Class A and B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment and those injurious or contaminating to other lading, (1) between Junction U. S. Highway 99–W and Oregon Highway 57 (vicinity of Tigard, Oreg.) and junction Oregon Highway 51 and Oregon Highway 57 (vicinity of Wilsonville, Oreg.), over Oregon Highway 57; (2) between junction Oregon Highway 51 and Oregon Highway 57 (vicinity of Wilsonville, Oreg.) and junction Oregon Highway 51 and U. S. Highway 99–E (vicinity Hubbard, Oreg.), over Oregon Highway 51 (the above routes cover what is commonly known as the Wilsonville cut-off from Tigard to Hubbard, Oreg.); and (3) between junction 99–E and Salem By-pass (north of Salem, Oreg.) and junction U. S. Highway 99–E and Salem By-pass (south of Salem, Oreg.), over Salem By-pass, serving no intermediate points on the above-described highways, as alternate routes in connection with carrier's regular-route operations between Portland, Oreg., and Harrisburg, Oreg., over U. S. Highway 99–E. Applicant is authorized to conduct operations in Oregon.

No. MC 32242 Sub 9, filed March 23, 1955, N. C. PURDIE CORPORATION, Stanley, N. Y. Applicant's representative: Bert Collins, 140 Cedar Street, New York 6, N. Y. For authority to operate as a *common carrier*, over irregular routes, transporting: *General commodities*, except those of unusual value, Class A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, between New York, N. Y., and points in Bergen, Passaic, Sussex, Warren, Morris, Essex, Hudson, Union, Middlesex, Somerset, Hunterdon, Monmouth, and Ocean Counties, N. J., on the one hand, and, on the other, points in New York, except New York, N. Y., and points within fifty (50) miles thereof.

NOTE: The purpose of the instant application is to remove the restriction reading "in truckload lots, minimum weight 10,000 pounds", contained in Certificate No. MC 32242, issued January 28, 1952. Applicant is authorized to conduct operations in New Jersey and New York.

No. MC 32474 Sub 15, filed March 28, 1955, C. A. CONKLIN TRUCK LINE, INC., 247 Pearl Street, Adrian, Mich. For authority to operate as a *common carrier*, transporting: *General commodities*, except those of unusual value, Class A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, serving all points in Oneida and Vilas Counties, Wis., as off-route points in connection with carrier's regular-route operations as follows: (1) Between Rhinelander, Wis., and Chicago, Ill.; (2) between junction U. S. Highways 8 and 45 approximately one mile west of Monico, Wis., and Eagle River, Wis.; (3) between Rhinelander, Wis., and Ironwood, Mich.; (4) between Rhinelander, Wis., and Land O'Lakes, Wis.; (5) between junction U. S. Highway 51 and County Highway M and Boulder Junction, Wis.; (6) between Boulder Junction, Wis., and junction U. S. Highway 51 and County Highway H; and (7) between junction Wisconsin Highway 70 and U. S. Highway 51 and Patterson Hardware Company located about eight miles west of said junction. Applicant is authorized to conduct operations in Illinois, Indiana, Iowa, Michigan, Ohio and Wisconsin.

No. MC 38170 Sub 9, filed March 30, 1955, WHITE STAR TRUCKING, INC., 1750 Southfield Street, Lincoln Park, Mich. Applicant's attorney: Wilhelmina Boersma, 2850 Penobscot Building, Detroit 26, Mich. For authority to operate as a *common carrier*, transporting: *General commodities*, except those of unusual value and except Class A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, serving the McLouth Steel Company plants located at or near Gibraltar, Mich., as off-route points in connection with applicant's authorized regular-route operations between Detroit, Mich., and Toledo, Ohio; between the junction of U. S. Highways 24 and 25 (north of Flat Rock, Mich.), and Detroit, Mich.; between the junction of U. S. Highway 25 and West Road (west of Trenton, Mich.), and the junction of U. S. Highway 25 and Allen Road; and between the junction of U. S. Highways 24 and 25 (north of Flat Rock, Mich.), and the junction of Michigan Highway 58 and U. S. Highway 10. Applicant is authorized to conduct operations in Michigan and Ohio.

No. MC 59957 Sub 25, filed March 28, 1955, MOTOR FREIGHT EXPRESS, a corporation, 540–550 East King St., York, Pa. Applicant's representative: Harold G. Wiemeyer, 550 East King St., York, Pa. For authority to operate as a *common carrier*, transporting: *General commodities*, except those of unusual value, Class A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading, serving points in the Borough of Bolivar, Pa., and points in the Township of Fairfield, Westmoreland County, Pa., as off-route points in connection with carrier's regular route operations between Pittsburgh, Pa., and Lancaster, Pa. Applicant is authorized to conduct operations in Delaware, Maryland, New York, Pennsylvania, and the District of Columbia.

No. MC 60229 Sub 3, filed March 9, 1955, Amended, FERACO, INC., 1131–35 West Dauphin Street, Philadelphia 33, Pa. Applicant's representative: Franklin B. Blocksom, 133 Warrior Road, Drexel Hill, Pa. For authority to operate as a *common carrier*, over irregular routes, transporting: *Metal scrap*, and *waste materials such as but not limited to ashes, sweepings, skimmings and residues to be smelted, melted and/or refined in smelting or furnace plants* (other than precious metal recovering plants); *shot, ingots, slabs* and *other shapes produced therefrom; ferro-manganese* and *ferro-silicon; ores, clays, minerals* and *earths, such as but not limited to chrome, manganese, ilmenite, dolomite, limestone, fullers earth, kaolen, sands and crude clays;* and *commercial fertilizers*, and *materials used in the manufacture of fertilizers*, in bulk, in dump-truck equipment only, between points in New Jersey, Delaware, Maryland and the District of Columbia, and that part of Pennsylvania in and south and east of Wayne, Susquehanna, Bradford, Sullivan, Lycoming, Clinton, Centre, Mifflin, Juniata, Perry and Franklin Counties, Pa.

No. MC 62896 Sub 4, filed April 1, 1955, CHARLES W. POOLE & BRERETON POOLE, doing business as POOLE'S DRAYAGE CO., 1619 Eckington Place NE., Washington, D. C. Applicant's attorney: Frank B. Hand, Jr., Transportation Bldg., Washington 6, D. C. No. MC 109584 Sub 19, filed April 5, 1955, ARIZONA-PACIFIC TANK LINES, 717 North 21st Avenue, Phoenix, Ariz. Applicant's attorney: R. Y. Schureman, 639 South Spring Street, Los Angeles 14, Calif. For authority to operate as a *common carrier*, over irregular routes, transporting: *Anhydrous ammonia*, in bulk, in tank vehicles, from points in California, to points in Coconino, Navajo and Apache Counties, Ariz. Applicant is authorized to conduct operations in Arizona and California.

No. MC 109596 Sub 7, filed March 25, 1955, EAST-WEST SYSTEM, INC., 1501 Exchange Ave., Oklahoma City, Okla. Applicant's attorney: W. T. Brunson, Leonhardt Building, Oklahoma City, Okla. For authority to operate as a *common carrier*, over regular routes, transporting: *Compressed gases*, in bulk, when moving in specially constructed Government-owned or shipper-owned trailers or semi-trailers, for the U. S. Government or its cost-type contractors; *empty gas cylinders;* and *empty specially constructed Government-owned or shipper-owned trailers*, (1) between (a) Enid, Okla., and Oklahoma City, Okla., over U. S. Highway 81 from Enid to El Reno, Okla., thence over U. S. Highway 66 to Oklahoma City, and return over the same route, serving no intermediate points, (b) Amarillo, Tex., and Pan Tex Ordnance Plant, Tex., over U. S. Highway 60, serving no intermediate points, (c) Amarillo, Tex., and U. S. Army Air Corps Technical School, Tex., over U. S. Highway 60 from Amarillo to junction unnumbered county road (approximately six miles from Amarillo), thence over unnumbered county roads to U. S. Army Air Corps Technical School, and return over the same route, serving no intermediate points, (d) Amarillo, Tex., and English Field Airport, Tex., over U. S. Highway 60 from Amarillo to junction unnumbered county road (approximately six miles from Amarillo), thence over unnumbered roads to English Field Airport, and return over the same route, serving no intermediat points, (e) Perryton, Tex., and Wheeler, Tex., over U. S. Highway 83, serving all intermediate points, (f) Wheeler, Tex., and Oklahoma City, Okla., over Texas Highway 152 from Wheeler to the Texas-Oklahoma State line, thence over Oklahoma Highway 41 to Sayre, Okla., thence over U. S. Highway 66 to Oklahoma City, and return over the same route, serving all intermediate points between Wheeler, Tex., and Sayre, Okla., including Sayre, but with service at Sayre restricted to traffic moving to or from points west of Sayre, (g) Amarillo, Tex., and Wheeler, Tex., over U. S. Highway 60 from Amarillo to junction Texas Highway 152, thence over Texas Highway 152 to Wheeler, and return over the same route, serving the intermediate points of Laketon, and Mobeetie, Tex., and (h) Sayre, Okla., and Amarillo, Tex., over U. S. Highway 66, serving no intermediate points, and (2) serving points (a) in the Amarillo, Tex. Commercial Zone, as intermediate and off-route points, in connection with regular route operations to and from Amarillo, Tex., over U. S. Highways 60, and 66, and (b) in the Oklahoma City, Okla. Commercial Zone, as intermediate and off-route points, in connection with regular route operations to and from Oklahoma City, Okla. over U. S. Highway 66.

NOTE: The applicant is authorized to operate over the above-specified regular routes and to and from points in the above-named Commercial Zones in the transportation of general commodities, with certain exceptions, but is not presently specifically authorized to transport the commodities named in this application.

No. MC 110053 Sub 3, filed March 28, 1955, ILLINOIS STATE MOTOR SERVICE, INC., 4241 West Division St., Chicago, Ill. Applicant's attorney: Eugene L. Cohn, One North LaSalle St., Chicago 2, Ill. For authority to operate as a *common carrier*, over regular routes, transporting: *Iron* and *steel*, and *iron and steel articles*, from Galesburg, Ill., to Monmouth, Ill., from Galesburg over U. S. Highway 34 to Monmouth, and return over the same route. Applicant is authorized to conduct operations in Indiana and Illinois.

No. MC 110325 Sub 7, filed April 4, 1955, TRANSCON LINES, a corporation, 1206 South Maple Avenue, Los Angeles, Calif. Applicant's attorney: Lee Reeder, Suite 1010, 1012 Baltimore Ave., Kansas City 5, Mo. (*Instant application directly related to MC–F 5950 published issue of April 13, 1955, on Page 2444.*) For authority to operate as a *common carrier*, over regular routes, transporting: *General commodities*, except those of unusual value, Class A and B explosives, livestock, automobiles, household goods as defined by the Commission, commodities in bulk, and machinery requiring special equipment or handling, between Los Angeles, Calif., and Transcon Lines Terminal at 7655 Paramount Blvd., Rivera, Calif., as an off-route point in connection with carrier's regular route operations. Applicant is authorized to

conduct operations in Missouri, Illinois, Kansas, Oklahoma, New Mexico, and California.

No. MC 110325 Sub 8, filed April 4, 1955, TRANSCON LINES, a corporation, 1206 South Maple Ave., Los Angeles, Calif. Applicant's attorney: Lee Reeder, Suite 1010, 1012 Baltimore Ave., Kansas City, Mo. (*Instant application directly related to MC–F 5950 published issue of April 13, 1955, Page 2444.*) For authority to operate as a *common carrier*, over regular routes, transporting: *General commodities*, except those of unusual value, Class A and B explosives, livestock, automobiles, household goods as defined by the Commission, commodities in bulk, and machinery requiring special equipment or handling, *Between* San Francisco and Berkeley, Calif., on the one hand, and, on the other, Los Angeles, Calif., as follows: (1) From Los Angeles over U. S. Highway 101 to junction U. S. By-pass Highway 101; thence over U. S. By-pass Highway 101 to San Francisco, thence over U. S. Highway 40, and the San Francisco Oakland Bay Bridge to Berkeley, and return over the same routes; (2) From Los Angeles over U. S. Highway 101 to San Francisco; thence over U. S. Highway 40 and the San Francisco Oakland Bay Bridge to Berkeley, and return over the same routes; (3) From Los Angeles over Alternate U. S. Highway 101 to its junction with U. S. Highway 101 near El Rio; thence over U. S. Highway routes as specified above to San Francisco, and Berkeley, and return over the same routes; (4) From Los Angeles over U. S. Highway 99 to the intersection of California Highway 120; thence over California Highway 120 to junction U. S. Highway 50, thence over U. S. Highway 50 via Oakland to its junction with U. S. Highway 40; thence over U. S. Highway 40 to Berkeley; thence over U. S. Highway 40 and the San Francisco Oakland Bay Bridge to San Francisco, and return over the same route; (5) From Los Angeles over U. S. Highway 152 near Sharon; thence over California Highway 152 to junction U. S. Highway 101; thence over U. S. Highway 101, By-pass U. S. Highway 101 and state routes as stated above to San Francisco and Berkeley, and return over the same routes; and (6) From Los Angeles over U. S. Highway 101 and Alternate U. S. Highway 101 and U. S. Highway 101 to the intersection of California Highway 17 near San Jose, Calif.; thence over California Highway 17 to its junction with U. S. Highway 50; thence over U. S. Highway 50 to its junction with U. S. Highway 40; thence over U. S. Highway 40 to Berkeley, thence over U. S. Highway 40 and the San Francisco Oakland Bay Bridge to San Francisco, and return over the same routes, and intermediate and off-route points in the carrier's termini. Applicant is authorized to conduct operations in Missouri, Illinois, Kansas, Oklahoma, New Mexico, and California.

NOTE: Applicant states: The purpose of this application is to convert applicant's authority from irregular routes to regular routes after it has been acquired.

No. MC 110325 Sub 9, filed April 4, 1955, TRANSCON LINES, a corporation, 1206 South Maple Ave., Los Angeles, Calif. Applicant's attorney: Lee Reader, Suite 1010, 1012 Baltimore Ave., Kansas City 5, Mo. (*Instant application directly related to MC–F 5950 published issue of April 13, 1955, Page 2444.*) For authority to operate as a *common carrier*, over irregular routes, transporting: *General commodities*, except those of unusual value, Class A and B explosives, household goods as defined by the Commission, livestock, commodities in bulk, commodities requiring special equipment other than refrigeration, articles weighing in excess of 16,000 pounds or the dimensions of which exceed 8 feet by 8 feet by 18 feet, and commodities injurious or contaminating to other lading, between points in California in (1) The area embraced by the following boundary: Beginning at the point the San Francisco-San Mateo County Boundary Line meets the Pacific Ocean; thence easterly along said boundary line to a point one mile west of U. S. Highway No. 101; southerly along an imaginary line one mile west of and paralleling U. S. Highway No. 101 to its intersection with the corporate boundary of the City of San Jose, southerly, easterly and northerly along said corporate boundary to its intersection with State Highway No. 17, northerly along State Highway No. 17 to Warm Springs; northerly along the unnumbered highway via Mission San Jose and Niles to Hayward; northerly along Foothill Boulevard to Seminary Avenue; easterly along Seminary Avenue to Mountain Boulevard; northerly along Mountain Boulevard and Moraga Avenue to Estates Drive; westerly along Estates Drive, Harbord Drive and Broadway Terrace to College Avenue; northerly along College Avenue to Dwight Way; easterly along Dwight Way to the Berkeley-Oakland boundary line; northerly along said boundary line to the campus boundary of the University of California; northerly and westerly along the campus boundary of the University of California to Euclid Avenue; northerly along Euclid Avenue to Marin Avenue; westerly along Marin Avenue to Arlington Avenue; northerly along Arlington Avenue to U. S. Highway No. 40 (San Pablo Avenue); northerly along U. S. Highway No. 40 to and including the City of Richmond; southwesterly along the highway extending from the City of Richmond to Point Richmond; southerly along an imaginary line from Point Richmond to the San Francisco Waterfront at the foot of Market Street; westerly along said waterfront and shore line to the Pacific Ocean; southerly along the shore line of the Pacific Ocean to point of beginning, and (2) the area embraced by the following boundary: Beginning at the intersection of Sunset Boulevard and U. S. Highway No. 101, Alternate; thence northeasterly along Sunset Boulevard to State Highway No. 7; northerly along State Highway No. 7 to State Highway 118, northeasterly along State Highway No. 118 through and including the City of San Fernando, continuing northeasterly and southeasterly along State Highway No. 118 to and including the City of Pasadena; easterly along U. S. Highway No. 66 to State Highway No. 19; southerly along State Highway No. 19 to its intersection with U. S. Highway No. 101, Alternate, at Ximeno Street; southerly along Ximeno Street and its prolongation to the Pacific Ocean; westerly and northerly along the shore line of the Pacific Ocean to a point directly south of the intersection of Sunset Boulevard and U. S. Highway No. 101, Alternate; thence northerly along an imaginary line to point of beginning. Applicant is authorized to conduct operations in Missouri, Illinois, Kansas, Oklahoma, New Mexico, and California.

NOTE: Applicant states: This application is filed to obtain a Certificate of Public Convenience and Necessity covering intrastate rights under the Second Proviso of section 206 (a) (1) of the Interstate Commerce Act.

No. MC 110505 Sub 23, March 25, 1955, RINGLE TRUCK LINES, INC., 601 South Grant, Fowler, Ind. Applicant's attorney: Robert C. Smith, 512 Illinois Building, Indianapolis 4, Ind. For authority to operate as a *common carrier*, over irregular routes, transporting: *Roofing materials*, and *building materials*, between Joliet, Ill., on the one hand, and, on the other, points in Iowa, Wisconsin, West Virginia, and Kentucky, except Louisville, Ky. NOTE: Applicant states that it presently has authority to perform operations from Joliet, Ill., to points in Indiana, and from Whiting, Ind., to points in Iowa, Wisconsin, West Virginia, and Kentucky, through the gateway of Whiting, Ind., and that the purpose of this application is to remove the requirement that such operations from Joliet, Ill., be conducted through said gateway. Applicant is authorized to conduct operations in Illinois, Indiana, Iowa, Kentucky, Missouri, Ohio, West Virginia, and Wisconsin.

No. MC 111434 Sub 5, filed August 16, 1954, (Reopened - Further Hearing) VERL HAMILTON, Cortez, Colo. Applicant's attorney: Julian P. Hanrock, 17 West Main Street, Cortez, Colo. For authority to operate as a *common carrier*, over irregular routes, transporting: *Sulphuric acid*, from (1) Thompson, and Green River, Utah to Naturita, Durango, and Uravan, Colo., and points in San Juan County, N. Mex., and (2) Green River, Utah, to Bluewater, N. Mex., and return with *empty containers*, or *other such incidental facilities* (not specified) used in transporting the above-specified commodity. Applicant is authorized to conduct operations in Colorado, New Mexico, and Utah.

No. MC 112886 Sub 4, filed April 4, 1955, VERMONT TRANSPORT COMPANY, INC., 136 South Main Street, Barre, Vt. Applicant's representative: Oliver C. Peterson, 795 Elm Street, Manchester, N. H. For authority to operate as a *common carrier*, over irregular routes, transporting: *Granite*, from points in Berlin Township, Barre Township, Northfield Township, and Montpelier, Vt., to points in Ohio. Authority is being sought to convert applicant's present *contract carrier* authority to that of a *common carrier*, and is in lieu of the authority now held by the applicant. Concurrent with the issuance of the certificate applied for herein, the *contract carrier* operations should be revoked.

No. MC 115281, filed March 30, 1955, G. F. EDWARDS, Box 9, Elmhurst, Pa. For authority to operate as a *common carrier*, over irregular routes, transporting: *Pulverized limestone*, from Newton, N. J., to points in Lackawanna and Wyoming Counties, Pa.

No. MC 115285, filed March 31, 1955, SAMUEL L. GASCHO AND JOHN D. GASCHO, doing business as S. L. GASCHO & SON, 142 New Street, Burlington, Ontario, Canada. Applicant's attorney: Robert A. Sullivan, 2606 Guardian Building, Detroit 26, Mich. For authority to operate as a *common carrier*, over irregular routes, transporting: *Calcium chloride* in bags, and in bulk, from Ludington and Midland, Mich., to the International Boundary Line between the United States and Canada at or near Port Huron, Mich.

No. MC 115287, March 31, 1955, THOMAS P. GLAZE, Fourth and Central Avenue, P. O. Box 16, Connersville, Ind. Applicant's attorney: Glenn F. Morgan, 404–406 International Building, Washington 4, D. C. Applicant's representative: R. A. Ellison, Neave Building, 4th at Race, Cincinnati, Ohio. For authority to operate as a *common carrier*, over regular routes, transporting: (1) *General commodities*, except those of unusual value, Class A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, between Cincinnati, Ohio and Connersville, Ind., from Cincinnati over U. S. Highway 52 to Brooksville, Ind., thence over Indiana Highway 1 to Connersville. (2) *Newspapers*, serving all intermediate points on the above-described routes, and the off-route points of Metamora, Ind., (on U. S. Highway 52), and Fairfield, Ind., (on Indiana Highway 101).

No. MC 115294, filed April 4, 1955, GUERDON SCHUMACHER, Belmont, Wis. Applicant's attorney: E. A. Solie, 715 First National Bank Building, 1 South Pinckney Street, Madison 3, Wis. For authority to operate as a *common carrier*, over irregular routes, transporting: *Fertilizer*, from Stitzer, Wis., to points in Iowa, those in Illinois on and north of U. S. Highway 36, and those in Minnesota on and south of U. S. Highway 14, and *fertilizer compounds*, from LaPlatte, Nebr., to Stitzer, Wis.

No. MC 115295, filed April 4, 1955, PHILIP R. ZIEMANN, doing business as PHILIP ZIEMANN, 506 14th Street NW., Rochester, Minn. Applicant's representative: A. R. Fowler, 2288 University Avenue, St. Paul 14, Minn. For authority to operate as a *common carrier*, over irregular routes, transporting: *Animal feed* and *poultry feed*, from New Richmond, Wis., to points in the Townships

of Kalmar, Cascade, Haverhill, Salem, Rochester, and Marion, in Olmstead County, Minn.

APPLICATIONS OF PASSENGERS

No. MC 3647 Sub 183, filed March 21, 1955. PUBLIC SERVICE COORDINATED TRANSPORT, a corporation, 80 Park Place, Newark, N. J. Applicant's attorney: Winslow B. Ingham, Public Service Terminal, Newark 1, N. J. For authority to operate as a *common carrier*, over regular routes, transporting: *Passengers* and their *baggage*, and *express* and *newspapers* in the same vehicle with passengers, (1) from junction White Horse Pike (U. S. Highway 30) and Warwick Road, Magnolia, N. J., over Warwick Road through Somerdale, Hi-Nella and Stratford, to junction Elm Aevnue, Laurel Springs, thence over Elm Avenue to junction Linden Avenue (Stone Road) thence over Linden Avenue (Stone Road) to junction White Horse Pike (U. S. Highway 30) in Lindenwold, N. J., and return over the same route, serving all intermediate points; (2) from junction Warwick Road and Lincoln Avenue, Magnolia, N. J., over Lincoln Avenue to junction East Atlantic Avenue, thence over East Atlantic Avenue to junction Warwick Road, Somerdale, and return over the same route, serving all intermediate points; and (3) from junction Chews Landing Road and Blackwood Road, Clementon, N. J., over Chews Landing Road, to junction Laurel Road, Lindenwold, N. J. Return from junction Chews Landing Road and Laurel Road, Lindenwold, N. J., over Laurel Road, to junction 8th Avenue, thence over 8th Avenue to junction Scott Avenue, thence over Scott Avenue to junction Chews Landing Road, thence over Chews Landing Road to Blackwood Road, Clementon, serving all intermediate points. Applicant is authorized to conduct operations in New Jersey, New York and Pennsylvania.

CORRECTIONS

No. MC 68618 Sub 20, CORRECTION: Published in issue of April 6, 1955, on page 2180. Should read as follows: LOS ANGELES-SEATTLE MOTOR EXPRESS, INC., 3200 Sixth Avenue South, Seattle, Wash. Applicant's attorney: William B. Adams, Pacific Building, Portland 4, Oreg. For authority to operate as a *common carrier*, over regular routes, transporting: *General commodities*, except those of unusual value, and except Class A, B, and C explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment other than refrigeration, (a) between Portland, Oreg., and Hubbard, Oreg., from Portland over U. S. Highway 99W to junction of U. S. Highway 99W and Oregon Highway 57, thence over Oregon Highway 57 to junction of Oregon Highway 57 and Oregon Highway 51, thence over Oregon Highway 51 to junction of Oregon Highway 51 and U. S. Highway 99E, thence over U. S. Highway 99E to Hubbard, and return over the same route, serving all intermediate points; (b) between the north junction of Salem, Oregon By-Pass and U. S. Highway 99E and the south junction of Salem By-Pass and U. S. Highway 99E via Salem By-Pass, and return over the same route, serving no intermediate points, as an alternate route in connection with carrier's regular-route operations between Seattle, Wash., and Los Angeles, Calif.; (c) between north junction of unnumbered highway and U. S. Highway 99E, over unnumbered highway via Jefferson, Oreg., to junction of said unnumbered highway and U. S. Highway 99E, serving the intermediate point of Jefferson, Oreg.; (d) between Eugene, Oreg., and Goshen, Oreg., from Eugene over U. S. Highway 126 to junction U. S. Highway 126 and Oregon Highway 225, thence over Oregon Highway 225 to junction Oregon Highway 225 and U. S. Highway 99 at or near Goshen, and return over the same route, serving all intermediate points; (e) between Anlauf, Oreg., and Rice Hill, Oreg., from Anlauf over Oregon Highway 45 to Rice Hill via Drain, Oreg., and return over the same route, serving all intermediate points; (f) between Oakland, Oreg., and Shady Point, Oreg., from Oakland over Oregon Highway 234 to Shady Point, and return over the same route, serving all intermediate points. NOTE: By routes (c), (d), (e) and (f) as set out above, applicant is seeking to amend its present authority because of relocation of portions of U. S. Highway 99E. Applicant is authorized to conduct opefations in California, Oregon and Washington.

No. MC 62396 Sub 3. CHARLES W. POOLE & PRESTON POOLE, doing business as POOLE'S DRAYAGE CO., 1619 Eckington Place, NE., Washington, D. C., published in issue of April 13, 1955, on page 2438, should read Sub 3 instead of Sub "B".

APPLICATIONS UNDER SECTION 5 AND 210a (b)

No. MC–F 5932. Authority sought for purchase by SANTA FE TRANSPORTATION COMPANY, 1100 So. San Pedro Street, Los Angeles 15, Calif., of the operating rights and certain property of PACIFIC MOTOR TRUCKING COMPANY, 65 Market Street, San Francisco, Calif., and for acquisition by THE ATCHISON, TOPEKA AND SANTA FE RAILWAY COMPANY of control of the operating rights and property through the purchase. Applicants' attorneys: Starr Thomas, 80 East Jackson Blvd., Chicago 4, Ill., Frederick G. Pfrommer, 114 Sansome Street, San Francisco 4, Calif., R. E. Wedekind, 65 Market Street, San Francisco 5, Calif. Operating rights sought to be purchased: (1) That portion of the general commodity and specified commodity rights (other than petroleum and petroleum products) sought to be acquired by vendor herein from PACIFIC FREIGHT LINES in No. MC–F 5783 (notice published in the September 22, 1954, issue of the FEDERAL REGISTER, at page 6097), which will enable vendee to conduct operations between, on the one hand, points served by THE ATCHISON, TOPEKA AND SANTA FE RAILWAY COMPANY and not served by SOUTHERN PACIFIC COMPANY or any of its subsidiary or affiliated companies, and, on the other hand, all points served, both exclusively and non-exclusively, by THE ATCHISON, TOPEKA AND SANTA FE RAILWAY COMPANY, over routes or portions thereof presently operated by PACIFIC FREIGHT LINES: and (2) Those portions of the interstate operating rights which vendor may acquire from PACIFIC FREIGHT LINES authorizing transportation over irregular routes of petroleum and petroleum products to all points in Mohave, Coconino and Yavapai Counties, Ariz., and in addition all points in Yuma and Maricopa Counties, Ariz., lying on or north of THE ATCHISON, TOPEKA AND SANTA FE RAILWAY or north of Arizona Highway 72 to its junction with U. S. Highway 70, thence over U. S. Highway 70, whichever is more southerly, to and including Phoenix and including points west of a line running north from Phoenix. Vendee is authorized to operate in California. Application has not been filed for temporary authority under section 210a (b). Application No. MC 78786 Sub 205, published in this issue of the FEDERAL REGISTER, is a directly related matter.

No. MC–F–5953. Authority sought for purchase by BARNES TRUCK LINE, INC., 506 Mayo St., Wilson, N. C., of the operating rights of MANNIE HURWITZ, doing business as D-C EXPRESS CO., P. O. Box 7477, Baltimore, Md., and for acquisition by ROY L. BARNES and EDDIE L. BARNES, Wilson, N. C., of control of the operating rights through the purchase. Applicants' attorney: James E. Wilson, Continental Bldg., Washington, D. C. Operating rights sought to be transferred: *General commodities*, with certain exceptions, not including household goods, as a *common carrier*, over regular routes, between Baltimore, Md., and Washington, D. C., serving all intermediate and certain off-route points. Vendee is authorized to operate in Maryland, Florida, North Carolina, Alabama, Virginia, Mississippi, Arkansas, New Jersey, Tennessee, Rhode Island, Indiana, Delaware, Illinois, West Virginia, Wisconsin, Michigan, West Virginia, Minnesota, Missouri, Kansas, Massachusetts, South Carolina, Nebraska, Georgia, Oklahoma, Pennsylvania, Texas, New York, South Dakota, Iowa, and the District of Columbia. Application has not been filed for temporary authority under section 210a (b).

No. MC–F–5954. Authority sought for purchase by COLONIAL FAST FREIGHT LINES, INC., 1201—1st Ave., No., Birmingham, Ala., of a portion of the operating rights and certain property of C. E. McBRIDE, doing business as COLONIAL FAST FREIGHT LINES, 1201—1st Ave., No., Birmingham, Ala., and for acquisition by C. E. McBRIDE, Birmingham, Ala., of control of said operating rights and certain property through the purchase. Applicants' attorney: Bennett T. Waites, 531–34 Frank Nelson Bldg., Birmingham, Ala. Operating rights sought to be transferred: *Iron and steel mill products*, and *commodities* the transportation of which because of their size or weight requires the use of special equipment, and *related machinery parts* and *related contractors' materials and supplies* when their transportation is incidental to the transportation by applicant of commodities which by reason of size or weight require special equipment, as a *common carrier*, over irregular routes, between Birmingham, Ala., and points within ten miles thereof, on the one hand, and, on the other, points in Florida, Georgia, Tennessee, Mississippi, and those in Louisiana east of the Mississippi River. Vendee is not a motor carrier, however, in No. MC–F–5955, C. E. McBride has applied for authority to control Colonial Refrigerated Transportation, Inc., which seeks, in the same proceeding, to acquire a portion of the operating rights of vendor herein. Application has not been filed for temporary authority under section 210a (b).

No. MC–F–5955. Authority sought for purchase by COLONIAL REFRIGERATED TRANSPORTATION, INC., 1201 1st Ave., No., Birmingham, Ala., of a portion of the operating rights and certain property of C. E. McBRIDE, doing business as COLONIAL FAST FREIGHT LINES, 1201 1st Ave., No., Birmingham, Ala., and for acquisition by C. E. McBRIDE, Birmingham, Ala., of control of said operating rights and property through the purchase. Applicants' attorney: Bennett T. Waites, 531–34 Frank Nelson Bldg., Birmingham, Ala. Operating rights sought to be transferred: *Dairy products, fresh meats, meats, meat products, and meat by-products, fresh fruits and vegetables, fresh poultry and seafood, frozen fcod*, including *frozen fish, fruits, vegetables, poultry and seafood*, as a *common carrier*, over irregular routes, from, to and between certain points in Maine, Massachusetts, Rhode Island, Alabama, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Pennsylvania, New York, New Jersey, Delaware, Maryland, Virginia, Connecticut, Illinois, Indiana, Kentucky, Michigan, Ohio, West Virginia, Wisconsin, Arkansas, and the District of Columbia. Vendee is not a motor carrier, however, in No. MC–F–5954, C. E. McBride has applied for authority to control Colonial Fast Freight Lines, Inc., which seeks, in the same proceeding, to acquire a portion of the operating rights of vendor herein. Application has not been filed for temporary authority under section 210a (b).

No. MC–F–5956. Authority sought for purchase by WORSTER MOTOR LINES, INC., East Main Road, R. D. #1, North East, Pa., of a portion of the operating rights of CLYDE H. WOLFE, doing business as WESTFIELD MOVING AND DELIVERY SERVICE, 102 Chestnut St., Westfield, N. Y., and for acquisition by DAVID B. WORSTER, North East, Pa., of control of said operating rights through the purchase. Applicants' attorney: William W. Knox, 1102 Palace Bldg., Erie, Pa. Operating rights sought to be transferred: *Fruit and fruit products*, as a *common carrier*, over irregular routes, between Westfield and Silver Creek, N. Y., and North East and Erie, Pa. Vendee is authorized to operate in Pennsylvania, New York, Ohio, Massachusetts, Connecticut, Rhode Island, New Jersey, Delaware, Maryland, West Virginia, Michigan, Indiana, Illinois, and the District of Columbia. Application has not been filed for temporary authority under section 210a (b).

No. MC–F–5957. Authority sought for purchase by CLYDE H. WOLFE, doing business as WESTFIELD MOVING AND DELIVERY SERVICE, 102 Chestnut St., Westfield, N. Y., of a portion of the operating rights of WORSTER MOTOR LINES, INC., East Main Road, R. D. #1, North East, Pa. Applicants' attorney: William W. Knox, 1102 Palace Bldg., Erie, Pa. Operating rights sought to be transferred: *Household goods* as defined by the Commission, as a *common carrier*, over irregular routes, between points in Erie County, Pa., on the one hand, and, on the other, points in Ohio and New York. Vendee is authorized to operate in New York and Pennsylvania. Application has not been filed for temporary authority under section 210a (b).

By the Commission.

[SEAL] HAROLD D. MCCOY, *Secretary*.

SECURITIES AND EXCHANGE COMMISSION

[File No. 70–3358]

PUBLIC SERVICE COMPANY OF OKLAHOMA AND CENTRAL AND SOUTH WEST CORP.

NOTICE OF FILING REGARDING ISSUANCE AND SALE BY SUBSIDIARY PUBLIC UTILITY COMPANY OF PREFERRED STOCK, ISSUANCE BY SUBSIDIARY PUBLIC UTILITY COMPANY TO PARENT REGISTERED HOLDING COMPANY OF COMMON STOCK AS STOCK DIVIDEND, AND AMENDMENT BY PUBLIC UTILITY COMPANY OF ARTICLES OF INCORPORATION; ORDER REGARDING SOLICITATION OF PROXIES FROM STOCKHOLDERS

APRIL 14, 1955.

Notice is hereby given that Central and South West Corporation ("Central"), a registered holding company, and its public-utility subsidiary, Public Service Company of Oklahoma ("Public Service"), have filed a joint application-declaration with this Commission pursuant to the provisions of the Public Utility Holding Company Act of 1935 ("Act"). Applicant-declarants have designated sections 6, 7, 9 and 10 of the act and Rules U-43 and U-50 promulgated thereunder as applicable to the transactions proposed in said application-declaration.

All interested persons are referred to said application-declaration for a statement of the proposed transactions, which are summarized as follows:

Public Service proposes, by amendment of its Articles of Incorporation, to increase the total number of authorized shares of its preferred stock from 203,500 shares, par value $100 per share, of which 148,500 shares are presently outstanding, to 350,000 shares, par value $100 per share, and thereupon to issue and sell 100,000 shares of the authorized but unissued shares of its preferred stock. The price to be paid to the company for the preferred stock (which shall be not less than $100 nor more than $102.75 per share) and the dividend rate thereof (which shall be a multiple of 4/100 of 1 percent) will be determined by competitive bidding pursuant to Rule U-50.

Public Service states that the net proceeds received from the sale of its preferred stock will be applied to its construction program, which for the calendar years 1955 and 1956 is estimated at approximately $52,500,000.

Public Service also proposes to issue and deliver to Central, and Central proposes to acquire, 300,000 shares of common stock, par value $10 per share, as a stock dividend. In connection therewith, Public Service proposes to transfer on its books from earned surplus to stated capital the sum of $10 for each of said additional shares of common stock, or a total of $3,000,000.

Public Service further proposes to solicit proxies from its stockholders to vote on amendments to its Articles of Incorporation, including the following: (i) To increase the number of shares of authorized preferred stock from 203,500 shares to 350,000 shares; (ii) to increase the amount of unsecured indebtedness which the company may issue or assume without the consent of preferred stockholders from 10 percent to 20 percent of the aggregate of secured debt and capital stock and surplus; (iii) to permit, in addition to the dividends which can be paid under existing restrictions, the payment of any dividends which the company could have paid, but had not paid, in any previous year or years; (iv) to reduce from two-thirds to a majority the vote of the preferred stock required to authorize the issuance of additional preferred stock ranking on a parity with the outstanding preferred stock unless specified requirements as to gross income and common stock equity are met; and (v) to prohibit the acquisition or redemption of preferred stock when dividends are in arrears unless all outstanding stock shall be redeemed or retired, or approval is obtained under the act.

Public Service states that adoption of the proposed amended Articles of Incorporation will require the affirmative vote of the holders of at least two-thirds of the outstanding shares of its preferred stock and the holders of a majority of its common stock all of which is owned by Central.

Public Service states that the transactions proposed herein are subject to the jurisdiction of the Corporation Commission of the State of Oklahoma and that no other State commission and no Federal regulatory agency, other than this Commission, has jurisdiction over the proposed transactions.

Public Service requests that the Commission, on or before April 15, 1955, permit its declaration to become effective with respect to the proposed solicitation of proxies, for the special meeting of stockholders (preferred and common) to be held on May 17, 1955, to vote on the proposed amendment to the Articles of Incorporation.

Public Service states that the fees and expenses to be paid or incurred by it in connection with the proposed solicitation of proxies, other than the costs of preparing, assembling, and mailing such statements, will not exceed $2,000.

The Commission having examined the declaration and the material proposed to be used in connection with the solicitation of proxies, and finding that the applicable provisions of section 12 (e) of the act and Rules U-62 and U-65 promulgated thereunder have been satisfied, and deeming it appropriate in the public interest, and in the interest of investors and consumers, to grant Public Service's request and permit the declaration to become effective forthwith, insofar at it relates to the solicitation of proxies:

It is ordered, That the declaration, insofar as it relates to the proposed solicitation of proxies, be, and the same hereby is, permitted to become effective forthwith, subject to the terms and conditions prescribed in Rule U-24.

Notice is further given that any interested person may, not later than April 28, 1955, at 5:30 p. m., e. d. s. t., request the Commission in writing that a hearing be held on the application-declaration with respect to the issuance and sale by Public Service of the 100,000 shares of __ percent Preferred Stock, and the issuance by Public Service, as a stock dividend, of 300,000 shares of common stock and the acquisition of the common stock by Central, stating the nature of his interest, the reason for such request, and the issues of fact or law raised by such filing which he proposes to controvert, or he may request to be notified if a hearing shall be ordered thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D. C. At any time after said date, said application-declaration, as filed or as it may hereafter be amended, may be granted and permitted to become effective pursuant to Rule U-23, or the proposed transactions may be exempted as provided in Rules U-20 (a) and U-100 promulgated under the act.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

[File No. 70-3363]

JERSEY CENTRAL POWER & LIGHT CO.

NOTICE OF FILING REGARDING ISSUANCE AND SALE OF FIRST MORTGAGE BONDS AT COMPETITIVE BIDDING

APRIL 14, 1955.

Notice is hereby given that Jersey Central Power & Light Company ("Jersey Central"), an electric utility subsidiary of General Public Utilities Corporation ("GPU"), a registered holding company, has filed an application with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"). The filing has designated section 6 (b) of the act and Rule U-50 promulgated thereunder as being applicable to the proposed application.

All interested persons are referred to said application which is on file in the office of this Commission for a statement of the transactions therein proposed which are summarized as follows:

Jersey Central proposes to issue and sell, pursuant to the competitive bidding provisions of Rule U-50, $20,000,000 principal amount of First Mortgage Bonds, __ Series due 1985. The bonds will be issued under and secured by the company's Mortgage Indenture dated March 1, 1946, as heretofore supplemented and as to be further supplemented by a Fourth Supplemental Indenture to be dated May 1, 1955.

The application states that $12,250,000 of the net proceeds from the sale of the bonds will be used to prepay indebtedness of Jersey Central and the balance of $7,750,000 will be aplied to the cost of Jersey Central's 1955 construction program. The indebtedness to be prepaid consists of Jersey Central's outstanding First Mortgage Bonds, 4 percent Series due 1983, in the aggregate principal amount of $8,500,000 and Notes, issued under a Credit Agreement, in the face amount of $3,750,000. The redemption premium and accrued interest applicable to the bonds and the accrued interest on the Notes will be paid from Jersey Central's treasury funds. The application further states that Jersey Central's construction program for 1955 contemplates the expenditure of $18,200,000 and that this amount will be provided for as follows: (i) $7,750,000 from the proceeds of the sale of the proposed new bonds; (ii) $4,000,000 heretofore realized from the sale by Jersey Central of 400,000 shares of its common stock to GPU (the sale of these additional shares of common stock having been the subject of the proceedings in SEC File No. 70-3341); and (iii) the balance from operations and from short-term bank borrowings which Jersey Central contemplates pursuant to the provisions of the first sentence of section 6 (b) of the act and which will be discharged out of the proceeds of subsequent permanent financing by Jersey Central.

The filing states that authority to issue and sell the bonds is being sought from the Board of Public Utility Commissioners of the State of New Jersey.

In connection with the amortization of the redemption premium and duplicate interest arising from the redemption of the 1983 Series Bonds Jersey Central proposes to make a special charge to income equal to the amount of the estimated reduction in 1955 Federal income taxes arising from the redemption of the 1983 Series Bonds (presently estimated at approximately $160,000) and to amortize the balance of the redemption premium and duplicate interest (less the unamortized premium, net of expenses, applicable to the 1983 Series Bonds) in annual amounts equal to the net savings resulting from the refunding. It is presently estimated that this balance will approximate $164,900 and that the amortization period, depending on the interest rate of the new bonds and the income tax rates in effect during the period of amortization, will be six or seven years long. The filing expressly provides that in the event this Commission determines not to exercise any jurisdiction it may have over the proposed accounting treatment for the transactions which are the subject of this application "* * * Jersey Central * * * consents to the non-exercise of jurisdiction by the Commission with respect to such accounting * * * [and] then contemplates the filing of a Petition with the Federal Power Commission seeking authority to effectuate the amortization of a portion of the redemption premium and duplicate interest arising from the redemption of the 1983 Series Bonds * * *" in the manner above described.

Jersey Central estimates that fees and expenses to be paid by the company applicable to the proposed issuance and sale of bonds will aggregate $88,000, including printing and engraving in the amount of $29,000, and legal fees and expenses of $12,000.

Notice is further given that any interested person may, not later than May 2, 1955, at 5:30 p. m., e. d. s. t., request the Commission in writing that a hearing be held on such matter, stating the reasons for such request, the nature of his interest and the issues of fact or law raised by said application which he desires to controvert, or may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D. C. At any time after May 2, 1955, said application, as filed or as amended, may be granted as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may take such other action as it deems appropriate.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

FEDERAL REGISTER

VOLUME 20 NUMBER 78

Washington, Thursday, April 21, 1955

TITLE 3—THE PRESIDENT

EXECUTIVE ORDER 10603

AMENDMENT OF EXECUTIVE ORDER NO. 10309,[1] PROVIDING FOR THE RESTORATION OF POSSESSION, USE, AND CONTROL OF CERTAIN LANDS RESERVED FOR MILITARY PURPOSES TO THE TERRITORY OF HAWAII AND TRANSFER OF TITLE TO SUCH LANDS TO THE TERRITORY

WHEREAS by Executive Order No. 10309 of December 3, 1951, the President of the United States directed that possession, use, and control of certain lands reserved for military purposes be restored to the Territory of Hawaii and that title to such lands be transferred to the Territory, subject to the conditions contained in such order; and

WHEREAS the description of course 6 of Tract No. 1 described in the said Executive order is erroneous; and

WHEREAS there was excepted and excluded from the application of the said Executive Order No. 10309 a portion of the said Tract No. 1, containing 6,920 square feet or 0.16 acre, because such land had been transferred to the control and jurisdiction of the Secretary of War (now Secretary of the Army) by letter of the Secretary of Labor (Immigration Service) dated December 16, 1939, pursuant to the act of Congress approved August 5, 1939, 53 Stat. 1209; and

WHEREAS the act of July 27, 1954, 68 Stat. 567 (Public Law 539, 83d Congress), provides, in part, that notwithstanding the said act of August 5, 1939, the President may exercise with respect to the said 0.16 acre of land transferred to the Secretary of War by letter of the Secretary of Labor dated December 16, 1939, all those powers which are conferred upon the President by the second sentence of section 91 of the Hawaiian Organic Act as amended (48 U. S. C. 511) with respect to other ceded property taken for the uses and purposes of the United States; and

WHEREAS it is deemed desirable and in the public interest that the said error in description be corrected, and that the provisions of Executive Order No. 10309 be made applicable to the said 0.16 acre of land:

NOW, THEREFORE, by virtue of the authority vested in me by the said act of July 27, 1954, and by section 91 of the said Hawaiian Organic Act as amended by section 7 of the act of May 27, 1910, 36 Stat. 447 (48 U. S. C. 511), it is ordered that the description of Tract No. 1 contained in the said Executive Order No. 10309 of December 3, 1951, be, and it is hereby, amended to read as follows:

TRACT NO. 1

Beginning at a lead plug at the west corner of this piece of land, on the southeasterly side of the area formerly known as Channel Street, the coordinates of the said point of beginning referred to Government Survey Triangulation Station "Punchbowl" being 4412.22 feet south and 5678.39 feet west, thence running by azimuths measured clockwise from true south:

1. 219° 00' 00" 154.09 feet along the southeasterly side of the area formerly known as Channel Street; thence along such area on a curve to the right with a radius of 20.00 feet, the chord azimuth and distance being;
2. 264° 00' 00" 28.28 feet;
3. 309° 00' 00" 172.16 feet along the same and along land formerly a portion of U. S. Immigration Station lot (Executive Order No. 10419 of December 11, 1952);
4. 38° 48' 30" 270.86 feet along the remainder of Tract No. 1 of Fort Armstrong Military Reservation;
5. 128° 48' 30" 25.98 feet along a portion of the U. S. Public Health Station lot (item 1 (a), act of July 27, 1954, 68 Stat. 567);
6. 218° 57' 20" 96.70 feet along the same;
7. 129° 03' 00" 167.01 feet along the same to the point of beginning; and containing an area of 35,932 square feet or 0.82 acre.

The provisions of Parts I and II of Executive Order No. 10309, including those relating to certificates of acceptance of work by the Department of the Army, shall be applicable to the said 0.16 acre of Tract No. 1 in the same manner and to the same extent as they would have been if the said land had not been excluded from the application thereof.

DWIGHT D. EISENHOWER

THE WHITE HOUSE,
April 19, 1955.

FEDERAL REGISTER

Published daily, except Sundays, Mondays, and days following official Federal holidays, by the Federal Register Division, National Archives and Records Service, General Services Administration, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U. S. C., ch. 8B), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President. Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15 cents) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, directly to the Government Printing Office, Washington 25, D. C.

The regulatory material appearing herein is keyed to the CODE OF FEDERAL REGULATIONS, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended August 5, 1953. The CODE OF FEDERAL REGULATIONS is sold by the Superintendent of Documents. Prices of books and pocket supplements vary.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER, or the CODE OF FEDERAL REGULATIONS.

TITLE 6—AGRICULTURAL CREDIT

Chapter IV—Commodity Stabilization Service and Commodity Credit Corporation, Department of Agriculture

Subchapter B—Loans, Purchases, and Other Operations

[1954 C. C. C. Grain Price Support Bulletin 1, Supp. 2, Flaxseed]

PART 421—GRAINS AND RELATED COMMODITIES

SUBPART—1954-CROP FLAXSEED RESEAL LOAN PROGRAM

A reseal loan program has been announced for 1954-crop flaxseed. The 1954 C. C. C. Grain Price Support Bulletin 1 (19 F. R. 967, 1595 and 6901), issued by the Commodity Credit Corporation and containing the general requirements with respect to price support operations for grains and related commodities produced in 1954, supplemented by Supplement 1, Flaxseed (19 F. R. 1578, 2714, 2843, 7103; 20 F. R. 323), containing the specific requirements for the 1954-crop flaxseed price support program is hereby further supplemented as follows:

Sec.
421.661 Applicable sections of 1954 C. C. C. Grain Price Support Bulletin 1, and Supplement 1, Flaxseed.
421.662 Availability.
421.663 Eligible producer.
421.664 Eligible flaxseed.
421.665 Approved storage.
421.666 Approved forms.
421.667 Quantity eligible for resealing.
421.668 Additional service charges.
421.669 Transfer of producer's equity.
421.670 Storage and track-loading payments.
421.671 Maturity and satisfaction.
461.672 Support rates.
461.673 CSS commodity offices.

AUTHORITY: §§ 421.661 to 421.673 issued under sec. 4, 62 Stat. 1070, as amended; 15 U. S. C. 714b. Interpret or apply sec. 5, 62 Stat. 1072, secs. 301, 401, 63 Stat. 1054; 15 U. S. C. 714c, 7 U. S. C. 1447, 1421.

§ 421.661 *Applicable sections of 1954 C. C. C. Grain Price Support Bulletin 1, and Supplement 1, Flaxseed.* The following sections of the 1954 C. C. C. Grain Price Support Bulletin 1, as amended, and Supplement 1, Flaxseed, as amended, published in 19 F. R. 967, 1578, 1595, 2714, 2843, 6901, 7103 and 20 F. R. 323, shall be applicable to the 1954 Flaxseed Reseal Loan Program: § 421.401 *Administration;* § 421.405 *Approved lending agencies;* § 421.408 *Liens;* § 421.410 *Set-offs;* § 421.411 *Interest rate;* § 421.413 *Safeguarding the commodity;* § 421.414 *Insurance on farm-storage loans;* § 421.415 *Loss or damage to the commodity;* § 421.416 *Personal liability of the producer;* § 421.417 *Release of the commodity under loan;* § 421.419 *Foreclosure;* § 421.420 *Purchase of notes;* § 421.655 *Determination of quantity;* § 421.656 *Determination of quality.* Other sections of the 1954 C. C. C. Grain Price Support Bulletin 1, as amended, and Supplement 1, Flaxseed, as amended, shall be applicable to the extent indicated in this subpart.

§ 421.662 *Availability*—(a) *Area and scope.* The reseal program will be available in areas in the following States where ASC State committees determine that there may be a shortage of storage space and that flaxseed can be safely stored on farms for the period of the reseal loan: Idaho, Iowa, Kansas, Minnesota, Montana, North Dakota, and South Dakota. This program provides, under certain circumstances, for the extension of 1954-crop farm-storage loans and the making of farm-storage loans on 1954-crop flaxseed covered by purchase agreements. Neither warehouse-storage loans nor purchase agreements will be available to producers under this program.

(b) *Time.* (1) The producer who desires to participate in the reseal loan program must file an application for a farm-storage reseal loan with the county committee.

(2) In the case of a farm-storage loan, the producer will be required to apply for extension of his loan before the final date for delivery specified in the delivery instructions issued to him by the county committee.

(3) The producer who signed a purchase agreement on farm-stored flaxseed is required, under the 1954 Flaxseed Price Support Program to notify the county committee not later than April 30, 1955, in the case of flaxseed stored in any of the States listed in paragraph (a) of this section if he intends to sell the flaxseed to CCC. If the producer has notified the county committee, on or before April 30, 1955, of his intention to sell the flaxseed to CCC or to participate in this program, he may obtain a farm-stored loan on the flaxseed. The loan documents must be executed by the producer on or before the final date for delivery specified in the delivery instructions or on or before June 30, 1955, if the producer has not requested or received delivery instructions. The loan documents must be presented for disbursement within 15 days after execution. Disbursement of loans will be made to producers by approved lending agencies under an agreement with CCC, or by ASC county offices by means of sight drafts drawn on CCC. Payment in cash, credit to the producer's account, or the drawing of a check or draft shall constitute disbursement. The producer shall not present the loan documents for disbursement unless the flaxseed is in existence and in good condition. If the flaxseed was not in existence and in good condition at the time of disbursement, the total amount disbursed under the loan shall be promptly refunded by the producer. In the event the amount disbursed exceeds the amount authorized under this subpart, the producer shall be personally liable for repayment of the amount of such excess.

(c) *Source.* A producer desiring to participate in the reseal loan program should make application to the county committee which approved his loan or purchase agreement. Disbursements of loans completed on flaxseed covered by purchase agreements shall be made to producers by ASC county offices by means of sight drafts drawn on CCC or

by approved lending agencies under agreements with CCC.

§ 421.663 *Eligible producer.* An eligible producer shall be any individual, partnership, association, corporation, or other legal entity who produced the flaxseed in 1954 as landowner, landlord, tenant, or sharecropper and who either completed a farm-storage loan or signed a purchase agreement covering flaxseed of the 1954 crop.

§ 421.664 *Eligible flaxseed*—(a) *Requirements of eligibility.* The flaxseed (1) must meet the requirements set forth in § 421.653 (a), (b) and (c); and (2) must be under price support loan or purchase agreement.

(b) *Inspection*—(1) *Extended farm-storage loans.* If a producer makes application to extend his farm-storage loan, the commodity loan inspector shall, with the producer, reinspect the flaxseed and structure in which the flaxseed is stored. If recommended by either the commodity loan inspector or the producer, a sample of the flaxseed shall be taken and submitted for grade analysis.

(2) *Flaxseed covered by purchase agreement.* If a producer makes application for a farm-storage loan on flaxseed covered by a purchase agreement, the commodity loan inspector shall inspect the flaxseed and storage structure, obtain a sample if the flaxseed and structure appear eligible, and proceed in the regular manner for the inspection of a commodity to be placed under loan.

§ 421.665 *Approved storage.* Flaxseed covered by any loans extended and any new loans completed must be stored in structures which meet the requirements for farm-storage loans as provided in § 421.406 (a). Consent for storage for any loans extended or new loans completed must be obtained by the producer for the period ending June 30, 1956, if the structure is owned or controlled by someone other than the producer, or if the lease expires prior to June 30, 1956.

§ 421.666 *Approved forms.* (a) The approved forms, which together with the provisions of this subpart govern the rights and responsibilities of the producer, shall consist of a Producer's Note and Supplemental Loan Agreement, Commodity Loan Form A, secured by a Comodity Chattel Mortgage on Commodity Loan Form AA, and such other forms and documents as may be prescribed by CCC. Notes and chattel mortgages must have State and documentary revenue stamps affixed thereto where required by law. Loan documents executed by an administrator, executor, or trustee will be aceptable only where legally valid.

(b) Where required by State law, a new producer's note and chattel mortgage shall be completed when a farm-storage loan is extended.

§ 421.667 *Quantity eligible for reseal-ing.* (a) The quantity of flaxseed eligible for reseal on an extended farm-storage loan will be the quantity shown on the original note and chattel mortgage, less any quantity delivered or redeemed.

(b) A producer may obtain a loan on not in excess of the quantity of flaxseed specified in the purchase agreement, minus any quantity of the flaxseed under such purchase agreement (1) which has been previously placed under loan or (2) on which he exercises his option to sell to CCC.

§ 421.668 *Additional service charges.* (a) When a farm-storage loan is extended, the producer will not be required to pay an additional service charge.

(b) At the time a farm-storage loan is made to the producer on flaxseed covered by a purchase agreement, the producer shall pay an additional service charge of ½ cent per bushel on the number of bushels placed under loan, or $1.50, whichever is greater. No refund of service charges will be made.

§ 421.669 *Transfer of producer's equity.* The producer shall not transfer either his remaining interest in or his right to redeem the flaxseed mortgaged as security for a loan under this program. A producer who wishes to liquidate all or part of his loan by contracting for the sale of the flaxseed must obtain written prior approval of the county committee on Commodity Loan Form 12 to remove the flaxseed from storage when the proceeds of the sale are needed to repay all or any part of the loan. Any such approval shall be subject to the terms and conditions set out in Commodity Loan Form 12, copies of which may be obtained by producers or prospective purchasers at the office of the county committee.

§ 421.670 *Storage and track-loading payments*—(a) *Storage payment.* A reseal storage payment will be made as follows:

(1) *Storage payment for full reseal period.* A storage payment computed at the rate of 16 cents per bushel will be made to the producer on the quantity involved if he (i) redeems flaxseed from the loan on or after April 30, 1956, (ii) delivers the flaxseed to CCC on or after April 30, 1956, or (iii) delivers the flaxseed to CCC prior to April 30, 1956 pursuant to demand by CCC for repayment of the loan solely for the convenience of CCC, if the flaxseed was not damaged or otherwise impaired due to negligence on the part of the producer.

(2) *Prorated storage payment.* A prorated storage payment computed at the rate of $0.00053 per bushel a day (but not to exceed 16 cents per bushel), according to the length of time the quantity of flaxseed involved was in store after June 30, 1955, will be made to the producer (i) in the case of loss assumed by CCC under the provisions of the loan program, (ii) in the case of flaxseed redeemed from the loan prior to April 30, 1956, and (iii) in the case of flaxseed delivered to CCC pursuant to its demand and not solely for the convenience of CCC, or upon request of the producer and with the approval of CCC, prior to April 30, 1956: *Provided, however,* That no storage payment will be made where the delivered flaxseed is damaged or otherwise impaired due to negligence on the part of the producer. In the case of losses assumed by CCC, the period for computing the storage payment shall end on the date of the loss; and in the case of redemptions on the date of repayment.

(3) In no case will any storage payment be made where the producer has made any false representation in the loan documents or in obtaining the loan, or where the flaxseed has been abandoned, or where there has been conversion on the part of the producer.

(b) *Track-loading payment.* A track-loading payment of 3 cents per bushel will be made to the producer on flaxseed delivered to CCC, in accordance with instructions of the county committee, on track at a country point.

§ 421.671 *Maturity and satisfaction.* (a) Loans will mature on demand but not later than April 30, 1956. The producer must pay off his loan, plus interest on or before maturity or deliver the mortgaged flaxseed in accordance with the instructions of the county committee. Credit will be given at the applicable settlement value according to grade and/or quality for the total quantity eligible for delivery. Delivery of flaxseed will be accepted only from bin(s) in which the flaxseed under reseal loan is stored. The provisions of § 421.418 (a), (c) and (e) (2) and (3), and of § 421.660 (a) (1) and (2) shall be applicable thereto.

§ 421.672 *Support rates.* (a) The support rate for an extended farm-storage loan shall remain the same as for the original loan. The support rate for flaxseed covered by a purchase agreement placed under a farm-storage loan shall be the same as the support rate established for the flaxseed in § 421.658 (c).

(b) Any discounts established for variation in quality as shown in § 421.658 (d) shall apply.

§ 421.673 *CSS commodity offices.* The CSS commodity offices and the areas served by them are shown below:

Chicago 5, Illinois, 623 South Wabash Avenue: Connecticut, Delaware, Illinois, Indiana, Iowa, Kentucky, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia.

Dallas 26, Texas, 3306 Main Street: Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, New Mexico, North Carolina, Oklahoma, South Carolina, Tennessee, Texas.

Kansas City 6, Missouri, 911 Walnut Street: Colorado, Kansas, Missouri, Nebraska, Wyoming.

Minneapolis 8, Minnesota, 1006 West Lake Street: Minnesota, Montana, North Dakota, South Dakota, Wisconsin.

Portland 5, Oregon, 515 Southwest 10th Avenue: Arizona, California, Idaho, Nevada, Oregon, Utah, Washington.

Issued this 18th day of April 1955.

[SEAL] WALTER C. BERGER,
Acting Executive Vice President,
Commodity Credit Corporation.

[F. R. Doc. 55-3289; Filed, Apr. 20, 1955; 8:53 a. m.]

TITLE 7—AGRICULTURE

Chapter VII—Commodity Stabilization Service (Farm Marketing Quotas and Acreage Allotments), Department of Agriculture

PART 728—WHEAT

SUBPART—FARM ACREAGE ALLOTMENTS FOR 1956 CROP

Correction

In Federal Register Document 55-2243, published at page 1632 of the issue for Friday, March 18, 1955, the phrase "in the county ASC office" should appear in the second line of the introductory text of § 728.615 (a), so that said introductory text reads as follows:

§ 728.615 *Data for old wheat farms*—(a) *Reports by producers.* To the extent that data are not available in the county ASC office, the owner, operator, or any other interested person shall furnish the following information regarding the farm in which he has an interest to the county ASC office of the county in which the farm is regarded as located if there was wheat acreage on the farm for the 1953, 1954, or 1955 crop;

TITLE 20—EMPLOYEES' BENEFITS

Chapter III—Bureau of Old-Age and Survivors Insurance, Social Security Administration, Department of Health, Education, and Welfare

[Regs. 4, Further Amended]

PART 404—FEDERAL OLD-AGE AND SURVIVORS INSURANCE (1950- ——)

MISCELLANEOUS AMENDMENTS

Amendments pursuant to certain provisions of Social Security Amendments of 1954 (Public Law 761, 83d Congress, 68 Stat. 1052).

Regulations No. 4, as amended (20 CFR, Cum. Supp.; 404.1 et seq.) are further amended as follows:

1. Section 404.104 is amended to read as follows:

§ 404.104 *Quarter of coverage after 1950*—(a) *In general.* Any quarter occurring after 1950 is a quarter of coverage for an individual if he:

(1) Has been paid $50 or more in wages in such quarter (except as provided in paragraph (b) of this section); or

(2) Was not paid at least $50 in wages in such quarter, but has, in the calendar year in which such quarter occurred, been paid $3,600 in wages (if the calendar year occurred after 1950 and before 1955) or $4,200 in wages (if the calendar year occurred after 1954); or

(3) Has been credited with $100 or more of self-employment income for such quarter (see § 404.106); or

(4) Had self-employment income for the taxable year in which the quarter or part of such quarter occurred, and the aggregate of his self-employment income for, and wages (if any) paid in such taxable year equals $3,600 (if the taxable year began after 1950 and ended before 1955) or $4,200 (if the taxable year ended after 1954).

(b) *Wages for agricultural labor after 1954.* If the wages have been paid for agricultural labor in any calendar year after 1954, the following are quarters of coverage:

(1) The last quarter of the year which can be but otherwise is not, if such wages are less than $200;

(2) The last 2 quarters of the year which can be but otherwise are not, if such wages are at least $200 but less than $300;

(3) The last 3 quarters of the year which can be but otherwise are not, if such wages are at least $300 but less than $400;

(4) All quarters of the year which can be but otherwise are not, if such wages are at least $400.

If the individual who has been paid wages for agricultural labor after 1954 has attained retirement age or died, and he does not have an insured status (§§ 404.108 and 404.109), or fails to meet requirements for entitlement to a computation or recomputation (see Subpart C of this part) by reason of the assignment of quarters of coverage as provided in this paragraph, but would have such status or meet such requirements by assigning the quarters of coverage to different quarters of such year, then such quarters of coverage shall instead be assigned to such different quarters, but only for purposes of determining insured status or compliance with the requirements for entitlement to a computation or recomputation.

(c) *When a quarter cannot be a quarter of coverage.* No quarter shall be counted as a quarter of coverage prior to the beginning of such quarter, and no quarter after the quarter in which the individual died shall be counted as a quarter of coverage; nor can any quarter be counted as more than one quarter of coverage.

2. Section 404.107 is amended to read as follows:

§ 404.107 *Fully insured status where individual died before September 1, 1950*—(a) *In general.* An individual who died before September 1, 1950, was fully insured if he had not less than one quarter of coverage (no matter when acquired) for each two of the quarters elapsing after either 1936 or the quarter in which he attained age twenty-one (whichever is later), and up to, but excluding, the quarter in which he either attained age 65 or died (whichever first occurred); provided that he had at least 6 quarters of coverage in any event. If the numbers of quarters elapsing after 1936 or the attainment of age twenty-one (whichever is applicable) is odd, one is subtracted from such number before this formula is applied. (Subpart N of this part sets out circumstances under which certain veterans of World War II shall be deemed to have died fully insured.)

(b) *Where individual had 6 quarters of coverage.* An individual who died before September 1, 1950, and was not at the time of death a fully insured individual within paragraph (a) of this section, but who had at least 6 quarters of coverage shall, nevertheless, be deemed to have died a fully insured individual for the purposes of determining entitlement to monthly benefits on the individual's wage record, for months after August 1954 based on applications filed after that month, of applicants for child's, widow's, parent's, and mother's insurance benefits, other than the divorced former wives of the individual.

3. Section 404.108 is amended to read as follows:

§ 404.108 *Fully insured status where an individual did not die before September 1, 1950*—(a) *In general.* An individual who did not die before September 1, 1950, is fully insured if he has not less than:

(1) One quarter of coverage (no matter when acquired) for each two of the quarters elapsing after either 1950 or the quarter in which he attained age twenty-one (whichever is later), and up to, but excluding, the quarter in which he either attained age 65 or died (whichever first occurred): *Provided,* That he had at least 6 quarters of coverage in any event; or

(2) Forty quarters of coverage.

If the number of quarters elapsing after 1950 or the attainment of age twenty-one (whichever is applicable) is odd, one is subtracted from such number before the formula in paragraph (a) of this section is applied. (Subpart N of this part sets out circumstances under which certain veterans of World War II shall be deemed to have died fully insured.)

(b) *Special case after 1954.* An individual who did not die before January 1, 1955, is fully insured if:

(1) He meets the requirements of paragraph (a) of this section; or

(2) All the quarters after 1954 and before either (i) July 1, 1956, or (ii) if later, the quarter in which he attained retirement age or died (whichever first occurred) are quarters of coverage of the individual, and there are at least 6 of such quarters.

4. Section 404.109 is amended to read as follows:

§ 404.109 *Currently insured status*—(a) *In general.* An individual is currently insured if he has not less than 6 quarters of coverage during any one of the following periods:

(1) The 13-quarter period ending with the quarter in which he died; or

(2) The 13-quarter period ending with the quarter in which he became entitled to old-age insurance benefits (see § 404.303) after August 1950; or

(3) The 13-quarter period ending with the quarter in which he became entitled to primary insurance benefits (see § 403.402 of this chapter (Regulations 3)), before September 1950.

(b) *Special case for husband's or widower's insurance benefits.* For purposes of determining whether the husband or widower of an individual is entitled to monthly benefits as such on the basis of the individual's wages and self-employment income where entitlement to such monthly insurance benefits is established, in part, on the basis of the

provisions of § 404.309 (e) (2) or § 404.322 (f) (2), as the case may be, the individual shall be deemed currently insured if she had not less than 6 quarters of coverage during the 13-quarter period ending with the quarter in which occurs the first month for which she was entitled to old-age insurance benefits (§ 404.303) and in which an event described in § 404.408 (a) did not occur.

5. Sections 404.212 through 404.215, inclusive, are repealed and there is substituted for such sections the following material:

BASIC COMPUTATION ARISING FROM SOCIAL SECURITY AMENDMENTS OF 1954

§ 404.230 *Effect of Social Security Amendments of 1954.* The Social Security Amendments of 1954 changed in many respects the method by which an individual's primary insurance amount (§ 404.201) is computed. It provides a new formula for computing an individual's primary insurance amount, standard end-of-year starting dates and first-of-year closing dates, the dropping out of as much as 5 years of low earnings (or no earnings) in the determination of average monthly wage, and various methods for recomputing an individual's primary insurance amount.

§ 404.231 *Scope.* Except as may be otherwise specified, the regulations in this subpart following this section are applicable with respect to monthly benefits, for months after August 1954 and with respect to lump-sum death payments, in the case of deaths after August 1954.

§ 404.232 *Method of determining primary insurance amount.* Subject to the provisions of § 404.233, the primary insurance amount of an individual shall be either:

(a) Fifty-five percentum of the first $110 of his average monthly wage, plus 20 percentum of the next $240, such amount, if not a multiple of 10 cents, being raised to the next higher multiple of 10 cents; or

(b) The amount determined by use of the conversion table in § 404.234.

§ 404.233 *Applicability of § 404.232.* The provisions of § 404.232 (a) and (b) are applicable in the case of any individual:

(a) Who does not become eligible for old-age insurance benefits under section 202 (a) until after August 1954 or dies after such month and without becoming eligible for such benefits under section 202 (a), and with respect to whom not less than 6 of the quarters elapsing after 1950 are quarters of coverage, or

(b) With respect to whom not less than 6 of the quarters elapsing after June 30, 1953, are quarters of coverage.

Except as may be specifically provided, in all other cases, only the provisions of § 404.232 (b) are applicable. Where the provisions of paragraphs (a) and (b) of § 404.232 are applicable to an individual his primary insurance amount shall be the larger of the two amounts determined under such paragraphs. For purposes of this section an individual shall be deemed eligible for old-age insurance benefits under section 202 (a) for any month if he was or would have been, upon filing application therefor in such month, entitled to such benefits for such month.

§ 404.234 *Use of conversion table to determine primary insurance amount.* For purposes of § 404.232 (b), the table appearing as appendix 2 to this subpart is applicable. The primary insurance amount of an individual to whom this table is applicable shall be whichever of the following amounts is the larger:

(a) The amount appearing in column III of such table on the line on which in column I appears his primary insurance benefit as determined by § 404.235, or

(b) The amount appearing in column III of such table on the line on which in column II appears his primary insurance amount as determined under § 404.236.

The average monthly wage of any such individual shall, for purposes of section 203 (a) of the act, be the amount appearing in column IV on the line on which in column III appears his primary insurance amount.

§ 404.235 *Determination of primary insurance benefit for conversion table (column I).* For purposes of § 404.234 (a), the primary insurance benefit of an individual shall be determined under the provisions of paragraph (a), (b), or (c) of § 404.204; except that:

(a) If such individual cannot become entitled (without the application of section 202 (j) (1) of the act) to old-age insurance benefits under section 202 (a) of the act until after August 1954, or in death cases, died after August 1954 without becoming entitled to such benefits, then, for purposes of subparagraph (1) of paragraph (c) of § 404.204, such individual's average monthly wage shall be determined under the provisions of §§ 404.237 to 404.244, using as his starting date December 31, 1936;

(b) The provisions of paragraph (c) of § 404.204 shall not be applicable in any case in which the individual attained age twenty-two after 1950 and with respect to whom not less than 6 of the quarters elapsing after 1950 are quarters of coverage;

(c) Where the individual is a fully insured individual by reason of the provisions of § 404.107 (b), the provisions of paragraph (b) of § 404.204 shall apply only where such individual died a currently insured individual and some other person was entitled to monthly benefits or a lump-sum death payment on the basis of his wages; in all other cases to which the provisions of such § 404.107 (b) are applicable, the provisions of paragraph (c) of § 404.204 shall apply and such individual's closing date, for purposes of § 404.209 (a), shall be the first day of the quarter in which the individual died.

§ 404.236 *Determination of primary insurance amount for conversion table (column II).* For purposes of § 404.234 (b), the primary insurance amount of an individual shall be determined under § 404.202 (a) (2); except that if such individual did not become entitled to (without the application of section 202 (j) (1) of the act) old-age insurance benefits under section 202 (a) of the act until after August 1954, or in death cases, died after August 1954 without becoming entitled to such benefits, then such individual's average monthly wage shall be determined under the provisions of §§ 404.237 to 404.244, but without regard to the provisions of § 404.242.

§ 404.237 *Method of determining average monthly wage.* An individual's average monthly wage, for the purpose of computing his primary insurance amount, is computed by dividing his total wages and self-employment income after his starting date and prior to his closing date by the number of months elapsing after such starting date and before his closing date, excluding from such elapsed months any month in any year prior to the year in which such individual attained the age of twenty-two, but only if less than 2 quarters of such prior year are quarters of coverage. If the total number of elapsed months is less than 18, the divisor shall be increased to 18.

§ 404.238 *Wages and self-employment income used in determining average monthly wage.* For purposes of § 404.237, "total wages" and "total self-employment income" of an individual shall include all wages and self-employment income after such individual's starting date and before his closing date and any other credits established for his account as specified in paragraphs (b), (c), (d) and (e) in § 404.206. "Total wages" and "total self-employment income" of an individual shall not include:

(a) The excess over $3,600 of wages paid in and self-employment income credited to any calendar year after 1950 and prior to 1955, or

(b) The excess over $4,200 of wages paid in and self-employment income credited to any calendar year after 1954, or

(c) If such individual's closing date is determined under paragraphs (a), (c) or (d) of § 404.241, and he has self-employment income in a taxable year which begins prior to such closing date and ends after the last day of the month preceding the month in which he becomes entitled to old-age insurance benefits under section 202 (a), his self-employment income in such taxable year, except as provided in § 404.268, or

(d) The excess over $2,100 of wages paid in and self-employment income credited to the year 1956, but only if with respect to such individual's average monthly wage, a closing date pursuant to § 404.241 (d) is used.

§ 404.239 *Rounding average monthly wage.* If the average monthly wage as computed under § 404.237 is not a multiple of $1, it is reduced to the next lower multiple of $1.

§ 404.240 *Starting date.* An individual's "starting date" shall be whichever of the following results in a higher primary insurance amount:

(a) December 31, 1950, or

(b) The last day of the year in which he attains the age of twenty-one if such last day is after December 31, 1950, except that if such individual's primary insurance amount is determined by use of the conversion table in § 404.234 and under the provisions of § 404.235, his starting date shall be December 31, 1936.

§ 404.241 *Closing date.* An individual's closing date shall be whichever of the following results in the highest primary insurance amount:

(a) The first day of the year in which he died or became entitled to old-age insurance benefits under section 202 (a), whichever first occurred, or

(b) The first day of the first year in which he both was a fully insured individual and had attained age 65, or

(c) The first day of the year following the year referred to in paragraph (a) of this section, but only if the Secretary determines, on the basis of evidence readily available to him at the time of the computation of the individual's primary insurance amount, that the use of a closing date under this paragraph will result in the highest primary insurance amount, or

(d) July 1, 1956, but only if the individual died or became (without the application of section 202 (j) (1) of the act) entitled to old-age insurance benefits in 1956 and he had 6 quarters of coverage after 1954 and prior to the quarter following the quarter in which he died or became entitled to old-age insurance benefits, whichever first occurred.

If an individual's closing date is determined to be the date specified in paragraph (d) of this section, then such individual's starting date shall be December 31, 1954, instead of the day specified in § 404.240, and his primary insurance amount shall, after the determination of his average monthly wage, be computed under the provisions of § 404.232 (a).

§ 404.242 *Exclusion from computation of average monthly wage.* Except as may be otherwise provided, in the case of any individual to whom the provisions of paragraph (a) (but without regard to whether he has 6 quarters of coverage after 1950) or (b) of § 404.233 are applicable, the Secretary shall determine the 4 or fewer calendar years after his starting date and prior to his closing date which, if the months of such years and his wages and self-employment income for such years were excluded in computing his average monthly wage, would produce the highest primary insurance amount. Such months and such wages and self-employment income shall be excluded for purposes of computing such individual's average monthly wage. The maximum number of calendar years determined under the first sentence of this section shall be 5 instead of 4 in the case of any individual who has not less than 20 quarters of coverage prior to the date he became entitled to old-age insurance benefits or died, whichever first occurred.

§ 404.243 *Average monthly wage for conversion table.* For the purpose of computing maximum benefits, the average monthly wage of an individual whose primary insurance amount is determined by use of the conversion table (§ 404.234) is the appropriate amount in column IV of such table.

§ 404.244 *Average monthly wage of veteran of World War II.* Where entitlement to any monthly insurance benefit or a lump sum is based on the guaranteed-insured status granted to a veteran of World War II under the provisions of section 217 (b) of the act (see § 404.1311) the average monthly wage of such veteran shall be deemed to be $160.

RECOMPUTATION OF BENEFITS

§ 404.260 *Applicability.* An individual entitled to old-age insurance benefits may secure a recomputation of his primary insurance amount under §§ 404.261 to 404.268. A survivor of an individual may secure a recomputation of such individual's primary insurance amount under §§ 404.269 to 404.275.

§ 404.261 *Recomputation to include wages and self-employment income in the year of entitlement*—(a) *Conditions.* Recomputation is permitted under this paragraph if:

(1) The individual files application therefor after the year in which he became entitled (without the application of section 202 (j) (1) of the act) to old-age insurance benefits under section 202 (a),

(2) He became entitled to such benefits after August 1954, and

(3) His closing date for purposes of computing his average monthly wage and primary insurance amount was determined under paragraph (a), (b), or (d) of § 404.241.

(b) *Method of computation.* The computation shall be made in the same manner as is provided in §§ 404.232 to 404.242, except that his closing date for purposes of § 404.241 shall be the first day of the year following the year in which he became entitled to old-age insurance benefits.

(c) *Effective date.* Such recomputation shall be effective for and after the first month in which his entitlement to old-age insurance benefits was effective, but in no event for any month prior to the twenty-fourth month before the month in which the application specified in paragraph (a) of this section is filed.

(d) *Applicability to other recomputations.* The provisions of this section shall be applicable to a recomputation under §§ 404.262, 404.263 (except a recomputation under paragraph (c) thereof) and § 404.264 (but only if the primary insurance amount was computed under the method specified in either paragraph (b) (2) or (3) of such section) in the same manner as though the individual became entitled in the year in which he filed the application for the recomputation specified in such sections.

§ 404.262 *Recomputation based on 6 quarters of coverage after June 30, 1953*—(a) *Conditions.* An individual entitled to old-age insurance benefits under section 202 (a) may have his primary insurance amount recomputed under this paragraph if:

(1) He files an application therefor after August 1954,

(2) He was entitled, or upon filing application therefor, would have been entitled to old-age insurance benefits for August 1954,

(3) He has 6 quarters of coverage after June 30, 1953, and

(4) The provisions of § 404.242 were not previously applicable to the computation of his primary insurance amount.

(b) *Method of computation.* The recomputation shall be made in the same manner as is provided in §§ 404.232 to 404.242 for the computation of the primary insurance amount as though the individual became entitled to old-age insurance benefits as of the date he filed the application specified in paragraph (a) of this section.

(c) *Effective date.* Such recomputation shall be effective for and after the twelfth month before the month in which such application was filed, but in no case before the first month of the quarter which is such individual's sixth quarter of coverage after June 30, 1953.

§ 404.263 *Recomputation after earnings of $1,200 in a calendar year*—(a) *Conditions.* Recomputation is permitted under this paragraph if:

(1) The individual entitled to old-age insurance benefits files application therefor after 1954,

(2) He has not less than 6 quarters of coverage after 1950 and prior to the quarter in which he filed such application,

(3) He has wages and self-employment income of more than $1,200 in a calendar year which occurs after 1953 (not taking into account any year prior to the calendar year in which he filed an effective application for the recomputation of his primary insurance amount under §§ 404.262 to 404.265) and after the year in which he became (without the application of section 202 (j) (1) of the act) entitled to old-age insurance benefits, and

(4) He filed the application referred to in subparagraph (1) of this paragraph no earlier than 6 months after the calendar year specified in subparagraph (3) of this paragraph in which he had such wages and self-employment income.

For the purpose of subparagraph (3) of this paragraph, an individual who files an effective application for a recomputation under § 404.262 or § 404.264 (but only if with respect to such application the method specified in paragraph (b) (3) of such section was used to compute such individual's primary insurance amount) shall be deemed to have become entitled to old-age insurance benefits in the year in which he filed such effective application.

(b) *Method of computation.* The computation shall be made in the same manner as is provided in §§ 404.232 to 404.242 for the computation of the primary insurance amount as though:

(1) The individual became entitled to old-age insurance benefits as of the date he filed application for recomputation, and

(2) The individual met the conditions of either paragraph (a) or (b) of § 404.233 if the conditions of either of such paragraphs have not actually been met.

(c) *Alternative method of computation.* Notwithstanding the provisions of paragraph (b) this section, only the provisions of §§ 404.232 (a), 404.237 to 404.242 (but without regard to the provisions of paragraphs (b) and (c) of § 404.241) shall be applicable to a recomputation under this section if with respect to previous computation of his primary insurance amount the provisions of § 404.242 were applicable.

(d) *Effective date.* Such a recomputation shall be effective for and after the twelfth month before the month in which he filed the application specified in paragraph (a) (1) of this section, but in no event earlier than the month following the calendar year specified in paragraph (a) (3) of this section.

For the purposes of paragraph (a) (3) of this section, an individual's self-employment income shall be allocated to calendar quarters in accordance with section 212 of the act.

§ 404.264 *Recomputation based on deductions from benefits or attainment of age 75*—(a) *Conditions.* Recomputation is permitted under this paragraph if:

(1) The individual files application therefor,

(2) His benefits were subject to a deduction, under section 203 (b) (1) and (2) of the act and for months prior to 1955, for at least 12 months (in a 36-month period) after his last computation of his primary insurance amount, except that this subparagraph shall not apply if the individual was 75 years of age or over prior to 1955 and in the month in which he filed the application required by subparagraph (1) of this paragraph and his old-age insurance benefit was, prior to the filing of such application, based upon a primary insurance amount computed under § 404.202 (c), and

(3) He had at least 6 quarters of coverage after 1950 and before 1955, and prior to the quarter in which he filed application for recomputation.

(b) *Method of computation*—(1) *Conditions, including filing of application, met prior to September 1954.* If the individual met all the conditions in paragraph (a) of this section prior to September 1954, his primary insurance amount shall be computed in the same manner as is provided in § 404.202 (a) and §§ 404.205 to 404.209 for the computation of the primary insurance amount as though the individual became entitled to old-age insurance benefits in the month in which he filed his application for recomputation specified in paragraph (a) (1) of this section. For months after August 1954, such amount shall be determined through the use of the conversion table under § 404.234.

(2) *Conditions, except filing of application, met prior to September 1954.* If after the last previous computation of his primary insurance amount, the individual filed the application specified in paragraph (a) (1) of this section after August 1954 and met the conditions of subparagraphs (2) and (3) of paragraph (a) of this section prior to September 1954, his primary insurance amount shall be recomputed in the manner provided in § 404.232 (b), and §§ 404.234 to 404.241 (but without regard to the provisions of §§ 404.234 (a) and 404.241 (d)) and as though he became entitled to old-age insurance benefits in the month in which he filed his application for recomputation specified in paragraph (a) (1) of this section.

(3) *Conditions met after August 1954.* If the individual did not meet the conditions of either subparagraph (2) or (3) of paragraph (a) of this section until after August 1954, his primary insurance amount shall be recomputed in the manner provided in §§ 404.232 to 404.242 and as though he became entitled to old-age insurance benefits in the month in which he filed his application for recomputation specified in paragraph (a) (1) of this section and as though he met the conditions of paragraphs (a) and (b) of § 404.233.

(c) *Effective date.* Such recomputation shall be effective for and after the month in which was filed the application for recomputation specified in paragraph (a) (1) of this section.

§ 404.265 *Recomputation based on services covered by a retroactive agreement under section 218*—(a) *Conditions.* Any individual whose primary insurance amount has not been recomputed under section 215 (f) (2) of the act in effect prior to the enactment of the Social Security Amendments of 1954 may have his primary insurance amount recomputed under § 404.264, provided he does not meet the provisions of paragraph (a) (2) of such section, if:

(1) He meets the provisions of paragraph (a) (1) and (3) of such section (provided the application is filed prior to January 1956),

(2) He performed services prior to January 1955:

(i) To which an agreement under section 218 was made applicable, and

(ii) On the basis of which deductions under section 203 of the act were not imposed because such services were performed prior to the date the agreement was agreed to or, if the original agreement was not applicable to such services, were performed prior to the date the modification making such agreement applicable to such services was agreed to, and

(iii) On the basis of which deduction would have been imposed under section 203 had such agreement or modification, as the case may be, been agreed to on the date it became effective, and

(3) With respect to the number of deductions imposed under section 203 (b) (1) and (2) of the act when added to the number of deductions that would have been imposed by reason of subparagraph (2) (iii) of this paragraph, he meets the conditions of paragraph (a) (2) of § 404.264.

(b) *Method of computation.* The individual's primary insurance amount shall be recomputed as though he became entitled to old-age insurance benefits in whichever of the following months yields the highest primary insurance amount:

(1) The month following the last month for which deductions under section 203 would have been imposed under the conditions specified in subparagraph (2) (iii) of paragraph (a) of this section;

(2) The first month after the month determined under subparagraph (1) of this paragraph, but prior to September 1954, in which his old-age insurance benefits were no longer subject to deductions under section 203 (b) of the act;

(3) The first month, prior to September 1954, after the last month in which his old-age insurance benefits were subject to deductions under section 203 (b), or

(4) The month after August 1954 in which the individual filed the application specified in paragraph (a) (1) of this section.

Where the provisions of subparagraph (1), (2), or (3) of this paragraph apply, the recomputation shall be made under the provisions in § 404.202 (a) and §§ 404.205 to 404.209 and through the use of the conversion table under § 404.234. Where the provisions of subparagraph (4) of this paragraph apply, the recomputation shall be made under the provisions of § 404.232 (b) and §§ 404.234 to 404.241 (but without regard to the provisions of § 404.234 (a)).

(c) *Effective date.* Such recomputation shall be effective for and after the month in which the application specified in paragraph (a) (1) of this section is filed. Any increase in benefits by reason of such recomputation shall not be paid on the basis of such individual's wages and self-employment income for all the total of such increased benefits equals the total of benefits paid on such wages and self-emplyoment income for all the months which were covered by the agreement or modification, referred to in paragraph (a) (2) of this section, and during which deductions under section 203 would have been imposed had such agreement or modification been agreed to on the date it became effective.

§ 404.266 *Recomputation to include wages immediately preceding entitlement.* With respect to individuals who became (without the application of section 202 (j) (1)) entitled to old-age insurance benefits prior to September 1954, recomputation is permitted under this section if the individual files an application therefor at least 6 months after the month in which he became so entitled. Such recomputation shall be made in the same manner as is provided in §§ 404.202 to 404.210 for the computation of the primary insurance amount, except that for purposes of § 404.209 such individual's closing date shall be the first day of the quarter in which he became entitled to old-age insurance benefits. Such recomputation shall be effective for and after the first month of entitlement to old-age insurance benefits. For months after August 1954, such amount shall be determined through the use of the conversion table under § 404.234.

§ 404.267 *Recomputation to include self-employment income.* An individual who became entitled to an old-age insurance benefit in 1952, or in 1953 in a taxable year which began in 1952 (and

without the application of section 202 (j) (1)) and who had self-employment income for a taxable year which ended within or with 1952 or which began in 1952 may have his old-age insurance benefit recomputed if he files an application therefor after the close of such taxable year. Such recomputation shall be made in the manner as is provided in §§ 404.202 to 404.210 (but without regard to section 215 (b) (4) (A) of the act in effect prior to the Social Security Amendments of 1954; see § 404.206 (a)) for the computation of the primary insurance amount, except that, for purposes of § 404.209, such individual's self-employment income closing date shall be the day following the quarter with or within which such taxable year ended, and for purposes of § 404.206, the self-employment income for any subsequent taxable year shall not be taken into account. Such recomputation shall be effective for and after the first month in which such individual became entitled to old-age insurance benefits; for months after August 1954, such amount shall be determined through the use of the conversion table under § 404.234.

§ 404.268 *Recomputation to include self-employment income excluded in previous computation*—(a) *Conditions and effective date.* Recomputation is permitted under this section if, in determining an individual's average monthly wage, self-employment income for the taxable year ending after the month before the month in which he became entitled to old-age insurance benefits was not, pursuant to the provisions of § 404.238 (c), included in his total self-employment income. Such recomputation shall be made after the close of such taxable year to take into account such self-employment income in such taxable year as is, pursuant to section 212 of the act, allocated to the calendar quarters prior to the closing date used in determining such individual's average monthly wage. Such recomputation shall be effective for and after the first month in which the individual became entitled to old-age insurance benefits.

(b) *Applicability to other recomputations.* The provisions of this section and § 404.238 (c) shall be applicable to a recomputation under §§ 404.262, 404.263, 404.264 (but only if the primary insurance amount was computed under the method specified in either paragraph (b) (2) or (3) of such section) and § 404.265 (but only where the provisions of paragraph (b) (4) apply) in the same manner as though the individual became entitled in the year in which he filed the application for the recomputation specified in this section.

§ 404.269 *Recomputation at the request of a survivor of an individual to include wages and self-employment income in the year of entitlement or death*—(a) *Conditions.* Recomputation is permitted under this paragraph if:

(1) The individual on the basis of whose wages and self-employment income recomputation of the primary insurance amount is requested died after August 1954;

(2) The last previous computation or recomputation of his primary insurance amount, if any, was based on a closing date determined under paragraphs (a), (b), or (d) of § 404.241, and

(3) A survivor entitled to monthly benefits or a lump-sum death payment on the basis of such individual's wages and self-employment income files an application for such recomputation. Notwithstanding the previous provisions of this paragraph a recomputation under this section is not permitted in the case of an individual entitled to old-age insurance benefits in the month of death unless such individual became entitled to such benefits after August 1954, or, if entitled prior to September 1954, such individual's primary insurance amount was recomputed on the basis of an application filed after August 1954 under any of the following sections: §§ 404.262, 404.263, 404.264 (but only if the primary insurance amount was computed under the method specified in either paragraph (b) (2) or (3) of such section), §§ 404.270, 404.271, 404.272 (but only if the primary insurance amount was computed under the method specified in either paragraph (b) (1) (ii) or (iii) of such section).

(b) *Methods of computation.* Such recomputation shall be made in the same manner as is provided in §§ 404.232 to 404.242 for the computation of the primary insurance amount except that the individual's closing date shall be:

(1) The day following the year of such individual's death, if such individual was not entitled to an old-age insurance benefit, or

(2) The day following the year in which such individual became entitled to old-age insurance benefits, if such individual's primary insurance amount has not been recomputed under any of the provisions specified in the last sentence of paragraph (a) of this section, or

(3) The day following the year in which he filed his last effective application for a recomputation under any of the provisions specified in the last sentence of paragraph (a) of this section, or

(4) The day following the year of death if the individual's primary insurance amount was recomputed, under the provision specified in the last sentence of paragraph (a) of this section, for the purpose of determining the amount of the survivor's monthly benefits or a lump-sum death payment payable on the basis of such individual's wages and self-employment income.

(c) *Effective date and applicability.* Such recomputation shall be applicable to survivor's monthly benefits and the lump-sum death payment payable on the basis of the individual's wages and self-employment income. With respect to such monthly benefits, such recomputation shall be effective for and after the first month in which the survivor became entitled to such monthly benefit, but in no event for any month prior to the twenty-fourth month before the month in which the application, specified in paragraph (a) (3) of this section, is filed.

§ 404.270 *Recomputation where individual has 6 quarters of coverage after June 30, 1953, at time of death*—(a) *Conditions.* Recomputation is permitted under this section if:

(1) In the month of the individual's death, he met the conditions, except the filing of an application, for a recomputation under § 404.262, and

(2) The survivor entitled to monthly benefits files application therefor.

(b) *Method of computation.* The recomputation shall be made in the same manner as is provided in §§ 404.232 to 404.242 for the computation of the primary insurance amount as though the individual became entitled to old-age insurance benefits in the month of death.

(c) *Effective date and applicability.* Such recomputation shall be applicable only to survivor's monthly benefits and shall be effective for and after the first month in which the survivor became entitled to such monthly benefits.

§ 404.271 *Recomputation for a survivor after individual has earnings of $1,200 in a calendar year or to include his railroad compensation*—(a) *Conditions.* A survivor entitled to monthly benefits or a lump-sum death payment on the basis of the wages and self-employment income of an individual who died after 1954 and who has been entitled to an old-age insurance benefit at the time of death, may secure recomputation of the decedent's primary insurance amount without filing application therefor provided:

(1) The decedent would have been entitled to a recomputation under § 404.263 (but without regard to the provisions of paragraph (a) (4)) had he filed application therefor in the month of death, or

(2) The decedent during his lifetime was paid compensation under the Railroad Retirement Act (see Subpart O of this part) and his old-age insurance benefits had not been recalculated pursuant to the provisions of § 404.277.

(b) *Method of recomputation*—(1) *Where based on earnings of $1,200 in a calendar year.* If recomputation is permitted by paragraph (a) (1) of this section such recomputation shall be made as though the decedent had filed application for recomputation under § 404.263 in the month of death, except that such recomputation will also include any railroad compensation (see Subpart O of this part) paid to the decedent prior to the applicable closing date used in such computation.

(2) *Where based on railroad compensation.* If recomputation is permitted by paragraph (a) (2) of this section such recomputation shall include only the wages and self-employment income used in the last previous computation of the decedent's primary insurance amount and the railroad compensation (see Subpart O of this part) paid to him prior to the closing date used in such previous computation.

(3) *How recomputed, if recomputation based on both.* If recomputation of the deceased individual's primary insurance amount is permitted under both subparagraphs (1) and (2) of this paragraph only the recomputation which results in the larger primary insurance amount shall be made.

(c) *Effective date and applicability.* Such recomputation shall be applicable

to survivor's monthly benefits and the lump-sum death payment payable on the basis of the individual's wages and self-employment income. With respect to such monthly benefit, such recomputation shall be effective for and after the first month in which the survivor became entitled to such monthly benefits.

§ 404.272 *Recomputation for a deduction from benefits, attainment of age 75 and based on railroad compensation*—(a) *Conditions.* A survivor entitled to monthly benefits or a lump-sum death payment on the basis of the wages and self-employment income of an individual who had been entitled to an old-age insurance benefit at the time of death, may secure recomputation of the decedent's primary insurance amount if:

(1) The decedent would have been entitled to a recomputation under § 404.264 had he filed application therefor in the month of death, or

(2) If such individual died prior to September 1954, the decedent during his lifetime was paid compensation under the Railroad Retirement Act (see Subpart O of this part) and his old-age insurance benefit had not been recalculated pursuant to the provisions of § 404.277.

(b) *Method of computation*—(1) *Where based on deductions from benefits and attainment of age 75.* A recomputation under paragraph (a) (1) of this section shall be made as though the deceased individual filed an application under § 404.264 and under the conditions specified in:

(i) Paragraph (b) (1) of § 404.264, if such individual died prior to September 1954, or

(ii) Paragraph (b) (2) of § 404.264, if such individual died after August 1954 and he had, prior to September 1954, met the conditions set forth in paragraph (a) of § 404.264, except the filing of an application, provided the survivor files an application, or

(iii) Paragraph (b) (3) of § 404.264, if he died after August 1954 and he had not, prior to September 1954, met all the conditions (excluding the condition relating to the filing of an application) set forth in paragraph (a) of § 404.264.

In any such computation, there shall also be included any railroad compensation (see Subpart O of this part) paid to the decedent prior to the applicable closing date used in such compensation.

(2) *Where based on railroad compensation.* If recomputation is permitted by paragraph (a) (2) of this section such recomputation shall include only the wages and self-employment income used in the last previous computation of the decedent's primary insurance amount and the railroad compensation (see Subpart O of this part) paid to him prior to the closing date used in such previous computation.

(3) *How recomputed, if recomputation based on both.* If recomputation of the deceased individual's primary insurance amount is permitted under both subparagraphs (1) and (2) of paragraph (a) of this section only the recomputation which results in the larger primary insurance amount shall be made.

(c) *Effective date and applicability.* Such recomputation shall be applicable to survivor monthly benefits and the lump-sum death payment payable on the basis of the individual's wages and self-employment income. With respect to such monthly benefit, such recomputation shall be effective for and after the first month in which the survivor became entitled to such monthly benefit.

§ 404.273 *Recomputation at request of survivor based on services of deceased individual covered by a retroactive agreement under section 218*—(a) *Conditions.* The survivors of an individual whose primary insurance amount has not been recomputed under section 215 (f) (2) of the act in effect prior to the Social Security Amendments of 1954 may have his primary insurance amount recomputed if:

(1) Such individual died prior to January 1956,

(2) He would have been entitled to a recomputation under § 404.265 had he filed application therefor in the month of death, and

(3) The survivor entitled to monthly benefits on the basis of the individual's wages and self-employment income files an application for a recomputation under this section (other than the application for monthly benefits).

(b) *Method of computation.* The individual's primary insurance amount shall be recomputed as though he became entitled to old-age insurance benefits in whichever of the months yields the highest primary insurance amount:

(1) The months specified in subparagraph (1), (2), or (3) of paragraph (b) of § 404.265, or

(2) The month of death,

and shall be made under the provisions in § 404.202 (a) and §§ 404.205 to 404.209 and through the use of the conversion table under § 404.234, except that with respect to subparagraph (2) of this paragraph, the recomputation shall be made, in cases where death occurred after August 1954, under the provisions of § 404.232 (b) and §§ 404.234 to 404.241 (but without regard to the provisions of § 404.234 (a)).

(c) *Effective date and applicability.* Such recomputation shall be applicable only to survivor's monthly benefits and shall be effective for and after the month in which the application specified in paragraph (a) (3) of this section is filed. The provision of the second sentence of paragraph (c) of § 404.265 shall be applicable to any increase resulting from a recomputation under this section.

§ 404.274 *Recomputation in death cases to include wages immediately preceding death or entitlement of decedent.* A survivor entitled to monthly benefits on the basis of the wages and self-employment income of an individual who died after August 1950 and prior to September 1954 may secure a recomputation of such deceased individual's primary insurance amount provided such survivor files an application therefor at least 6 months after the month of the individual's death or entitlement, whichever first occurred. Such recomputation shall be made in the same manner as is provided in §§ 404.202 to 404.210 for the computation of the primary insurance amount, except that for purposes of § 404.209 such individual's closing date shall be the first day of the quarter in which he died or became entitled to old-age insurance benefits, whichever first occurred. Such recomputation shall be effective for and after the month in which the survivor who filed the application for recomputation under this paragraph became entitled to such monthly benefits. For months after August 1954, such amount shall be determined through the use of the conversion table under § 404.234. No such recomputation shall affect the amount of a lump-sum death payment (§ 404.243), nor shall it render erroneous any lump-sum death payment certified prior to the effective date of such recomputation.

§ 404.275 *Recomputations to include self-employment income of deceased individual who died in 1952 or in a taxable year beginning in 1952*—(a) *Individual not entitled to old-age insurance benefit at death.* In the cases of an individual who died in 1952 or died in 1953 in a taxable year which began in 1952 (but did not become entitled to old-age insurance benefits prior to 1952) and who had self-employment income for the taxable year which ended with his death, such individual's primary insurance amount may be recomputed if the person entitled to monthly benefits on the basis of his wages and self-employment income files application after the close of such taxable year. Such recomputation shall be made in the manner as provided in §§ 404.202 to 404.210 (but without regard to section 215 (b) (4) (A) of the act in effect prior to the Social Security Amendments of 1954; see § 404.206 (a)) for the computation of the primary insurance amount except that, for purposes of § 404.209, such individual's self-employment income closing date shall be the day following the quarter with or within which such taxable year ended.

(b) *Individual entitled to old-age insurance benefit at death.* A survivor entitled to monthly benefits on the basis of the wages and self-employment income of an individual who, at the time of death; could have become entitled to a recomputation under § 404.267 had he filed application therefor at such time may secure such recomputation upon the filing of an application. Such recomputation shall be made in the same manner as though such individual had filed the application at the time of death.

(c) *Payments under recomputation permitted by paragraphs (a) and (b) of this section.* A recomputation permitted by paragraph (a) or (b) of this section shall be effective for and after the month in which the survivor became entitled to monthly benefits. For months after August 1954, such amount shall be determined through the use of the conversion table under § 404.234. No recomputation under such paragraphs will affect the amount of a lump-sum death payment (§ 404.343); nor shall it render erroneous any lump-sum death payment certified prior to the effective date of such recomputation.

§ 404.276 *Recomputation for veteran of World War II.* If an individual entitled to old-age insurance benefits is a veteran of World War II and he dies prior to July 27, 1954, his primary insurance amount may be recomputed under the provisions of section 217 (b) of the act.

§ 404.277 *When recomputation is effective.* Any recomputation under the preceding sections shall be effective only if such recomputation results in a higher primary insurance amount.

§ 404.278 *Recalculation of benefits of an individual entitled to old-age insurance benefits to include compensation for railroad services.* Any individual who is entitled to old-age insurance benefits under section 202 (a) for months after October 1951 and whose benefits do not include the compensation received by him for his service in the railroad industry may have his benefits recalculated to include such compensation, provided such compensation may otherwise be treated as wages under the provisions of Subpart O of this part. No application is necessary for such recalculation. Such recalculation shall be made in the same manner as such individual's monthly benefits under section 202 (a) were last computed; any increase in such benefit amount due to such recalculation shall be effective for and after November 1951.

6. The following material is added as an appendix to Subpart C to follow immediately after Appendix 1 to such subpart.

APPENDIX 2

For purposes of § 404.234 the following table is applicable.

I If the primary insurance benefit (as determined under § 404.235) is—	II Or the primary insurance amount (as determined under § 404.236) is—	III The primary insurance amount (as determined pursuant to § 404.232 (b)) shall be—	IV And the average monthly wage for computing the maximum under section 203 (a) (see § 404.402 et seq.) shall be—
$10.00	$25.00	$30.00	$55.00
$10.01–$10.04	25.10	30.10	55.00
$10.05–$10.08	25.20	30.20	55.00
$10.09–$10.15	25.30	30.30	55.00
$10.16–$10.20	25.40	30.40	55.00
$10.21–$10.24	25.50	30.50	55.00
$10.25–$10.28	25.60	30.60	56.00
$10.29–$10.35	25.70	30.70	56.00
$10.36–$10.40	25.80	30.80	56.00
$10.41–$10.44	25.90	30.90	56.00
$10.45–$10.48	26.00	31.00	56.00
$10.49–$10.55	26.10	31.10	57.00
$10.56–$10.50	26.20	31.20	57.00
$10.61–$10.64	26.30	31.30	57.00
$10.65–$10.68	26.40	31.40	57.00
$10.69–$10.75	26.50	31.50	57.00
$10.76–$10.80	26.60	31.60	57.00
$10.81–$10.84	26.70	31.70	58.00
$10.85–$10.88	26.80	31.80	58.00
$10.89–$10.95	26.90	31.90	58.00
$10.96–$11.00	27.00	32.00	58.00
$11.01–$11.04	27.10	32.10	58.00
$11.05–$11.08	27.20	32.20	59.00
$11.09–$11.15	27.30	32.30	59.00
$11.16–$11.20	27.40	32.40	59.00
$11.21–$11.24	27.50	32.50	59.00
$11.25–$11.28	27.60	32.60	59.00
$11.29–$11.35	27.70	32.70	59.00
$11.36–$11.40	27.80	32.80	60.00
$11.41–$11.44	27.90	32.90	60.00
$11.45–$11.48	28.00	33.00	60.00
$11.49–$11.55	28.10	33.10	60.00
$11.56–$11.60	28.20	33.20	60.00
$11.61–$11.64	28.30	33.30	61.00
$11.65–$11.68	28.40	33.40	61.00
$11.69–$11.75	28.50	33.50	61.00
$11.76–$11.80	28.60	33.60	61.00
$11.81–$11.84	28.70	33.70	61.00
$11.85–$11.88	28.80	33.80	61.00
$11.89–$11.95	28.90	33.90	62.00

7. Section 404.216 is repealed.

8. Section 404.302 is amended to read as follows:

§ 404.302 *Amount of benefit payments.* Ordinarily, a beneficiary is paid the monthly benefit or lump sum to which he is entitled in the amount calculated as indicated in the succeeding sections of this subpart. In some instances the amount of the benefit paid for one or more months, or the lump sum paid, may be greater or less than the amount so calculated because of the provisions of Subparts E and F of this part. See those subparts for full explanation of the circumstances under which these changes occur. See also § 404.345 for conditions under which benefits will not be paid where the beneficiary is deported.

9. Section 404,309 (e) is amended to read as follows:

§ 404.309 *Husband's insurance benefit; conditions of entitlement.* • • •

(e) Was receiving at least one-half of his support (see § 404.332) from his wife (1) at the time she became entitled to old-age insurance benefits and he filed proof of such support within 2 years after the month in which she became so entitled, or (2) with respect to benefits under this section for months after August 1954 on the basis of applications filed after such month and then only if his wife was, without the application of section 202 (j) (1) of the act, entitled to a primary insurance benefit (see § 403.402 of this chaper, Regulations 3) under the act for August 1950, on the first day of the first month for which she was entitled to old-age insurance benefits (§ 404.303) and in which an event described in § 404.408 (a) did not occur and he filed proof of such support within 2 years after such first month; and

10. Section 404.319 (d) is amended to read as follows:

§ 404.319 *Widow's insurance benefits; conditions of entitlement.* • • •

(d) (1) Has either filed an application (see Subpart G of this part) for widow's insurance benefits, or (2) was entitled after she attained age 65 to wife's insurance benefits based upon the wages and self-employment income of her husband for the month preceding the month in which he died, or (3) was entitled on the basis of such wages and self-employment income to mother's insurance benefits for the month preceding the month in which she attained age 65; and

11. Paragraphs (f), (g) and (h) of § 404.322 are amended to read as follows:

§ 404.322 *Widower's benefits; conditions of entitlement.* • • •

(f) Was receiving at least one-half of his support (see § 404.322) from his wife (1) at the time of her death, or at the time she became entitled to old-age insurance benefits, if she was then a currently insured individual and (except as provided in § 404.1357) filed proof of such support within 2 years after the date of her death or the month in which she became entitled to old-age insurance benefits (whichever is appropriate), or (2) with respect to benefits under this section for months after August 1954 on the basis of an application filed after such month and then only if his wife was a currently insured individual and was, without the application of section 202 (j) (1) of the act, entitled to a primary insurance benefit (see § 403.402 of this chapter, Regulations 3) under the act for August 1950, on the first day of the first month for which she was entitled to old-age insurance benefits (§ 404.303) and in which an event described in § 404.408 (a) did not occur and he filed proof of such support within 2 years after such first month; and

(g) Is not entitled to an old-age insurance benefit which is equal to or greater than three-fourths of the primary insurance amount (see Subpart C of this part) of his deceased wife.

12. Section 404.325 (a) (5) is amended to read as follows:

§ 404.325 *Mother's insurance benefits; conditions of entitlement.* (a) • • •

(5) (i) Has filed application (see Subpart G of this part) for mother's insurance benefits, or (ii) was entitled to wife's insurance benefits on the basis of the wages and self-employment income of such deceased insured individual for the month preceding the month in which he died.

13. Section 404.328 (c) is amended to read as follows:

§ 404.328 *Parent's insurance benefits; conditions of entitlement.* • • •

(c) Was receiving at least one-half of his support (see § 404.332) from such individual at the time of such individual's death and (1) (except as provided in §§ 404.1319 and 404.1357) has filed proof of such support within 2 years after the date of such death, or (2) if such individual is a fully insured individual by reason of the provisions of § 404.107 (b), has filed proof of such support prior to September 1956; and

14. There is hereby added after § 404.333 a new section, designated as § 404.333a, to read as follows:

§ 404.333a *Minimum survivor's or dependent's benefits.* Whenever the amount of a monthly insurance benefit for any month, as determined under the preceding sections of this subpart (except an old-age insurance benefit, § 404.303), is, prior to any reduction under § 404.335 (b), less than $30 and no other individual is entitled, as determined under such preceding sections and without the application of section 202 (j) (1) of the act, to a monthly benefit for such month on the basis of the same wages and self-employment income, such monthly insurance benefit shall, prior to any reduction under § 404.335 (b), be increased to $30.

15. Section 404.338 (b) is amended to read as follows:

§ 404.338 *Lump-sum death payments; conditions of entitlement.* • • •

(b) An application (see Subpart G of this part) for such lump sum has, except as otherwise provided in Subpart G of this part or in § 404.339, been filed within 2 years after the date of death of such individual.

16. Section 404.339 is amended to read as follows:

§ 404.339. *Lump-sum death payments; to widow or widower.* If the deceased individual is survived by a widow or widower (see §§ 404.1104 and 404.1107) who was living with (see § 404.1111) such individual at the time of death, such widow or widower will become entitled to a lump-sum death payment upon filing application in accordance with §404.338, except that no such application is necessary where such widow or widower was entitled to a wife's or husband's insurance benefits, on the basis of wages and self-employment income of the deceased individual, for the month preceding the month of death of such individual.

17. Section 404.343 is amended to read as follows:

§ 404.343 *Lump-sum death payments; amount of payment.* The lump sum to which a widow or widower is entitled under § 404.339 is an amount equal to 3 times the primary insurance amount (see Subpart C of this part) of the deceased insured individual or $255, whichever is the smaller. Where payment is made to an applicant because he is equitably entitled to a lump sum under § 404.340 the amount payable to him will be determined as follows:

(a) If no person other than such applicant is or becomes equitably entitled under § 404.340 the amount payable will be an amount equal to whichever of the following is the least: the amount of the burial expenses paid by the applicant, 3 times the primary insurance amount of the deceased individual, or $255;

(b) If two or more persons are or become equitably entitled under § 404.340, the total lump sum which may be paid shall be whichever of the following is the least: three times the primary insurance amount, $255, or the total amount of burial expenses paid by all persons equitably entitled. Each equitably entitled applicant shall be paid that proportionate part of the lump sum which the burial expenses paid by such person bears to the total burial expenses paid by all persons equitably entitled, but in no event shall the amount paid to such person exceed the amount of burial expenses paid by him.

18. There is hereby added after § 404.344 a new section, designated as § 404.345, to read as follows:

§ 404.345 *Prohibition against payment of benefits or lump-sum death payment where individual is deported.* If an individual is, after September 1, 1954, deported under paragraph (1), (2), (4), (5), (6), (7), (10), (11), (12), (14), (15), (16), (17), or (18) of section 241 (a) of the Immigration and Nationality Act, then:

(a) No old-age insurance benefits shall be paid to such individual for any month occurring (1) after the month in which the Administration is notified by the Attorney General that such individual has been so deported and (2) before the month in which such individual is thereafter lawfully admitted to the United States for permanent residence;

(b) If no benefit could be paid to such individual (or if no benefit can be paid to him if he were alive) for any month by reason of paragraph (a) of this section, no monthly insurance benefit under the preceding provisions of this subpart shall be paid on the basis of his wages or self-employment income for such month to any other person who is not a citizen of the United States and is outside the United States for any part of such month; and

(c) No lump-sum death payment shall be paid on the basis of such individual's wages and self-employment income if he dies (1) in or after the month in which such notice is received and (2) before the month in which he is thereafter lawfully admitted to the United States for permanent residence.

19. Section 404.401 is amended to read as follows:

§ 404.401 *Modification in amount of benefits or lump-sum death payments.* Under certain conditions the amount of benefits and lump sums, as calculated under sections 202 (a)–202 (i) of the act, must be modified upward or downward in determining the amount actually to be paid to the beneficiary. The modifications in the amount calculated under those sections of the act occur where:

(a) Reductions of benefits are required under sections 202 (j) (1), 202 (k) (3), and 203 (a) of the act, or

(b) Increases are required under section 202 (m) or 215 (g) of the act, or

(c) Deductions from benefits or lump sums are required under section 203 (b), (c), (f), (g), or (i) of the act, section 907 of the Social Security Act Amendments of 1939, or section 101 (l) (3) of the Social Security Amendments of 1954, or

(d) Adjustment is required under section 204 (a) of the act, or

(e) Suspensions are required under section 202 (n) of the act.

20. Section 404.402 is amended to read as follows:

§ 404.402 *When reductions are required.* A reduction in the amount of benefits is required when for any month the total amount of benefits, calculated under section 202 (a) through (h), payable on the basis of the wages and self-employment income of an insured individual is more than $40 for months prior to September 1952, or $45 for months after August 1952 and prior to September 1954, or the larger of $50 or 1½ times the individual's primary insurance amount for months after August 1954, and exceeds one of the following amounts:

(a) $150 for months prior to September 1952, or $168.75 for months after August 1952 and prior to September 1954, or $200 for months after August 1954, or

(b) Eighty percentum of such individual's average monthly wage; or

(c) If any of such benefits are payable to a child who would, but for the provision in section 202 (k) (2) (A) of the act (see § 404.334) be entitled to benefits payable on the basis of the wages and self-employment income of one or more insured individuals, 80 percentum of the sum of the average monthly wages of all of such insured individuals.

21. Paragraph (a) of § 404.403 is amended to read as follows:

§ 404.403 *How reductions are made*—(a) *Applicability of provisions of § 404.402.* If, by reason of § 404.402, a reduction in the amount of benefits is required, each of such benefits (except an old-age insurance benefit) must be proportionately reduced so that the total of the benefits will be the amount stated in paragraph (a), (b), or (c) of such § 404.402, whichever is the least, except that if the conditions of paragraph (c) of § 404.402 exist, the limitation specified in paragraph (b) of § 404.402 shall not apply. In no case will the total amount of benefits for any month be reduced to the amount less than $40 for months prior to September 1952, or $45 for months after August 1952 and prior to September 1954, or the larger of $50 or 1½ times the insured individual's primary insurance amount for months after August 1954.

22. The heading of § 404.403 (b) is amended to read as follows:

(b) *Circumstances under which provisions of § 404.402 are inapplicable with respect to benefits for months prior to September 1954.* * * *

23. Section 404.403 is amended by adding at the end thereof, two new paragraphs, designated as paragraphs (c) and (d), to read as follows:

(c) *Circumstances under which provisions of § 404.402 are inapplicable with respect to benefits after August 1954.* The provisions of § 404.402 will not apply where:

(1) An individual was entitled (without the application of section 202 (j) (1) of the act) to an old-age insurance benefit under section 202 (a) of the act for August 1954; and

(2) One or more other persons were entitled (without the application of such section 202 (j) (1) of the act) to monthly benefits under section 202 on the basis of the wages and self-employment income of the individual referred to in subparagraph (1) of this paragraph; and

(3) The total of benefits to which all persons are entitled on the wages and self-employment income of the individual referred to in subparagraph (1) of this paragraph for any month subsequent to August 1954 for which such individual is entitled to such old-age insurance benefit would, because of the increase in benefits resulting from the Social Security Amendments of 1954 and the application of the maximum provisions appearing in § 404.402, be reduced to an amount lower than the total of such benefits to which such persons were entitled for August 1954. In such a case the total benefits payable for such subsequent month will not be reduced below the amount by which such individual's old-age insurance benefit for August 1954 would have been increased had the Social Security Amendments of 1954 been applicable in such month, plus the total benefits payable after August 1954 after the application of § 404.402, or the total benefits as determined by the provisions of paragraph (b) of this section whichever of such total benefits is the larger.

(d) *Circumstances under which § 404.401 (b) will be modified.* Where:

(1) Two or more persons are entitled (without the application of section 202 (j) (1) of the act) to monthly benefits under section 202 of the act for August 1954 on the basis of the wages and self-employment income of the deceased individual; and

(2) The total of benefits to which all such persons are entitled on the basis of such deceased individual's wages and self-employment income for any month after August 1954 would, but for the provisions of this paragraph, be reduced under the provisions of § 404.402 (b) to 80 percentum of such individual's average monthly wage;

then, for purposes of such paragraph (b) of such section, such individual's average monthly wage shall be the larger of his average monthly wage as determined under § 404.237, or his average monthly wage as determined under § 404.205, plus $7.

24. Section 404.406 is amended to read as follows:

§ 404.406 *Increases of benefits*—(a) *Increases to the next multiple of 10 cents.* If any monthly benefit computed under the provisions of section 202 of the act is not a multiple of 10 cents, it will be increased to the next higher multiple of 10 cents.

(b) *Increase of survivor's and dependent's benefits.* Under certain conditions, the monthly insurance benefit payable to an individual (except a

benefit payable under section 202 (a) of the act) may, if it is less than $30, be increased to $30 (see § 404.333a).

25. Section 404.407 is amended to read as follows:

§ 404.407 *Relationship between deductions, reductions, adjustments, and increases.* Reductions under § 404.402 and increases under § 404.406 (a) are made after making any deductions which may be required under subsection (b), (c), (f), (g), or (i) of section 203 of the act or under section 907 of the Social Security Act Amendments of 1939. However, reductions under § 404.402 are made before reductions under § 404.405, increases under § 404.406 (a) or adjustments under section 204 (a) of the act.

26. Section 404.408 is amended to read as follows:

§ 404.408 *Deductions imposed because an individual works*—(a) *When deductions imposed.* Deductions are to be made from any benefit or benefits payable to an individual and from any wife's, child's, or husband's insurance benefits payable to his wife, child, or husband with respect to such individual's wages and self-employment income for any month:

(1) Prior to September 1952, in which such individual under age 75 renders services for wages, as defined in §§ 404.1026 to 404.1027, of more than $50, or

(2) After August 1952 and prior to the first month of individual's first taxable year beginning after 1954, in which such individual was under age 75, with respect to months prior to 1955, or under age 72, with respect to months after 1954, and in which he renders services for wages, as defined in §§ 404.1026 to 404.1027, of more than $75, or

(3) In which such individual is charged in accordance with the provisions of § 404.414, with net earnings from self-employment of more than $50 or $75, as the case may be, or

(4) In which such individual is charged, in accordance with the provisions of § 404.414 with earnings, or

(5) After December 1954, in which such individual is under age 72 and on seven or more different calendar days in which he is engaged in noncovered remunerative activity outside the United States (§ 404.418).

For the purposes of determining whether under subparagraph (1) or (2) of this paragraph an individual has rendered services for wages of more than $50 or $75, whichever is applicable, the provisions of section 209 of the act which, for other purposes, limits the wages in a calendar year prior to 1951 to $3,000, after 1950 and prior to 1955 to $3,600, and after 1954 to $4,200, do not apply. (For circumstances under which deductions will be imposed where an individual's services are covered retroactively by an agreement under section 218 of the act and benefits are recomputed to include remuneration for such services, see § 404.265 (c).)

(b) *Amount of deductions.* The amount to be deducted shall be equal to the benefit or total of benefits payable to the individual and to the wife's, child's, or husband's benefit payable to such individual's wife, child, or husband, on the basis of his wages and self-employment income, in the month in which the event specified in any of the subparagraphs of paragraph (a) of this section occurred.

27. Section 404.412 is amended to read as follows:

§ 404.412 *Total amount to be deducted.* If, however, any of the events occasioning the deduction under § 404.408 and § 404.409 occurs in more than one month, the total amount to be deducted is equal to the sum of the deductions for all months in which any such event occurred. With respect to net earnings from self-employment under paragraph (a) (3) of § 404.408 and earnings under paragraph (a) (4) of § 404.408, a deduction event is deemed to have occurred in any month to which any excess of net earnings from self-employment or earnings, as the case may be, is charged (see § 404.414).

28. Section 404.414 is amended to read as follows:

§ 404.414 *Charging of earnings and net earnings from self-employment.* Prior to the Social Security Amendments of 1954 an individual was charged only on the basis of his net earnings from self-employment as that term is defined in § 404.1050. Enactment of such amendments eliminated such charging and provided for charging on the basis of his earnings, as that term is defined in § 404.417. Paragraphs (a), (b) and (c) of this section provide the method by which an individual will be charged with either earnings or net earnings from self-employment, as the case may be.

(a) *For taxable years ending prior to September 1952.* The following rules will apply in determining the amount of an individual's net earnings from self-employment that are to be charged to a particular month for purposes of deductions (§ 404.408) with respect to taxable years ending prior to September 1952:

(1) If the individual's net earnings from self-employment for the taxable year are not more than $50 times the number of months in such taxable year, each month in such year shall be charged with $50 or less; or

(2) If his net earnings from self-employment exceed that amount, each month of such year is first charged with $50. The first $50 of the excess (or the whole of the excess if it is less than $50) is charged to the latest month of the taxable year. The next $50 of the excess, if any (or the whole of the excess if it is less than $50) is charged to the next preceding month and so on until all of the excess is charged or every month to which a portion of the excess is chargeable has been charged with a part of such excess.

(b) *For taxable years ending after August 1952 and prior to the beginning of the individual's first taxable year after 1954.* The rules for charging net earnings from self-employment appearing in paragraph (a) of this section shall apply with respect to taxable years ending after August 1952 and prior to the beginning of the first taxable year after 1954, except that such charging shall be on the basis of $75 per month rather than $50 per month. Where an individual's taxable year ends in 1955 (other than the taxable year ending on December 31, 1955) and he has net earnings from self-employment by reason of section 101 (g) (1), (2), or (4) or section 101 (d) of the Social Security Amendments of 1954, his net earnings from self-employment for his taxable year ending in 1955 shall be credited equally to the last quarter of such taxable year and the three preceding quarters. Only that amount of net earnings from self-employment credited to quarters after 1954 shall be chargeable under this paragraph, but in no event will such net earnings from self-employment be charged to months prior to 1955.

(c) *For taxable years beginning after 1954.* With respect to taxable years beginning after 1954 and for purposes of deductions (§ 404.408) an individual will be charged only on the basis of his earnings and then only if such earnings in his taxable year exceed $100 times the number of months in such year. Where there is such an excess, the first $80 of such excess (or the whole of the excess, if it is less than $80) is charged to the latest month in the taxable year. The next $80 of the excess, if any (or the whole of the excess, if it be less than $80) is charged to the next preceding month and so on until all of the excess is charged or every month to which a portion of the excess is chargeable has been charged with a part of such excess.

29. Section 404.415 is amended to read as follows:

§ 404.415 *Months to which earnings and net earnings from self-employment cannot be charged*—(a) *Net earnings from self-employment.* Notwithstanding the provisions of § 404.414 net earnings from self-employment in excess of $50 times the number of months in the taxable year, if such taxable year ended prior to September 1952, or $75 times the number of months in the taxable year, if such taxable year ended after August 1952 and prior to the individual's first taxable year beginning after 1954 shall not be charged to any month:

(1) In which such individual was not entitled to a benefit;

(2) In which the individual performed services for wages for which he suffered deductions under § 404.408;

(3) In which the individual is a wife, widow, or a former wife divorced who suffers a deduction because of the occurrence of the event specified in § 404.409;

(4) In which the individual was 75 years of age or over with respect to months prior to 1955, or 72 years of age or over with respect to months after 1954; or

(5) In which the individual did not engage in self-employment.

(b) *Earnings.* Notwithstanding the provisions of § 404.414, earnings in excess of $100 times the number of months in the taxable year beginning after 1954 shall not be charged to any month:

(1) In which such individual was not entitled to a benefit;

(2) In which the individual was engaged in noncovered remunerative activity outside the United States for which he suffered a deduction under § 404.408;

(3) In which the individual is a wife, widow, or a former wife divorced who suffers a deduction because of the occurrence of the event specified in § 404.409;

(4) In which the individual was age 72 or over; or

(5) In which the individual did not engage in self-employment and did not render services for wages, as defined in § 404.417, of more than $80.

A person shall be deemed to have engaged in self-employment in any month if in such month he renders substantial services, as defined in § 404.416, in operating a trade or business as owner or partner, even though there may be no earnings or net earnings from self-employment attributable to his services for such month. For purposes of paragraph (b) (5) of this section, an individual will be presumed with respect to any month to have rendered services for wages, as defined in § 404.417, of more than $80 until it is shown to the satisfaction of the Administration that such individual did not render services in such month for more than such amount.

30. Section 404.416 is amended to read as follows:

§ 404.416 *Definition of "substantial services."* For the purposes of § 404.415 an individual is presumed to have rendered substantial services in each month in his taxable year. However, he may submit evidence to establish that in any month in such taxable year he did not render substantial services with respect to any trade or business the net income or loss of which is includible in computing his net earnings from self-employment for any taxable year if such taxable year ends prior to his first taxable year beginning after 1954, or in computing his earnings (but without regard to § 404.417 (b)) for any taxable year if such taxable year begins after 1954. In determining whether an individual has rendered such substantial services in a month, the particular facts in each case will be examined. The following factors, among others, will be considered in making the determination:

(a) The amount of time devoted to the trade or business,

(b) The amount of capital invested in the trade or business,

(c) The nature of the services rendered by the beneficiary,

(d) The seasonal nature of the trade or business,

(e) The presence or absence of a paid manager, a partner, or a family member who manages the business,

(f) The type of business establishment that is involved, and

(g) The relationship of the activity performed prior to the period of retirement with that performed subsequent to retirement.

Example. X, who was entitled to old-age insurance benefits during the entire year and was under 72 years of age, owned and actively operated a fruit stand during part of the year (June 15 through September 15). His net earnings from the business amounted to $1,610. During the month of October he worked a few hours a day as an employee at a neighborhood store and received wages therefor of $90. His total earnings for the taxable year were $1,700. In order to determine whether the benefits payable to X are subject to deductions because of his earnings, the excess over $1,200 (i. e., $500) will be charged to the following months: $80 to October since he rendered services for wages of more than $80 in that month, $80 to September, $80 to August, $80 to July, $80 to June, since in the months June-September he was engaged in self-employment. There would be no charging to the months of January through May and November and December since X did not engage in self-employment, nor did he render services for wages of more than $80 during those months. Therefore, deductions will be imposed against X's benefits only for the months of June, July, August, September, and October.

31. Section 404.417 is amended to read as follows:

§ 404.417 *Definition of earnings.* When the term "earnings" is used in this subpart and not as a part of the phrase "net earnings from self-employment," it shall mean an individual's earnings with respect to a taxable year beginning after 1954 and includes the sum of his wages, as defined in paragraph (b) of this section, for services rendered in such year and his net earnings from self-employment, as defined in paragraph (a) of this section, for such year minus any net loss from self-employment, as defined in paragraph (a) of this section, for such year.

(a) *Net earnings from self-employment and net loss from self-employment.* An individual's net earnings from self-employment and his net loss from self-employment for the purposes of this section and § 404.416, shall be determined under the provisions of section 211, but without regard to the provisions in paragraphs (1), (4), and (5) of subsection (c); any excess of income over deductions so resulting from such computation shall be his net earnings from self-employment and any excess of deductions over income so resulting shall be his net loss from self-employment.

(b) *Wages.* For purposes of this section, and §§ 404.415 (b), 404.423, 404.424, an individual's wages shall be determined under section 209, but without regard to the limitations as to amounts of remuneration specified in subsections (a), (g) (2), (g) (3), (h) (2), and (j) of such section 209; and in making such computation, services which do not constitute "employment" as defined in section 210 of the act performed within the United States by an individual as an employee shall be deemed to be employment as so defined if the remuneration for such services is not includible in computing his net earnings from self-employment or net loss from self-employment, as defined in paragraph (a) of this section.

(c) *Presumptions concerning wages.* For purposes of this section wages, as determined under paragraph (b) of this section, which according to reports received by the Administration are paid to an individual during a taxable year shall be presumed to have been paid to him for services rendered in such year until it is shown to the satisfaction of the Administration that they were paid for services rendered in another taxable year. If such reports with respect to an individual show his wages for a calendar year, such individual's taxable year shall be presumed to be a calendar year for purposes of this section until it is shown to the satisfaction of the Administration that his taxable year is not a calendar year.

32. Section 404.418 is amended to read as follows:

§ 404.418 *Definition of noncovered remunerative activity outside the United States.* An individual shall be considered to be engaged in noncovered remunerative activity outside the United States if he performs services outside the United States as an employee and such services do not constitute "employment" as defined in section 210, or if he carries on a trade or business outside the United States (other than the performance of his services as an employee) the net income or loss of which is not includible in computing his net earnings from self-employment, as defined in § 404.1050, for a taxable year and would not be excluded from net earnings from self-employment if carried on in the United States by any of the number of paragraphs of section 211 (a). When used in the preceding sentence with respect to a trade or business (other than the performance of services as an employee) the term "United States" does not include Puerto Rico or the Virgin Islands in the case of an alien who is not a resident of the United States (including Puerto Rico and the Virgin Islands); and the term "trade or business" shall have the same meaning as when used in section 162 of the Internal Revenue Code of 1954.

33. Section 404.419 is amended to read as follows:

§ 404.419 *Reports to the Administration of certain events occasioning deductions.* Section 203 (f) of the act imposes upon an individual the obligation to report to the Administration the occurrence of any of the events enumerated in subsection (b) or (c) of section 203 of the act (other than events described in subsection (b) (1) or (c) (1) thereof) if such individual is in receipt of benefits (on his own behalf or on behalf of another) from which a deduction is to be made under such subsections.

34. Section 404.420 is amended to read as follows:

§ 404.420 *Imposition of additional deductions for failure to report deduction event.* If the individual referred to in § 404.419 fails to report to the Administration the occurrence of any event occasioning a dedutcion prior to the receipt and acceptance of a benefit for the second month following the month in which the event occurred, a deduction is made in addition to that required under section 203 (b) or (c) of the act.

35. Section 404.421 is amended to read as follows:

§ 404.421 *Amount of additional deduction.* The amount of an additional deduction required under § 404.420 and

the manner in which it is effected are the same as provided for deductions under section 203 (b) or (c) of the act as may be modified by the application of section 203 (h) of the act, except that the amount of the first additional deduction imposed against any individual shall equal the deduction imposed for the first month in which an unreported deduction event occurred, even though the failure to report is with respect to more than one month.

36. Section 404.422 is amended to read as follows:

§ 404.422 *Imposition and collection of additional deductions for months prior to September 1954.* After August 31, 1954, no additional deduction shall be imposed under section 203 (f) in effect prior to the Social Security Amendments of 1954 on account of a beneficiary's failure to report services rendered for wages which, pursuant to section 203 (b) (1) of the act in effect prior to such amendment (§ 404.408 (a) (1) and (2)) caused a deduction from benefits. Any additional deduction imposed under such subsection 203 (f) prior to September 1, 1954, on account of an event occasioning a deduction under section 203 (b) (1) of the act in effect prior to the Social Security Amendments of 1954 (§ 404.408 (a) (1) and (2)) shall not reduce or affect any benefits paid or payable after August 1954.

37. Section 404.423 is amended to read as follows:

§ 404.423 *Reports to Administration of earnings or net earnings from self-employment.* Section 203 (g) of the act imposes upon an individual entitled to any monthly benefit under section 202 of the act during a taxable year (or the individual in receipt of such benefits on his behalf) the obligation to report to the Administration the amount of his earnings (or wages, as defined in §404.417 (b)) or net earnings from self-employment for any such taxable year.

(a) *Net earnings from self-employment.* With respect to taxable years ending prior to the first taxable year beginning after 1954, such individual is required to report his net earnings from self-employment for any such taxable year, when such net earnings from self-employment exceed the product of $50 or $75, whichever is applicable (see § 404.414), times the number of months in such year provided that the individual so entitled had not attained the age of 75 in or prior to the first month of such year.

(b) *Earnings.* With respect to taxable years beginning after 1954, such individual is required to file a report of his earnings, as defined in § 404.417 or his wages, as defined in § 404.417 (b) for any such taxable year when such earnings or wages, as the case may be, exceed the product of $100 times the number of months in such taxable year provided that the individual so entitled had not attained the age of 72 in or prior to the first month of such year.

The report for any taxable year must be filed with the Social Security Administration on or before the 15th day of the third month following the close of such year. The filing of an income tax return with respect to such individual's self-employment income is not such a report. The report to the Administration shall be made on such forms and in accordance with such instructions (printed thereon or attached thereto) as are prescribed by the Administration. The prescribed form may be obtained from any office of the Bureau.

38. Section 404.424 is amended to read as follows:

§ 404.424 *Imposition of additional deduction where individual fails to report earnings or net earnings from self-employment*—(a) *Failure to report earnings.* If an individual fails to make a timely report of his earnings or wages, as specified in § 404.423, with respect to the taxable years specified in such section and at least one deduction is imposed because of his earnings (see § 404.408) he shall suffer additional deductions.

(1) *First failure.* If such failure is the first one, one additional deduction will be imposed in an amount equal to his benefits for the last month of such taxable year to which he was entitled to such benefit.

(2) *Second failure.* If such failure is the second one, an additional deduction will be imposed equal to two times his benefit or benefits for the last month in such taxable year to which he was entitled to such benefit.

(3) *Third or subsequent failure.* If such failure is the third or subsequent one, an additional deduction will be imposed equal to three times his benefit or benefits for the last month of such taxable year for which he was entitled to such benefit.

Notwithstanding the preceding provisions of this section, the number of additional deductions required by this paragraph shall not exceed the number of months in such taxable year for which such individual received and accepted insurance benefits and for which deductions are imposed by reason of such earnings. In determining whether failure to report earnings is the first or subsequent failure for any individual, all taxable years ending prior to the imposition of the first additional deduction under this paragraph, other than the latest one of such years, shall be disregarded.

(b) *Failure to report net earnings from self-employment.* After August 31, 1954, no additional deductions under section 203 (g) of the act in effect prior to the Social Security Amendments of 1954 will be imposed for the failure of an individual to report his net earnings from self-employment for taxable years as specified in § 404.423 (a). Any additional deduction imposed under such section 203 (g) prior to September 1, 1954, will not reduce or affect any benefit paid or payable after August 1954.

39. There is added immediately following § 404.424 a new section, designated as § 404.424a to read as follows:

§ 404.424a *Good cause for failure to make required reports*—(a) *When good cause is found to exist.* The failure of an individual to make any report required by § 404.419 or § 404.423 within the time prescribed therein shall not be regarded as such a failure if he affirmatively establishes to the satisfaction of the Administration that his failure to file a timely report was due to good cause and not due to any wilful neglect. In determining whether good cause has been established, due regard shall be given to the nature of the provisions regarding deductions and to the circumstances involved in each particular case. This would involve, for example, cases where failure to file timely reports was caused by:

(1) Serious illness of the individual or by death or serious illness in his immediate family,

(2) Inability of the individual to obtain, within the time required to file the report, earnings information from his employer because of death or serious illness of the employer or one in his immediate family, or unavoidable absence of his employer, or destruction by fire or other damage of the employer's place of business or his records,

(3) Destruction by fire or other damage of the individual's place of business or business records,

(4) Transmittal of such report, within the time required to file the report, in good faith to another Government agency,

(5) Unawareness of the statutory provision combining wages and net earnings from self-employment, provided the individual was awarded benefits before 1955 and has $1,200 or less in earnings from each source, or unawareness that noncovered as well as covered earnings are counted for deduction purposes, provided the individual was awarded benefits before 1955 and has covered earnings of $1,200 or less,

(6) Unawareness of the statutory provision that an annual report is required where earnings exceed $1,200 for the year in which individual attained age 72,

(7) Belief that the statutory provision requiring that Federal income tax returns for a calendar year be filed by April 15 also applied to the annual report, provided the individual filed an annual report with the Administration before April 16,

(8) Erroneous information furnished to the individual by an employee of the Administration,

(9) Failure on the part of the Administration to furnish forms in sufficient time for an individual to complete and file the report on or before the date it was due, provided he made a timely request to the Administration for such forms,

(10) Belief that an extension of time granted by the Internal Revenue Service for filing income tax returns was also applicable to the anual report to be made to the Administration,

(11) Reliance on continuing issuance of checks after individual correctly reported a deduction event to the Administration and the individual was not furnished an annual report by the Administration for completion for that year.

(b) *When good cause is not found to exist.* Generally, an individual will not

be regarded as having established good cause where, after having been found to have good cause for a failure to file a timely report for an earlier year, he again fails to file a timely report under the same or similar circumstances.

40. Section 404.425 is amended to read as follows:

§ 404.425 *Suspensions of benefits currently because individual worked or engaged in self-employment*—(a) *Circumstances under which benefits may be suspended.* If the Administration determines, on the basis of information obtained by or submitted to it, that it may reasonably be expected that an individual entitled to benefits under section 202 for any taxable year will suffer deductions imposed under section 203 (b) (see § 404.408) by reason of his earnings or net earnings from self-employment for such year, the Administration may, before the close of such taxable year, suspend the payment for each month in such year (or for only such months as the Administration may specify) of the benefits payable on the basis of such individual's wages and self-employment income. Such suspension shall remain in effect with respect to the benefits for any month until the Administration has determined whether or not any deduction is imposed for such months under section 203 (b).

(b) *Request for report to Administration during taxable year.* The Administration may, before the close of the taxable year of an individual entitled to benefits during such year, request of such individual that he make, at such time or times as the Administration may specify, a declaration of his estimated earnings or net earnings from self-employment for the taxable year and that he furnish to the Administration such other information with respect to such earnings or net earnings from self-employment as the Administration may specify. A failure by such individual to comply with any such request shall in itself constitute justification for a determination under this section that it may reasonably be expected that the individual will suffer deductions imposed under section 203 (b) by reason of his earnings or net earnings from self-employment for such year.

(c) *Request for report to Administration after close of taxable year.* If, after the close of a taxable year which begins after 1954 of an individual entitled to benefits under section 202 for such year, the Administration requests such individual to furnish a report of his earnings for such taxable year or any other information with respect to such earnings which the Administration may specify and if the individual fails to comply with such request, such failure shall, in itself, constitute justification for a determination that such individual's benefits are subject to deductions under § 404.408 for each month in any such taxable year (or only for such months thereof as the Administration may specify) by reason of his earnings for such year.

41. Section 404.426 is amended by inserting at the end of paragraph (b) thereof a new paragraph, hereby designated as (c), to read as follows:

(c) *Effective date of repeal of section 203 (i) of the act.* The provisions of this section shall not be applicable with respect to any benefits for months after August 1954. Effective September 1, 1954, this section is no longer operative.

42. Section 404.427 is amended to read as follows:

§ 404.427 *Deduction under section 907 of the Social Security Act Amendments of 1939.* Section 907 of the Social Security Act Amendments of 1939 provides for deductions from benefits and lump-sum death payments in cases where the taxes imposed by section 1400 of the Internal Revenue Code of 1939:

(a) With respect to a wage earner's employment in 1939 and subsequent to his attaining age 65; or

(b) With respect to services which constitute employment by virtue of section 209 (o) of the Act in effect prior to the Social Security Act Amendments of 1950 have neither been deducted by his employer from the wages paid him for services in such employment nor paid by such employer. The total amount to be deducted is an amount equal to 1 percent of such wages with respect to which taxes have neither been deducted nor paid by the employer. The provisions of such section 907 as referred to in paragraph (a) hereof shall not be applicable with respect to any benefits for months after August 1954 and effective September 1, 1954, are no longer operative.

43. Section 404.501 is amended to read as follows:

§ 404.501 *General applicability of section 204 (a).* Section 204 (a) of the act provides for adjustments, as set forth in §§ 404.502 and 404.503, in cases where an error has been made which results in an overpayment or underpayment to an individual under title II of the act, including overpayments and underpayments prior to January 1940. The provisions for adjustment also apply in cases where, through error,

(a) A reduction required under section 203 (a), 202 (j) (1), 202 (k) (3) of the act, or

(b) An increase required under section 202 (d) (2), 202 (m), and 215 (g), or

(c) A deduction required under section 203 (b) (as may be modified by section 203 (h)), (c), or (i) of the act or section 907 of the Social Security Act Amendments of 1939, or

(d) A suspension under section 202 (n) is not made, or where such a reduction, increase, deduction, or suspension is made which is either larger or smaller than required. As used in this part, the term "overpayment" includes a payment where nothing was payable under title II of the act and a payment resulting from the failure to impose timely deductions under section 203 (b) (as may be modified by section 203 (h)), or (c) of the act (hereinafter referred to as a "deduction-overpayment"). The term "underpayment" includes nonpayment where some amount was payable under that title.

44. Section 404.504 is amended to read as follows:

§ 404.504 *Relation to provisions for reductions and increases.* The amount of an overpayment or underpayment of a benefit is the difference between the amount paid to the beneficiary and the amount of such benefit as reduced under section 203 (a), 202 (j) (1) or 202 (k) (3), or as increased under section 202 (d) (2), 202 (m), or 215 (g). Likewise, in effecting an adjustment with respect to an overpayment, no amount can be considered as having been withheld from a particular benefit, which is in excess of the amount of such benefit as so decreased.

45. Section 404.1001 is amended by adding at the end thereof a new paragraph, designated as (w), to read as follows:

§ 404.1001 *General definitions and use of terms.* * * *

(w) "Social Security Amendments of 1954" means the act approved on September 1, 1954 (68 Stat. 1052)

(Secs. 205, 1102, 49 Stat. 624, 647, as amended; 42 U. S. C. 405, 1302. Interprets or applies 68 Stat. 1052)

[SEAL] CHARLES I. SCHOTTLAND,
Commissioner of Social Security.

Approved: April 11, 1955.

ROSWELL B. PERKINS,
Acting Secretary.

TITLE 16—COMMERCIAL PRACTICES

Chapter I—Federal Trade Commission

[File No. 21-165]

PART 23—MILK AND ICE CREAM CAN INDUSTRY

ORDER RESCINDING RULES

Whereas on July 15, 1931, the Commission promulgated trade practice rules for the Milk and Ice Cream Can Industry, which were codified in the Code of Federal Regulations (16 CFR Part 23); and

Whereas it appears that the said rules for this industry do not in some respects accurately reflect existing requirements of law, and members of this industry generally are not interested in having such rules revised; and

Whereas under the circumstances proceedings for revision of the rules for this industry do not appear to be warranted:

It is ordered, That the said rules be and the same are hereby rescinded.

Issued: April 18, 1955.

By the Commission.

[SEAL] ROBERT M. PARRISH,
Secretary.

[F. R. Doc. 55-3290; Filed, Apr. 20, 1955; 8:53 a. m.]

TITLE 36—PARKS, FORESTS, AND MEMORIALS

Chapter I—National Park Service, Department of the Interior

PART 20—SPECIAL REGULATIONS

MOUNT RAINIER NATIONAL PARK; SPEED

Paragraph (c) *Speed,* of § 20.5 *Mount Rainier National Park,* is amended to read as follows:

(c) *Speed.* The maximum speed of automobiles and other vehicles, except in emergencies as provided in § 1.42 (b) of this chapter, shall not exceed the following prescribed limits when appropriate signs giving notice thereof are erected:

(1) 15 miles per hour:

(i) When approaching or upon a curve or any other part of a road or highway in the event the driver's view is obstructed within a distance of 100 feet along the road or highway in the direction in which such driver is proceeding.

(2) 20 miles per hour:

(i) In any business or residence district.

(ii) Upon that portion of any road or highway which passes through or borders upon a public campground, parking area, or other place of public assemblage.

(3) 35 miles per hour:

(i) On U. S. Highway No. 410 from Chinook Pass to its junction with the East Side Road at Cayuse Pass.

(ii) On the Sunrise (Yakima Park) Road between its junction with the White River Campground Road and Sunrise.

(iii) On the White River Campground Road.

(iv) On the Carbon River Road.

(v) On the road from the Nisqually Park Entrance to Paradise.

(vi) On the West Side Road.

(vii) On the Mowich Lake Road.

(4) 45 miles per hour:

(i) On the East Side Road between its junction with U. S. Highway No. 410 at Cayuse Pass and the south park boundary.

(ii) On the Sunrise (Yakima Park) Road between its junction with U. S. Highway No. 410 and its junction with the White River Campground Road.

(5) 50 miles per hour:

(i) On U. S. Highway No. 410 between the north park boundary and its junction with the East Side Road at Cayuse Pass.

(6) Trucks of a ton and one-half capacity or over, 30 miles per hour except on U. S. Highway No. 410 between the north park boundary and its junction with the East Side Road at Cayuse Pass.

(7) Trucks of a ton and one-half capacity or over, 40 miles per hour on U. S. Highway No. 410 between the north park boundary and its junction with the East Side Road at Cayuse Pass.

(8) Vehicles towing trailers or other vehicles of any kind, 30 miles per hour, except on U. S. Highway No. 410 between the north park boundary and its junction with the East Side Road at Cayuse Pass.

(9) Vehicles towing trailers or other vehicles of any kind, 40 miles per hour on U. S. Highway No. 410 between the north park boundary and its junction with the East Side Road at Cayuse Pass.

(10) In every event, vehicles shall be driven or operated at appropriate reduced speed when approaching and crossing an intersection, when approaching and going around a curve, when approaching a hill crest, when traveling upon a narrow and winding road, and when special hazards exist with respect to pedestrians or other traffic or by reason of weather or roadway conditions.

(Sec. 3, 39 Stat. 535, as amended; 16 U. S. C. 3)

Issued this 29th day of March 1955.

[SEAL] PRESTON P. MACY,
Superintendent,
Mount Rainier National Park.

[F. R. Doc. 55-3269; Filed, Apr. 20, 1955; 8:49 a. m.]

PART 20—SPECIAL REGULATIONS

ROCKY MOUNTAIN NATIONAL PARK; SPEED

Add new paragraph (g) *Speed,* to § 20.7 *Rocky Mountain National Park,* to read as follows:

(g) *Speed.* Speed limits in the Park, except in emergencies as provided in § 1.42 (b) of this chapter, are as follows:

(1) 40 miles per hour:

(i) Between the National Park boundary at the Grand Lake Entrance and the Phantom Valley Trading Post.

(2) 35 miles per hour:

(i) All other roads in the Park.

(3) As provided in § 1.42 (a) of this chapter, vehicles shall be operated at an appropriate reduced speed where so posted or when approaching and crossing an intersection, when approaching and going around a curve, when approaching a hill crest, when traveling upon a narrow and winding road, and when special hazards exist with respect to pedestrians or other traffic, or by reason of weather or roadway conditions.

(Sec. 3, 39 Stat. 535, as amended; 16 U. S. C. 3)

Issued this 31st day of March 1955.

[SEAL] JAMES V. LLOYD,
Superintendent,
Rocky Mountain National Park.

[F. R. Doc. 55-3270; Filed, Apr. 20, 1955; 8:49 a. m.]

PART 20—SPECIAL REGULATIONS

ZION AND BRYCE CANYON NATIONAL PARKS; SPEED

Paragraph (d) *Speed,* of § 20.10 *Zion and Bryce Canyon National Parks,* is amended to read as follows:

(d) *Speed.* Speed in the Parks, except in emergencies as provided in § 1.42 (a) of this chapter, is limited to 35 miles per hour except where lower limits are prescribed and posted.

(Sec. 3, 39 Stat. 535, as amended; 16 U. S. C. 3)

Issued this 16th day of March 1955.

[SEAL] PAUL R. FRANKE,
Superintendent, Zion and Bryce Canyon National Parks.

[F. R. Doc. 55-3271; Filed, Apr. 20, 1955; 8:49 a. m.]

PART 20—SPECIAL REGULATIONS

LASSEN VOLCANIC NATIONAL PARK; SPEED

Paragraph (e) *Speed,* of § 20.11 *Lassen Volcanic National Park,* is amended to read as follows:

(e) *Speed.* Speed limits in the Park, except in emergencies as provided in § 1.42 (b) of this chapter, are as follows:

(1) 25 miles per hour:

(i) On the Hat Creek Road, Butte Lake Road, Warner Valley Road, and Juniper Lake Road.

(2) 20 miles per hour

(i) In any business, residential, or Government service area.

(ii) Upon that portion of any road or highway which passes through or borders upon a public campground, picnic area, parking area, or other place of public assemblage.

(3) In every event, vehicles shall be driven or operated at appropriate reduced speed when approaching and crossing an intersection, when approaching and going around a curve, when approaching a hill crest, when traveling upon a narrow and winding road, and when special hazards exist with respect to pedestrians or other traffic or by reason of weather or roadway conditions.

(Sec. 3, 39 Stat. 535, as amended; 16 U. S. C. 3)

Issued this 5th day of April 1955.

[SEAL] EDWARD D. FREELAND,
Superintendent,
Lassen Volcanic National Park.

[F. R. Doc. 55-3272; Filed, Apr. 20, 1955; 8:49 a. m.]

PART 20—SPECIAL REGULATIONS

EVERGLADES NATIONAL PARK

1. Paragraph (k) *Unattended property,* is added to § 20.45 *Everglades National Park,* reading as follows:

(k) *Unattended property.* No person shall leave unattended for more than 30 days any boat, airboat, houseboat, barge, or other floating property, or fish net, bait trap, crab trap, or other device used in catching products of the sea.

2. Paragraph (l) *Reckless operation of boats,* is added to § 20.45 *Everglades National Park,* reading as follows:

(l) *Reckless operation of boats.* The operation of any boat on waters of Everglades National Park in a careless or heedless manner, in willful or wanton disregard of the rights or safety of others, or without due caution and at speed or in a manner so as to endanger or be likely to endanger any person or property is prohibited.

(1) *Speed of boats.* Except where different speed limits are indicated by posted signs or markers, speed of boats shall not exceed 40 miles per hour in the waters of the Park.

(Sec. 3, 39 Stat. 535, as amended; 16 U. S. C. 3)

Issued this 25th day of March 1955.

[SEAL] DANIEL B. BEARD,
Superintendent,
Everglades National Park.

[F. R. Doc. 55-3273; Filed, Apr. 20, 1955; 8:50 a. m.]

PART 20—SPECIAL REGULATIONS

THEODORE ROOSEVELT NATIONAL MEMORIAL PARK; SPEED

Part 20 is amended by adding a new § 20.50 reading as follows:

§ 20.50 *Theodore Roosevelt National Memorial Park*—(a) *Speed.* Speed limits in the Park, except in emergencies as provided in § 1.42 (b) of this chapter, are as follows:

(1) 15 miles per hour:

(i) In public campgrounds including approach and exit roads to campgrounds so posted.

(ii) Headquarters areas including approach and exit roads so posted.

(2) 35 miles per hour:

(i) On all public roads in the park, except that vehicles shall be operated at safe driving speeds as provided in § 1.42 (a) of this chapter.

(Sec. 3, 39 Stat. 535, as amended; 16 U. S. C. 3)

Issued this 22d day of March 1955.

[SEAL] JOHN W. JAY, JR.,
Superintendent.

[F. R. Doc. 55-3274; Filed, Apr. 20, 1955; 8:50 a. m.]

PART 20—SPECIAL REGULATIONS

SCOTTS BLUFF NATIONAL MONUMENT; SPEED

Part 20, Special Regulations, is amended by adding a new § 20.53 to read as follows:

§ 20.53 *Scotts Bluff National Monument*—(a) *Speed.* Speed of automobiles and other vehicles, except ambulances and Government cars on emergency trips, shall not exceed 25 miles per hour on any of the Monument roads unless different speed limits are indicated by posted signs or markers.

(Sec. 3, 39 Stat. 535, as amended; 16 U. S. C. 3)

Issued this 4th day of April 1955.

[SEAL] FRANK H. ANDERSON,
Superintendent,
Scotts Bluff National Monument.

[F. R. Doc. 55-3275; Filed, Apr. 20, 1955; 8:50 a. m.]

TITLE 43—PUBLIC LANDS: INTERIOR

Chapter I—Bureau of Land Management, Department of the Interior

[Circular 1905]

PART 196—PHOSPHATE LEASES AND USE PERMITS

SIZE OF LEASEHOLD AND LIMITATION OF ACREAGE HOLDINGS

Section 196.2 (b) is amended to read as follows:

§ 196.2 *Size of leasehold and limitation of acreage holdings.* * * *

(b) A lessee, upon a showing that the leased deposits extend into adjoining Federal lands may, upon application to be filed in the Land Office, be granted, subject to the acreage limitation under paragraph (a) of this section, a lease for additional acreage, if the Manager, after consultation with the Mining Supervisor, shall determine that the increased acreage will result in conservation of natural resources and will provide for the most economical and efficient recovery of a minable deposit without waste. In applying this paragraph, fringe acreage in an area not of interest to more than one operator, and lacking sufficient reserves of phosphate deposits to warrant independent development, may be leased noncompetitively without publication either by separate lease or by adding to an existing leasehold (within the aggregate limitation of 2,560 acres), subject to a bonus of not less than $1.00 an acre, a minimum royalty, and such other terms and conditions as may be determined at the time the lease offer is made. If, however, the fringe acreage has sufficient reserves to warrant independent development, or, if, following appropriate inquiry of operators in the area and consultation with the Mining Supervisor, the Manager determines that there is competitive interest therein, the lands will be offered competitively under § 196.11.

(Sec. 32, 41 Stat. 450; 30 U. S. C. 189)

DOUGLAS MCKAY,
Secretary of the Interior.

APRIL 14, 1955.

[F. R. Doc. 55-3256; Filed, Apr. 20, 1955; 8:45 a. m.]

Appendix C—Public Land Orders

[Public Land Order 1125]

UTAH

WITHDRAWING PUBLIC LANDS FOR USE OF DEPARTMENT OF THE AIR FORCE AS A SUPERSONIC TRACK AND TESTING AREA

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

Subject to valid existing rights, the following-described public lands in Utah are hereby withdrawn from all forms of appropriation under the public-land laws, including the mining and mineral-leasing laws, and reserved for use of the Department of the Air Force as a supersonic track and testing area and for other military purposes:

SALT LAKE MERIDIAN

T. 40 S., R. 12 W.,
Sec. 33, S½S½.
T. 41 S., R. 12 W.,
Sec. 4;
Sec. 5, lot 1, S½NE¼, SE¼;
Sec. 8, E½, E½NW¼, NE¼SW¼;
Sec. 9, N½NE¼, W½, SW¼SE¼;
Sec. 17, E½, S½SW¼;
Sec. 19, NE¼NE¼;
Sec. 20, N½;
Sec. 21, N½.

The areas described aggregate 2,851.68 acres.

This order shall be subject to the existing withdrawals for reclamation and power purposes so far as they affect any of the lands; and shall take precedence over, but not otherwise affect the Departmental order of April 8, 1935, establishing Utah Grazing District No. 4.

ORME LEWIS,
Assistant Secretary of the Interior.

APRIL 15, 1955.

[F. R. Doc. 55-3258; Filed, Apr. 20, 1955; 8:46 a. m.]

[Public Land Order 1126]

CALIFORNIA

WITHDRAWING PUBLIC LANDS FOR USE OF DEPARTMENT OF THE AIR FORCE IN CONNECTION WITH EDWARDS AIR FORCE BASE

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

Subject to valid existing rights, the public lands in the following-described areas in California are hereby withdrawn from all forms of appropriation under the public-land laws, including the mining and mineral-leasing laws, and reserved for use of the Department of the Air Force for military purposes in connection with Edwards Air Force Base:

SAN BERNARDINO MERIDIAN

T. 8 N., R. 10 W.,
Sec. 24, E½SE¼, NW¼SE¼.

The area described contains 120 acres.

This order shall apply to all lands within the above-described area, upon the cancellation, termination or release of prior entries, selections, rights, appropriations, or claims, or upon the revocation of prior withdrawals, unless expressly otherwise provided in the order of withdrawal.

ORME LEWIS,
Assistant Secretary of the Interior.

APRIL 15, 1955.

[F. R. Doc. 55-3259; Filed, Apr. 20, 1955; 8:46 a. m.]

[Public Land Order 1127]

ALASKA

RESERVING LANDS WITHIN CHUGACH NATIONAL FOREST FOR USE BY FOREST SERVICE, DEPARTMENT OF AGRICULTURE, FOR ADMINISTRATIVE AND PUBLIC SERVICE SITES AND HIGHWAY PURPOSES

By virtue of the authority vested in the President by the act of June 4, 1897 (30 Stat. 34, 36; 16 U. S. C. 473), and otherwise, and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

Subject to valid existing rights, the public lands within the following-described area within the Chugach National Forest are hereby withdrawn from all forms of appropriation under the public-land laws including the mining and the mineral-leasing laws, and reserved for use by the Forest Service, Department of Agriculture, for administrative and public service sites, and highway purposes:

CHUGACH NATIONAL FOREST

A strip of land 25 chains in width and approximately 9.5 miles in length, paralleling the southwest shore of Kenai Lake from the west end of the bridge near the outlet of Kenai Lake, approximate latitude 60°29' 30" N., longitude 149°48'30" W., southeasterly to an unnamed creek in approximate latitude 60°23'30" N., longitude 149°39'30" W.

The tract contains approximately 1,885 acres.

This order shall take precedence over but not otherwise affect the existing withdrawal of the lands for national forest purposes.

ORME LEWIS,
Assistant Secretary of the Interior.

APRIL 15, 1955.

[F. R. Doc. 55-3260; Filed, Apr. 20, 1955; 8:46 a. m.]

[Public Land Order 1128]

ALASKA

PARTIALLY REVOKING PUBLIC LAND ORDER NO. 1028 OF NOVEMBER 4, 1954, WHICH RESERVED PUBLIC LANDS FOR USE OF BUREAU OF LAND MANAGEMENT AS A FOREST MANAGEMENT AREA

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

Public Land Order No. 1028 of November 4, 1954, reserving public lands in Alaska for use of the Bureau of Land Management as a forest management area, is hereby revoked so far as it affects the following-described lands:

FAIRBANKS MERIDIAN

T. 2 S., R. 3 W.,
Sec. 16.
T. 3 S., R. 4 W.,
Sec. 16, that portion lying north of right limit of Tanana River.

The areas described aggregate 1,050.55 acres.

The lands are subject to the reservation for the support of common schools in Alaska, provided by the act of March 4, 1915, (38 Stat. 1214; 48 U. S. C. 253) as amended by the acts of March 5, 1952 (66 Stat. 14) and August 5, 1953 (67 Stat. 364).

ORME LEWIS,
Assistant Secretary of the Interior.

[Public Land Order 1129]

ALASKA

WITHDRAWING PUBLIC LAND FOR USE OF BUREAU OF LAND MANAGEMENT AS AN ADMINISTRATIVE SITE

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

Subject to valid existing rights, the following-described public land in Alaska is hereby withdrawn from all forms of appropriation under the public-land laws, including the mining and the mineral-leasing laws, and reserved for use of the Bureau of Land Management, Department of the Interior, as the Slana Administrative Site:

A tract of land located on south side of Glenn Highway (Big Timber-Slana section Milepost 61.675) Latitude 62°42'30" North, Longitude 144° West, approximately one-half mile west of Slana, more particularly described as follows: from Milepost 61 on Slana-Tok road, South, 2 chains, thence S. 80° E. 27.5 chains, thence S. 66° E. 18 chains, thence S. 64° E. 8.5 chains along center line of road, thence South 150 feet to edge of R-O-W, to the point of beginning, thence S. 26° W. 5.0 chains; N. 64° W. 10.0 chains; N. 26° E. 5.0 chains; S. 64° E. 10.0 chains to the point of beginning.

The tract described contains 5 acres.

ORME LEWIS,
Assistant Secretary of the Interior.

[Public Land Order 1131]

ARKANSAS AND FLORIDA

RESERVING LANDS WITHIN OZARK AND OCALA NATIONAL FORESTS FOR USE OF THE FOREST SERVICE AS ADMINISTRATIVE SITES, RECREATION AREAS, OR FOR OTHER PUBLIC PURPOSES; REVOKING EXECUTIVE ORDER NO. 1830 OF SEPTEMBER 24, 1913

By virtue of the authority vested in the President by the act of June 4, 1897 (30 Stat. 34, 36; 16 U. S. C. 473) and otherwise, and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

Subject to valid existing rights, the following-described areas within the national forests hereinafter designated are hereby withdrawn from all forms of appropriation under the public-land laws, including the mining and mineral-leasing laws, except for oil and gas, provided that no part of the surface of the lands, not included within existing oil and gas leases, shall be used in connection with prospecting, mining, and removal of the oil and gas, and reserved for use of the Forest Service, Department of Agriculture, as administrative sites, recreation areas, or for other public purposes as indicated:

ARKANSAS—FIFTH PRINCIPAL MERIDIAN

OZARK NATIONAL FOREST

Shores Lake Recreation Area

T. 11 N., R. 28 W.,
Sec. 2, W½SW¼;
Sec. 10, W½W½, NE¼NE¼.

The areas described aggregate 280 acres.

White Rock Mountain Recreation Area

T. 12 N., R. 28 W.,
Sec. 22.

The area described aggregates 640 acres.

Gray's Forest Camp Recreation Area

T. 12 N., R. 27 W.,
Sec. 32, N½NW¼SE¼, N½NE¼SW¼.

The areas described aggregate 40 acres.

Cherry Bend Recreation Area

T. 13 N., R. 27 W.,
Sec. 36, SW¼SE¼.

The area described aggregates 40 acres.

Long Pool Recreation Area

T. 10 N., R. 20 W.,
Sec. 6, NW¼SE¼, SW¼NE¼.

The areas described aggregate 80 acres.

Bayou Bluff Recreation Area

T. 10 N., R. 18 W.,
Sec. 7, N½NW¼SE¼SW¼, SW¼NW¼SE¼SW¼, S½S½SE¼SW¼, NW¼SW¼SE¼SW¼;
Sec. 18, NE¼NW¼.

The areas described aggregate 59.3 acres.

Barkshed Recreation Area

T. 16 N., R. 12 W.,
Sec. 15, SE¼NW¼, E½SW¼.

The areas described aggregate 120 acres.

Blanchard Springs Recreation Area

T. 15 N., R. 11 W.,

[Public Land Order 1132]

FLORIDA

REVOKING EXECUTIVE ORDER NO. 5278 OF FEBRUARY 7, 1930

By virtue of the authority vested in the President by section 1 of the act of June 25, 1910, c. 421 (36 Stat. 847; 43 U. S. C. 141) and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

Executive Order No. 5278 of February 7, 1930, temporarily withdrawing the following-described public lands in Florida for classification and pending determination as to the advisability of including such lands in a national forest, is hereby revoked:

TALLAHASSEE MERIDIAN

T. 1 S., R. 17 E.,
Sec. 20, NE¼NW¼, NE¼SW¼.
T. 3 S., R. 17 E.,
Sec. 33, lot 4.
T. 1 S., R. 18 E.,
Sec. 32, SE¼SE¼.
T. 3 S., R. 18 E.,
Sec. 26, SE¼NE¼.
T. 2 S., R. 20 E.,
Sec. 36, lot 2.

The areas described aggregate 158.83 acres of public lands and 67.07 acres of patented lands.

The lands in Tps. 1 and 3, S., R. 18 E., are a part of the Osceola National Forest. The NE¼NW¼, sec. 20, T. 1 S., R. 17 E., and lot 4, sec. 33, T. 3 S., R. 17 E., have been patented.

The remaining lands are located in Columbia and Baker Counties, Florida. They are flatwood in character and have a level surface. The tracts are not suitable for cultivation. They are chiefly valuable for grazing.

No application for the lands may be allowed under the homestead, small tract, or any other nonmineral public-land law unless the lands have already been classified as valuable or suitable for such type of application, or shall be so classified upon the consideration of an application. Any application that is filed will be considered on its merits. The lands will not be subject to occupancy or disposition until they have been classified.

This order shall not otherwise become effective to change the status of the described lands until 10:00 a. m. on the 35th day after the date of this order. At that time the said lands shall become subject to application, petition, location and selection, subject to valid existing rights, the provisions of existing withdrawals, the requirements of applicable laws, and the 91-day preference-right filing period for veterans and others entitled to preference under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284), as amended.

Veterans' preference-right applications under the said act of September 27, 1944, may be filed on or before 10:00 a. m. on the 35th day after the date of this order, and those covering the same lands shall be treated as though simultaneously filed at that time. Applications filed under the act after that time and during the succeeding 91 days shall be considered in the order of filing. Applications by the general public under the public-land laws, filed on or before 10:00 a. m. on the 126th day after the date of this order shall be treated as though simultaneously filed at that time, where the applications are for the same lands; otherwise, priority of filing shall govern.

Inquiries regarding the lands shall be addressed to the Supervisor, Eastern States Office, Bureau of Land Management, Washington 25, D. C.

ORME LEWIS,
Assistant Secretary of the Interior.

APRIL 15, 1955.

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 969]

HANDLING OF AVOCADOS GROWN IN SOUTH FLORIDA

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given that the Department is giving consideration to the taking of the following actions, which have been proposed by the Avocado Administrative Committee, established pursuant to the marketing agreement and Order No. 69 (7 CFR Part 969; 19 F. R. 3439) regulating the handling of avocados grown in South Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.; 68 Stat. 906, 1047).

All persons who desire to submit written data, views, or arguments for consideration in connection with such proposals should do so by forwarding the same to the Director, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, Room 2077, South Building, Washington 25, D. C., not later than the tenth day after the publication of this notice in the FEDERAL REGISTER.

The proposed actions are as follows:

I. Amend § 969.130 of the supplementing rules and regulations (19 F. R. 5439) so that said section will read as follows:

§ 969.130 *Quality regulations.* Quality regulations recommended and established pursuant to § 969.50 shall be on the basis of the following specifications or appropriate modifications thereof:

(a) *No. 1 grade.* "No. 1 grade" consists of avacados of similar varietal characteristics which are mature but not overripe, well formed, clean, well colored, well trimmed, and which are free from decay, anthracnose, freezing injury and free from damage caused by

bruises, cuts or other skin breaks, pulled stems, russeting or similar discoloration, scars or scab, sunburn, sunscald or sprayburn, cercospora spot, other disease, insects, or mechanical or other means. In order to allow for variations incident to proper grading and handling, not more than a total of 10 percent, by count, of the avocados in any lot may fail to meet the requirements of this grade: *Provided,* That not more than one-half of this amount, or 5 percent, may be affected by anthracnose or decay, including therein not more than 1 percent for decay. (See application of tolerances and size requirements.)

(b) *Combination grade.* Any lot of avocados may be designated "Combination grade" when not less than 60 percent, by count, of the avocados in each container meet the requirements of the No. 1 grade and the remainder meet the requirements of the No. 2 grade. In order to allow for variations incident to proper grading and handling, not more than a total of 10 percent, by count, of the avocados in any lot may fail to meet the requirements of the No. 2 grade: *Provided,* That not more than one-half of this amount, or 5 percent, may be affected by anthracnose or decay, including therein not more than 1 percent for decay. No part of any tolerance shall be allowed to reduce for the lot as a whole the percentage of No. 1 fruit required or specified in the combination, but individual containers may have not more than 10 percent less than the percentage of No. 1 fruit required or specified. (See application of tolerances and size requirements.)

(c) *No. 2 grade.* "No. 2 grade" consists of avocados of similar varietal characteristics which are mature but not overripe, fairly well formed, clean, fairly well colored, well trimmed and which are free from decay, freezing injury and free from serious damage caused by anthracnose, bruises, cuts or other skin breaks, pulled stems, russeting or similar discoloration, scars or scab, sunburn, sunscald or sprayburn, cercospora spot, other disease, insects, or mechanical or other means. In order to allow for variations incident to proper grading and handling, not more than a total of 10 percent, by count, of the avocados in any lot may fail to meet the requirements of this grade: *Provided,* That not more than one-half of this amount, or 5 percent, shall be allowed for serious damage by anthracnose or decay, including therein not more than 1 percent for decay. (See application of tolerances and size requirements.)

(d) *No. 3 grade.* "No. 3 grade" consists of avocados of similar varietal characteristics which are mature but not overripe, which are not badly misshapen, and which are free from decay and free from serious damage caused by anthracnose and from very serious damage caused by freezing injury, bruises, cuts or other skin breaks, pulled stems, russeting or similar discoloration, scars, or scab, sunburn, sunscald or sprayburn, cercospora spot, other disease, insects, dirt, or mechanical or other means. In order to allow for variations incident to proper grading and handling, not more than a total of 10 percent, by count, of the avocados in any lot may fail to meet the requirements of this grade, including therein not more than 2 percent of decay. (See application of tolerances and size requirements.)

(e) *Unclassified.* "Unclassified" consists of avocados which have not been classified in accordance with any of the foregoing grades. The term "unclassified" is not a grade, as used herein, but is provided as a designation to show that no grade has been applied to the lot.

(f) *Size requirements.* (1) The size of avocados may be specified in terms of count, minimum weight or a range in weights. When counts or minimum weights are specified for the avocados in a container, the weight of the smallest fruit shall be not less than 75 percent of the weight of the largest fruit.

(2) In order to allow for variations incident to proper sizing, not more than 5 percent of the avocados in any lot may fail to meet the size requirements: *Provided,* That when the minimum and maximum weights are both specified, an additional 5 percent tolerance shall be allowed for avocados which are larger than the specified maximum weight.

(g) *Application of tolerances.* The contents of individual packages in the lot, based on sample inspection, are subject to the following limitations: *Provided,* That the averages for the entire lot are within the tolerances specified for the grade:

(1) For packages which contain more than 20 avocados and a tolerance of 10 percent or more is provided, individual packages in any lot shall have not more than one and one-half times the tolerance specified. For packages which contain more than 20 avocados and a tolerance of less than 10 percent is provided, individual packages in any lot shall have not more than double the tolerance specified, except that at least one defective and one off-size specimen may be permitted in any package.

(2) For packages which contain 20 avocados or less, individual packages shall have not more than double the tolerance specified, except that at least one defective and one off-size specimen may be permitted in any package.

(h) *Definitions*—(1) *Similar varietal characteristics.* "Similar varietal characteristics" means that the avocados in any container are similar in shape, texture and color of skin and flesh.

(2) *Mature.* "Mature" means that the avocado has reached a stage of growth which will insure a proper completion of the ripening process.

(3) *Overripe.* "Overripe" means that the avocado is dead ripe with flesh soft or discolored and past commercial use.

(4) *Well formed.* "Well formed" means that the avocado has the normal shape characteristic of the variety.

(5) *Clean.* "Clean" means that the avocado is practically free from dirt, staining or other foreign material.

(6) *Well colored.* "Well colored" means that the avocado has the color characteristic of the variety.

(7) *Well trimmed.* "Well trimmed" means that the stem, when present, is cut off fairly smoothly at a point not more than one-fourth inch beyond the shoulder of the avocado.

(8) *Damage.* "Damage" means any defect which materially affects the appearance, or the edible or shipping quality of the individual fruit, or the general appearance of the fruits in the container. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(i) Cuts or other skin breaks when not healed and penetrating beneath the epidermis or the aggregate area exceeds the area of a rectangle one inch in length and one-eigth inch in width; or when healed and the appearance is materially affected.

(ii) Pulled stems when the exposed stem cavity is excessively deep, or when skin surrounding the stem cavity is more than slightly torn.

(iii) Russeting or similar discoloration when the appearance of the avocado is affected to a greater extent than that of an avocado which has brown surface discoloration aggregating 5 percent of the fruit surface.

(iv) Scars or scab when the appearance of the avocado is affected to a greater extent than that of an avocado which has brown superficial scars aggregating 5 percent of the fruit surface.

(v) Sunburn when the appearance of the avocado is affected to a greater extent than that of an avocado which has yellow colored sunburn aggregating 5 percent of the fruit surface.

(vi) Sunscald or sprayburn when not well healed, or when soft, or when the appearance of the avocado is affected to a greater extent than that of an avocado which has brown superficial scars aggregating 5 percent of the fruit surface.

(9) *Fairly well formed.* "Fairly well formed" means that the avocado may be slightly abnormal in shape but not to the extent that the appearance is seriously affected.

(10) *Fairly well colored.* "Fairly well colored" means that the avocado shows a shade of color which is fairly characteristic of the variety.

(11) *Serious damage.* "Serious damage" means any defect which seriously affects the appearance, or the edible or shipping quality of the individual fruit, or the general appearance of the avocados in the container. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as serious damage:

(i) Anthracnose when any spot exceeds the area of a circle one-fourth inch in diameter, or when more than 3 spots each exceeding the area of a circle three-sixteenths inch in diameter.

(ii) Cuts or other skin breaks when not healed and the aggregate area exceeds the area of a rectangle one inch in length and one-fourth inch in width, or when not healed and penetrating into the flesh of the fruit, or when healed and the appearance is seriously affected.

(iii) Pulled stems when the skin surrounding the exposed stem cavity is torn more than an aggregate area of a circle one-fourth inch in diameter, or when flesh is torn.

(iv) Russeting or similar discoloration when the appearance of the avocado is affected to a greater extent than that of an avocado which has brown surface discoloration aggregating 25 percent of the fruit surface.

(v) Scars or scab when the appearance of the avocado is affected to a greater extent than that of an avocado which has brown superficial scars aggregating 25 percent of the fruit surface.

(vi) Sunburn when the appearance of the avocado is affected to a greater extent than that of an avocado which has yellow colored sunburn aggregating 25 percent of the fruit surface.

(vii) Sunscald or sprayburn when not well healed, or when soft, or when the appearance of the avocado is affected to a greater extent than that of an avocado which has brown superficial scars aggregating 25 percent of the fruit surface.

(12) *Badly misshapen.* "Badly misshapen" means that the avocado is so badly curved, constricted, pointed or otherwise deformed that the appearance is very seriously affected.

(13) *Very serious damage.* "Very serious damage" means any defect which very seriously affects the appearance, or the edible or shipping quality of the avocado. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as very serious damage:

(i) Cuts or other skin breaks when not healed and penetrating into the flesh of the fruit, or any skin break very seriously affecting the appearance, or the edible or shipping quality.

(ii) Pulled stems when the skin surrounding the exposed stem cavity is torn more than an aggregate area of a circle one-half inch in diameter, or when the flesh is torn.

(iii) Russeting or similar discoloration when the appearance of the avocado is affected to a greater extent than that of an avocado which has brown surface discoloration aggregating 50 percent of the fruit surface.

(iv) Scars or scab when the appearance of the avocado is affected to a greater extent than that of an avocado which has brown superficial scars aggregating 50 percent of the fruit surface.

(v) Sunburn when the appearance of the avocado is affected to a greater extent than that of an avocado which has yellow colored sunburn aggregating 50 percent of the fruit surface.

(vi) Sunscald or sprayburn when not well healed, or when soft, or when the appearance of the avocado is affected to a greater extent than that of an avocado which has brown superficial scars aggregating 50 percent of the fruit surface.

II. Issue, effective 12:01 a. m., e. s. t., June 1, 1955, an implementing order which will, on and after that time, prohibit the handling of any avocados grown in South Florida which do not grade at least No. 3 grade, as such grade is proposed to be defined in pargaraph (d) of § 969.130 set forth in I of this notice.

Dated: April 18, 1955.

AVOCADOS

NOTICE OF PROPOSED RULE MAKING

Notice[1] is published in this issue of the FEDERAL REGISTER that the Department is giving consideration to the issuance of quality regulations for application, effective at 12:01 a. m., e. s. t., June 1, 1955, with respect to the handling of avocados pursuant to the provisions of the marketing agreement and Order No. 69 (7 CFR Part 969; 19 F. R. 3439) regulating the handling of avocados grown in South Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq., 68 Stat. 906, 1047). Such proposed quality regulations would, if adopted, prohibit, on and after June 1, 1955, the handling of any avocados which do not grade at least No. 3 grade, as such grade is proposed to be defined in the aforesaid notice.

Notice is hereby given that the Department is also giving consideration to applying, effective at 12:01 a. m., e. s. t., June 1, 1955, the same quality restrictions to all imports of avocados into the United States, and to requiring inspection and certification of each such import by the Federal or Federal-State Inspection Service pursuant to the provisions of § 1060.153 of the general regulations (7 CFR Part 1060; 19 F. R. 7707, 8012) applicable to the importation of certain listed commodities (including avocados).

All persons who desire to submit written data, views, or arguments for consideration in connection with the proposals set forth in the preceding paragraph should do so by forwarding the same to the Director, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, Room 2077, South Building, Washington 25, D. C., not later than the tenth day after the publication of this notice in the FEDERAL REGISTER.

Dated: April 18, 1955.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[T. D. 53781; Customs Delegation Order 8]

FIELD OFFICERS

DELEGATION OF AUTHORITY UNDER EMERGENT CONDITIONS

APRIL 15, 1955.

Delegation of authority to field officers of the Bureau of Customs under emergent conditions of authority transferred by the Secretary of the Treasury to the Commissioner of Customs.

By virtue of the authority vested in me by Treasury Department Order No. 165, revised (T. D. 53654; 19 F. R. 7241), there is hereby delegated to the respective collectors of customs, comptrollers of customs, appraisers of merchandise, supervising customs agents, and chief chemists, upon the proclamation by the President of the existence of a state of civil defense emergency or in the event of an enemy attack upon any point within the continental limits of the United States, so much of the authority then vested in the Commissioner of Customs by delegation from the Secretary of the Treasury as relates to the functions performed by the respective officers within their functional and geographical areas of jurisdiction.

The purpose of this order is to provide a temporary expedient to meet emergent conditions. The respective officers will be notified when they are to cease to exercise the authority herein delegated.

[SEAL] RALPH KELLY,
Commissioner of Customs.

POST OFFICE DEPARTMENT

ESTABLISHMENT OF REGIONAL HEADQUARTERS AT DENVER, COLO., FOR COLORADO, WYOMING, UTAH, ARIZONA, AND NEW MEXICO

The following is the text of Order No. 55860 of the Postmaster General, dated April 6, 1955, relative to the above subject:

Pursuant to the authority of section 1 (b) of Reorganization Plan No. 3 of the 1949, the following changes will become effective on April 11, 1955:

1. On the effective date there will be established a regional headquarters at Denver, Colorado under a Regional Director who will exercise the powers, duties, functions and jurisdiction delegated by Order No. 55809 dated January 3, 1955, and Order No. 55810 dated January 3, 1955 (20 F. R. 276). Pending appointment of a Regional Director the postal affairs affecting the Bureau of Operations and Bureau of Personnel in the region shall be under the direction of the Regional Operations Manager who will be rsponsible to the Assistant Postmaster General, Bureau of Post Office Operations. The Regional Operations Manager will be subject to all policy affecting regional operations prescribed by the Department in Washington. There will also be a Regional Controller in the regional office who will be responsible to the Assistant Postmaster General and Controller, Bureau of Finance. The Regional Personnel Manager will be administratively responsible to the Regional Operations Manager so far as Bureau of Operations activities are concerned, and functionally to the Assistant Postmaster General, Personnel. Functions such as those listed below which were formerly discharged by various headquarters, bureaus and offices in Washington will now be discharged by the regional staff.

A. Personnel functions, including such items as recruitment, selection and placement of personnel; training activities; labor relations; safety and health programs; classification of positions; awards and efficiency rating systems; review and disposition of disciplinary actions; and liaison with the Civil Service Commission in the region.

B. Service functions, including recommendations to the Department for the establishment or discontinuance of post offices, classified stations and branches; approval of requests for allowances of funds; maintenance of high standards of service in all post offices; and effective control of costs.

C. Industrial engineering functions, including administration of cost reduction programs; improvement in work methods; endorsement of requests for capital expenditures; maintenance of work standards; layout of facilities; provision of work simplification methods and training; and development of systems and procedures, other than accounting and fiscal procedures.

D. Controller functions, including the direction of accounting, budget and cost analysis activities.

E. Public information functions, including encouragement of public cooperation and participation in improving postal methods; and maintaining good relations with Federal, State and municipal officials.

2. Pending the appointment of a Regional Director, this order does not affect the bureaus and offices of the Department other than:

A. Bureau of Operations;

B. Bureau of Personnel;

C. Bureau of Finance (and Controller).

All other bureaus and offices, however, are expected to coordinate and cooperate with this new regional organization.

3. The region will be divided into five districts. All postmasters in each district will report directly to their district manager.

4. Previous orders or instructions concerning the routing of communications from postmasters to the above-mentioned bureaus in Washington are hereby superseded. All communications, with respect to the functions set forth in this order will be directed to the appropriate district manager, with the exceptions of monthly and quarterly accounts, which will continue to be routed as at present.

5. District headquarters cities, and the jurisdiction of each district, are as follows:

DISTRICT NO. 1—DENVER, COLO.

All counties in Colorado.

DISTRICT NO. 2—CHEYENNE, WYO.

All counties in Wyoming.

DISTRICT NO. 3—SALT LAKE CITY, UTAH

All counties in Utah.

DISTRICT NO. 4—PHOENIX, ARIZ.

All counties in Arizona.

DISTRICT NO. 5—ALBUQUERQUE, N. MEX.

All counties in New Mexico.

6. District Managers will be designated in a separate announcement. They will act for and be responsible to the Regional Operations Manager on post office matters within their Districts. Each District Manager will be responsible for functions delegated to him by the Regional Operations Manager, including such things as: making major operating decisions within his District; recommending action on all supervisory appointments; recommending action on requests for funds; advising Regional Operations Manager on District matters and conditions; carrying out regional policies in the District; interpreting departmental and regional policies and recommending changes; coordinating with other bureaus and government agencies in the District; taking necessary actions on complaints; directing the control of expenditures in the District; and maintaining essential records.

(R. S. 161, 396; secs. 304, 309, 42 Stat. 24, 25, sec. 1 (b), 63 Stat. 1066; 5 U. S. C. 22, 133z–15, 369)

[SEAL] ABE MCGREGOR GOFF,
The Solicitor.

DEPARTMENT OF AGRICULTURE

Commodity Stabilization Service

SUGARCANE IN FLORIDA; WAGES AND PRICES

NOTICE OF HEARING AND DESIGNATION OF PRESIDING OFFICERS

Pursuant to the authority contained in subsections (c) (1) and (c) (2) of section 301 of the Sugar Act of 1948, as amended, (61 Stat. 929; 7 U. S. C. Sup. 1131), and in accordance with the rule of practice and procedure applicable to wage and price proceedings (7 CFR 802.1 et seq.), notice is hereby given that a public hearing will be held in Clewiston, Florida, in the Sugarland Park Auditorium on May 5, 1955, beginning at 10:00 a. m.

The purpose of this hearing is to receive evidence which may be of assistance to the Secretary of Agriculture in determining (1) pursuant to the provisions of section 301 (c) (1) of the act, fair and reasonable wage rates for persons employed in the production, cultivation, or harvesting of sugarcane in Florida during the period July 1, 1955 through June 30, 1956, on farms with respect to which applications for payment under the act are made, and (2) pursuant to the provisions of section 301 (c) (2) of the act, fair and reasonable prices for the 1955 crop of sugarcane to be paid, under either purchase or toll agreements, by producers who process sugarcane grown by other producers and who apply for payments under the act.

In the interest of obtaining the best possible information, all interested persons are requested to appear at the hearing to express their views and present appropriate data in regard to wages and prices.

The hearing, after being called to order at the time and place mentioned herein, may be continued from day to day within the discretion of the presiding officers and may be adjourned to a later day or to a different place without notice other than the announcement thereof by the presiding officers.

Ward S. Stevenson and Larry F. Diehl are hereby designated as presiding officers to conduct either jointly or severally the foregoing hearing.

Issued this 18th day of April 1955.

[SEAL] LAWRENCE MYERS,
Director, Sugar Division.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

MONTANA

NOTICE OF PROPOSED WITHDRAWAL AND RESERVATION OF LANDS

The United States Forest Service, Department of Agriculture, has filed an application, Serial No. Montana 014987, for the withdrawal of the lands described below, from location and entry under the general mining laws. The applicant desires the withdrawal of these lands to protect administrative and recreation sites and other public service areas.

For a period of thirty days from the date of publication of this notice, persons having cause may present their objections in writing to the undersigned official of the Bureau of Land Management, Department of the Interior, 1245 North Twenty-ninth Street, Billings, Montana.

If circumstances warrant it, a public hearing will be held at a convenient time and place, which will be announced.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

The lands involved in the application are:

MONTANA PRINCIPAL MERIDIAN

BEAVERHEAD NATIONAL FOREST

Antone Administrative Site

T. 12 S., R. 5 W.,
Sec. 21: NE¼NE¼.

The area described contains 40 acres.

Selway Lookout Administrative Site

T. 8 S., R. 15 W.,
Sec. 17: SE¼NE¼NE¼.

The area described contains 10 acres.

Wise River Ranger Station

T. 1 N., R. 11 W.,
Sec. 34: SE¼SE¼.
T. 1 S., R. 11 W.,
Sec. 3: Lots 1, 4, 7, 8, SE¼NE¼, SE¼ and those portions of Lots 2, 3, 5, 6, SW¼NE¼, S½NW¼ not included in HES No. 223.

The area described contains approximately 460 acres.

HELENA NATIONAL FOREST

Aspen Grove Campground

T. 14 N., R. 7 W.,
Sec. 7: Lot 7, NW¼ Lot 8, S½N½N½NW¼SE¼, S½N½NW¼SE¼, S½NW¼SE¼, SE¼NE¼SW¼.

The area described contains approximately 95.58 acres.

Beaver Creek Campground

T. 15 N., R. 9 W.,
Sec. 33: SW¼SE¼.

The area described contains 40 acres.

Beaver Creek Recreational Area

T. 13 N., R. 1 W.,
Sec. 27: NE¼NE¼, SW¼NE¼, NE¼SW¼, N½SW¼SW¼;
Sec. 28: SE¼SE¼.

The area described contains 180 acres.

Blackfoot Canyon Recreational Area

T. 14 N., R. 9 W.,
Sec. 29: NE¼NE¼NE¼.

The area described contains 10 acres.

Colorado Mountain Lookout Administrative Site

T. 9 N., R. 5 W.,
Sec. 26: SW¼NW¼SW¼, NW¼SW¼SW¼;
Sec. 27: SE¼NE¼SE¼, NE¼SE¼SE¼.

The area described contains 40 acres.

Crow Creek Campground

T. 6 N., R. 1 W.,
Sec. 4: NW¼SE¼SE¼, N½SW¼SE¼SE¼.

The area described contains 15 acres.

Crystal Creek Picnic Area

T. 8 N., R. 2 W.,
Sec. 4: Lots 4, 11.

The area described contains 75.45 acres.

Glendale Campground

T. 6 N., R. 1 W.,
Sec. 14: SW¼SW¼SE¼, W½SE¼SW¼SE¼.

The area described contains 15 acres

Heart Lake Recreational Area

T. 16 N., R. 8 W., unsurveyed,
Sec. 17: SW¼SW¼;
Sec. 18: S½SE¼;
Sec. 19: N½NE¼;
Sec. 20: NW¼NW¼.

The area described contains 240 acres.

Indian Creek Recreational Area

T. 12 N., R. 1 E.,
Sec. 8: S½S½;
Sec. 17: N½NE¼.

The area described contains 240 acres.

Jenkins Gulch Campground

T. 6 N., R. 1 W.,
Sec. 4: S½NE¼NE¼SW¼, SE¼SE¼NE¼SW¼, N½SE¼SW¼, NW¼SW¼NW¼SE¼, S½SW¼NW¼SE¼.

The area described contains 35 acres.

Kading Pasture Administrative Site

T. 8 N., R. 7 W.,
Sec. 21: Lot 2, SE¼SE¼NW¼, NE¼SW¼, N½SE¼SW¼, W½NW¼SE¼.

The area described contains 134.80 acres.

Little Blackfoot Recreational Area

T. 9 N., R. 6 W.,
Sec. 30: SE¼NW¼, NE¼SW¼, N½SE¼SW¼.

The area described contains 100 acres.

McClellan Creek Recreational Area

T. 8 N., R. 2 W.,
Sec. 9: Lots 6, 7, N½NW¼SE¼, N½SW¼SW¼SE¼.

The area described contains 56.12 acres.

Meadow Creek Recreational Area

T. 16 N., R. 9 W., unsurveyed,
Sec. 18: SW¼SW¼;
Sec. 19: NW¼NW¼.
T. 16 N., R. 10 W., unsurveyed,
Sec. 13: SE¼SE¼;
Sec. 24: NE¼NE¼.

The area described contains 120 acres.

Meriwether Campground

T. 13 N., R. 2 W.,
Sec. 19: E½.

The area described contains 320 acres.

Ontario Creek Recreational Area

T. 8 N., R. 6 W.,
Sec. 17: SW¼NW¼SW¼, NW¼SW¼SW¼;
Sec. 18: SE¼NE¼SE¼, NE¼SE¼SE¼.

The area described contains 40 acres.

Snowbank Summer Home Area

T. 15 N, R. 8 W.,
Sec. 9: S½NW¼NE¼, N½SW¼NE¼.

The area described contains 40 acres.

Strawberry Lookout Administrative Site

T. 8 N., R. 3 W.,
Sec. 1: S½SE¼NE¼.

The area described contains 20 acres.

Ten Mile Recreational Area

T. 9 N., R. 5 W.,
Sec. 17: W½NW¼SW¼, NW¼SW¼SW¼, SE¼NE¼SE¼, NE¼SE¼SE¼, S½SE¼SE¼;
Sec. 20: NE¼NE¼, SE¼NW¼NE¼, S½NE¼, SE¼SE¼NW¼, NW¼NE¼SE¼, N½NW¼SE¼, SW¼NW¼SE¼;
Sec. 21: SW¼NW¼.

The area described contains 290 acres.

Treasure Mountain Lookout Administrative Site

T. 8 N., R. 6 W.,
Sec. 6: Lots 2, 3, 6, 7.

The area described contains 134.02 acres.

Trout Creek Recreational Area

T. 11 N., R. 1 W.,
Sec. 2: S½NE¼, N½SW¼;
Sec. 3: SW¼SW¼.

The area described contains 200 acres.

Vigilante Campground

T. 12 N., R. 1 E.,
Sec. 30: SE¼.

The area described contains 160 acres.

KOOTENAI NATIONAL FOREST

Lake Creek Campground

T. 26 N., R. 28 W.,
Sec. 5: S½SW¼SW¼;
Sec. 8: N½NW¼NW¼.

The area described contains 40 acres.

Sylvanite Administrative Site

T. 34 N., R. 33 W., unsurveyed.

A tract of land described by metes and bounds as follows:

Beginning at Corner No. 6 of H. E. S. No. 845, thence S. 20° 00' E., 11.75 chs., thence S. 38° 00' E. 25.90 chs., thence S. 13° 30' E. 4.50 chs., thence S. 25° 00' W. 13.50 chs., thence S. 12° 00' E. 12.50 chs., thence S. 86° 00' W. 12.40 chs., thence N. 15° 00' W. 54.87 chs., thence N. 47° 00' E. 12.40 chs. to the point of beginning, containing an area of 90 acres more or less.

R. D. NIELSON,
State Supervisor,
Bureau of Land Management.

APRIL 14, 1955.

ALASKA

SMALL TRACT CLASSIFICATION ORDER NO. 38, AMENDMENT 1 AND NOTICE OF OPENING

APRIL 15, 1955.

1. Pursuant to authority delegated to me by Bureau Order No. 541, dated April 21, 1954 (19 F. R. 2473), I hereby amend Small Tract Classification Order No. 38, dated February 21, 1951, to read as follows:

ANCHORAGE AREA

POTTER ROAD UNIT NO. 2

For Lease and Sale; For Residence Sites

Seward Meridian:
T. 12 N., R. 3 W.,
Section 15:
Lots 33–88 incl.,
Lots 92–95 incl.,
Lots 98–143 incl.

Comprising 67 tracts aggregating 137.5 acres.

2. The classification of the above-described lands as amended by this order segregates them from all appropriations, including locations under the mining laws, except as to applications under the Small Tract Act and applications under the mineral leasing laws.

3. The lands are located approximately seven miles south and east of Anchorage. They are accessible mainly via the Lake Otis, Abbott and South Boundary Roads. The South Boundary Road is a newly constructed Alaska Road Commission road that borders the small tract unit on the north. Access to the south end of the area is via the Seward Highway, the O'Malley Road, and one quarter mile of private road. The private road is not maintained and can be considered as a fair weather road only. The terrain of the lands varies from gently rolling to rolling. Little Campbell Creek cuts across the south half of the area from south-east to north-west. The lands immediately adjacent to Little Campbell Creek are low and poorly drained. Vegetative cover consists of mature spruce and birch on the uplands and black spruce, alder, and willow on the lowlands. Utilities and public services available to the area include the public roads previously mentioned, an electric distribution system, school bus transportation and fire protection. Stores, churches, and other public services are available in Spenard and Anchorage.

4. The individual tracts vary in size from 1.25 to 2.50 acres. The supplemental plat of survey showing the loca-

tion of each tract can be secured for $1.00 from the Area Cadastral Engineering Office, Bureau of Land Management, Juneau, Alaska. Brochures which describe the area and contain sketch maps of the platting of the small tracts can be obtained free of charge from the Manager, Anchorage Land Office, Anchorage, Alaska. The appraised values of the tracts vary from $155 to $730 per tract as shown below. Rights-of-way, 50 feet in width, for road purposes will be reserved as shown below.

POTTER ROAD NO. 2 (ANCHORAGE AREA)—APPRAISAL SCHEDULE

Official description[1]	Acreage	Advance rental (2 years)	Easements (50 feet)	Appraised value
Seward Meridian, T. 12 N., R. 3 W., sec. 15:

[1] From supplemental plat of survey.

5. Leases will be issued for a term of two years and will contain an option to purchase in accordance with 43 CFR 257.13 (Circular 1899). Lessees who comply with the general terms and conditions of their leases will be permitted to purchase their tracts at the prices listed above at any time during the term of their leases providing that they have either (a) constructed the improvements specified in paragraph 6 or (b) filed a copy of an agreement in accordance with 43 CFR 257.13 (d). Leases will not be renewable unless failure to construct the required improvements is justified under the circumstances and nonrenewal would work an extreme hardship on the lessee.

6. To maintain their rights under their leases, lessees will be required to either (a) construct substantial improvements on their lands or (b) file a copy of an agreement with their neighbors binding them to construct substantial improvements on their lands. Such improvements must conform with health, sanitation, and construction requirements of local ordinances and must, in addition, meet at least the following minimum standards. The home must be insulated and be suitable for year-around occupancy, be on a permanent foundation, contain at least 192 square feet of floor space (outside measure), and contain a minimum of one door and one window. The home must be built in a workmanlike manner out of attractive materials properly finished. Adequate disposal and sanitary facilities must be installed.

7. Beginning at 10:00 a. m. on May 19, 1955, the lands will be open to filing of drawing-entry cards (Form 4–775) only by persons entitled to veterans' preference. In brief, persons entitled to such preference are (a) honorably discharged veterans who served in the armed forces of the United States for a period of at least 90 days after September 15, 1940, (b) surviving spouse or minor orphan children of such veterans through a legally authorized representative, and (c) with the consent of the veteran, the spouse of living veterans. The 90-day requirement does not apply to veterans who were discharged on account of wounds or disability incurred in the line of duty or the surviving spouse or minor children of veterans killed in the line of duty. Drawing-entry cards (Form 4–775) are available upon request from the Manager, Anchorage Land Office, Anchorage, Alaska.

Drawing-entry cards will be accepted if filled out in compliance with the instructions on the form and submitted to the above named official prior to 10:00 a. m. on June 9, 1955. A drawing will be held on that date to select the successful entrants who will be sent copies of the lease form, Form 4–776, with instructions as to their execution and return and as to payment of fees and rentals. All entrants will be notified of the results of the drawing.

For a period of 91 days or until the close of business on September 7, 1955, any tracts remaining unappropriated will be subject to filing in the order received by qualified veteran applicants. Such filings will be executed upon the lease form, Form 4–776.

During the 21-day period extending between 10:00 a. m. on August 18, 1955, and September 8, 1955, drawing-entry cards will be accepted from the general public on any unappropriated parcels of the subject land, however, during this 21-day period veteran priority rights still prevail. A drawing will be held at 10:00 a. m. on September 8, 1955, to select successful entrants, after which the unappropriated portions of the subject land will be open to application under this classification in order of filing. All entrants will be notified of the results of the drawing and successful entrants will be sent copies of the lease forms with instructions as to their execution.

The filing of the lease form, Form 4–776, must be accompanied by a filing fee of $10.00 plus the advance rental specified above. The advance rental is determined as being a sum which amounts to 1/20th of the appraised value of the land for each of two years under lease and rounded to the nearest five dollars. The advance rental for any unexpired full lease year, if any, subsequent to the filing of the application to purchase, will be subtracted from the sale price of the land as shown above. Failure to transmit the filing fee and the advance rental with the application will render the application invalid. Advance rentals will be returned to unsuccessful applicants. All filing fees will be retained by the United States.

8. All valid applications filed prior to February 21, 1951, will be granted the preference right provided for by 43 CFR 257.5 (a).

LOWELL M. PUCKETT,
Area Administrator.

ALASKA

NOTICE OF PROPOSED WITHDRAWAL AND RESERVATION OF LANDS

APRIL 14, 1955.

An application, serial number Anchorage 022782, for the withdrawal from all forms of appropriation under the public land laws, including the mining and mineral leasing laws of the lands described below was filed on March 1, 1955, by Soil Conservation Service. The purposes of the proposed withdrawal: Administrative site.

For a period of 60 days from the date of publication of this notice, persons having cause to object to the proposed withdrawal may present their objections in writing to the Area Administrator, Area 4, Bureau of Land Management, Department of the Interior, at Box 480, Anchorage, Alaska. In case any objection is filed and the nature of the opposition is such as to warrant it, a public hearing will be held at a convenient time and place, which will be announced, where opponents to the order may state their views and where proponents of the order can explain its purpose.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER, either in the form of a public land order or in the form of a notice of determination if the application is rejected. In either case, a separate notice will be sent to each interested party of record.

The lands involved in the application are:

SEWARD MERIDIAN

T. 6 N., R. 11 W.,
Section 31: Lots 131, 165 and 166.

Aggregating 5 acres.

LOWELL M. PUCKETT,
Area Administrator.

ARIZONA

RESTORATION ORDER UNDER FEDERAL POWER ACT; CORRECTION

APRIL 13, 1955.

Notice of Restoration Order Under the Federal Power Act, Document No. 29, Arizona, dated March 2, 1955, published in the FEDERAL REGISTER, March 10, 1955, (20 F. R. 1455), is hereby corrected as follows: Paragraph 3 should read as set forth below:

3. All of the subject lands are reserved in one or more of the following power withdrawals:

(a) Water Power Designation No. 5, approved February 9, 1917.

(b) Power Site Reserve No. 602, created April 4, 1917.

(c) Filing for preliminary permit in Project No. 730, on July 16, 1926, by the Arizona Sodium Production Company.

E. R. TRAGITT,
Acting State Supervisor.

FEDERAL POWER COMMISSION

[Docket No. G-7507]

UTAH SOUTHERN OIL CO.

NOTICE OF APPLICATION AND DATE OF HEARING

APRIL 15, 1955.

Take notice that Utah Southern Oil Company (Applicant), with a principal place of business in Salt Lake City, Utah, filed an application on December 27, 1954, for a certificate of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, authorizing Applicant to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant produces natural gas from State "A" Lease, Logan County, Colorado, which is sold in interstate commerce to Kansas-Nebraska Natural Gas Company, Inc. (under temporary authorization issued February 4, 1955), for resale.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on May 9, 1955, at 9:30 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before April 29, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[SEAL] LEON M. FUQUAY,
Secretary.

[Project No. 2183]

GRAND RIVER DAM AUTHORITY

NOTICE OF APPLICATION FOR LICENSE

APRIL 15, 1955.

Public notice is hereby given that Grand River Dam Authority, of Vinita, Oklahoma, has filed application under the Federal Power Act (16 U. S. C. 791a–825r) for license for proposed waterpower Project No. 2183, to be known as the Markham Ferry Project and located on Grand River and tributaries approximately 8 miles southeast of the City of Pryor in Mayes and Craig Counties, Oklahoma, and to consist of a dam about 80 feet high composed of an earth embankment section, a spillway section, a powerhouse and intake section, and two gravity nonoverflow sections, creating a reservoir with top pool elevations for power and flood control, respectively, at 617 feet and 634 feet above mean sea level; a powerhouse integral with the dam containing initially three turbines each rated at 20,000 horsepower under a head of 58 feet and driving a 15,000-kilowatt generator with provision for the future installation of two similar units in an extension of the powerhouse; five penstocks; a step-up substation at the dam; one or more 110,000-volt transmission lines connecting the step-up substation with the applicant's existing Markham Ferry Switching Station; and appurtenant facilities. Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure of the Commission (18 CFR 1.8 or 1.10), the time within which such petitions must be filed being specified in the rules. The last date upon which protests may be filed is May 31, 1955. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
Secretary.

SECURITIES AND EXCHANGE COMMISSION

[File No. 70-3361]

GEORGIA POWER CO.

NOTICE OF PROPOSED ISSUANCE AND SALE OF BONDS BY SUBSIDIARY PUBLIC-UTILITY COMPANY

APRIL 15, 1955.

Notice is hereby given that Georgia Power Company ("Company"), a public-utility subsidiary of The Southern Company, a registered holding company, has filed with this Commission an application and an amendment thereto pursuant to section 6 (b) of the Public Utility Holding Company Act of 1935 ("act") and Rule U-50 promulgated thereunder regarding the following proposed transaction:

The Company proposes to issue and sell, subject to the competitive bidding requirements of Rule U-50, $12,000,000 principal amount of First Mortgage Bonds, __ percent Series due 1985. The interest rate (which shall be a multiple of 1/8 of 1 percent) and the price to be paid to the Company (which shall be not less than 100 percent nor more than 102¾ percent of the principal amount, exclusive of accrued interest from May 1, 1955 to date of payment and delivery) will be determined by competitive bidding. The new bonds will be secured by a Mortgage and Deed of Trust executed by the Company to The New York Trust Company, Trustee, dated as of March 1, 1941, as heretofore supplemented and as further supplemented by a Supplemental Indenture to be dated as of May 1, 1955.

The Company proposes to use the net proceeds from the sale of the new bonds, together with other available funds, for the construction or acquisition of permanent improvements, extensions, and additions to its property. The Company contemplates making total expenditures of approximately $33,400,000 during 1955 for such purposes.

The fees and expenses to be paid in connection with the proposed transaction, other than underwriting commissions, are estimated at $73,386, including taxes, filing fees and recording fees, $18,436; cost of definitive bonds, printing and miscellaneous expenses, $28,000; charges of trustee (including counsel) $5,950; counsel fees $9,500; accountants' fees $4,500; and services of Southern Services, Inc., $7,000. In addition, the fees of independent counsel to the underwriters are estimated at $6,500.

The issue and sale of said bonds will have been expressly authorized by the Public Service Commission of Georgia, in which State the Company is organized and doing business.

The Company requests that the order of the Commission herein be made effective upon issuance.

Notice is further given that any interested person may, not later than April 29, 1955, at 5:30 p. m., request the Commission in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law, if any, raised by said application which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D. C. At any time after said date, said application, as now amended or as further amended, may be granted as provided by Rule U-23 of the rules and regulations promulgated under the act, or the Commission may take such other action as it may deem appropriate under the circumstances.

By the Commission.

FEDERAL REGISTER

VOLUME 20 NUMBER 79

Washington, Friday, April 22, 1955

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

[Reg. No. SR-410]

PART 42—IRREGULAR AIR CARRIER AND OFF ROUTE RULES

SPECIAL CIVIL AIR REGULATION; FLIGHT TIME LIMITATIONS FOR TRANSCONTINENTAL NONSTOP IRREGULAR AIR CARRIER INTERSTATE OPERATIONS

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 18th day of April 1955.

On June 14, 1954, the Board adopted Special Civil Air Regulation No. SR-405 which permitted air carriers in the conduct of scheduled transcontinental nonstop flights to schedule flight crew members for more than eight but not more than ten hours of continuous duty aloft on flights conducted in pressurized airplanes carrying at least two pilots and a flight engineer. Special Civil Air Regulation No. SR-405 will terminate with the effective date of any final action taken by the Board in respect of Draft Release No. 54-16, which was circulated to the public on May 28, 1954.

Subsequently a request was made to the Board by an irregular air carrier to provide that Part 42 operators may make nonstop flights on the same basis extended to the scheduled operators under SR-405.

The Board believes that the nonstop flight time limitations should be extended to irregular air carriers on substantially the same basis as they are currently applied to scheduled air carriers. The scheduled air carrier operating rules of Part 40 contain requirements for dispatch and company communications systems not currently required under the irregular air carrier operating rules of Part 42. In order to insure equivalent safety, therefore, the Board believes it necessary to add certain provisions concerning dispatch and company communications systems for the operations herein contemplated. The petitioner has advised the Board that it considers these provisions reasonable. Therefore, by this Special Civil Air Regulation the Board applies to irregular air carriers the provisions of SR-405 provided that the air carrier is able to show an independent air/ground communications service and a dispatch organization serving terminal points which are essentially similar to those required of scheduled air carriers.

It should be noted that the independent air/ground communications system specified by this rule is required to be approved by the Administrator as adequate to serve terminal points. This requirement is intended to provide an operational control system which insures reliable and rapid communications either direct or via acceptable point-to-point circuits between the pilot and the dispatcher under normal operating conditions. While the Board is not in this instance establishing firm criteria with respect to the geographic coverage of such a communications system, we envisage that it will normally permit communication between the pilot and the dispatcher at least during the last hour of the flight.

As is the case in scheduled air carrier operations, the Board contemplates that the dispatcher will be responsible for monitoring the progress of each flight and issuing instructions and information necessary for the continued safety of the flight within the area of communications provided under this rule. It is expected that the dispatch office will be so located with respect to the terminal point and so equipped with necessary communications facilities as to insure that the dispatcher will be in possession of necessary information to determine the flight may be terminated safely and to communicate such information to the pilot.

The Board anticipates that the air carrier shall determine that prior to serving in operations conducted under this rule, an aircraft dispatcher shall be familiar with all essential operating procedures and with the equipment and facilities to be used.

The Board contemplates that at the termination of SR-405 this regulation will have been reexamined and necessary action will then be taken with regard to flight time limitations for irregular long-range nonstop interstate operations.

Interested persons have been afforded an opportunity to participate in the making of this regulation, and due consideration has been given to all relevant matter presented. Since this regulation is in the nature of relieving from a re-

In consideration of the foregoing, the Civil Aeronautics Board hereby makes and promulgates the following Special Civil Air Regulation, effective April 18, 1955:

Notwithstanding the requirements of § 42.48 of the Civil Air Regulations, air carriers in the conduct of interstate transcontinental nonstop flights, in accordance with Part 42, may schedule flight crew members for more than eight but not more than ten hours of continuous duty aloft without an intervening rest period: *Provided*, That the flight is conducted in pressurized airplanes with a flight crew of at least two pilots and a flight engineer: *And provided further*, That the carrier utilize in the conduct of such operations an air/ground communications service independent of systems operated by the Federal Government, and a dispatch organization, both of which have been approved by the Administrator as adequate to serve the terminal points concerned. This regulation shall terminate with the effective termination of SR–405.

(Sec. 205, 52 Stat. 984; 49 U. S. C. 425. Interpret or apply §§ 601, 604, 52 Stat. 1007, 1010, as amended; 49 U. S. C. 551, 554)

By the Civil Aeronautics Board.

PART 600—DESIGNATION OF CIVIL AIRWAYS

ALTERATIONS

The civil airway alterations appearing hereinafter have been coordinated with the civil operators involved, the Army, the Navy and the Air Force, through the Air Coordinating Committee, Airspace Subcommittee, and are adopted to become effective when indicated in order to promote safety. Compliance with the notice procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to public interest and therefore is not required.

Part 600 is amended as follows:

1. Section 600.16 *Green civil airway No. 6 (Laredo, Tex., to Norfolk, Va.)* is amended between Blackstone, Va., and Norfolk, Va., to read: "Blackstone, Va., radio range station; Richmond, Va., radio range station; Norfolk, Va., radio range station to the Norfolk Municipal Airport, Norfolk, Va."

2. Section 600.234 is amended to read:

§ 600.234 *Red civil airway No. 34 (Charleston, W. Va., to Weeksville, N. C.).* From the Charleston, W. Va., radio range station via the Pulaski, Va., radio range station to the Greensboro, N. C., radio range station. From the intersection of the northeast course of the Greensboro, N. C., radio range and the northwest course of the Raleigh, N. C., radio range to the Raleigh, N. C., radio range station. From the intersection of the north course of the Williamston, N. C., VHF VAR radio range and the southwest course of the Norfolk, Va., radio range to the Weeksville, N. C. (Navy) radio range station.

3. Section 600.251 is amended to read:

§ 600.251 *Red civil airway No. 51 (Blackstone, Va., to Norfolk, Va.).* From the Blackstone, Va., radio range station via the intersection of the east course of the Blackstone, Va., radio range and the west course of the Langley, Va., AFB radio range to the Langley, Va., AFB radio range station, excluding the portions which overlap the Camp Pickett Restricted Area (R–44) and the Plum Tree Island Restricted Area (R–49).

4. Section 600.638 is amended to read:

§ 600.638 *Blue civil airway No. 38 (Five Finger, Alaska, to United States Canadian Border).* That airspace over United States territory from the Five Finger, Alaska, USCG nondirectional radio beacon via the Gustavus, Alaska, radio range; Haines, Alaska, nondirectional radio beacon to the Whitehorse, Yukon Territory, radio range station.

5. Section 600.6004 is amended to read:

§ 600.6004 *VOR civil airway No. 4 (Seattle, Wash., to Washington, D. C.).* From the Seattle, Wash., omnirange station via the Ellensburg, Wash., omnirange station; intersection of the Ellensburg omnirange 191° True and the Yakima omnirange 304° True radials; Yakima, Wash., omnirange station, excluding those portions which overlap danger areas; Pendleton, Oreg., omnirange station; Baker, Oreg., omnirange station; Boise, Idaho, omnirange station; intersection of the Boise omnirange 129° True and the Burley omnirange 292° True radials; Burley, Idaho, omnirange station, including a south alternate from the Boise omnirange station to the Burley omnirange station via the Twin Falls, Idaho, omnirange station; Malad City, Idaho, omnirange station; Rock Springs, Wyo., omnirange station; Cherokee, Wyo., omnirange station, including a north alternate; Laramie, Wyo., omnirange station; Denver, Colo., omnirange station, including a north alternate via the intersection of the Laramie omnirange 131° True and the Denver omnirange 014° True radials; Thurman, Colo., omnirange station, including a south alternate; Goodland, Kans., omnirange station, including a north alternate via the intersection of the Thurman omnirange 085° True and the Goodland omnirange 304° True radials; Hill City, Kans., omnirange station, including a north alternate; Russell, Kans., omnirange station; Salina, Kans., omnirange station, including a north alternate from Hill City omnirange station to Salina omnirange station; Topeka, Kans., omnirange station, including a south alternate; intersection of the Topeka omnirange 078° True and the Kansas City omnirange 261° True radials; Kansas City, Mo., omnirange station, including a north alternate; Columbia, Mo., omnirange station, including a south alternate and also a north alternate via the intersection of the Kansas City omnirange 076° True and the Columbia omnirange 292° True radials, excluding those portions which overlap danger areas; St. Louis, Mo., omnirange station, including a north and a south alternate; Centralia, Ill., omnirange station, including a north and a south alternate; Evansville, Ind., omnirange station, including a south alternate; the intersection of the Evansville omnirange 80° True and the Louisville omnirange 269° True radials; Louisville, Ky., omnirange station, including a north alternate from the Evansville omnirange station to the Louisville omnirange station; Lexington, Ky., omnirange station, including a south alternate and also a north alternate via the intersection of the Louisville, omnirange 083° True and the Lexington omnirange 294° True radials; Charleston, W. Va., omnirange station; Elkins, W. Va., omnirange station, including a north alternate via the intersection of the Charleston omnirange 049° True and the Elkins omnirange 264° True radials and also a south alternate via the intersection of the Charleston omnirange 081° True and the Elkins omnirange 227° True radials; Front Royal, Va., omnirange station; Herndon, Va., omnirange station to the point of intersection of the Herndon omnirange 089° True and the Washington, D. C., terminal omnirange 351° True radials.

6. Section 600.6005 is amended to read:

§ 600.6005 *VOR civil airway No. 5 (Jacksonville, Fla., to Cleveland, Ohio).* From the Jacksonville, Fla., omnirange station via the Alma, Ga., omnirange station, including a west alternate; Macon, Ga., omnirange station; intersection of the Macon omnirange 330° True and the Atlanta omnirange 102° True radials; to the Atlanta, Ga., omnirange station, including a west alternate from the Alma omnirange station to the Atlanta omnirange station via the intersection of the Alma omnirange 305° True and the Atlanta omnirange 151° True radials. From the Chattanooga, Tenn., omnirange station via the Nashville, Tenn., omnirange station; Bowling Green, Ky., omnirange station; intersection of the Bowling Green omnirange 048° True and the Louisville omnirange 189° True radials; Louisville, Ky., omnirange station, including an east alternate from the Bowling Green omnirange station to the Louisville, omnirange station via the intersection of the Bowling Green omnirange 063° True and the Louisville omnirange 168° True radials; Cincinnati, Ohio, omnirange station, including an east alternate; intersection of the Cincinnati omnirange 045° True and the Columbus omnirange 246° True radials; Columbus, Ohio, omnirange station; Mansfield, Ohio, omnirange station; to the Cleveland, Ohio, omnirange station.

7. Section 600.6007 *VOR civil airway No. 7 (Miami, Fla., to Green Bay, Wis.)* is amended by changing the portion between the Marianna, Fla., omnirange station and the Muscle Shoals, Ala., omnirange station to read: "Marianna, Fla., omnirange station; intersection of the Marianna omnirange 333° True and the Montgomery omnirange 137° True radials; Montgomery, Ala., omnirange station, including a west alternate from the Marianna omnirange station to the Montgomery omnirange station via the intersection of the Marianna omnirange 303° True and the Montgomery omnirange 192° True radials; Birmingham, Ala., omnirange station, including an east alternate via the intersection of the Montgomery omnirange 358° True and the Birmingham omnirange 138° True radials and also a west alternate; intersection of the Birmingham omnirange 358° True and the Muscle Shoals omnirange 129° True radials; Muscle Shoals, Ala., omnirange station;".

8. Section 600.6010 *VOR civil airway No. 10 (Pueblo, Colo., to New York, N. Y.)* is amended by changing all between the Carleton, Mich., omnirange station and the Philipsburg, Pa., omnirange station to read: "Carleton, Mich., omnirange station; Perry, Ohio, nondirectional radio beacon; Youngstown, Ohio, omnirange station; Philipsburg, Pa., omnirange station;"

9. Section 600.6014 *VOR civil airway No. 14 (Roswell, N. Mex., to Boston, Mass.)* is amended by changing the portion between the Tulsa, Okla., omnirange station and the Springfield, Mo., omnirange station to read: "Tulsa, Okla., omnirange station, including a north alternate and also a south alternate via the intersection of the Oklahoma City omnirange 100° True and the Tulsa omnirange 207° True radials; Neosho, Mo., omnirange station, including a north alternate via the intersection of the Tulsa omnirange 050° True and the Neosho omnirange 260° True radials; Springfield, Mo., omnirange station, including a north alternate via the intersection of the Neosho omnirange 045° True and the Springfield omnirange 261° True radials and also a south alternate;"

10. Section 600.6016 *VOR civil airway No. 16 (Los Angeles, Calif., to Boston, Mass.)* is amended by changing all between the Graham, Tenn., omnirange station and the Montebello, Va., omnirange station to read: "Graham, Tenn., omnirange station, including a south alternate; Nashville, Tenn., omnirange station; Crossville, Tenn., omnirange station, including a south alternate from the Graham omnirange station to the Crossville omnirange station via the Graham omnirange 099° True and the Crossville omnirange 257° True radials; intersection of the Crossville omnirange 104° True and the Knoxville omnirange 249° True radials; Knoxville, Tenn., omnirange station; Tri-City, Tenn., omnirange station; Pulaski, Va., omnirange station, including a north alternate from the Knoxville omnirange station to the Pulaski omnirange station via the intersection of the Knoxville omnirange 054° True and the Pulaski omnirange 260° True radials; Montebello, Va., omnirange station;"

11. Section 600.6018 *VOR civil airway No. 18 (Dallas, Tex., to Charleston, S. C.)* is amended by changing all after the Birmingham, Ala., omnirange station to read: Birmingham, Ala., omnirange station; Anniston, Ala., omnirange station; intersection of the Anniston omnirange 084° True radial and the Atlanta Airport ILS localizer west course; Atlanta, Ga., Airport ILS localizer; intersection of the Atlanta Airport ILS localizer east course and the Augusta omnirange 278° True radial; Augusta, Ga., omnirange station, including a south alternate from the Anniston omnirange station to the Augusta omnirange station via the intersection of the Anniston omnirange 104° True and the Atlanta omnirange 262° True radials; the Atlanta, Ga., omnirange station and the intersection of the Atlanta omnirange 102° True and the Augusta omnirange 263° True radials; intersection of the Augusta omnirange 090° True and the Charleston omnirange 301° True radials; to the Charleston, S. C., omnirange station. The portions of this airway which conflict with the Fort McClellan Restricted Area (R–130) are excluded.

12. Section 600.6020 *VOR civil airway No. 20 (Laredo, Tex., to Richmond, Va.)* is amended by changing all after the La Grange, Ga., omnirange station to read: "La Grange, Ga., omnirange station; Atlanta, Ga., omnirange station; intersection of the Atlanta omnirange 048° True and the Anderson omnirange 236° True radials; Anderson, S. C., omnirange station; Spartanburg, S. C., omnirange station; Greensboro, N. C., omnirange station; Danville, Va., omnirange station; to the Flat Rock, Va., omnirange station."

13. Section 600.6088 is amended by changing the caption to read: *"VOR civil airway No. 88 (Tulsa, Okla., to Mansfield, Ohio)*," by changing all before the Centralia, Ill., omnirange station to read: "From the Tulsa, Okla., omnirange station via the intersection of the Tulsa omnirange 050° True and the Springfield omnirange 261° True radials; Springfield, Mo., omnirange station; Vichy, Mo., omnirange station; intersection of the Vichy omnirange 084° True and the Centralia omnirange 261° True radials; Centralia, Ill., omnirange stations;" and by changing all after the Dayton, Ohio, omnirange station to read: "Dayton, Ohio, omnirange station; to the Mansfield, Ohio, omnirange station, including a north alternate."

14. Section 600.6092 is amended by changing the caption to read: *"VOR civil airway No. 92 (Chicago, Ill., to Washington, D. C.)*," and by changing all after the Mansfield, Ohio, omnirange station to read: "Mansfield, Ohio, omnirange station; intersection of the Mansfield omnirange 100° True and the Pittsburgh omnirange 291° True radials; Pittsburgh, Pa., omnirange station; intersection of the Pittsburgh omnirange 132° True and the Front Royal omnirange 307° True radials; Front Royal, Va., omnirange station; intersection of the Front Royal omnirange 112° True and the Washington terminal omnirange 245° True radials; to the Washington, D. C., terminal omnirange station."

15. Section 600.6093 *VOR civil airway No. 93 (Baltimore, Md., to Princeton, Maine)* is amended by changing all between the Allentown, Pa., omnirange station and the Concord, N. H., omnirange station to read: "Allentown, Pa., omnirange station; Wilkes-Barre-Scranton, Pa., omnirange station; Albany, N. Y., omnirange station; intersection of the Albany omnirange 099° True and the Concord omnirange 231° True radials; Concord, N. H., omnirange station;".

16. Section 600.6103 is added to read:

§ 600.6103 *VOR civil airway No. 103 (Elkins, W. Va., to Wheeling, W. Va.)*. From the Elkins, W. Va., omnirange station to the Wheeling, W. Va., omnirange station.

17. Section 600.6107 is amended to read:

§ 600.6107 *VOR civil airway No. 107 (Long Beach, Calif., to Red Bluff, Calif.)*. From the Long Beach, Calif., omnirange station via the intersection of the Long Beach omnirange 292° True and the Fillmore omnirange 141° True radials; Fillmore, Calif., omnirange station; Coalinga, Calif., omnirange station; Oakland, Calif., omnirange station; Ukiah, Calif., omnirange station; to the Red Bluff, Calif., omnirange station.

18. Section 600.6119 is amended to read:

§ 600.6119 *VOR civil airway No. 119 (Huntington, W. Va., to Buffalo, N. Y.)*. From the Huntington, W. Va., nondirectional radio beacon via the Parkersburg, W. Va., omnirange station; Wheeling, W. Va., omnirange station; Pittsburgh, Pa., omnirange station; intersection of the Pittsburgh omnirange 040° True and the Bradford omnirange 210° True radials; Bradford, Pa., omnirange station; to the Buffalo, N. Y., omnirange station.

19. Section 600.6122 is amended to read:

§ 600.6122 *VOR civil airway No. 122 (Crescent City, Calif., to Klamath Falls, Oreg.)*. From the Crescent City, Calif., omnirange station to the Medford, Oreg., omnirange station. From the point of intersection of the Medford, Oreg., omnirange 176° True and the Klamath Falls, Oreg., omnirange 273° True radials; to the Klamath Falls, Oreg., omnirange station.

20. Section 600.6132 is amended to read:

§ 600.6132 *VOR civil airway No. 132 (Cheyenne, Wyo., to Hutchinson, Kans.)*. From the Cheyenne, Wyo., omnirange station via the Akron, Colo., omnirange station, Goodland, Kans., omnirange station; to the Hutchinson, Kans., omnirange station.

21. Section 600.6138 is added to read:

§ 600.6138 *VOR civil airway No. 138 (Rock River, Wyo., to Sidney, Nebr.)*. From the Rock River, Wyo., omnirange station to the Sidney, Nebr., omnirange station.

22. Section 600.6139 *VOR civil airway No. 139 (Norwich, Conn., to Boston, Mass.)* is amended by changing all after the Providence, R. I., ILS localizer to read: "Providence, R. I., ILS localizer, intersection of the Providence ILS localizer course and the Boston ILS localizer course; to the Boston, Mass., localizer."

23. Section 600.6144 *VOR civil airway No. 144 (Chicago, Ill., to Washington, D. C.)* is amended by deleting the words, "Wheeling, W. Va., omnirange station;"

24. Section 600.6147 is amended to read:

§ 600.6147 *VOR civil airway No. 147 (Philadelphia, Pa., to Rochester, N. Y.)*. From the West Chester, Pa., omnirange station via the Allentown, Pa., omnirange station; intersection of the Allentown omnirange 329° True and the Elmira omnirange 134° True radials; Elmira, N. Y., omnirange station; intersection of the Elmira omnirange 305° True and the Rochester omnirange 183° True radials; to the Rochester, N. Y., omnirange station.

25. Section 600.6151 is amended to read:

§ 600.6151 *VOR civil airway No. 151 (Woonsocket, R. I., to Keene, N. H.)*. From the point of intersection of the Norwich, Conn., omnirange 043° True and the Gardner omnirange 152° True radials via the Gardner, Mass., omnirange station; to the Keene, N. H. nondirectional radio beacon.

26. Section 600.6173 is added to read:

§ 600.6173 *VOR civil airway No. 173 (Springfield, Ill., to Chicago, Ill.)*. From the Sprinfield, Ill., omnirange station via the Roberts, Ill., omnirange station; intersection of the Roberts omnirange 013° True and the Chicago Midway Airport terminal omnirange 198° True radials; to the Chicago, Ill., Midway Airport terminal omnirange station.

27. Section 600.6174 is amended to read:

§ 600.6174 *VOR civil airway No. 174 (Scotland, Ind., to Washington, D. C.)*. From the Scotland, Ind., omnirange station via the Louisville, Ky., omnirange station; York, Ky., omnirange station; Elkins, W. Va., omnirange station; Front Royal, Va., omnirange station; intersection of the Front Royal omnirange 112° True and the Washington, D. C., terminal omnirange 245° True radials; to the Washington, D. C., terminal omnirange station.

28. Section 600.6186 is added to read:

§ 600.6186 *VOR civil airway No. 186 (St. Louis, Mo., to Scotland, Ind.)*. From the St. Louis, Mo., omnirange station via the Vandalia, Ill., omnirange station; intersection of the Vandalia omnirange 073° True and the Scotland omnirange 293° True radials; to the Scotland, Ind., omnirange station.

29. Section 600.6172 *VOR civil airway No. 172 (Iowa City, Iowa, to Chicago, Ill.)* is amended by deleting the words, "Polo omnirange 259° True radials;" and substituting in lieu thereof the following words, "Polo omnirange 269° True radials;"

(Sec. 205, 52 Stat. 984, amended; 49 U. S. C. 425. Interpret or apply sec. 302, 52 Stat. 985, as amended; 49 U. S. C. 452)

This amendment shall become effective 0001 e. s. t., April 22, 1955.

[SEAL] F. B. LEE,
Administrator of Civil Aeronautics.

[F. R. Doc. 55-3291; Filed, Apr. 21, 1955; 8:45 a. m.]

[Amdt. 53]

PART 601 — DESIGNATION OF CONTROL AREAS, CONTROL ZONES, AND REPORTING POINTS

ALTERATIONS

The control area, control zone and reporting point alterations appearing hereinafter have been coordinated with the civil operators involved, the Army, the Navy and the Air Force, through the Air Coordinating Committee, Airspace Subcommittee, and are adopted to become effective when indicated in order to promote safety. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to public interest and therefore is not required.

Part 601 is amended as follows:

1. Section 601.638 is amended by changing caption to read: *"Blue civil airway No. 38 control areas (Five Finger, Alaska, to United States-Canadian Border)."*

2. Section 601.1241 is amended to read:

§ 601.1241 *Control area extension (Tulsa, Okla.)*. That airspace within a 25-mile radius of the Tulsa, Okla., radio range station; that airspace southwest of Tulsa bounded on the northwest by VOR civil airway No. 14, on the southeast by VOR civil airway No. 15 and on the southwest by VOR civil airway No. 163; that airspace south of Tulsa bounded on the west and northwest by VOR civil airway No. 15E, on the east and southeast by lines 5 miles east of and parallel to direct lines extending between the Tulsa, Okla., omnirange station, the McAlester, Okla., omnirange station and the Dallas, Tex., omnirange station and on the south by the Sherman, Tex., Perrin AFB control area extension.

3. Section 601.1334 is amended to read:

§ 601.1334 *Control area extension (Del Rio, Tex.)*. That airspace over United States Territory within a 25-mile radius of Laughlin Air Force Base, Del Rio, Tex., excluding the portions which overlap Laughlin AFB Restricted Area (R-427) and Del Rio Restricted Area (R-425).

4. Section 601.1377 is added to read:

§ 601.1377 *Control area extension (Boston, Mass.)*. That airspace northeast of Boston within a 25-mile radius of the Boston radio range station bounded on the west by Amber civil airway No. 7, on the southeast by Boston control area extension No. 1141 and on the south by Red civil airway No. 11; that airspace southeast of Boston within a 25-mile radius of the Boston radio range station bounded on the north by Boston control area extension No. 1142, on the southwest by VOR civil airway No. 141 and on the northwest by Red civil airway No. 21.

5. Section 601.1378 is added to read:

§ 601.1378 *Control area extension (Wilmington, Del.)*. That airspace within a 20-mile radius of the New Castle radio range station lying in the southeast and southwest quadrants of the radio range.

6. Section 601.1379 is added to read:

§ 601.1379 *Control area extension (Waterloo, Iowa)*. That airspace within a 15-mile radius of the Waterloo Municipal Airport.

7. Section 601.2029 is amended to read:

§ 601.2029 *Fort Worth, Tex., control zone.* All that airspace within a 5-mile radius of Meacham Field and within a 5-mile radius of Carswell AFB, within 2 miles either side of the south course of the Ft. Worth radio range extending to the intersection of the south course of the Ft. Worth radio range with the west course of the Dallas, Tex., radio range, within 2 miles either side of a line bearing 181° True from the Carswell AFB extending to a point 13 miles south of the Air Force Base, and the airspace bounded on the east by a line two miles east of and parallel to a direct line from Meacham Field through the Haslet nondirectional radio beacon, on the north by Lat. 32°59'45" and on the west by a line 2 miles west of and parallel to a direct line from the Carswell AFB through the Newark nondirectional radio beacon.

8. Section 601.2078 *Vichy, Mo., control zone* is revoked.

9. Section 601.2082 *Akron, Ohio, control zone* is amended by adding the following portion to present control zone: "and within 2 miles either side of the west course of the Akron radio range extending from the radio range station to a point 10 miles west."

10. Section 601.2122 is amended to read:

§ 601.2122 *Detroit, Mich., control zone.* Within a 5-mile radius of the Detroit-Wayne Major Airport and within a 5-mile radius of the Willow Run Airport, within 2 miles either side of the front and back courses of the Willow Run ILS localizer extending from a point 12 miles southwest of the Willow Run outer marker to a point 12 miles northeast of the Ford nondirectional radio beacon, within 2 miles either side of the front and back courses of the Wayne Major ILS localizer extending from a point 12 miles southwest of the Wayne Major outer marker to a point 15½ miles northeast of the Wayne Major ILS localizer, and within 2 miles either side of a 134° True Track extending from the Willow Run Airport to a point 12 miles southeast of the Wayne Major outer marker.

11. Section 601.2147 is added to read:

§ 601.2147 *Waterloo, Iowa, control zone.* Within a 5-mile radius of the Waterloo Municipal Airport and within 2 miles either side of the 78° True, 200° True, 238° True, 314° True and 356° True radials of the Waterloo omnirange extending from the omnirange station to points 12 miles east, south, southwest, northwest and north of the omnirange station.

12. Section 601.4234 is amended to read:

§ 601.4234 *Red civil airway No. 34 (Charleston, W. Va., to Weeksville, N. C.)*. Pulaski, Va., radio range station.

13. Section 601.4638 is amended to read:

§ 601.4638 *Blue civil airway No. 38 (Five Finger, Alaska, to United States-Canadian Border)*. Five Finger, Alaska, nondirectional radio beacon; the intersection of the southeast course of the Gustavus, Alaska, radio range and the northeast course of the Sitka, Alaska, radio range; Gustavus, Alaska, radio range station.

14. Section 601.6005 is amended to read:

§601.6005 *VOR civil airway No. 5 control areas (Jacksonville, Fla., to Cleveland, Ohio)*. All of VOR civil airway No. 5 including east and west alternates, but excluding the airspace between the main airway and its west alternate from the Alma, Ga., omnirange station to the Atlanta, Ga., omnirange station, and also excluding the airspace between the main airway and its east alternate from the Bowling Green, Ky., omnirange station to the Louisville, Ky., omnirange station.

15. Section 601.6016 is amended to read:

§ 601.6016 *VOR civil airway No. 16 control areas (Los Angeles, Calif., to Boston, Mass.)*. All of VOR civil airway No. 16 including north and south alternates but excluding the airspace between the main airway and its south alternate from the Graham, Tenn., omnirange station to the Crossville, Tenn., omnirange station, and also excluding the airspace between the main airway and its north alternate from the Knoxville, Tenn., omnirange station to the Pulaski, Tenn., omnirange station.

16. Section 601.6018 is amended to read:

§ 601.6018 *VOR civil airway No. 18 control areas (Dallas, Tex., to Charleston, S. C.)*. All of VOR civil airway No. 18 including north and south alternates, but excluding the airspace between the main airway and its south alternate from the Anniston, Ala., omnirange station to the Augusta, Ga., omnirange station.

17. Section 601.6051 is amended to read:

§ 601.6051 *VOR civil airway No. 51 control areas (Miami, Fla., to Chicago, Ill.)*. All of VOR civil airway No. 51 including east and west alternates, but excluding the airspace between the main airway and its west alternate from the Alma, Ga., omnirange station to the Atlanta, Ga., omnirange station.

18. Section 601.6088 is amended to read:

§ 601.6088 *VOR civil airway No. 88 control areas (Tulsa, Okla., to Mansfield, Ohio)*. All of VOR civil airway No. 88, including a north alternate.

19. Section 601.6092 is amended to read:

§ 601.6092 *VOR civil airway No. 92 control areas (Chicago, Ill., to Washington, D. C.)*. All of VOR civil airway No. 92.

20. Section 601.6103 is added to read:

§ 601.6103 *VOR civil airway No. 103 control areas (Elkins, W. Va., to Wheeling, W. Va.)*. All of VOR civil airway No. 103.

21. Section 601.6107 is amended to read:

§ 601.6107 *VOR civil airway No. 107 control areas (Long Beach, Calif., to Red Bluff, Calif.)*. All of VOR civil airway No. 107.

22. Section 601.6119 is amended to read:

§ 601.6119 *VOR civil airway No. 119 control areas (Huntington, W. Va., to Buffalo, N. Y.)*. All of VOR civil airway No. 119.

23. Section 601.6122 is amended to read:

§ 601.6122 *VOR civil airway No. 122 control areas (Crescent City, Calif., to Klamath Falls, Oreg.).* All of VOR civil airway No. 122.

24. Section 601.6132 is amended to read:

§ 601.6132 *VOR civil airway No. 132 control areas (Cheyenne, Wyo., to Hutchinson, Kans.).* All of VOR civil airway No. 132.

25. Section 601.6138 is added to read:

§ 601.6138 *VOR civil airway No. 138 control areas (Rock River, Wyo., to Sidney, Nebr.).* All of VOR civil airway No. 138.

26. Section 601.6147 is amended to read:

§ 601.6147 *VOR civil airway No. 147 control areas (Philadelphia, Pa., to Rochester, N. Y.).* All of VOR civil airway No. 147.

27. Section 601.6151 is amended to read:

§ 601.6151 *VOR civil airway No. 151 control areas (Woonsocket, R. I., to Keene, N. H.).* All of VOR civil airway No. 151.

28. Section 601.6173 is added to read:

§ 601.6173 *VOR civil airway No. 173 control areas (Springfield, Ill., to Chicago, Ill.).* All of VOR civil airway No. 173.

29. Section 601.6174 is amended to read:

§ 601.6174 *VOR civil airway No. 174 control areas (Scotland, Ind., to Washington, D. C.).* All of VOR civil airway No. 174.

30. Section 601.6186 is added to read:

§ 601.6186 *VOR civil airway No. 186 control areas (St. Louis, Mo., to Scotland, Ind.).* All of VOR civil airway No. 186.

31. Section 601.7001 *Domestic VOR reporting points* is amended by adding the following reporting points:

Salem Intersection: The intersection of the Hartford, Conn., omnirange 130° True and the Norwich, Conn., omnirange 224° True radials.

Coldwater Intersection: The intersection of the Dayton, Ohio, omnirange 324° True and the Findlay, Ohio, omnirange 250° True radials.

Lewisburg Intersection: The intersection of the Bowling Green, Ky., omnirange 283° True and the Nashville, Tenn., omnirange 343° True radials.

Bay Point Intersection: The intersection of the Oakland, Calif., omnirange 039° True and the Modesto, Calif., omnirange 292° True radials.

Round Top Intersection: The intersection of the Austin, Tex., omnirange 109° True and the College Station, Tex., omnirange 202° True radials.

Rossville Intersection: The intersection of the Lafayette, Ind., omnirange 080° True and the Indianapolis, Ind., omnirange 342° True radials.

Ringling Intersection: The intersection of the Ardmore, Okla., omnirange 274° True and the Oklahoma City, Okla., omnirange 175° True radials.

Belle Glade Intersection: The intersection of the Vero Beach, Fla., omnirange 192° True and the Miami, Fla., omnirange 337° True radials.

Bradford, Pa., omnirange station.

Phoenix, Ariz., omnirange station.

by revoking the following reporting points:

Bedford Intersection: The intersection of the Pullman, Mich., omnirange 094° True and the Litchfield, Mich., omnirange 314° True radials.

Adrian Intersection: The intersection of the Detroit, Mich., omnirange 228° True and the Waterville, Ohio, omnirange 328° True radials.

Napoleon Intersection: The intersection of the Detroit, Mich., omnirange 257° True and the Waterville, Ohio, omnirange 328° True radials.

Andres Intersection: The intersection of the Naperville, Ill., omnirange 155° True and the Chicago Heights, Ill., omnirange 228° True radials.

and by changing the following reporting points to read:

Paterson Intersection: The intersection of the Wilkes-Barre-Scranton, Pa., omnirange 117° True and the Wilton, Conn., omnirange 240° True radials.

Flint Intersection: The intersection of the Lansing, Mich., omnirange 068° True and the Salem, Mich., omnirange 342° True radials.

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interpret or apply sec. 601, 52 Stat. 1107, as amended; 49 U. S. C. 551)

This amendment shall become effective 0001 e. s. t., April 22, 1955.

[SEAL] F. B. LEE,
Administrator of Civil Aeronautics.

[F. R. Doc. 55-3292; Filed, Apr. 21, 1955; 8:45 a. m.]

[Amdt. 139]

PART 609—STANDARD INSTRUMENT APPROACH PROCEDURES

PROCEDURE ALTERATIONS

The standard instrument approach procedure alterations appearing hereinafter are adopted to become effective when indicated in order to promote safety. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to the public interest, and therefore is not required.

Part 609 is amended as follows:

NOTE: Where the general classification (LFR, VAR, ADF, ILS, GCA, or VOR), location, and procedure number (if any) of any procedure in the amendments which follow, are identical with an existing procedure, that procedure is to be substituted for the existing one, as of the effective date given, to the extent that it differs from the existing procedure; where a procedure is canceled, the existing procedure is revoked; new procedures are to be placed in appropriate alphabetical sequence within the section amended.

1. The low frequency range procedures prescribed in § 609.6 are amended to read in part:

LFR STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, and courses are magnetic. Distances are in statute miles unless otherwise indicated. Elevations and altitudes are in feet, MSL. Ceilings are in feet above airport elevation.
If an LFR instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure authorized by the Administrator for Civil Aeronautics for such airport. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below.

City and State; airport name, elevation; facility; class and identification; procedure No.; effective date	Initial approach to facility from—	Course and distance	Minimum altitude (ft.)	Procedure turn (—) side of final approach course (outbound and inbound); altitudes; limiting distances	Minimum altitude over facility on final approach course (ft.)	Course and distance, facility to airport	Ceiling and visibility minimums			If visual contact not established at authorized landing minimums after passing facility within distance specified, or if landing not accomplished
							Condition	Type aircraft		
								75 m. p. h. or less	More than 75 m. p. h.

WEST PALM BEACH, FLA. Palm Beach International, 19'. SBMRA-DTV PBI. Procedure No. 1. Amendment 10. Effective March 24, 1954. Major changes: Superseded by Special Procedure (not published).	PROCEDURE CANCELED MAY 3, 1955. (THIS CANCELLATION DOES NOT AFFECT THE MILITARY PROCEDURES IN THE PILOT'S HANDBOOK.)									

2. The automatic direction finding procedures prescribed in § 609.8 are amended to read in part:

ADF STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, and courses are magnetic. Distances are in statute miles unless otherwise indicated. Elevations and latitudes are in feet, MSL. Ceilings are in feet above airport elevation.
If an ADF instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure authorized by the Administrator for Civil Aeronautics for such airport. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below.

City and State; airport name, elevation; facility; class and identification; procedure No.; effective date	Initial approach to facility from—	Course and distance	Minimum altitude (ft.)	Procedure turn (—) side of final approach course (outbound and inbound); altitudes; limiting distances	Minimum altitude over facility on final approach course (ft.)	Course and distance, facility to airport	Ceiling and visibility minimums			If visual contact not established at authorized landing minimums after passing facility within distance specified, or if landing not accomplished
							Condition	Type aircraft		
								75 m. p. h. or less	More than 75 m. p. h.

6. The ground controlled approach procedures prescribed in § 609.13 are amended to read in part:

GCA STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, and courses are magnet C. Distances are in statute miles unless otherwise indicated. Elevations and altitudes are in feet, MSL. Ceilings are in feet above airport elevation.
If a GCA instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized by the Administrator for Civil Aeronautics for such airport. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the ground controller. From initial contact with GCA to final authorized landing minimums, the instructions of the GCA controller are mandatory except when (A) visual reference with ground is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach.

City and State; airport name, elevation; effective date	Radar terminal area; maneuvering altitudes by sectors and limiting distances	Ceiling and visibility minimums: Runway No.	Condition	Precision approach (PAR): 75 m. p. h. or less	Precision approach (PAR): More than 75 m. p. h.	Surveillance approach (ASR): 75 m. p. h. or less	Surveillance approach (ASR): More than 75 m. p. h.	Except when the ground controller may direct otherwise prior to final approach, a missed approach procedure shall be executed as provided below when (a) communication on final approach is lost for more than 5 seconds; (b) directed by ground controller; (c) visual reference is not established upon descent to the authorized landing minimums; or (d) landing is not accomplished

TITLE 7—AGRICULTURE

Chapter VIII—Commodity Stabilization Service (Sugar), Department of Agriculture

Subchapter B—Sugar Requirements and Quotas

[Sugar Reg. 814.13, Amdt. 1]

PART 814—ALLOTMENT OF SUGAR QUOTAS

PUERTO RICO, 1955

Basis and purpose. This amendment is issued under section 205 (a) of the Sugar Act of 1948, as amended (hereinafter called the "act"), for the purpose of revising Sugar Regulation 814.13 (19 F. R. 9319) which allots the 1955 sugar quota for Puerto Rico for consumption in the continental United States (including raw sugar transferred for further processing and shipment within the direct-consumption portion of such quota) and the 1955 sugar quota for local consumption in Puerto Rico among persons who process Puerto Rican sugarcane into sugar (1) to be brought into the continental United States and (2) to be marketed for local consumption in Puerto Rico.

The sugar quota for Puerto Rico for consumption in the continental United States is referred to herein as "mainland quota" and allotments thereof are referred to as "mainland allotments." The sugar quota for consumption in Puerto Rico and allotments thereof are referred to as "local quota" and "local allotments," respectively.

The purpose of the revision of Sugar Regulation 814.13 is to (1) increase the portion of the quotas allotted to processors from 80 percent to 80.561 percent of the mainland quota and 81.740 percent of the local quota, pending issuance of an order based on final data relating to processings from 1954–55 crop sugarcane, 1954 marketings and January 1, 1955, inventories, as provided in Sugar Regulation 814.13; (2) revise the estimate of the 1954–55 crop "processings • • • from • • • proportionate shares" by Central Mercedita, Inc., to 91,521 short tons, raw value; and, (3) increase the initial mainland and local allotments for Central Mercedita, Inc., to 51,401 and 18,348 short tons, raw value, respectively.

Pursuant to the authority contained in the act and in accordance with the applicable rules of practice and procedure (7 CFR 801.1 et seq.) a notice was published on February 11, 1955 (20 F. R. 902), of a public hearing to be held in Room 124 Administration Building, U. S. Department of Agriculture, Washington, D. C., on February 21, 1955, beginning at 10:00 a. m., e. s. t. The scope of such hearing was limited by the notice to the presentation of evidence relevant and pertinent to the need for an increase and the basis upon which the initial mainland and local allotments for Central Mercedita, Inc., might be increased without change in either the allotments established by Sugar Regulation 814.13 (19 F. R. 9319) for other allottees or the formula for finally allotting the mainland and local quotas.

The hearing was held at the place and time specified in the notice.

Central Mercedita, Inc., will soon be forced to discontinue sugarcane processing operations due to inadequate storage facilities and the level of the allotments established by Sugar Regulation 814.13 (19 F. R. 9319). Thus, in order that all interested persons may be afforded an equitable opportunity to market sugar, it is hereby found that due and timely execution of the Secretary's functions imperatively and unavoidably requires the omission of a recommended decision, and that compliance with the 30-day effective date requirement of the Administrative Procedure Act (60 Stat. 237), is impracticable and contrary to the public interest, and consequently this order shall be effective when published in the FEDERAL REGISTER.

Summary of testimony at reopened hearing. With respect to the need and the basis for increasing the initial mainland and local allotments for Central Mercedita, Inc., a witness for Central Mercedita, Inc., testified that the 1955 crop proportionate share sugarcane of substantially all of the growers whose sugarcane was formerly processed by Corporacion Azucarera Sauri and Subira is being processed by Central Mercedita, Inc., and approximately 12,000 short tons, raw value of sugar will be produced from such sugarcane (R. 60, 62–68, and Ex. 4R); that the allotments established for Central Mercedita, Inc., by Sugar Regulation 814.13 did not take into consideration this additional sugar to be produced in 1955 from sugarcane of growers whose sugarcane was formerly ground by Corporation Azucarera Sauri and Subira (R. 58, Ex. 3R), and that unless the mainland and local allotments for Central Mercedita, Inc., established by Sugar Regulation 814.13 are increased to take into consideration the additional production of approximately 12,000 tons of sugar from sugarcane formerly processed by Corporacion Azucarera Sauri and Subira, it will be necessary, because of insufficient storage facilities, for Central Mercedita, Inc., to discontinue processing operations sometime in April or May prior to their completion of the processing of the 1955 crop proportionate share sugarcane (R. 62, 69, 70 and 71).

Subject to a finding of a need for increasing the mainland and local allotments established for Central Mercedita, Inc., by Sugar Regulation 814.13 (19 F. R. 9319) and without change in the allotments established for other allottees by such regulation or change in the allotment formula on which such allotments were based, the Government witness proposed that:

(1) The estimate of the quantity of sugar to be produced by Central Mercedita, Inc., from 1954–55 crop sugarcane should be increased to 91,521 short tons, raw value, which is the total quantity of sugar produced from 1953–54 crop sugarcane by Central Mercedita, Inc., and Corporacion Azucarera Sauri and Subira;

(2) The initial mainland and local allotments for Central Mercedita, Inc., should be increased to 51,401 and 18,348 short tons, raw value, respectively, the allotments which would result by utilizing the same formula as provided in Sugar Regulation 814.13 and by using 91,521 short tons, raw value, as an estimate of processing by Central Mercedita, Inc., from 1954–55 crop sugarcane; and,

(3) The portion of the quotas to be allotted to processors, pending issuance of an order based on final data from processings of 1954–55 crop sugarcane, 1954 marketings and January 1, 1955, inventories as provided in Sugar Regulation 814.13, should be increased from 80 percent to 80.561 percent of the mainland quota and 81.740 percent of the local quota (R. 75–77).

The Government witness explained that the proposed increase in the portion of the mainland and local quotas to be allotted to processors, pending issuance of an order based on final data, was necessary to allow an increase in the initial allotments for Central Mercedita, Inc., and at the same time not disturb the initial allotments to other allottees under the regulation (R. 75).

A witness representing all allottees except four stated that the proposal of the Government witness was fair, reasonable and in order since: (1) it would result in an initial allotment for Central Mercedita, Inc., in line with the initial allotments of the other allottees in relation to the 1955 crop processings of Central Mercedita, Inc., and the other allottees; (2) it would not affect the preliminary allotment of any other processor; and, (3) it would not affect the final 1955 allotment of Central Mercedita, Inc., or any other processor in Puerto Rico (R. 77–78).

Basis for change in allotments. For the purpose of measuring the factors "processings from sugarcane to which proportionate shares pertained" and "ability to market" in the formula on which the mainland and local allotments established by Sugar Regulation 814.13 were based, each processor's production of sugar from 1953–54 crop proportionate share sugarcane was used as an estimate of the production of sugar from 1954–55 crop sugarcane by such processor. Such estimate, however, did not take into consideration the processings to be undertaken in 1955 by Central Mercedita, Inc., from sugarcane of growers whose sugarcane was formerly processed by Corporacion Azucarera Sauri and Subira. As a result, the initial allotments established for Central Mercedita, Inc., are smaller in proportion to the 1954–55 crop processings by that allottee than is the case for the other allottees.

Accordingly, the sum of processings of sugar from 1953–54 crop sugarcane by Central Mercedita, Inc., and Corporacion Azucarera Sauri and Subira constitutes a better estimate of the 1954–55 crop processings by Central Mercedita, Inc., and for the purpose of determining initial allotments for that processor, this estimate is substituted in the allotment formula on which the allotments established by Sugar Regulation 814.13 are based. The substitution of a revised estimate of processings from 1954–55 crop sugarcane by Central Mercedita, Inc., would, of itself, result in larger initial allotments for that allottee, and would decrease correspondingly the initial allotments for all other allottees.

To avoid decreasing the initial allotments of the other processors named in Sugar Regulation 814.13, the portion of the mainland and local quotas allotted is increased from 80 percent to 80.561 and 81.740 percent, respectively.

Findings and conclusions. On the basis of the record of the hearing I hereby find and conclude that:

1. The mainland and local allotments established for Central Mercedita, Inc., by Sugar Regulation 814.13 (19 F. R. 9319) are based, in part, upon an estimate of that processor's 1954–55 crop processings which did not take into account approximately 12,000 short tons, raw value, of sugar to be produced in 1955 by that processor from sugarcane of growers whose sugarcane was formerly processed by Corporacion Azucarera Sauri and Subira.

2. Increases in the mainland and local allotments established for Central Mercedita, Inc., by Sugar Regulation 814.13 (19 F. R. 9319) are necessary to afford that allottee an equitable opportunity to market sugar in an orderly manner within such allotments.

3. Increases in the mainland and local allotments established for Central Mercedita, Inc., by Sugar Regulation 814.13 (19 F. R. 9319) should be accomplished by utilizing in the formula provided in such regulation the sum of processings from 1953–54 crop sugarcane by Central Mercedita, Inc., and Corporacion Azucarera Sauri and Subira as the estimate of processings from 1954–55 crop sugarcane by Central Mercedita, Inc.

4. Pending availability of final data with respect to 1954–55 crop processings, 1954 marketings and January 1, 1955, inventories, 80.561 percent and 81.740 percent, respectively, of the mainland and local quotas should be allotted in order that the mainland and local allotments established by Sugar Regulation 814.13 (19 F. R. 9319) for Central Mercedita, Inc., may be increased and the allotments for other allottees under such regulation may remain unchanged.

5. Allotments established in the foregoing manner and in the amounts set forth in the order provide a fair, efficient and equitable distribution of the quotas as required by section 205 (a) of the act.

Order. Pursuant to the authority vested in the Secretary of Agriculture by section 205 (a) of the act, paragraph (a) of § 814.13 is hereby amended to read as follows:

§ 814.13 *Allotment of 1955 sugar quotas for Puerto Rico*—(a) *Allotments.* The 1955 sugar quota for Puerto Rico for consumption in the continental United States (including raw sugar to be further processed and marketed within the direct-consumption portion of such quota) and the 1955 sugar quota for local consumption in Puerto Rico, are hereby allotted, to the extent shown in this section, to the following processors in amounts which appear in columns (1) and (2) opposite their respective names:

[Short tons, raw value]

TITLE 21—FOOD AND DRUGS

Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

PART 3—STATEMENTS OF GENERAL POLICY OR INTERPRETATION

USE OF VEGETABLE FAT IN PRODUCTS WHICH ARE IMITATIONS OF ICE CREAM

Under the authority vested in the Secretary of Health, Education, and Welfare by the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 701, 52 Stat. 1055; 21 U. S. C. 371) and delegated to the Commissioner of Food and Drugs by the Secretary (20 F. R. 1996), and pursuant to the provisions of the Administrative Procedure Act (sec. 3, 60 Stat. 237, 238; 5 U. S. C. 1002), the statement of interpretation contained in § 3.18 *Use of vegetable fat in ice cream,* published in the FEDERAL REGISTER of April 13, 1950 (15 F. R. 2082) is hereby revoked, and the following statement of interpretation is hereby issued:

§ 3.39 *Use of vegetable fat in products which are imitations of ice cream.* There is currently being marketed in interstate commerce a frozen product made in semblance of ice cream, but containing vegetable fats in complete or partial substitution for milk fat. In some cases the product is marketed under a fanciful designation. Such a product is now regarded as an imitation of ice cream, and thus amenable to the provision of the Federal Food, Drug, and Cosmetic Act requiring the label to bear the name "Imitation Ice Cream," with all these words in type of uniform size and prominence, regardless of whether a fanciful designation is used.

(Sec. 701, 52 Stat. 1055; 21 U. S. C. 371. Interprets or applies secs. 402, 403; 52 Stat. 1047; 21 U. S. C. 342, 343)

Dated: April 18, 1955.

[SEAL] GEO. P. LARRICK,
Commissioner of Food and Drugs.

TITLE 43—PUBLIC LANDS: INTERIOR

Chapter I—Bureau of Land Management, Department of the Interior

[Circular 1906]

PART 200—MINERAL DEPOSITS IN ACQUIRED LANDS AND UNDER RIGHTS-OF-WAY

Paragraph (b) of § 200.7 is amended to read as follows:

§ 200.7 *Leases of future or fractional interests.* • • •

(b) *Offers to lease and leases covering future interests in oil and gas deposits.* A noncompetitive lease for a whole or fractional future interest will be issued only to an offeror who owns all or substantially all of the present operating rights to the minerals in the lands in the offer as mineral fee owner, as lessee or as an operator holding such rights. There is no required form for an application or offer to lease such whole or fractional future interest. The application or offer therefor should, however, to the extent applicable, conform to and include the information required by §§ 200.3, 200.4, 200.5 and must be accompanied by a certified abstract of title containing record evidence of the creation of, and offeror's right to the claimed mineral interest. If the offeror acquired the operating rights under a lease or contract, the offer shall also be accompanied by three copies of such lease or contract. In lieu of an abstract, a certificate of title may be furnished. A future interest offer may include tracts in which the United States owns a fractional present interest as well as the future interest for which a lease is sought, but it shall not include tracts where the United States owns the entire mineral interest at the time the offer is made. Future interest leases will become effective on the date when the United States becomes vested with the mineral rights as stated in the lease. Where the effective dates of the vesting of the Government's title to the minerals are

different for different tracts, separate leases covering each of such different tracts will be issued.

(Sec. 10, 61 Stat. 915; 30 U. S. C. 359)

DOUGLAS MCKAY,
Secretary of the Interior.

APRIL 15, 1955.

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 927]

[Docket No. AO-71-A-29]

HANDLING OF MILK IN THE NEW YORK METROPOLITAN MILK MARKETING AREA

DECISION WITH RESPECT TO PROPOSED AMENDMENT OF TENTATIVE AGREEMENT AND THE ORDER, AS AMENDED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held at New York, New York, on February 21 and on March 17, 1955, and at Syracuse, New York, during the period February 23–March 15, 1955, pursuant to notice thereof issued on February 14, 1955, and published in the FEDERAL REGISTER on February 17, 1955 (20 F. R. 1016).

The material issues of record are concerned with:

1. The pricing of Class I–A milk;
2. The pricing of Class III milk;
3. The need for prompt action necessitating omission of a recommended decision and opportunity for exceptions with respect to issues 1 and 2; and
4. The classification of milk used in the manufacture of Italian soft cheeses at plants in the marketing area.

Findings and conclusions. The following findings and conclusions on issues 1, 2, and 3 are based upon the evidence in the record of the hearing. Findings and conclusions on issue No. 4 are being deferred for inclusion in a separate recommended decision at a later date.

Issue No. 1. The hearing was called following the submission of petitions by producer organizations to consider revision of the present provisions of the order for the pricing of Class I–A milk, and of petitions by handlers relative to the pricing of Class III milk. The specific proposals considered at the hearing relative to Class I–A milk were designed to result in the establishment of prices for Class I–A milk averaging on an annual basis approximately $6.00 per hundredweight either by (1) fixing a $6.00 Class I–A price subject to seasonal variation similar to that now provided, or (2) by continuing the present pricing formula but with operation of the utilization adjustment factor eliminated.

In support of these proposals a great deal of emphasis was placed upon the "cost-price squeeze" in which producers were reported to find themselves. This difficulty was reported to be the result primarily of a decline during the past two or three years in the uniform price received by producers for milk without a corresponding reduction in the costs of producing milk. The average of monthly uniform prices declined from $4.64 in 1952 to $4.22 in 1953 and to $4.00 in 1954. The index of costs of production as presently calculated and published pursuant to the provisions of the order was approximately the same in January 1955 as in January 1952. This index increased from 111 (1948 equals 100) in January 1952 to a high of 115 in December 1952 and has since the middle of 1953 leveled off at about 110 in recent months.

Testimony presented indicates that producers are experiencing considerable difficulty in meeting operating expenses. Farm machinery and implement dealers reported an increasing difficulty experienced by farmers in paying for supplies, equipment and machinery. Feed dealers reported an increase in the volume of accounts receivable for feed purchases. Representatives of banks and other lending agencies reported an increasing demand among milk producers for production credit and for refinancing and the conversion of short term loans to longer term financing arrangements. Producers experiencing the most difficulty appear to be those who invested in dairy farms and production equipment at relatively high prices during a period of several years prior to 1952. The average net income of dairy farmers in the milkshed has declined materially during the past two years.

The decline of 64 cents per hundredweight in the return to producers (uniform price) during the past two years is the result of a combination of factors. The principal factors are (1) declining Class I–A prices (from an average of $5.50 in 1952 to $5.13 in 1954), (2) lower Class III prices (averaging $3.68 in 1952 and $2.93 in 1954), and (3) the utilization in Class III of a larger percentage of the total volume of pool milk together with a correspondingly smaller percentage utilization in Class I–A. The percentage of pool milk in Class I–A declined from 43.9 in 1952 to 40.3 in 1954, while the percentage of pool milk utilized in Class III increased from 40 in 1952 to 44.9 in 1954. Roughly, three quarters of the decline in the uniform price reflects the impact of factors other than the reduction in the Class I–A price.

The above enumerated factors contributing to the decline in the uniform price, except the lower level of the Class III price, are directly associated with, or attributable to, the increased volume of pool milk. The reduction from 1952 to 1954 in the Class III price reflects the generally lower level of the value of milk for use in manufactured dairy products. Comparable reductions from 1952 to 1954 occurred in the United States average price paid for milk for manufacturing and in the Midwest condensery price. From 1952 to 1954 the total volume of pool milk increased from 7,118 million pounds to 7,765 million pounds, an increase of about 9 percent. During the same period Class I–A sales, and total fluid milk sales including Classes I–B and I–C, increased only slightly with the results that, (1) the increased volume of pool milk in excess of fluid milk sales was reflected in a lower Class I–A price, and (2) virtually all of the additional volume of pool milk in 1954 went into Class III and at a price substantially lower than in 1952.

In considering proposals to increase Class I–A prices, it is necessary, of course, to consider the purposes or objectives properly sought to be accomplished in the process of fixing Class I–A prices under the order. The Agricultural Marketing Agreement Act of 1937, as amended, pursuant to which minimum prices are established under the order, authorizes the Secretary of Agriculture to fix such prices as he finds will reflect the price of feeds, the available supply of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, insure a sufficient quantity of pure and wholesome milk, and be in the public interest. Prices established under the order must conform to these standards.

It seems appropriate in considering the issues presented at this hearing, involving an appraisal of Class I–A prices established under existing provisions of the order, to recall findings with reference to proper objectives in the pricing of Class I–A milk which were made in the decision of the Secretary of Agriculture issued on February 3, 1950 (15 F. R. 706) on the basis of which the present Class I–A pricing formula was adopted. It was stated in that decision that: "The objective in pricing Class I–A milk, from what appears to be a purely economic standpoint as expressed in general terms by the New York Milkshed Price Committee, is to keep the price so adjusted that a sufficient supply of Class I milk will be available at all times to meet the demand without the occurrence of troublesome surpluses, and more specifically:

"1. To obtain an adequate supply of approved milk so that consumer demand will be fully met at all times without having more milk than is needed for fluid use and necessary reserves to allow for seasonal and short-time variations in production and consumption. The price should not be high enough to stimulate production to the point where production controls appear necessary. Monthly prices should be adjusted in such a manner that they contribute toward a desirable seasonal pattern of production.

"2. To hold the consumption of fluid milk within the limits of available supplies without the necessity of consumer rationing or administrative direction of the flow of milk to various trade outlets, except in emergencies caused by unusual weather, transportation tie-ups, strikes, and the like."

It was further found in that decision that: "No particular inconsistency is apparent between the above-quoted objective and the standards prescribed in the act. Both seem to indicate that economic conditions affecting the supply of and demand for milk are of primary importance in establishing the price of Class I–A milk, and that the primary purpose of a Class I–A pricing provision should be to produce a price which will maintain an economic balance between the supply of milk and the demand for it. Proposed Class I–A pricing provisions having as their objective such things as the maintenance of a price at certain levels in relation to a computed cost of production without regard to whether or not such price results in the maintenance of balance between the supply of and demand for milk, or such things as a price low enough to enable all consumers to buy as much milk as it would be nutritionally desirable for them to have without regard to whether or not enough milk would be produced at that price, are inconsistent with the standards prescribed by the act and with sound economic objectives. Pricing proposals with such objectives, consequently, cannot be adopted. Proper prices for Class I–A milk may be expected to contribute to the welfare of producers and consumers but cannot be expected, in and of themselves, to constitute a complete solution of all of the economic and social problems with which producers and consumers may be confronted."

These findings are confirmed on the basis of evidence in this record. There is no basis for finding that the objectives sought to be accomplished have changed. Fundamentally, the question now presented is whether or not present provisions of the order have operated and are continuing to operate so as to yield Class I–A prices which meet the prescribed standards and objectives.

The evidence is clear that the supply of pool milk has been adequate to meet market requirements at all times since the present order provisions for the pricing of Class I–A milk became effective in August 1950. In terms of annual averages the percentages of pool milk utilized in Class I (A, B and C) for the years 1951 through 1954 were 52.3, 51.4, 48.6, and 47.3, respectively. In the month of November, normally the month of smallest supply, the volume of pool milk appears not only to have been ample during the past several years, but has been relatively large in comparison with short season supplies during the years 1943 to 1948. Milk utilized in fluid form, together with milk used for fluid cream for the marketing area (also required by health authorities to come from approved sources), accounted for less than 75 percent of the November supply of pool milk in each of the last three years. These same uses accounted for about 97 percent of the November supply of pool milk in each of the years 1945, 1946 and 1947. Some procurement problems appear to have been experienced during short seasons when more than around 90 percent of the pool supply on a monthly basis was used for fluid milk and Class II cream. Even though the market was characterized as "short" at times when reserve supplies were considerably less than 10 percent, at no time was it necessary to bring in milk from outside the regular supply area for use as fluid milk or cream.

During the last three years when the trend has been for the volume of pool milk to increase in relation to market requirements for fluid use, the order provisions have operated to reduce the Class I–A price. Annual averages of monthly Class I–A prices declined from $5.64 in 1951 to $5.50, $5.23 and $5.13, respectively, in 1952, 1953 and 1954. It is apparent that Class I–A prices had to come down under the conditions prevailing consistent with accepted standards and objectives in pricing Class I–A milk.

Accompanying the increasing volume of pool milk during recent years has been a shift in the seasonal pattern of receipts. There has been a tendency for receipts of pool milk to increase less during the months of July, August and September than in other months. This is particularly apparent for the month of August. There has been a shift toward less milk in August relative to November. In 1950 and 1951, the decrease in the volume of pool milk from August to November averaged about 20 percent, while in the years 1952, 1953 and 1954 decreases from August to November were 15, 11, and 7 percent, respectively. Receipts of pool milk in August 1954 were actually 3.6 percent lower than in August 1953 and lower than any August since 1951. To some extent this shift in the seasonal pattern of supply, together with a seasonal increase in a demand for fluid milk, fluid cream and ice cream during summer months, has resulted in a relatively shorter supply situation during the month of August. On a monthly basis, however, only about 65 percent of the total volume of pool milk was used for fluid milk and Class II cream in August 1954; whereas, in November 1954 about 70 percent of all pool milk was so utilized. The desirability of revision in the seasonal adjustment factors now used in the Class I–A pricing formula was not sufficiently explored at this hearing, however, to justify a change. Likewise, the proposal made at the hearing by handlers for reducing the number of changes per year in the seasonal factors, thus permitting fewer changes in the street price, should not be adopted at this time. Before such a change is made for the purpose indicated it should be further considered at another hearing together with further consideration of desirable changes from the standpoint of influence on the production pattern.

Price reductions during recent years have not been confined to the New York Class I–A and uniform prices for milk. The Class I–A price dropped 27 cents per hundredweight from 1952 to 1953 and 10 cents from 1953 to 1954. The Boston Class I price dropped 53 cents and 3 cents, respectively, in the two years. The Philadelphia Class I price dropped 27 cents in each of the two years and the Connecticut Class I price dropped 33 cents from 1952 to 1953 and 22 cents from 1953 to 1954. In Chicago, the largest market in the Midwest, the Class I–A price dropped 65 cents per hundredweight from 1952 to 1953 and 43 cents from 1953 to 1954. Thus, the declines in the New York Class I–A price do not appear excessive in relation to reductions in fluid milk prices in other large markets in the Northeast or in the Midwest. In Buffalo and Rochester, on the other hand, there was little change in the Class I price from 1952 to 1954. Nor have the New York Class I–A price changes been unfavorable as compared with the Midwest condensery price. The margin of the New York price over the condensery price increased from $1.72 per hundredweight in 1952 to $2.13 in 1954. In the years 1950, 1951, and 1953, the margin was about $2.00.

From 1951 to 1954, the changes in the New York uniform price and the changes in the United States average price received by farmers for all milk at wholesale have been almost identical. Also, changes in the uniform price have not been unfavorable as compared with the changes in prices paid to farmers for all products. From December 1950 to December 1954, the uniform price dropped 10.6 percent and all prices received by farmers dropped 17.3 percent. From December 1953 to December 1954, the uniform price decreased 3.7 percent and all prices received by farmers decreased by 5.9 percent. Clearly, the problem of declining farm prices is not peculiar to New York marketing area milk, nor have the declines in the price of milk under the New York order been out of line with declines in other areas or for other farm products.

Proponents of higher Class I–A prices urged elimination of the utilization adjustment percentage in the present formula for establishing the price of Class I–A milk. This is the factor in the formula primarily responsible for the reductions in the Class I–A price which have occurred since the formula became effective. This factor has operated to reduce the Class I–A price because of the increasing supply of pool milk relative to fluid milk sales. There has been relatively little change in the total volume of fluid milk sales (Classes I–A, I–B, and I–C) during the past 4 years. Declining per capita consumption of fluid milk in the marketing area has about offset increases in population. In addition, some reduction in fluid milk sales outside the marketing area appears to have resulted from an increase in production for surrounding markets and from increasing the price for such milk from the I–C to the I–A level effective February 1, 1954. On the supply side, the increase in the volume of pool milk is attributed both to consistently increasing production per farm and to some extent to the admission into the pool of milk from plants and producers formerly supplying other markets. Daily deliveries of milk per farm have increased quite steadily for the past 15 years; increasing from 269 pounds in 1940 to 424 pounds in 1954, an increase of 58 percent. The increase from 1950 to 1954 was about 13 percent. Evidence in the record appears to indicate that a portion of the increase in the volume of pool milk which has occurred

since 1948 is the result of the entry of new plants and producers into the pool.

Reasons advanced for elimination of the utilization adjustment factor are that it has not accomplished the objectives intended or contemplated, and that it cannot be expected to operate properly. Concerning the intended purpose of the utilization adjustment percentage, reference is made to the decision of February 3, 1950, on the basis of which the present Class I–A pricing formula was adopted. In that decision it was found the supply of milk for the market was affected by various enumerated factors, and because of practical difficulties encountered in providing a means by which each such factor could be reflected individually, it was concluded that prospective supplies could be more accurately predicted by extending current trends in actual supply. Likewise, it was found that similar difficulties were involved in attempting to forecast consumption directly on the basis of numerous factors causing changes in the consumption of milk. Accordingly, the utilization adjustment factor in the formula was adopted to reflect both supply and demand conditions, or the balance between them. Simply stated, the utilization adjustment percentage was adopted as one factor in a pricing formula which, in its overall operation, was designed to bring about automatic changes in the Class I–A price in response to economic conditions which should cause the Class I–A price to change. The formula was designed to operate so that an increase in supply relative to demand would be reflected as a price depressing force and so that an increase in demand in relation to supply would be reflected as a price raising force.

The thing that has happened is that the utilization adjustment factor in the formula has operated to bring the Class I–A price down as the supply of pool milk has increased relative to fluid milk sales. In that respect, it appears that the factor has done substantially what it was designed to do. That being the case, it seems to follow that the real basis of proposals to eliminate the utilization adjustment percentage must be that it is now believed to be wrong in basic principle and design; that is, that the formula should not operate to change the Class I–A price as the supply of pool milk in relation to fluid milk sales changes.

In support of the proposition that the Class I–A price should not have been reduced as the supply of pool milk relative to fluid sales has increased, the point was made that the contemplated and desirable balance between supply and sales has not been achieved; specifically that reductions in the Class I–A and uniform prices have neither deterred production nor stimulated consumption sufficiently to have brought about the desired balance. Arguments were advanced to the effect that the reaction of producers to price reductions has been to increase production, rather than to reduce it, and thus, that the formula not only has failed in its purpose but has worked in reverse on the supply side by contributing to, rather than relieving, the oversupply situation. It was contended that the utilization adjustment factor in the formula has not worked on the demand side because reductions in the Class I–A price have not been accompanied by lower consumer prices for milk.

It is recognized, of course, that Class I–A price reductions have not brought about corresponding reductions in the volume of pool milk. It is also recognized that the supply of pool milk is affected not only by changes in the price but also by numerous other factors including weather conditions, crop yields, quality of crops, relative prices of other farm products, alternative opportunities, inter-market shifts of plants and producers, the quality of cows, the number of cows, and numerous technological changes in dairy farming. Operating in conjunction with other factors are continuing efforts, probably accentuated during periods of low prices, to improve efficiency in milk production. Such efforts have brought a continuing trend in the milkshed toward more milk per cow, fewer but larger farms and more milk per farm. Because all such factors operate simultaneously, it is extremely difficult to measure the precise effect which a change in any one factor has upon production. The production response to changes in price is likely to be obscured by other factors. It is not to be expected that, except by coincidence, the supply of pool milk would change promptly and in direct proportion to changes in the Class I–A or uniform price. Because of the nature of the dairy enterprise it is not reasonable to expect that each producer will respond in the same way or at the same time to a change in price. Some producers may actually increase production in response to a lower price while others may find it impossible to do so particularly over extended periods. With low milk prices relative to production costs there appears to be a tendency, as would be expected, for some dairymen to forego the raising of calves and to employ all available feed and labor in a way to bring immediate return. Such responses may tend for a time to retard or delay the ultimate effect of reduced prices on production, but eventually tend to be offset by such factors as fewer cows, reduced feeding, impairment of production facilities and the withdrawal and withholding of capital.

Concerning the argument that the utilization adjustment factor has not operated on the demand side because the reductions in the Class I–A price have not been passed on to the consumers, it must be recognized that the Class I–A price is only one factor affecting the consumer price. The fact that the consumer price has not declined in line with the Class I–A price does not mean that reductions in the Class I–A price have not been reflected in the consumer price.

Another reason advanced for elimination of the utilization adjustment percentage is that it improperly reflects that portion of the supply of pool milk resulting from the addition of new plants and producers to the pool. This milk was characterized as representing the surplus of surrounding markets which has been attracted to the New York pool in the absence of marketwide pooling in such markets as Northern New Jersey, Philadelphia, Connecticut, and numerous other markets in the States of Pennsylvania and New York. As previously indicated, the shift of plants into the pool since 1948 accounts for a portion of the increase in the volume of pool milk.

There appears to be considerable doubt, however, that the exclusion of such new plants from the pool (assuming its effective accomplishment) would reduce the volume of pool milk by an equivalent amount over an extended period of time. In contrast with the New York market, the market pools of Rochester and Buffalo have not experienced the addition of new plants and producers to any significant extent over a period of 14 years. Nevertheless, in the latter markets there has been an increase in volume of pool milk relative to market requirements for fluid milk and cream similar to the increase in the New York market. In the period 1940–1942, 61.3 percent of New York pool milk was utilized for fluid milk and Class II cream. Corresponding percentages for Rochester and Buffalo during the same period were 72.6 and 67.4, respectively. Approximately 10 years later, during the period 1950–1954, fluid use in Rochester and Buffalo accounted for 58.2 and 60 percent, respectively, of the pool milk compared to 57.2 percent in New York. This similar trend toward an increasing volume of pool milk in excess of fluid requirements has occurred in the upstate markets in spite of the fact that between the two periods indicated (1940–1942 to 1950–1954) there was a much larger increase than in New York in the quantity of milk utilized for fluid milk and cream. In Rochester and Buffalo the percentage increases were 29 and 54 percent, respectively, compared with an increase of 14 percent in the New York market.

It is concluded that the entry of new plants and producers into the New York pool has contributed to the increased volume of pool milk, but that its impact upon the Class I-A and uniform prices is not susceptible of precise calculation. It must be concluded that inter-market shifts of plants and producers is a factor affecting the supply of pool milk, and to the extent to which it does occur, is a factor which, consistent with the pricing standards of the Agricultural Marketing Agreement Act, must be reflected in the Class I-A price. Otherwise, the level of the Class I-A price itself would tend to aggravate, rather than correct, the effects of such shifts on the supply of pool milk. While the recent trend in inter-market shifts has been for additional milk to enter the pool, subsequent shifts may be in the opposite direction.

In addition to the alleged basic defects in operation of the utilization percentage, it was contended at the hearing that the present Class I-A price formula is mechanically defective with regard to the statistical method employed to adjust current utilization for the seasonality, and in that failure to reflect the amount of money paid for milk by consumers results in giving insufficient weight to changes in demand. Reference to such minor defects was not accompanied by proposed corrective measures but was in support of the proposal for complete abandonment of the present formula. This record provides no basis for revision of the formula to correct such alleged mechanical defects. Furthermore, they do not appear to have been of sufficient significance to have precluded the effective operation of the formula.

There appears to be indications that certain important factors affecting the prospective supply of pool milk are beginning to operate in the direction of a reduction in supply. Competition in dairy farming has become intensified. Conditions have become less favorable for the entry of new capital and for the maintenance and expansion of production facilities. During the period of rapidly increasing cow prices prior to 1952, the raising of heifer calves appears to have been stimulated to the point that the number of milk cows increased rather significantly through 1954. Since the Spring of 1952, however, the price of dairy cows has declined materially, and the number of heifer calves in the State of New York on January 1, 1955 was 4 percent smaller than a year earlier, and 9 percent smaller than on the same date in 1953. The rate of culling dairy cows during 1954 was higher than in 1953 and the third highest since 1923. These factors indicate a prospective leveling off or decline in cow numbers during 1955 and 1956.

Other factors appear to be operating to bring the supply of pool milk and fluid sales into better balance. Sales of fluid milk in the market during recent months have shown moderate increases over the same month a year ago. This improved relationship has resulted in an improvement over a year ago in the utilization adjustment percentage, and has produced Class I–A prices higher than a year earlier during each of the months of February, March and April of 1955.

Numerous references were made at the hearing to other means of alleviating some of the conditions sought to be corrected by proposals to increase the level of the Class I–A price. Such other measures included the recommendations of the Case Committee and other suggestions which in substance involve (1) more effective regulation of supplies for surrounding markets with particular regard to the pricing and pooling arrangements, (2) a possible tightening of order provisions relating to the entry into the New York pool of new plants and producers, (3) added incentives for more uniform seasonal production by means of a base-rating plan, (4) revision of location differentials in line with transportation costs, (5) increasing returns on fluid milk sales outside the marketing area, and (6) increasing returns on milk utilized in Class III.

Action on these matters is not within the scope of this hearing except as to the pricing of Class III milk. Accordingly, they are considered as pertinent only in relation to the question of what changes, if any, should be made at this time in provisions of the order for the pricing of Class I–A milk. There appears to be considerable merit in suggestions made to the effect that some or all of these proposals offer a more effective and appropriate approach to some of the problems being experienced by producers than are proposals for substantial increases in the level of the Class I–A price.

There was considerable debate at the hearing over the probable impact of substantially higher Class I–A prices on the consumption of fluid milk. There is no basis for finding that higher Class I–A prices would not be reflected in higher consumer prices. While there is evidence to indicate that the demand for fluid milk, at least in the short run, is relatively inelastic, it appears reasonably certain that the price at which milk is available to consumers is an important factor affecting the quantity sold over longer periods of time. Consumer prices for milk are now relatively high and have tended to increase recently relative to other foods including other dairy products. It was indicated that a further widening of the spread between retail milk prices and the price of substitute dairy products, such as quickly soluble nonfat dry milk, would involve a real risk of substitution in substantial quantity. Aside from other aspects of the problem and the question of compliance with other prescribed pricing standards, it cannot be found that substantially higher Class I–A prices would be in the public interest generally or in the long-time interest of producers. The probable unfavorable effect on fluid milk sales and a further aggravation of the problem of relatively large supplies of pool milk which probably would result, both appear to be contrary to the long-time interests of producers as well as consumers.

As was the case at the hearing on the basis of which the present Class I–A pricing formula was adopted, the question was presented at the hearing as to whether the order should contain any formula for the pricing of Class I–A milk or whether Class I–A prices should be established exclusively by the public hearing and amendment procedure. In this connection, evidence in the record substantiates the conclusion (previously reached in the decision of February 3, 1950) that the advantages of a formula out-weigh the disadvantages, and that the provisions of the order should include a formula as a means of bringing about timely changes in price as changes occur in conditions known to be of importance in determining the Class I–A price.

As previously indicated, there are indications that forces are at work tending toward a more favorable relationship between the supply of pool milk and fluid sales in the market. It seems probable that the declines in the Class I–A price which have already occurred are sufficient to bring about a better balance between supply and demand in the market. Also as previously indicated, this improved relationship to some extent is already being reflected in Class I–A prices slightly higher than at the same time a year ago. A tendency for the supply of pool milk to decline during the months of July, August and September relative to other months has also been noted previously. In view of these considerations, it is concluded that the order should be amended to provide for a Class I–A price of not less than $4.75 per hundredweight during the months of May through September 1955. It is concluded however that, except for this temporary adjustment, the present pricing formula has operated, and is continuing to operate, to produce changes in the Class I–A price in accordance with the prescribed pricing standards, and accordingly, that it should be retained in the order.

One other change in the order should be made which only indirectly affects the price of Class I–A milk. Evidence in the record indicates that the Cornell index of costs in dairy farming overstates by about 10 percent the level of costs based on recent field studies. The cost of production index presently required by the order to be computed and announced each month may also be expected to overstate the actual average cost of milk production by about 10 percent because it is heavily weighted by the Cornell index and is otherwise similarly computed. The cost of production index announced under the order reflects changes in the price of items used in the production of milk. Similarly, the index of wholesale prices used in the Class I–A pricing formula reflects changes since 1948 in the price of commodities generally. Neither index reflects changes in efficiency or changes in the quantities of the priced items used in production. These two indices as now announced under the order thus appear to remain comparable. The Class I–A price index, however, reflects quantitative changes in milk production relative to sales and is now comparable with the costs of the production index only if the latter is adjusted to correct for the degree of its overstatement for actual costs. Accordingly, for purposes of comparison with the Class I–A price index in connection with determining pursuant to § 927.40 (b) (2) as whether a hearing should be held, the cost of production index should be reduced by 10 percent. However, for reasons previously indicated, no such adjustment is necessary for purposes of comparison with the wholesale price index pursuant to § 927.40 (b) (1).

Issue No. 2. The proposals and the evidence thereon presented at the hearing with reference to the pricing of Class III milk were concerned primarily with (1) fixing the Class III price at not less than the Midwestern condensery price during the months of September through December, (2) eliminating the butter-cheese differential except during the months of May and June, (3) providing plus and minus differentials at individual plants depending upon how the milk is utilized, and (4) a seasonal reduction in the Class III price during the months of March through June.

The first three of these proposals were offered as proposals designed to increase the return to producers for Class III milk, while the fourth is a proposal to reduce the Class III price during months of highest volume. Proposals to change the general level of the Class III price involve such considerations as volume to be handled, available outlets and facilities, seasonal variation, shifts in utilization, and the level of the Class III price relative to other prices for milk

used for manufacturing. These considerations, except the relative level of the Class III price, will be dealt with in connection with the specific proposals. A comparison of the Class III price with the United States average price paid for milk for manufacturing indicates that there has been no pronounced shift in the relationship during the past three years. Simple averages of monthly Class III prices for each of the years 1952, 1953, and 1954 exceeded the United States average prices of milk for manufacturing for those years by 5, 6, and 8 cents, respectively. Compared with the Midwest condensery price the Class III price was lower by 10 cents in 1952, by 2 cents in 1953, and 7 cents lower in 1954. The weighted average price for all Class III milk including that utilized for butter and cheese was 4 cents lower for the year 1954 than the simple average of announced monthly Class III prices.

Concerning the proposed Midwest condensery price floor, reference is made to findings and conclusions relating to a similar proposal contained in a decision issued on August 18, 1954. With reference to the proposal considered at that time for pricing Class III milk directly on the basis of prices paid at selected Midwest condenseries, it was found (1) that there is considerable shifting of relationships among prices paid for milk used for various manufactured milk products, and (2) that there appears to be no basis for concluding that the Midwest condensery price is a better measure of the value, or of changes in the value, of Class III milk than either (a) prices paid for milk for other manufactured milk uses or (b) the market values for dairy products now used in the Class III formula. Prices paid for milk for manufacturing uses was recognized, however, as a useful and reliable guide for determining the proper average level of the Class III price over extended periods. There was no new evidence presented at this last hearing on which to base contrary findings. Such limited new evidence as was presented relative to the relationship of the Midwest condensery price to other prices, and a further reduction during the past year in the number of Midwest condenseries at which prices paid are included in the average price reported tend to further support the previous findings.

There appears to be an adequate basis for apprehension as to whether all of the pool milk in excess of fluid requirements would continue to be handled and disposed of in an orderly manner if the butter-cheese differential were to be eliminated at this time except for the months of May and June. In spite of substantial increases in the quantities of milk going into Class III outlets other than for butter and cheese during the past few years coincident with the higher volume of Class III milk resulting from the increasing volume of pool milk relative to fluid requirements, the volume of milk utilized in butter and cheese in recent years has also increased materially. Substantial quantities of milk, particularly during the past two years, have been utilized for butter and cheese in months other than May and June. In 1954, the milk utilized for butter in May and June constituted only slightly more than 20 percent of the total volume so utilized during the year. Nearly one-half of the total volume of milk utilized for cheese was in months other than May and June. With the prospect that the volume of Class III milk to be disposed of, at least through the flush season of 1955, will be even higher than in 1954, it appears that butter and cheese will continue at least temporarily to constitute the only available outlets for substantial quantities of Class III milk. The consequences of eliminating the butter-cheese adjustment under these circumstances need to be explored and considered more extensively than was done at this hearing before it can be found that its elimination is justified.

The proposal for adding 20 cents to the Class III price or for deducting 20 cents from the Class III price applicable at individual plants depending upon the percentage of the milk at the plant utilized in Classes I–A and I–B should not be adopted. Evidence presented does not provide an adequate basis for determining whether or not the differentials proposed are appropriate or whether the utilization percentages proposed constitute proper breaking points for application of the differentials. The evidence presented also leaves far too great a degree of uncertainty as to both the immediate and long-run impact of the proposal upon the handling of the milk in the milkshed and upon its net effect on returns to producers.

Proponents of reductions in the Class III price during the months of March through June pointed to the fact that the volume of Class III milk to be handled has increased and to the fact that the 1955 volume in those months is expected to be 3 to 4 percent larger than in 1954. It was further contended that it is during these months that the largest volume of milk has to be moved from receiving plants to manufacturing plants, with resulting added costs to handlers for transportation and handling. Proponents of a higher Class III price pointed to the same basic fact of increased volume of Class III milk, claiming that this, together with improved seasonal variation, results in more efficient operation of manufacturing plants and reduced unit cost, thus constituting support for a higher Class III price.

Another reason advanced in support of proposed reductions of from 12 to 20 cents in the Class III price in the March–June period was that Class III milk must be priced on a competitive basis with surrounding markets during the season of the year when the surplus is largest and when it is most difficult to move milk. It was pointed out that handlers are confronted with the problem of disposing of Class III milk in competition with unregulated milk seeking similar outlets, and with milk from other regulated markets but priced substantially lower than Class III milk under Order No. 27. Specific reference in this connection was made to (1) provisions of the Boston order under which, in the absence of a weighted average cream price, milk for manufacturing is priced on the basis of the United States average price of milk for manufacturing, (2) to provisions of the Philadelphia order recently amended to provide a reduction of 20 cents below the regular Class II price for specified manufacturing uses, and (3) lower prices established in various State-regulated markets in New York, Pennsylvania and New Jersey for milk in manufacturing uses.

While it is acknowledged that these competitive situations are likely to constitute Class III disposal problems for certain handlers, they do not appear to obtain over a sufficiently wide area or to have enough of an impact on a sufficient volume of Class III milk to justify a reduction in the price of all Class III milk including that unaffected by such competitive conditions. A suggested change in the classification provisions of the order to allow the classification of pool milk in Class III up to the total volume of milk used for manufacturing at nonpool plants not only appears to be outside the scope of this hearing but would not be justified without more extensive consideration of its effect upon the overall returns for pool milk classified at nonpool plants.

The existence of conditions paralleling those in 1954, at which time there was a reduction of 10 cents per hundredweight in the Class III price for May and June, was cited in support of proposed lower Class III prices at this time. On the other hand, significant differences were shown to exist between marketing conditions now and those prevailing at the same time last year. The level of dairy support prices after April 1 was known much earlier this year than in 1954, thus providing more favorable conditions for planning manufacturing operations. Gross margins available to handlers between order prices and market prices of products were shown to have increased somewhat in 1954 in relation to those prevailing previously.

Much less difficulty was reported to have been experienced this year in finding outlets for Class III milk on reasonable terms. At the hearing on which the price reduction in 1954 was based numerous instances were reported of inability to collect any handling charge from operators of manufacturing plants, particularly from cheese manufacturers. The situation generally on handling charges on Class III milk this year was reported to be materially improved with contracts having been made as early as in January for disposition of flush season supplies for manufacturing at reasonable handling charges ranging from 10 to 20 cents per hundredweight.

Improved availability of outlets for Class III milk is also reflected in generally higher prices and handling charges obtaining in the spot market for fluid milk in the marketing area, and in higher handling charges for marketing area fluid milk under annual contracts negotiated this spring for fluid supplies throughout the ensuing year. The attractiveness, from the standpoint of handling charges obtainable by milkshed receiving plants, of outlets for milk for various manufacturing uses is recognized as constituting an important factor influencing the amount of handling charges negotiated in contracts between buyers and sellers for supplies of milk for distribution for fluid use in the marketing area.

A further consideration of importance under circumstances shown at this hearing to prevail is the effect that a reduction in the Class III price at this time would have on returns to producers. It was shown that on an annual basis for 1954 there were 3,483 million pounds of pool milk utilized in Class III, representing 44.9 percent of all pool milk, compared with 3,133 million pounds, constituting 40.3 percent of the pool milk, utilized in Class I–A. The volume in Class III thus exceeds the volume in Class I–A by about 11 percent. Utilization in other fluid milk classes, however, brought the total fluid use up to 47.3 percent of pool receipts. When it is recognized that during the months of May and June it is probable that around 60 percent of the milk will go into Class III uses, the importance of the Class III price as a factor influencing the uniform price during those months is apparent. After weighing all evidence presented, it is concluded that proposed changes in provisions of the order for the pricing of Class III milk should not be adopted.

Issue No. 3. The due and timely execution of the function of the Secretary under the act imperatively and unavoidably requires the omission of a recommended decision by the Deputy Administrator, Agricultural Marketing Service, and the opportunity for exceptions thereto on the above issues No. 1 and No. 2.

The nature of these issues is such that the conclusions thereon should be effectuated as soon as possible. Delay beyond the minimum time required to make the attached order effective would defeat its purpose. The time necessarily involved in the preparation, filing and publication of a recommended decision together with time for filing exceptions thereto would preclude timely action.

It is therefore found that good cause exists for the omission of the recommended decision in order to inform interested parties promptly of the conclusions reached. It is important that interested parties be informed of the action decided upon as promptly as possible in order that appropriate adjustments may be made promptly in their operations in accordance with the decision.

Rulings on proposed findings and conclusions. Briefs which were filed on behalf of interested parties contained statements of fact, proposed findings and conclusions, and arguments with respect to the provisions of the proposed amendment. Every point covered in the briefs was carefully considered along with the evidence in the record in making the findings and reaching the conclusions hereinbefore set forth. To the extent that the findings and conclusions proposed in the briefs are inconsistent with the findings and conclusions contained herein, the request to make such findings or to reach such conclusions is denied on the basis of the facts found and stated in connection with the conclusions in this decision.

General findings. (a) The proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the proposed marketing agreement and in the order, as amended, and as hereby proposed to be further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(c) The proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, will regulate the handling of milk in the same manner as, and are applicable only to persons in the respective classes of industrial and commercial activity specified in, the said marketing agreement upon which a hearing has been held.

Determination of representative period. The month of February 1955 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of the order amending the order, as amended, now in effect, regulating the handling of milk in the New York Metropolitan milk marketing area in the manner set forth in the attached amending order is approved or favored by producers who, during such period, were engaged in the production of milk for sale in the marketing area specified in such marketing order.

Marketing agreement and order, as amended. Annexed hereto and made a part hereof are two documents entitled, respectively, "Marketing Agreement Regulating the Handling of Milk in the New York Metropolitan Milk Marketing Area" and "Order Amending the Order, as amended, Regulating the Handling of Milk in the New York Metropolitan Milk Marketing Area" which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

It is hereby ordered, That all of this decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the order as hereby proposed to be amended by the attached order which will be published with this decision.

This decision filed at Washington, D. C., this 19th day of April 1955.

[SEAL] EZRA TAFT BENSON,
Secretary of Agriculture.

Order[1] *Amending the Order, as Amended, Regulating the Handling of Milk in the New York Metropolitan Milk Marketing Area*

§ 927.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order, and of the previously issued amendments thereto and all said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the New York Metropolitan milk marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(3) The said order, as amended, and as hereby further amended, regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered that on and after the effective date hereof the handling of milk in the New York Metropolitan milk marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, as follows:

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

1. Replace the period at the end of the first sentence in paragraph (a) of § 927.40 with a colon and add thereto the following: *"And provided further,* That such Class I–A price shall not be less than $4.75 during any of the months of May through September 1955."

2. Amend subparagraph (2) of paragraph (b) in § 927.40 to read as follows:

(2) There is a difference of more than 15 points for each of three consecutive months between 90 percent of the index of cost of production announced pursuant to § 927.46 (a) (6) and the index of the Class I–A price announced pursuant to § 927.46 (a) (7).

NOTICES

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

[Bureau Order No. 551, Amdt. 13]

REDELEGATIONS OF AUTHORITY

Order No. 551, as amended (16 F. R. 2939, 5456, 7467, 8252; 17 F. R. 3516, 7552; 18 F. R. 7305; 19 F. R. 1936, 3482, 3971, 4544, 4585, 7416; and 20 F. R. 1562, is further amended as follows:

1. Section 12 under the heading Functions Relating to Land and Minerals is amended to read as follows:

SEC. 12. *Leases and permits.* The approval of leases and permits, pursuant to the provisions of 25 CFR Part 171, of (1) tribal lands and lands owned by individual Indians and associations of Indians; and (2) lands acquired by the United States for Indian school or other Indian administrative purposes or transferred to or placed under the administration of the Bureau of Indian Affairs, except where such lands are permitted under contracts providing for the subpermitting thereof. This authority extends to and includes the waiver of requirements for advertising of leases or permits and the waiver of acreage limitations for farm and farm pasture lands.

2. Subsection (a) of section 132, under the heading Functions Relating to Credit Matters, is amended to read as follows:

SEC. 132. *Approval of mortgages and deeds of trust.* (a) The approval of mortgages and deeds of trust pursuant to 25 CFR 241.52, given as security for loans to finance productive enterprises operated by borrowers; to provide housing facilities for borrowers; and for the purchase or construction of other improvements to be utilized by borrowers when the loans are made by:

(1) Any corporation, tribe, band, or credit association pursuant to 25 CFR 21.13 and 28.11;

(2) Any bureau or agency operating under authority of Congress;

(3) Any National or State bank;

(4) Any building and loan association operating under authority of the law of any State; or,

(5) Any insurance company authorized by law to engage in the making of such loans in the State involved.

3. A new section, numbered 133 and reading as follows, is added under the heading Functions Relating to Credit Matters:

SEC. 133. *Revolving cattle pool.* (a) The sale of cattle repaid to the United States pursuant to the provisions of 25 CFR 23.17.

(b) The acceptance of cash in lieu of obligations to the United States for cattle, pursuant to the provisions of 25 CFR 23.18.

4. Two new sections, numbered 264 and 265 and reading as follows, are added under the heading Functions Relating to Funds and Fiscal Matters:

SEC. 264. *Individual Indian moneys.* The approval of expenditures of Individual Indian moneys held in the custody of the Department of the Interior.

SEC. 265. *Osage Indian funds.* The approval of applications by Osage Indians under section 5 of the act of April 18, 1912 (37 Stat. 87), for the withdrawal of individual trust funds in the Treasury of the United States and quarterly pro rata share payments of Osage tribal funds and interest on individual funds in the United States Treasury pursuant to the provisions of the act of June 28, 1906 (34 Stat. 544), as amended, or supplemented, by the acts of February 27, 1925 (43 Stat. 1008), and June 24, 1938 (52 Stat. 1034).

GLENN L. EMMONS,
Commissioner.

APRIL 18, 1955.

Bureau of Land Management

CALIFORNIA

NOTICE OF THE FILING OF PLATS OF SURVEY, EXTENSION SURVEY AND DEPENDENT SURVEY

APRIL 14, 1955.

Notice is given that plats of survey, as follows, were accepted September 9, 1954, and will be officially filed in the Land Office, Los Angeles, California, effective at 10:00 a. m. on the 35th day after date of this notice.

SAN BERNARDINO MERIDIAN

Plats of Survey of T. 3 S., R. 14 E.,
Fractional secs. 35 and 36.
T. 4 S., R. 14 E.,
Fractional secs. 1 and 2.
Dependent resurvey and extension survey of:
T. 4 S., R. 15 E.,
Sec. 31, lots 3, 4, 5, 6;
Sec. 32, lots 1 to 8 inclusive;
Sec. 33, lots 1, 2, 3, 4.
Extension Survey of T. 5 S., R. 14 E.,
Secs. 12, 13, 23, All;
Sec. 24, N½, SW¼.

The areas described aggregate 5024.97 acres.

Title to fractional sec. 36, T. 3 S., R. 14 E., S. B. M., subject to any prior existing rights, vested in the State of California as of the date of acceptance of the plat of survey. All remaining lands shall be subject to the following provisions of this order.

Available information indicates that the lands described are rolling rough hills to sandy desert lands.

No application for the described lands may be allowed under the homestead, desert-land, small tract, or any other non-mineral public land law unless the land has already been classified as valuable or suitable for such applications or shall be so classified upon consideration of an application.

At the hour and date specified above the said lands shall, subject to valid existing rights and the provisions of any existing withdrawals, become subject to application, petition, location, or selection as follows:

(a) *Ninety-day period for preference-right filings.* For a period of 90 days, commencing at the hour and on the day specified above, the public lands affected by this notice shall be subject to (1) application under the homestead or the desert-land laws, or the Small Tract Act of June 1, 1938 (52 Stat. 609; 43 U. S. C. 682a), as amended, by qualified veterans of World War II and other qualified persons entitled to preference under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284), as amended, subject to the requirements of applicable law, and (2) application under any applicable public-land law, based on prior existing valid settlement rights and preference rights conferred by existing laws or equitable claims subject to allowance and confirmation. Applications under subdivision (1) of this paragraph shall be subject to applications and claims of the classes described in subdivision (2) of this paragraph. All applications filed under this paragraph, either at or before 10:00 a. m. on the 35th day after the date of this notice, shall be treated as though filed simultaneously at that time. All applications filed after 10:00 a. m. on the said 35th day shall be considered in the order filed.

(b) *Date of non-preference-right filings.* Commencing at 10:00 a. m. on the 126th day after the date of this notice, any lands remaining unappropriated shall become subject to such application, petition, location, selection, or other appropriation by the public generally as may be authorized by the public-land laws. All such applications filed either at or before 10:00 a. m. on the 126th day after the date of this notice, shall be treated as though filed simultaneously at the hour specified on such 126th day. All applications filed thereafter shall be considered in the order filed.

A veteran shall accompany his application with a complete photostatic, or other copy (both sides), of his certificate of honorable discharge, or of an official document of his branch of the service which shows clearly his honorable discharge as defined in § 181.36 of Title 43 of the Code of Federal Regulations, or

constitutes evidence of other facts upon which the claim for preference is based and which shows clearly the period of service. Other persons claiming credit for service of veterans must furnish like proof in support of their claims. Persons asserting preference rights, through settlement or otherwise, and those having equitable claims, shall accompany their applications by duly corroborated statements in support thereof, setting forth in detail all facts relevant to their claims.

Applications for these lands, which shall be filed in the Land Office, Los Angeles, California, shall be acted upon in accordance with the regulations contained in § 295.8 of Title 43 of the Code of Federal Regulations and Part 296 of that title, to the extent that such regulations are applicable. Applications under the homestead laws shall be governed by the regulations contained in Parts 166 to 170, inclusive, of Title 43 of the Code of Federal Regulations, and applications under the desert-land laws and the Small Tract Act of June 1, 1938, shall be governed by the regulations contained in 232 and 257, respectively, of that title.

Inquiries concerning these lands shall be addressed to the Manager, Land Office, Los Angeles, California.

[SEAL] PAUL B. WITMER,
Manager.

INTERSTATE COMMERCE COMMISSION

FOURTH SECTION APPLICATIONS FOR RELIEF

APRIL 19, 1955.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the general rules of practice (49 CFR 1.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

LONG-AND-SHORT-HAUL

FSA No. 30509: Cast iron pipe in official territory. Filed by C. W. Boin, and C. R. Goldrich, Agents, for interested rail carriers. Rates on cast iron pressure pipe and fittings, carloads, from points in Massachusetts, New Jersey, Ohio, Pennsylvania, and Virginia to points in official territory.

Grounds for relief: Motor-truck competition.

Tariff: Agent Boin's I. C. C. No. A–1062.

FSA No. 30510: Latex to Concord and Roxboro, N. C. Filed by R. E. Boyle, Jr., Agent, for interested rail carriers. Rates on latex (liquid crude rubber), carloads, from Baton Rouge and North Baton Rouge, La., to Concord and Roxboro, N. C.

Grounds for relief: Short-line distance formula and circuity.

Tariff: Supplement 52 to Agent Spaninger's I. C. C. 1400.

FSA No. 30511: Merchandise—Nashville, Tenn., to New York, N. Y. Filed by R. E. Boyle, Jr., Agent, for interested rail carriers. Rates on various commodities in mixed carloads, from Nashville, Tenn., to New York, N. Y.

Grounds for relief: Competition with motor carriers and circuity.

Tariff: Supplement 8 to Agent Spaninger's I. C. C. 1458.

FSA No. 30512: Merchandise—Cincinnati, Ohio, to Florida. Filed by R. E. Boyle, Jr., Agent, for interested rail carriers. Rates on commodities, various, in mixed carloads, from Cincinnati, Ohio, to Lakeland and Winter Park, Fla.

Grounds for relief: Motor truck competition and circuity.

Tariff: Supplement 7 to Agent Spaninger's I. C. C. 1458.

FSA No. 30513: Merchandise—O & M River crossings to Mississippi. Filed by R. E. Boyle, Jr., Agent, for interested rail carriers. Rates on various commodities, in mixed carloads, from Cincinnati, Ohio, St. Louis, Mo., and East St. Louis, Ill., to Gulfport, Hattiesburg, and Laurel, Miss.

Grounds for relief: Motor truck competition and circuity.

Tariff: Supplement 7 to Agent Spaninger's I. C. C. 1458.

FSA No. 30514: Grain and products—Arkansas, Kansas, and Oklahoma to Texas. Filed by F. C. Kratzmeir, Agent, for interested rail carriers. Rates on grain, grain products and seeds, carloads, from specified points in Arkansas, Kansas and Oklahoma to specified points in Texas.

Grounds for relief: Circuity.

Tariff: Supplement 102 to Agent Kratzmeir's I. C. C. 3941.

FSA No. 30515: Barium sulphate—Missouri to West Virginia. Filed by F. C. Kratzmeir, Agent, for interested rail carriers. Rates on crude barium sulphate (barytes ore), carloads, from Blackwell, Mo., and twelve other points in Missouri to Charleston, Huntington and South Charleston, W. Va.

Grounds for relief: Water and import competition, and circuity.

Tariffs: Missouri Pacific Railroad Co., I. C. C. No. A–10237, supplement 19. St. Louis-San Francisco Co. I. C. C. A–336, supplement 13.

FSA No. 30516: Salt to Houston, Del. Filed by F. C. Kratzmeir, Agent, for interested rail carriers. Rates on common salt, carloads, from specified points in Louisiana and Texas to Houston, Del.

Grounds for relief: Depressed rates reflecting combinations of intermediate rate factors, and circuity.

Tariff: Supplement 67 to Agent Kratzmeir's I. C. C. 3668.

By the Commission.

ORGANIZATION, DUTIES AND FUNCTIONS

MARCH 28, 1955.

The material appearing at 12 F. R. 10148, 16 F. R. 8189, 16 F. R. 11745, and 17 F. R. 7910 is superseded by the following:

SECTION 1. *Purpose.* The purpose of this order is to define the broad authority and functions of the Secretary of Commerce and to prescribe the method and channels through which these functions are performed.

SEC. 2. *Secretary of Commerce.* .01 The Secretary of Commerce is responsible for the administration of the functions and authorities assigned to the Department of Commerce broadly described in the act of February 14, 1903 (32 Stat. 826), which reads in part as follows:

It shall be the province and duty of the said Department (Department of Commerce) to foster, promote, and develop the foreign and domestic commerce, • • • manufacturing, shipping • • • industries, and the transportation facilities of the United States; and to this end it shall be vested with jurisdiction and control of the departments, bureaus, offices, and branches of the public service hereinafter specified, and with such other powers and duties as may be prescribed by law.

.02 In addition to the generic authority provided in the act of February 14, 1903, supra, Reorganization Plan No. 5 of 1950 and Reorganization Plan No. 21 of 1950 transferred to the Secretary of Commerce, with certain exceptions not here pertinent, the related functions and authorities vested in all other officers and organization units of the Department of Commerce.

.03 The Secretary is also responsible for advising the President on Federal policy and programs affecting the industrial and commercial segments of the national economy within the scope of the Department of Commerce.

.04 The order of precedence to act as Secretary of Commerce is established by law and Executive Order which provide that the following officers, in the order designated, shall perform the duties of the Secretary of Commerce in the event

of the absence or sickness of the Secretary, or until a successor is appointed in the event of the vacancy of that position:

1. The Under Secretary.
2. The Under Secretary for Transportation.
3. The Assistant Secretaries of Commerce in the order of precedence as determined by the dates of their commissions.
4. The General Counsel.

SEC. 3. *Office of the Secretary of Commerce.* .01 The Office of the Secretary of Commerce is composed of the following officers and organization units:

1. The Secretary of Commerce.
2. The Under Secretary.
3. The Under Secretary for Transportation: Defense Air Transportation Administration.
4. The Assistant Secretary for Domestic Affairs.
5. The Assistant Secretary for International Affairs: Office of International Trade Fairs.
6. The Assistant Secretary for Administration: Office of Budget and Management, Office of Personnel Management, Office of Publications, Office of Administrative Operations, Office of Security Control, Agency Inspection Staff, Appeals Board.
7. The General Counsel.
8. Office of Public Information.
9. Office of Strategic Information.

.02 In the execution of his responsibilities for the administration of the functions and authorities assigned to the Department of Commerce, the Secretary has delegated, by separate orders, the performance of certain specified functions, together with the related operating authority, to the heads of the constituent units of the Office of the Secretary and to the heads of the primary organization units of the Department.

.03 Exhibit 1 to this order indicates the respective areas of functional supervision and authority exercised by the heads of the constituent units of the Office of the Secretary of Commerce and identifies the applicable enabling Department Order.

SEC. 4. *Effect on other orders.* This order supersedes Department Order No. 83 (Amended) of August 6, 1951, and Department Order No. 82 (Amended) of August 5, 1950. Any other orders or parts of orders the provisions of which are inconsistent or in conflict with the provisions of this order are hereby amended or superseded accordingly.

Effective date: March 28, 1955.

SINCLAIR WEEKS,
Secretary of Commerce.

SECURITIES AND EXCHANGE COMMISSION

[File No. 1-2706]

WILLSON PRODUCTS, INC.

NOTICE OF APPLICATION TO STRIKE FROM LISTING AND REGISTRATION, AND OF OPPORTUNITY FOR HEARING

APRIL 18, 1955.

American Stock Exchange has made application, pursuant to section 12 (d) of the Securities Exchange Act of 1934 and Rule X-12D2-1 (b) promulgated thereunder, to strike the above named security from listing and registration thereon.

The reasons alleged in the application for striking this security from listing and registration include the following:

Pursuant to an offer dated February 10, 1955, the Ray-O-Vac Company has purchased 151,211 shares of Willson Products, Inc., through April 7, 1955, leaving only 2,581 shares publicly held by 48 holders of record.

The purchase offer has been extended to the close of business May 11, 1955.

In the opinion of its Committee on Securities, the number of shares remaining in public hands has become so reduced as to make inadvisable further dealings therein upon the Exchange.

Upon receipt of a request, on or before May 4, 1955, from any interested person for a hearing in regard to terms to be imposed upon the delisting of this security, the Commission will determine whether to set the matter down for hearing. Such request should state briefly the nature of the interest of the person requesting the hearing and the position he proposes to take at the hearing with respect to imposition of terms. In addition, any interested person may submit his views or any additional facts bearing on this application by means of a letter addressed to the Secretary of the Securities and Exchange Commission, Washington 25, D. C. If no one requests a hearing on this matter, this application will be determined by order of the Commission on the basis of the facts stated in the application and other information contained in the official file of the Commission pertaining to the matter.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

SUBVERSIVE ACTIVITIES CONTROL BOARD

[Docket No. 109-53]

HERBERT BROWNELL, JR., ATTORNEY GENERAL OF THE UNITED STATES, PETITIONER, v. AMERICAN COMMITTEE FOR PROTECTION OF FOREIGN BORN, RESPONDENT

NOTICE OF HEARING

Notice is hereby given that, pursuant to the Subversive Activities Control Act of 1950 (Title I of the Internal Security Act of 1950, Pub. Law 831, 81st Cong. 50 U. S. C. 781 et seq.), particularly section 13 of said act (50 U. S. C. 792), a hearing in the above-entitled proceeding on the petition of the Attorney General for an order of the Board requiring the Respondent to register as a Communist-front organization pursuant to section 7 of said act (50 U. S. C. 786), will be held commencing on Monday, May 16, 1955, at 10:00 a. m., e. d. s. t., in Hearing Room 111, Lafayette Building, 811 Vermont Avenue NW., Washington, D. C.

Dated at Washington, D. C., April 18, 1955.

[SEAL] THOMAS J. HERBERT,
Chairman.

FEDERAL REGISTER

VOLUME 20 NUMBER 80

Washington, Saturday, April 23, 1955

TITLE 5—ADMINISTRATIVE PERSONNEL

Chapter I—Civil Service Commission

PART 22—APPEALS OF PREFERENCE ELIGIBLES UNDER THE VETERANS' PREFERENCE ACT OF 1944

Effective upon publication in the FEDERAL REGISTER, Part 22 is revised and amended to read as follows:

Subpart A—General Provisions

Sec.
22.101 Applicability of regulations.
22.102 Employee coverage.
22.103 Definitions.

Subpart B—Agency Action

22.201 Notification of proposed action; charges and opportunity for answer.
22.202 Exceptions to thirty-day notice period.
22.203 Reasonable time to answer.
22.204 Status of employee during notice period.
22.205 Notification of adverse decision of an administrative officer.

Subpart C—Employee Appeals

22.301 Right of appeal.
22.302 Time limit.
22.303 Where appeal shall be filed.
22.304 Contents of appeal.
22.305 Failure to prosecute appeal.

Subpart D—Commission Action on Initial Appeal

22.401 Investigation.
22.402 Right to a hearing.
22.403 Decision on appeals in the Commission; by whom made; contents.
22.404 Recommended corrective action.
22.405 Copies of decision.
22.406 Agency action.
22.407 Report to the Commission.

Subpart E—Commission Action; Appellate Review

22.501 Appeals to the Board of Appeals and Review.
22.502 Board procedures.
22.503 Finality of decision.
22.504 The Commissioners.

Subpart F—Hearings

22.601 Right to appear at hearing.
22.602 How conducted.
22.603 Introduction of evidence.
22.604 Rules of evidence.
22.605 Testimony taken under oath; record of hearings.
22.606 Limitation on attendance at hearings.
22.607 Appearance of witnesses.

AUTHORITY: §§ 22.101 to 22.607 issued under secs. 11, 19, 58 Stat. 390, 391; 5 U. S. C. 860, 868. Interpret or apply sec. 14, 58 Stat. 390, as amended by 61 Stat. 723; 5 U. S. C. 863. Other statutory provisions interpreted or applied are cited to text in parentheses.

SUBPART A—GENERAL PROVISIONS

§22.101 *Applicability of regulations*—(a) *Scope.* The regulations in this part shall apply to appeals from adverse decisions of administrative officers of the Federal Government and the Government of the District of Columbia. They shall not apply to any decision of the Commission or to any action of an administrative officer which is taken pursuant to instructions from the Commission.

(b) *Appeals involving performance ratings.* The regulations in this part shall apply to adverse decisions based on unsatisfactory performance. However, the correctness of any performance rating which is appealable to a board of review established under section 7 of the Performance Rating Act of 1950, shall not be considered.

(c) *Reduction in rank or compensation due to Commission's position classification decisions.* The regulations in this part shall apply to reductions in grade or rank of employees which are taken, at the election of the agency, after a position classification decision by the Commission.

§ 22.102 *Employee coverage*—(a) *Employees covered.* The regulations in this part shall apply to any career, career-conditional, or indefinite employee who has completed a probationary or trial period in a position in the competitive service, or to any employee who has completed one year of current continuous employment in a position outside the competitive service. Such employment may be in the service of any establishment, agency, bureau, administra-

tion, project, or department created by acts of Congress or Presidential order or in the service of the District of Columbia.

(b) *Employees not covered.* The regulations in this part shall not apply to an employee serving a probationary or trial period, or to an employee under the legislative or judicial branch of the Government unless he is occupying a position in the competitive service. This part shall not apply to an employee (except a postmaster) whose appointment is required to be confirmed by the United States Senate.

§ 22.103 *Definitions.* As used in this part, the term:

(a) "Adverse action" includes discharge, suspension for more than thirty (30) days, furlough without pay, and reduction in rank or compensation for reasons other than reduction in force pursuant to section 12 of the Veterans' Preference Act of 1944, as amended.

(b) "Commission" means the United States Civil Service Commission.

(c) "Days" means calendar days and not work days.

(d) "Employee" means a preference eligible employee, as specified in section 2 of the Veterans' Preference Act of 1944, as amended.

(e) "Separation under honorable conditions" means separation from active duty in any branch of the armed forces by transfer to inactive status, transfer to retired status, acceptance of a resignation, or issuance of an honorable discharge.

SUBPART B—AGENCY ACTION

§ 22.201 *Notification of proposed action: charges and opportunity for answer.* Adverse action shall not be taken against an employee except for such cause as will promote the efficiency of the service and for reasons given in writing. Except as provided in § 22.202, an employee against whom adverse action is sought shall be given at least thirty (30) full days' advance written notice stating any and all reasons, specifically and in detail, for any such proposed action.

§ 22.202 *Exceptions to thirty-day notice period.* (a) Advance written notice shall not be necessary in cases of furlough without pay due to unforeseeable circumstances, such as sudden breakdowns in equipment, acts of God, or emergencies requiring immediate curtailment of activities.

(b) The employees need not be given the full thirty (30) days' advance written notice, but must be given such lesser number of days advance notice and opportunity to answer as under the circumstances is reasonable and can be justified, in cases where there is reasonable cause to believe the employee to be guilty of a crime for which a sentence of imprisonment can be imposed.

§ 22.203 *Reasonable time to answer.* A reasonable time shall be allowed an employe for answering, personally and in writing, charges and notifications of proposed adverse actions and for furnishing affidavits in support of such answers. The reasonable time required shall depend on the facts and circumstances of each case, and shall be sufficient in all cases to afford the employee ample opportunity to prepare answers and secure affidavits.

§ 22.204 *Status of employee during notice period.* Whether the employee is given thirty (30) full days' advance notice under § 22.201, or less than thirty (30) full days' notice under paragraph (b) of § 22.202, he shall be retained in an active duty status during such notice period. However, in any case of a proposed adverse action, the employee may be placed on annual leave without his consent when the administrative office does not consider it advisable from an official standpoint to retain him in an active duty status during the period of advance notice. When an employee is not placed on annual leave and the circumstances are such that his retention in an active duty status may result in damage to Government property, or may be detrimental to the interest of the Government or injurious to the employee, his fellow workers or the general public, the employee may be temporarily assigned to duties in which these conditions would not exist or he may be placed on leave without pay with his consent: *Provided*, That in an emergency case requiring prompt suspension of an employee, the employing agency may suspend him for not more than thirty (30) days. The employee shall be given written notice of the proposed emergency suspension at least twenty-four (24) hours in advance. The reasons for not retaining an employee in an active duty status shall be made part of the record. Such reasons shall be reviewed by the Commission in the event that the employee subsequently appeals from the final decision reached by the administrative officer.

§ 22.205 *Notification of adverse decision of an administrative officer.* The administrative officer shall render his decision, and it shall be in writing, dated, and submitted to the employee promptly after such decision has been made. The employee shall be advised, in the same notification, of the reasons for the action taken and of his right to appeal to the appropriate office of the Commission, as provided in Subpart C of this part.

SUBPART C—EMPLOYEE APPEALS

§ 22.301 *Right of appeal.* An employee may appeal to the Commission from any decision of an administrative officer to take adverse action.

§ 22.302 *Time limit*—(a) *General.* An appeal may be submitted at any time after the notice of adverse decision but not later than ten (10) days after the adverse action has been effected, except as provided in paragraphs (b), (c), and (d) of this section.

(b) *Classification decisions.* The time limit on an appeal from a reduction resulting from a classification decision of an employing agency, when there is a right to appeal the position classification to the agency under its established administrative procedures, shall be not later than ten (10) days after the final decision by the agency on the administrative position classification appeal.

(c) *Presidential postmasters.* In the case of a postmaster appointed by the President and confirmed by the United States Senate, who is notified of an adverse decision of discharge and continues in office until a successor is installed, the time limit on an appeal shall be ten (10) days after receipt of notice of adverse decision.

(d) *Extension of time limit.* The time limit may be extended, in the discretion of the Commission, upon a showing by the employee that he was not notified of the applicable time limit and was not otherwise aware of the limit or that circumstances beyond his control prevented him from filing an appeal within the prescribed time limit.

§ 22.303 *Where appeal shall be filed.* (a) An appeal from an employee of the Federal Government in the Metropolitan area of Washington, D. C., or outside the continental limits of the United States (except Alaska, Hawaii, Puerto Rico, and the Virgin Islands) and an employee of the District of Columbia Government shall be submitted to the Chief, Appeals Examining Office, Bureau of Departmental Operations, United States Civil Service Commission, Washington 25, D. C.

(b) An appeal from any other employee shall be submitted to the director of the appropriate civil service region or manager of any branch regional office.

§ 22.304 *Contents of appeal.* The appeal of the employee to the Commission shall be in writing and shall set forth his reasons for contesting the adverse action, with offer of proof and such pertinent documents as he is able to submit.

§ 22.305 *Failure to prosecute appeal.* An appeal will be closed for failure to prosecute, when the appellant does not furnish required information and duly proceed with the advancement of his appeal. In lieu of closing for failure to prosecute, an appeal may be adjudicated if the information is sufficient for that purpose. A closed appeal will not be reopened except in the discretion of the Commission upon a showing that circumstances beyond the control of the appellant prevented him from prosecuting the appeal.

SUBPART D—COMMISSION ACTION ON INITIAL APPEAL

§ 22.401 *Investigation*—(a) *Scope.* Investigation will be made by the Commission to develop the facts and circumstances relative to the adverse decision.

(b) *Evidence.* Statements of witnesses shall be by affidavit, when practicable, and relative to the adverse decision.

(c) *Evidence available to both parties.* All relevant representations shall be dis-

cussed with both parties to the appeal, and shall be available for review by them.

§ 22.402 *Right to a hearing.* The employee shall have a right to a hearing before the office of the Commission undertaking initial adjudication of his case. This shall be the only opportunity for hearing as a matter of right. The employee shall be advised of his right to a hearing and shall express his desire in writing.

§ 22.403 *Decision on appeals in the Commission; by whom made; contents.* The decision on the appeal shall be made by the Chief, Appeals Examining Office, or by the regional director, as appropriate. The decision shall consist of the findings and recommendations, including an analysis of the evidence, the reasons for the conclusions reached, and the action to be taken by the agency.

§ 22.404 *Recommended corrective action.* The Chief, Appeals Examining Office, or the regional director shall recommend such corrective action as may be necessary.

§ 22.405 *Copies of decision.* A copy of the decision shall be furnished to the employee or his designated representative, and to the employing agency, with notification of the right of either party to appeal within seven (7) days to the Board of Appeals and Review, U. S. Civil Service Commission, Washington 25, D. C.

§ 22.406 *Agency action.* It is mandatory for the agency to take corrective action in accordance with the decision made by the Chief, Appeals Examining Office or the regional director, unless appeal is made to the Board of Appeals and Review.

§ 22.407 *Report to the Commission.* The agency shall report to the Chief, Appeals Examining Office, or to the regional office, as the case may be, within seven (7) days after receipt of the decision that it has carried such decision into effect or that it is appealing the decision.

SUBPART E—COMMISSION ACTION; APPELLATE REVIEW

§ 22.501 *Appeals to the Board of Appeals and Review*—(a) *Appeal from decision of a Commission office.* When an employee or the employing agency elects to appeal from a decision of the Chief, Appeals Examining Office, or regional director, such appeal shall be made to the Board of Appeals and Review (hereinafter referred to as the "Board"), U. S. Civil Service Commission, Washington 25, D. C.

(b) *Time limit for filing.* Such appeal must be filed within seven (7) days after the date of receipt of notification of the decision. This time limit may be extended, in the discretion of the Board, only upon a showing that circumstances beyond the control of the employee or the employing agency prevented the filing of a further appeal within the prescribed seven (7) days.

(c) *Form and content.* The appeal shall be in writing and shall set forth the basis for the appeal.

§ 22.502 *Board procedures*—(a) *Scope.* The Board will review the entire record of the case and all written representations submitted to the Board relevant to the appeal.

(b) *Personal appearance.* In its discretion, the Board may afford the parties an opportunity to appear personally and present oral arguments and representations. No oral evidence shall be submitted which could have been accepted in connection with the initial appeal.

(c) *Decision.* The decision on an appeal to the Board shall be transmitted to the employee, or his designated representative, and to the employing agency.

§ 22.503 *Finality of decision.* The decision on an appeal to the Board shall be final. There is no further right to appeal. A recommendation for corrective action is mandatory and must be complied with by the agency. Where corrective action is required, the agency shall report to the Board promptly that such action has been taken.

§ 22.504 *The Commissioners.* The Commissioners may, in their discretion, when, in their judgment, such action appears warranted by the circumstances, reopen and reconsider any previous decision.

SUBPART F—HEARINGS

§ 22.601 *Right to appear at hearing.* An employee has a right to appear at the hearing on his appeal, personally or through or accompanied by his representative, before the office of the Commission handling the appeal. The agency has a right to participate in such a hearing. Both parties shall have the right to produce witnesses.

§ 22.602 *How conducted.* The hearing will be informal and will be conducted by a representative of the Commission.

§ 22.603 *Introduction of evidence.* Opportunity will be afforded for the introduction of evidence (including testimony and statements by the employee and his designated representative and witnesses and by representatives of the agency and its witnesses) and for the cross-examination of witnesses.

§ 22.604 *Rules of evidence.* Rules of evidence will not be strictly applied during hearings, but the Commission representative in charge of the hearing shall use reasonable discretion to exclude irrelevant or unduly repetitious testimony.

§ 22.605 *Testimony taken under oath; record of hearings.* The testimony at hearings shall be under oath. The office of the Commission handling the appeal shall determine how the hearing will be recorded. If the hearing is recorded verbatim, the reporter's transcript shall be made a part of the record of the proceeding and a copy shall be furnished to each party. When the hearing is not recorded verbatim, the presiding officer shall make a suitable summary of pertinent portions of the testimony. When agreed to in writing by all parties concerned, the summary shall constitute the report of the hearing and shall be made a part of the record. A copy shall be furnished to each party. Should the presiding officer and the parties fail to agree on the summary, the parties shall be permitted to submit, in writing, exceptions to any part of the summary. Such exceptions shall be considered in connection with the making of the finding and recommendation.

§ 22.606 *Limitation on attendance at hearings.* Hearings shall not be open to the general public or the press. Attendance shall be limited to persons determined by the Commission to have a direct connection with the appeal.

§ 22.607 *Appearance of witnesses.* The Commission is not authorized to subpoena witnesses. The employee and his designated representative, and the employing agency, must make their own arrangements for the appearance of witnesses.

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] WM. C. HULL,
Executive Assistant.

TITLE 7—AGRICULTURE

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders), Department of Agriculture

[Navel Orange Reg. 57]

PART 914—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

LIMITATION OF HANDLING

§ 914.357 *Navel Orange Regulation 57*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 14, as amended (7 CFR Part 914; 19 F. R. 2941), regulating the handling of navel oranges grown in Arizona and designated part of California, effective September 22, 1953, under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Navel Orange Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such navel oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The Navel Orange Administrative Committee held an open meeting on April 21, 1955, after giving due notice thereof, to consider supply and market conditions for navel oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein was promptly submitted to the Department after such meeting was held; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such navel oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed on or before the effective date hereof.

(b) *Order.* (1) The quantity of navel oranges grown in Arizona and designated part of California which may be handled during the period beginning at 12:01 a. m., P. s. t., April 24, 1955, and ending at 12:01 a. m., P. s. t., May 1, 1955, is hereby fixed as follows:

(i) District 1: Unlimited movement;
(ii) District 2: 346,500 boxes;
(iii) District 3: Unlimited movement;
(iv) District 4: Unlimited movement.

(2) Navel oranges handled pursuant to the provisions of this section shall be subject to any size restrictions applicable thereto which have heretofore been issued on the handling of such oranges and which are effective during the period specified herein.

(3) As used in this section, "handled," "boxes," "District 1," "District 2," "District 3," and "District 4" shall have the same meaning as when used in said amended marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: April 22, 1955.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[F. R. Doc. 55-3414; Filed, Apr. 22, 1955; 11:33 a. m.]

[Lemon Reg. 506]

PART 953—LEMONS GROWN IN CALIFORNIA AND ARIZONA

LIMITATIONS OF SHIPMENTS

§ 953.693 *Lemon Regulation 586*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 53, as amended (7 CFR Part 953; 19 F. R. 7175), regulating the handling of lemons grown in the State of California or in the State of Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of the quantity of such lemons which may be handled, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. Shipments of lemons, grown in the State of California or in the State of Arizona, are currently subject to regulation pursuant to said amended marketing agreement and order; the recommendation and supporting information for regulation during the period specified herein was promptly submitted to the Department after an open meeting of the Lemon Administrative Committee on April 20, 1955, such meeting was held, after giving due notice thereof to consider recommendations for regulation, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such lemons; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time thereof.

(b) *Order.* (1) The quantity of lemons grown in the State of California or in the State of Arizona which may be handled during the period beginning at 12:01 a. m., P. s. t., April 24, 1955, and ending at 12:01 a. m., P. s. t., May 1, 1955, is hereby fixed as follows:

(i) District 1: Unlimited movement;
(ii) District 2: 450 carloads;
(iii) District 3: Unlimited movement.

(2) As used in this section, "handled," "carloads," "District 1," "District 2," and "District 3" shall have the same meaning as when used in the said amended marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: April 21, 1955.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[F. R. Doc. 55-3384; Filed, Apr. 22, 1955; 8:56 a. m.]

TITLE 9—ANIMALS AND ANIMAL PRODUCTS

Chapter I—Agricultural Research Service, Department of Agriculture

Subchapter B—Cooperative Control and Eradication of Animal Diseases

PART 54—ANIMALS DESTROYED BECAUSE OF SCRAPIE

Part 54 is revised to read as follows:

Pursuant to the authority of section 11 of the act of May 29, 1884, as added by the act of September 21, 1944, and as amended by the act of August 8, 1953, 67 Stat. 493; 21 U. S. C. 114a, the following Part 54 is hereby promulgated:

Sec.
54.1 Definitions.
54.2 Cooperation with States.
54.3 Appraisal of animals.
54.4 Time limit for slaughter.
54.5 Care and feeding of animals under quarantine; disposal of animals after slaughter.
54.6 Mortgages and other liens against animals.
54.7 Destruction of animals.
54.8 Payments to owners for animals destroyed.
54.9 Claims not allowed.

AUTHORITY: §§ 54.1 to 54.9 issued under sec. 11, 58 Stat. 734, as amended; 21 U. S. C. 114a.

§ 54.1 *Definitions.* For the purpose of this part, the following words, names and terms shall be construed, respectively, to mean:

(a) "The Department" means the United States Department of Agriculture.

(b) "Branch" means the Animal Disease Eradication Branch of the Agricultural Research Service, United States Department of Agriculture.

(c) "Destroyed" means destroyed by slaughter or by such other means as may be authorized by the Chief of Branch.

(d) "Animals" include sheep and/or goats.

§ 54.2 *Cooperation with States.* Upon determination by the Chief of Branch of the existence of scrapie, he shall solicit the cooperation of the proper State or Territory authorities in the eradication of such disease.

§ 54.3 *Appraisal of animals.* (a) Affected and exposed animals shall be appraised at their actual value at the place and time of appraisal by a representative of the Branch and a representative of the State jointly, except that, if the owner and State authorities approve, such animals may be appraised by a representative of the Branch alone.

(b) The Branch may decline to accept any appraisal that appears to it to be unreasonable or out of proportion to the value of similar animals of a like quality. Appraisals shall not exceed any limit set by the laws of the State or other agency which is cooperating with the Branch in the payment of indemnity because of scrapie.

§ 54.4 *Time limit for slaughter.* Animals slaughtered under this part shall be slaughtered within 15 days after the date of appraisal unless such time is specifically extended by the Chief of Branch.

§ 54.5 *Care and feeding of animals under quarantine; disposal of animals after slaughter.* Expenses for the care and feeding of animals held for destruction and the expense of destruction, burial, incineration, etc., and/or transportation and other expenses incidental to their slaughter will not be paid by the Department.

§ 54.6 *Mortgages and other liens against animals.* (a) When animals have been destroyed pursuant to this part, the inspector in charge shall take reasonable precaution to determine, prior to his approval of vouchers in which compensation therefore is claimed, who is the owner of the animals and whether there are any mortgage or other liens outstanding against the animals. If it appears that there are outstanding liens, a full report regarding the same shall be made and shall accompany the voucher. Every such report shall include a description of the liens, the name of the person or persons having possession of the documentary evidence thereof, and a statement showing what arrangements, if any have been made, to discharge the liens. Every such report should also include a statement of any claims, other than liens, outstanding against the animals destroyed of which the inspector in charge may have knowledge.

(b) When it appears that there are no outstanding liens or claims against the animals a statement to this effect, signed by the owner, shall accompany the voucher.

§ 54.7 *Destruction of animals.* (a) Animals affected with or exposed to scrapie shall be destroyed under this part only after obtaining the written agreement of the owner to accept, as compensation in full from the United States, 50 percent of the difference between the appraisal value and the salvage value not to exceed $25 per head for grade animals and $75 per head for purebred animals.

(b) Animals which are exposed to but which do not show visible symptoms of scrapie and whose flesh can be saved for food without risk of spreading the disease may be slaughtered in an establishment approved by the Chief of Branch.

§ 54.8 *Payments to owners for animals destroyed.* (a) Owners of animals destroyed in accordance with this part because such animals are affected with or exposed to scrapie shall be paid an indemnity not to exceed 50 percent of the difference between the appraised value of each animal so destroyed and the net salvage received by the owner thereof.

(b) The Federal indemnity shall be limited to $25 per head for grade animals and $75 per head for purebred animals.

(c) The Branch may indemnify owners up to the limitations specified in this part whether or not the State participates in indemnity payment.

(d) Animals presented for appraisal as purebred shall be accompanied by their certificate of registry at the time of appraisal, or they shall be appraised as grades: *Provided, however,* That in the absence of such proof of purebreeding the Chief of Branch may grant a reasonable time for the presentation of their certificate of registration to the appraiser.

§ 54.9 *Claims not allowed.* (a) The Department will not allow claims arising out of the destruction of animals unless they have been previously appraised, and the owners thereof shall have executed agreements, in compliance with this part.

(b) The Department will not allow claims if the claimant has failed to comply with any of the Department regulations pertaining to scrapie including the necessary cleaning and disinfection of his premises and conveyances.

Effective date. This part shall become effective upon publication.

The primary purpose of this part is to provide for indemnity payments by the Federal Government. The amount of these indemnities is dependent on budget considerations and other facts peculiarly within the knowledge of the Department of Agriculture. Hence, under section 4 of the Administrative Procedure Act (5 U. S. C. 1003) it is found upon good cause that notice and other public procedure with respect to the promulgation of this part are impracticable and contrary to the public interest and this part may be made effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D. C., this 20th day of April 1955.

[SEAL] M. R. CLARKSON,
Acting Administrator,
Agricultural Research Service.

[F. R. Doc. 55-3329; Filed, Apr. 22, 1955; 8:46 a. m.]

TITLE 16—COMMERCIAL PRACTICES

Chapter I—Federal Trade Commission

[File No. 21-143]

PART 41—MEDICAL GAS INDUSTRY

ORDER RESCINDING RULES

Whereas on August 24, 1931, the Commission promulgated trade practice rules for the Medical Gas Industry, which were codified in the Code of Federal Regulations (16 CFR Part 41); and

Whereas it appears that said rules for this industry do not in some respects accurately reflect existing requirements of law, and members of this industry generally are not interested in having such rules revised; and

Whereas under the circumstances proceedings for revision of the rules for this industry do not appear to be warranted;

It is ordered, That the said rules be and the same are hereby rescinded.

Issued: April 20, 1955.

By the Commission.

[SEAL] ROBERT M. PARRISH,
Secretary.

[F. R. Doc. 55-3348; Filed, Apr. 22, 1955; 8:48 a. m.]

TITLE 26—INTERNAL REVENUE, 1954

Chapter I—Internal Revenue Service, Department of the Treasury

Subchapter E—Alcohol, Tobacco, and Other Excise Taxes

PART 175—TRAFFIC IN CONTAINERS OF DISTILLED SPIRITS

On November 24, 1954, a notice of proposed rule making with respect to Part 175 of Title 26 (1939) of the Code of Federal Regulations was published in the FEDERAL REGISTER (19 F. R. 7577). The purposes of the amendments were stated as (a) to liberalize the marking requirements for liquor bottles, (b) to place both domestic and imported liquor bottles on the same basis, (c) to require all manufacturers of liquor bottles, including earthenware, to qualify in the same manner as manufacturers of glass liquor bottles, (d) to authorize the Commissioner, in his discretion, to prescribe the use of other suitable materials (glass and earthenware being specifically authorized by regulations) in the manufacture of liquor bottles, (e) to modify the procedure for approving and classifying distinctive liquor bottles, (f) to extend the means of marking indicia on liquor bottles to include etching, sand-blasting, or any other method of marking approved by the Commissioner, (g) to remove the requirement that bottle manufacturers and bottlers submit monthly reports on Forms 146 and 147, respectively, (h) to specifically state that bottles bearing the indicia selected by a bottler for use by himself or any of his wholly-owned subsidiaries may be used interchangeably with bottles bearing indicia of the particular premises where the bottling is to be conducted, (i) to relax requirements with respect to off-premises bottle storage for bottlers and manufacturers, (j) to permit bottlers to store miscellaneous items of equipment and supplies in off-premises bottle storage places, (k) to conform Part 175 to the reorganization procedure by delegating certain functions, hitherto reserved for the Commissioner, to the assistant regional commissioner, (l) to clarify the procedure to be followed in investigating applications for permits, and (m) to place permits (on Form 98) for the procurement, use, and importation of liquor bottles on a continuing rather than an annual basis. After consideration of all relevant matter presented by interested parties, and in order (a) to adopt Part 175 of Subchapter C of Title 26 of the 1939 Code of Federal Regulations, redesignated as Part 175 of Subchapter E of Title 26 of the 1954 Code of Federal Regulations and to amend such adopted regulations to implement the revision of the regulatory provisions of the Internal Revenue Code of 1954 by (1) deleting the words "at retail" in describing containers held for sale, and (2) authorizing the regulation of traffic in containers of 5-gallon capacity, which are customarily used for the packaging and transportation of untaxpaid distilled spirits, and (b) to make editorial changes, the following regulations are prescribed:

Preamble: 1. The regulations in this part shall supersede Regulations 13, 1950 edition (26 CFR (1939) Part 175; 15 F. R. 4045) as amended by Treasury Decisions 6053 (18 F. R. 7609) and 6114 (19 F. R. 8502).

2. These regulations shall not affect any act done or any liability or right accruing or accrued, or any suit or proceeding had or commenced, before the effective date of these regulations.

3. Inasmuch as these regulations are needful for the enforcement of the applicable provisions of the Internal Revenue Code of 1954 effective January 1, 1955, it is hereby found that it is contrary to the public interest to issue these regulations generally subject to the effective date limitation of section 4 (c) of the Administrative Procedure Act (60 Stat. 238; 5 U. S. C. 1003 (c)). Accordingly, the regulations in this part shall be effective on the date of their publication in the FEDERAL REGISTER, except § 175.30, which, to the extent that it applies to one who manufactures, stores, ships, consigns, or delivers liquor bottles formerly classified as earthenware containers for distilled spirits and authorized to be used by a bottler under a permit in effect immediately preceding the date of the publication of these regulations in the FEDERAL REGISTER, shall be effective on the 31st day after the date of such publication.

Subpart A—Scope of Regulations

Sec.
175.1 Containers of distilled spirits.
175.2 Adoption of other regulations.
175.3 Forms prescribed.

Subpart B—Definitions

175.5 Meaning of terms.

175.7 Application.
175.8 Assistant regional commissioner.
175.9 Bottler.
175.10 Commissioner.
175.11 Container.
175.12 Director, Alcohol and Tobacco Tax Division.
175.13 Distilled spirits.
175.14 Importer.
175.15 I. R. C.
175.16 Kind.
175.17 Liquor bottle.
175.18 Permit.
175.19 Person.
175.20 Regional commissioner.
175.21 United States.
175.22 Vintage spirits.

Subpart C—Manufacture and Sale of Bottles for Packaging Distilled Spirits

175.30 Permit to manufacture.
175.31 Changes in plant.
175.32 Storage of liquor bottles by manufacturer.
175.33 Persons authorized to receive liquor bottles.
175.34 Indicia for domestic liquor bottles.

Subpart D—Labels

175.40 General.
175.41 Brand name, kind and alcoholic content.
175.42 Net contents.
175.43 Name and address of bottler.
175.44 Age of whisky not blended or rectified.
175.45 Age of blended or rectified whisky.
175.46 Age of brandy.
175.47 Coloring matter.

Subpart E—Use of Liquor Bottles of Domestic Manufacture for Packaging Distilled Spirits

Sec.
175.55 General.
175.56 Distinctive liquor bottles (not costly) for distilled spirits.
175.57 Distinctive liquor bottles (costly).
175.58 Distinctive liquor bottles for liqueurs and cordials.
175.59 Approval of distinctive liquor bottles.
175.60 Use of liquor bottles bearing same indicia, by parent company and wholly-owned subsidiaries.
175.61 Authorized receipt of liquor bottles.
175.62 Use and resale of liquor bottles.
175.63 Reuse of liquor bottles.
175.64 Storage of liquor bottles.

Subpart F—Reports and Inventories

SHIPMENT OF LIQUOR BOTTLES

175.70 Orders for shipment.
175.71 Report of shipment.
175.72 Notice of receipt.
175.73 Records of orders for, and reports of shipment and reciept of, liquor bottles.

REPORTS

175.74 Requirements.
175.75 Inspection of stocks and records of liquor bottles.

Subpart G—Imports and Exports

IMPORTATION OF EMPTY LIQUOR BOTTLES

175.85 General.
175.86 Permit required.
175.87 Indicia for empty liquor bottles.
175.88 Empty distinctive liquor bottles (not costly) for distilled spirits.
175.89 Empty distinctive liquor bottles (costly).
175.90 Empty distinctive liquor bottles for liqueurs and cordials.
175.91 Records of orders for, and notices of receipt of, empty liquor bottles.

IMPORTATION OF FILLED LIQUOR BOTTLES

175.92 General.
175.93 Permit required.
175.94 Indicia.
175.95 Distinctive liquor bottles (not costly) for distilled spirits.
175.96 Distinctive liquor bottles (costly).
175.97 Distinctive liquor bottles for liqueurs and cordials.
175.98 Vintage spirits.
175.99 Approval of distinctive liquor bottles.
175.100 Liquor bottles denied entry.

EXPORTS

175.101 Exports.
175.102 Language of indicia.

Subpart H—Permits, Revocation Proceedings

175.105 Application.
175.106 Investigation.
175.107 Approval.
175.108 Contemplated disapproval.
175.109 Terms and conditions of permit.
175.110 Violation of permit.
175.111 Disposition of stocks of liquor bottles.

Subpart I—Purchase, Sale, and Possession of Used Liquor Bottles

175.120 Purchase or sale of used liquor bottles.
175.121 Reuse of liquor bottles.
175.122 Possession of used liquor bottles.

AUTHORITY: §§ 175.1 to 175.122 issued under sec. 7805, 68A Stat. 917; 26 U. S. C. 7805. Interpret or apply sec. 5214, 68A Stat. 639; 26 U. S. C. 5214. Other statutory provisions interpreted or applied are cited to text in parentheses.

SUBPART A—SCOPE OF REGULATIONS

§ 175.1 *Containers of distilled spirits.* The regulations in this part relate to the traffic in containers of distilled spirits of a capacity of not less than one-half pint and not more than five wine gallons. This part covers the manufacture, sale, and use of liquor bottles for packaging distilled spirits for other than industrial use; reports and inventories of liquor bottles; imports and exports of liquor bottles; permits; and the purchase, sale and possession of used liquor bottles.

§ 175.2 *Adoption of other regulations.* All provisions of regulations relating to the size and filling of bottles contained in 27 CFR Part 5 are hereby extended to and made a part of this part.

§ 175.3 *Forms prescribed.* The Director, Alcohol and Tobacco Tax Division, is authorized to prescribe all forms required by this part, including applications, reports, and records. Information called for shall be furnished in accordance with the instructions on the forms or issued in respect thereto.

SUBPART B—DEFINITIONS

§ 175.5 *Meaning of terms.* As used in this part, unless the context otherwise requires, terms shall have the meanings ascribed in this subpart.

§ 175.6 *Age.* "Age" shall have the meaning given to such term by the provisions of 27 CFR Part 5, and shall be stated in the manner provided in said part.

§ 175.7 *Application.* "Application" shall mean a formal written request for a permit for one or more of the privileges authorized by this part, verified by a written declaration that such statement is made under penalties of perjury.

(68A Stat. 749; 26 U. S. C. 6065)

§ 175.8 *Assistant regional commissioner.* "Assistant regional commissioner" shall mean the Assistant Regional Commissioner, Alcohol and Tobacco Tax, who is responsible to, and functions under the direction and supervision of, the regional commissioner.

§ 175.9 *Bottler.* "Bottler" shall mean a distiller, rectifier, proprietor of an internal revenue bonded warehouse, taxpaid bottling house, industrial alcohol plant or industrial alcohol bonded warehouse, a class 8 bonded warehouse qualified under the customs laws, or an agency of the United States or any State or political subdivision thereof.

§ 175.10 *Commissioner.* "Commissioner" shall mean the Commissioner of Internal Revenue.

§ 175.11 *Container.* "Container" shall mean a vessel of a capacity of not less than one-half pint and not more than 5 wine gallons designed or intended for use for the sale of distilled spirits for other than industrial use.

§ 175.12 *Director, Alcohol and Tobacco Tax Division.* "Director, Alcohol and Tobacco Tax Division" shall mean the Director, Alcohol and Tobacco Tax Division, Internal Revenue Service, Treasury Department, Washington, D. C.

§ 175.13 *Distilled spirits.* Distilled spirits, spirits, alcohol, and alcoholic spirits shall mean:

(a) That substance known as ethyl alcohol, hydrated oxide of ethyl, or spirits of wine, which is commonly produced by the fermentation of grain, starch, molasses, or sugar, including all dilutions and mixtures of this substance, and

(b) Products of rectification, for other than industrial use.

§ 175.14 *Importer.* "Importer" shall mean any person authorized to import distilled spirits into the United States.

§ 175.15 *I. R. C.* "I. R. C." shall mean the Internal Revenue Code of 1954.

§ 175.16 *Kind.* "Kind" shall have the respective meanings given to such term by the "Standards of identity for distilled spirits," set forth in 27 CFR Part 5, and shall be stated in the manner provided in said part.

§ 175.17 *Liquor bottle.* "Liquor bottle" shall mean a container (as defined by § 175.11) made of glass, or earthenware, or other suitable material approved by the Director, Alcohol and Tobacco Tax Division.

§ 175.18 *Permit.* "Permit" shall mean a written authorization signed by the assistant regional commissioner, describing the acts permitted to be performed.

§ 175.19 *Person.* "Person" shall mean and include an individual, a trust, estate, partnership, association, company or corporation.

(68A Stat. 911; 26 U. S. C. 7701)

§ 175.20 *Regional commissioner.* "Regional commissioner" shall mean the regional commissioner in each of the internal revenue regions.

§ 175.21 *United States.* "United States" shall mean the States, the Territories of Alaska and Hawaii, and the District of Columbia.

(68A Stat. 911; 26 U. S. C. 7701)

§ 175.22 *Vintage spirits.* "Vintage spirits" shall mean all imported distilled spirits which are not less than 10 years old and which were bottled prior to August 1, 1934.

SUBPART C—MANUFACTURE AND SALE OF BOTTLES FOR PACKAGING DISTILLED SPIRITS

§ 175.30 *Permit to manufacture.* Any person intending to engage in the manufacture of liquor bottles shall apply on Form 93 to the assistant regional commissioner of the region in which his plant is situated for an appropriate permit authorizing him to engage in such manufacture, and, except as may otherwise be provided in this part, no person may hereafter manufacture, store, ship, consign, or deliver liquor bottles unless in accordance with the terms of such a permit.

§ 175.31 *Changes in plant.* Any person who after the issuance of a permit authorizing him to engage in the manufacture of liquor bottles desires to make major changes in the construction or equipment of his plant, shall file an application on Form 93 with the assistant regional commissioner of the region in which his plant is situated for an appropriate permit authorizing him to make such changes.

§ 175.32 *Storage of liquor bottles by manufacturer.* Any person authorized to manufacture liquor bottles may store such bottles off the premises described on his Form 93 in a room or warehouse, securely constructed and adequately protected, only when so authorized by a permit issued by the assistant regional commissioner of the region in which such storage space is located, pursuant to application Form 98.

§ 175.33 *Persons authorized to receive liquor bottles.* No person may ship, consign, or deliver liquor bottles except to authorized bottlers to whom the assistant regional commissioner, or the Director, Alcohol and Tobacco Tax Division, in the case of States, has assigned an appropriate symbol and number for marking liquor bottles: *Provided*, That liquor bottles may be shipped pursuant to Form 98 by the manufacturer to another person for additional processing, such as coloring or cutting, where legal title and custody to such liquor bottles are retained by the manufacturer until they are delivered to the permittee-user.

§ 175.34 *Indicia for domestic liquor bottles.* There shall be legibly blown, etched, sand-blasted, marked by underglaze coloring, or otherwise permanently marked by any method approved by the Director, Alcohol and Tobacco Tax Division, in either the bottom or the body of each liquor bottle (a) the permit number of the manufacturer, (b) the year of manufacture (which shall be indicated by the last two numerals), and (c) a symbol and number assigned by the assistant regional commissioner, or by the Director, Alcohol and Tobacco Tax Division, in the case of States, to represent the name of the bottler procuring the same; and there shall be similarly marked on the shoulder of each such bottle the words "Federal Law Forbids Sale or Reuse of This Bottle": *Provided*, That liquor bottles which are authorized by the Director, Alcohol and Tobacco Tax Division, under §§ 175.56, 175.57, and 175.58 may be manufactured and shipped, consigned, or delivered, as excepted from the markings required by this section.

SUBPART D—LABELS

§ 175.40 *General.* Liquor bottles shall bear labels showing the brands and marks prescribed by this subpart.

§ 175.41 *Brand name, kind and alcoholic content.* The brand name, kind and alcoholic content of the distilled spirits, by proof, shall be shown on the label, except that the alcoholic content may be stated in percentage, by volume, in the case of liqueurs, cordials, bitters, cocktails, gin fizzes, or other such specialties.

§ 175.42 *Net contents.* The net contents of liquor bottles shall be shown on the label, unless the statement of the net contents is legibly marked, in the manner prescribed in § 175.34, in the bottles.

§ 175.43 *Name and address of bottler.* On labels of domestic distilled spirits, there shall be stated the phrase "Bottled by," immediately followed by the name of the bottler or the trade name under which the spirits are bottled, and the place where such spirits are bottled. If the bottler is the actual bona fide operator of more than one bottling plant engaged in bottling the same brand of distilled spirits, there may be stated immediately following the name (or trade name) of such bottler the addresses of the plants at which such product is bottled: *Provided*, That on labels of whisky and straight whisky there shall be stated the State of distillation of such whisky, if such whisky is not distilled in the State given in the address of the brand label: *Provided further*,

(a) That, where distilled spirits are bottled by or for the distiller thereof, there may be stated, in lieu of the phrase "Bottled by," followed by the bottler's name (or trade name) and address, the phrase "Distilled by," followed by the name (or trade name) under which the particular spirits were distilled, and the address (or addresses) of the distiller;

(b) That, where distilled spirits are bottled by or for the rectifier thereof, there may be stated, in lieu of the phrase "Bottled by," followed by the bottler's name (or trade name) and address, the phrase "Blended by," "Made by," "Prepared by," "Manufactured by," or "Produced by" (whichever may be appropriate to the act of rectification involved), followed by the name (or trade name) under which the distilled spirits were rectified, and the address (or addresses) of the rectifier;

(c) That, on labels of distilled spirits bottled for a retailer or other person who is not the actual distiller or rectifier of such distilled spirits there may also be stated the name and address of such retailer or other person, immediately preceded by the words "Bottled for" or "Distributed by," or other similar statement.

§ 175.44 *Age of whisky not blended or rectified.* If whisky is not blended or rectified, the age thereof shall be shown on the label, but this statement shall not be required as to whisky bottled in bond or foreign or domestic whisky four years or more old.

§ 175.45 *Age of blended or rectified whisky.* If whisky is blended or rectified, the age of the whisky therein and the respective percentage, by volume, of whisky or whiskies and neutral spirits, stated in the manner and form prescribed by 27 CFR Part 5, shall be shown on the label: *Provided*, That this statement shall not be required in the case of blended foreign or domestic whiskies containing no neutral spirits, all of which are four years or more old.

§ 175.46 *Age of brandy.* If brandy is aged for a period of less than two years, the age thereof shall be shown on the label.

§ 175.47 *Coloring matter.* A statement of the percentage, by volume, of coloring matter, if such coloring matter is present in the distilled spirits in excess of 2½ percent by volume, shall be shown on the label, except that this requirement shall not apply to liqueurs, cordials, bitters, cocktails, gin fizzes, or other such specialties.

SUBPART E—USE OF LIQUOR BOTTLES OF DOMESTIC MANUFACTURE FOR PACKAGING DISTILLED SPIRITS

§ 175.55 *General.* Distilled spirits packaged for sale in domestically manufactured containers (as defined by § 175.11) shall be packaged only in liquor bottles which conform to the requirements of this part and to the provisions relating to the size and filling of bottles of 27 CFR Part 5.

§ 175.56 *Distinctive liquor bottles (not costly) for distilled spirits.* Upon application (Form 98) by any bottler, the assistant regional commissioner of the region in which the plant of such bottler is situated may, by the issuance of an appropriate permit, authorize the procurement and use by such bottler of liquor bottles which are found by the Director, Alcohol and Tobacco Tax Division, to be of distinctive shape or design (but not costly of manufacture), and which bear the indicia required by § 175.34 anywhere on the bottle, for the packaging of distilled spirits, including liqueurs, cordials, and specialties.

§ 175.57 *Distinctive liquor bottles (costly).* Upon application (Form 98) by any bottler, the assistant regional commissioner of the region in which the plant is situated may, by the issuance of an appropriate permit, authorize the procurement and use by such bottler, for the packaging of any distilled spirits, of liquor bottles, not marked as required by § 175.34, which, because of their unique or distinctive shape or design and cost to the bottler, are found by the Director, Alcohol and Tobacco Tax Division, not to afford a jeopardy to the revenue.

§ 175.58 *Distinctive liquor bottles for liqueurs and cordials.* Upon application (Form 98) by any bottler, the assistant regional commissioner of the region in which the plant of such bottler is situated may, by the issuance of an appropriate permit, authorize the procurement and use by such bottler of liquor bottles which are found by the Director Alcohol and Tobbaco Tax Division, to be of distinctive shape or design for the packaging of liqueurs, cordials, bitters, cocktails, gin fizzes, and such other specialities as may be specified from time to time by the Director, Alcohol and Tobacco Tax Division, not marked as required by § 175.34.

§ 175.59 *Approval of distinctive liquor bottles.* Application in letter form for the approval of any distinctive liquor bottle, accompanied by a specimen bottle (or an authentic model or other representation acceptable to the Director, Alcohol and Tobacco Tax Division), and 25 photographs thereof, size 5" x 7", shall be submitted to the Director, Alcohol and Tobacco Tax Division. In the case of liquor bottles which the applicant intends to qualify under the provisions of § 175.57, the application shall include a statement of the cost of each such bottle to the bottler. Approval of the distinctive bottle by the Director, Alcohol and Tobacco Tax Division, will be obtained, prior to submission of an application (Form 98) to the assistant regional commissioner. Such application (Form 98) shall specify the number of the bottle assigned by the Director, Alcohol and Tobacco Tax Division.

§ 175.60 *Use of liquor bottles bearing same indicia, by parent company and wholly-owned subsidiaries.* Any bottler authorized to bottle distilled spirits at more than one location may select any one permit symbol and number assigned to him, or to any of his wholly owned subsidiaries, for use by him and at any or all of the premises of his wholly owned subsidiaries at which distilled spirits are bottled. The bottler shall furnish notification of such selection to the assistant regional commissioner of each region where such indicia is to be used. The symbol and number so selected may be used interchangeably with the symbol and number assigned to the particular premises where the bottling is to be conducted. Stocks of liquor bottles bearing such selected indicia may be shipped by the bottle manufacturer direct to the premises of the parent company or to any of its wholly owned subsidiaries and may be transferred between such premises, without obtaining from the assistant regional commissioner a permit authorizing such shipment or transfer; however, bottles bearing any symbol and number assigned to the parent company or to any of its wholly owned subsidiaries, other than those bearing the selected indicia, may not be shipped by the bottle manufacturer, or transferred, to any premises other than those of the bottler to whom the symbol and number were assigned, without first obtaining a permit, on Form 98, from the assistant regional commissioner of the region in which the transferor-permittee is located.

§ 175.61 *Authorized receipt of liquor bottles.* No bottler shall accept shipment or delivery of new liquor bottles except from persons holding permits under the provisions of § 175.30. No bottler shall accept shipment or delivery of used liquor bottles except (a) from the owner or occupant of the premises upon which such bottles may lawfully be emptied, or (b) from storage premises established under the provisions of § 175.64.

§ 175.62 *Use and resale of liquor bottles.* No bottler shall use any liquor bottle except for packaging distilled spirits, or resell any liquor bottle except in connection with the sale of its contents, or divert any liquor bottle from his own use except upon application (Form 98) to and authorization by the assistant regional commissioner, as provided by § 175.111.

§ 175.63 *Reuse of liquor bottles.* The reuse for packaging distilled spirits for sale of liquor bottles is prohibited: *Provided*, That liquor bottles used for packaging domestic distilled spirits may be reused (a) by the bottler whose permit number is blown therein; (b) by the parent company or wholly-owned subsidiary under the provisions of § 175.60; or (c) by the person acquiring stocks of liquor bottles in the possession of a permittee when any permit is suspended, revoked, or surrendered, as authorized by § 175.111; and liquor bottles used for packaging imported distilled spirits may be exported for reuse under the provisions of § 175.101.

§ 175.64 *Storage of liquor bottles.* Each person authorized to bottle distilled spirits, including any parent company that selects one symbol and number to be legibly marked in liquor bottles for use by it and by one or more of its wholly-owned subsidiaries as authorized by § 175.60, shall store new and used liquor bottles bearing the indicia assigned to him in a safe and secure place on the qualified premises: *Provided*, That such person, under permit issued by the assistant regional commissioner of the region pursuant to an application filed on Form 98, may store such liquor bottles off his qualified premises, in a room or warehouse securely constructed and adequately protected. The bottler may store used liquor bottles bearing permit numbers of other authorized bottlers for the purpose of facilitating their return to the respective bottlers. He may also store liquor bottles used for packaging imported distilled spirits for exportation as authorized by § 175.101, and miscellaneous items of equipment and supplies. An importer, under permit issued by the assistant regional commissioner of the region in which the storage place is located, pursuant to an application filed on Form 98, may store liquor bottles used for packaging imported distilled spirits, for exportation as authorized by § 175.101, in a room or warehouse securely constructed and adequately protected. He may also store liquor bottles used for packaging domestic distilled spirits, bearing permit numbers of authorized bottlers, for the purpose of facilitating their return to the respective bottlers. Each such bottler or importer must maintain suitable commercial records covering the receipt, disposition, and stocks of all such liquor bottles. Report of shipment to the bottling premises of used liquor bottles for packaging domestic distilled spirits as prescribed by § 175.71 and notice of receipt as prescribed by § 175.72 are not required.

SUBPART F—REPORTS AND INVENTORIES

SHIPMENT OF LIQUOR BOTTLES

§ 175.70 *Orders for shipment.* Each order for the shipment or delivery of liquor bottles shall show the name of the manufacturer-consignor, the date of the order, the shipping or delivery destination, the name and address of the consignee, the method of forwarding, and the shipment or delivery date requested by the consignee.

§ 175.71 *Report of shipment.* A report showing the name of the manufacturer-consignor, the date of the order, the shipping or delivery destination, the name and address of the consignee, the method of forwarding, the number of packages, and the size, quantity, and description of liquor bottles furnished, shall be forwarded by the manufacturer-consignor with each shipment or delivery.

§ 175.72 *Notice of receipt.* A notice of the receipt of shipment or delivery,

§ 175.13 *Distilled spirits.* Distilled spirits, spirits, alcohol, and alcoholic spirits shall mean:

(a) That substance known as ethyl alcohol, hydrated oxide of ethyl, or spirits of wine, which is commonly produced by the fermentation of grain, starch, molasses, or sugar, including all dilutions and mixtures of this substance, and

(b) Products of rectification, for other than industrial use.

§ 175.14 *Importer.* "Importer" shall mean any person authorized to import distilled spirits into the United States.

§ 175.15 *I. R. C.* "I. R. C." shall mean the Internal Revenue Code of 1954.

§ 175.16 *Kind.* "Kind" shall have the respective meanings given to such term by the "Standards of identity for distilled spirits," set forth in 27 CFR Part 5, and shall be stated in the manner provided in said part.

§ 175.17 *Liquor bottle.* "Liquor bottle" shall mean a container (as defined by § 175.11) made of glass, or earthenware, or other suitable material approved by the Director, Alcohol and Tobacco Tax Division.

§ 175.18 *Permit.* "Permit" shall mean a written authorization signed by the assistant regional commissioner, describing the acts permitted to be performed.

§ 175.19 *Person.* "Person" shall mean and include an individual, a trust, estate, partnership, association, company or corporation.

(68A Stat. 911; 26 U. S. C. 7701)

§ 175.20 *Regional commissioner.* "Regional commissioner" shall mean the regional commissioner in each of the internal revenue regions.

§ 175.21 *United States.* "United States" shall mean the States, the Territories of Alaska and Hawaii, and the District of Columbia.

(68A Stat. 911; 26 U. S. C. 7701)

§ 175.22 *Vintage spirits.* "Vintage spirits" shall mean all imported distilled spirits which are not less than 10 years old and which were bottled prior to August 1, 1934.

SUBPART C—MANUFACTURE AND SALE OF BOTTLES FOR PACKAGING DISTILLED SPIRITS

§ 175.30 *Permit to manufacture.* Any person intending to engage in the manufacture of liquor bottles shall apply on Form 93 to the assistant regional commissioner of the region in which his plant is situated for an appropriate permit authorizing him to engage in such manufacture, and, except as may otherwise be provided in this part, no person may hereafter manufacture, store, ship, consign, or deliver liquor bottles unless in accordance with the terms of such a permit.

§ 175.31 *Changes in plant.* Any person who after the issuance of a permit authorizing him to engage in the manufacture of liquor bottles desires to make major changes in the construction or equipment of his plant, shall file an application on Form 93 with the assistant regional commissioner of the region in which his plant is situated for an appropriate permit authorizing him to make such changes.

§ 175.32 *Storage of liquor bottles by manufacturer.* Any person authorized to manufacture liquor bottles may store such bottles off the premises described on his Form 93 in a room or warehouse, securely constructed and adequately protected, only when so authorized by a permit issued by the assistant regional commissioner of the region in which such storage space is located, pursuant to application Form 98.

§ 175.33 *Persons authorized to receive liquor bottles.* No person may ship, consign, or deliver liquor bottles except to authorized bottlers to whom the assistant regional commissioner, or the Director, Alcohol and Tobacco Tax Division, in the case of States, has assigned an appropriate symbol and number for marking liquor bottles: *Provided*, That liquor bottles may be shipped pursuant to Form 98 by the manufacturer to another person for additional processing, such as coloring or cutting, where legal title and custody to such liquor bottles are retained by the manufacturer until they are delivered to the permittee-user.

§ 175.34 *Indicia for domestic liquor bottles.* There shall be legibly blown, etched, sand-blasted, marked by underglaze coloring, or otherwise permanently marked by any method approved by the Director, Alcohol and Tobacco Tax Division, in either the bottom or the body of each liquor bottle (a) the permit number of the manufacturer, (b) the year of manufacture (which shall be indicated by the last two numerals), and (c) a symbol and number assigned by the assistant regional commissioner, or by the Director, Alcohol and Tobacco Tax Division, in the case of States, to represent the name of the bottler procuring the same; and there shall be similarly marked on the shoulder of each such bottle the words "Federal Law Forbids Sale or Reuse of This Bottle": *Provided*, That liquor bottles which are authorized by the Director, Alcohol and Tobacco Tax Division, under §§ 175.56, 175.57, and 175.58 may be manufactured and shipped, consigned, or delivered, as excepted from the markings required by this section.

SUBPART D—LABELS

§ 175.40 *General.* Liquor bottles shall bear labels showing the brands and marks prescribed by this subpart.

§ 175.41 *Brand name, kind and alcoholic content.* The brand name, kind and alcoholic content of the distilled spirits, by proof, shall be shown on the label, except that the alcoholic content may be stated in percentage, by volume, in the case of liqueurs, cordials, bitters, cocktails, gin fizzes, or other such specialties.

§ 175.42 *Net contents.* The net contents of liquor bottles shall be shown on the label, unless the statement of the net contents is legibly marked, in the manner prescribed in § 175.34, in the bottles.

§ 175.43 *Name and address of bottler.* On labels of domestic distilled spirits, there shall be stated the phrase "Bottled by," immediately followed by the name of the bottler or the trade name under which the spirits are bottled, and the place where such spirits are bottled. If the bottler is the actual bona fide operator of more than one bottling plant engaged in bottling the same brand of distilled spirits, there may be stated immediately following the name (or trade name) of such bottler the addresses of the plants at which such product is bottled: *Provided*, That on labels of whisky and straight whisky there shall be stated the State of distillation of such whisky, if such whisky is not distilled in the State given in the address of the brand label: *Provided further*,

(a) That, where distilled spirits are bottled by or for the distiller thereof, there may be stated, in lieu of the phrase "Bottled by," followed by the bottler's name (or trade name) and address, the phrase "Distilled by," followed by the name (or trade name) under which the particular spirits were distilled, and the address (or addresses) of the distiller;

(b) That, where distilled spirits are bottled by or for the rectifier thereof, there may be stated, in lieu of the phrase "Bottled by," followed by the bottler's name (or trade name) and address, the phrase "Blended by," "Made by," "Prepared by," "Manufactured by," or "Produced by" (whichever may be appropriate to the act of rectification involved), followed by the name (or trade name) under which the distilled spirits were rectified, and the address (or addresses) of the rectifier;

(c) That, on labels of distilled spirits bottled for a retailer or other person who is not the actual distiller or rectifier of such distilled spirits there may also be stated the name and address of such retailer or other person, immediately preceded by the words "Bottled for" or "Distributed by," or other similar statement.

§ 175.44 *Age of whisky not blended or rectified.* If whisky is not blended or rectified, the age thereof shall be shown on the label, but this statement shall not be required as to whisky bottled in bond or foreign or domestic whisky four years or more old.

§ 175.45 *Age of blended or rectified whisky.* If whisky is blended or rectified, the age of the whisky therein and the respective percentage, by volume, of whisky or whiskies and neutral spirits, stated in the manner and form prescribed by 27 CFR Part 5, shall be shown on the label: *Provided*, That this statement shall not be required in the case of blended foreign or domestic whiskies containing no neutral spirits, all of which are four years or more old.

§ 175.46 *Age of brandy.* If brandy is aged for a period of less than two years, the age thereof shall be shown on the label.

§ 175.47 *Coloring matter.* A statement of the percentage, by volume, of coloring matter, if such coloring matter is present in the distilled spirits in excess of 2½ percent by volume, shall be shown on the label, except that this requirement shall not apply to liqueurs, cordials, bitters, cocktails, gin fizzes, or other such specialties.

SUBPART E—USE OF LIQUOR BOTTLES OF DOMESTIC MANUFACTURE FOR PACKAGING DISTILLED SPIRITS

§ 175.55 *General.* Distilled spirits packaged for sale in domestically manufactured containers (as defined by § 175.11) shall be packaged only in liquor bottles which conform to the requirements of this part and to the provisions relating to the size and filling of bottles of 27 CFR Part 5.

§ 175.56 *Distinctive liquor bottles (not costly) for distilled spirits.* Upon application (Form 98) by any bottler, the assistant regional commissioner of the region in which the plant of such bottler is situated may, by the issuance of an appropriate permit, authorize the procurement and use by such bottler of liquor bottles which are found by the Director, Alcohol and Tobacco Tax Division, to be of distinctive shape or design (but not costly of manufacture), and which bear the indicia required by § 175.34 anywhere on the bottle, for the packaging of distilled spirits, including liqueurs, cordials, and specialties.

§ 175.57 *Distinctive liquor bottles (costly).* Upon application (Form 98) by any bottler, the assistant regional commissioner of the region in which the plant is situated may, by the issuance of an appropriate permit, authorize the procurement and use by such bottler, for the packaging of any distilled spirits, of liquor bottles, not marked as required by § 175.34, which, because of their unique or distinctive shape or design and cost to the bottler, are found by the Director, Alcohol and Tobacco Tax Division, not to afford a jeopardy to the revenue.

§ 175.58 *Distinctive liquor bottles for liqueurs and cordials.* Upon application (Form 98) by any bottler, the assistant regional commissioner of the region in which the plant of such bottler is situated may, by the issuance of an appropriate permit, authorize the procurement and use by such bottler of liquor bottles which are found by the Director Alcohol and Tobbaco Tax Division, to be of distinctive shape or design for the packaging of liqueurs, cordials, bitters, cocktails, gin fizzes, and such other specialities as may be specified from time to time by the Director, Alcohol and Tobacco Tax Division, not marked as required by § 175.34.

§ 175.59 *Approval of distinctive liquor bottles.* Application in letter form for the approval of any distinctive liquor bottle, accompanied by a specimen bottle (or an authentic model or other representation acceptable to the Director, Alcohol and Tobacco Tax Division), and 25 photographs thereof, size 5" x 7", shall be submitted to the Director, Alcohol and Tobacco Tax Division. In the case of liquor bottles which the applicant intends to qualify under the provisions of § 175.57, the application shall include a statement of the cost of each such bottle to the bottler. Approval of the distinctive bottle by the Director, Alcohol and Tobacco Tax Division, will be obtained, prior to submission of an application (Form 98) to the assistant regional commissioner. Such application (Form 98) shall specify the number of the bottle assigned by the Director, Alcohol and Tobacco Tax Division.

§ 175.60 *Use of liquor bottles bearing same indicia, by parent company and wholly-owned subsidiaries.* Any bottler authorized to bottle distilled spirits at more than one location may select any one permit symbol and number assigned to him, or to any of his wholly owned subsidiaries, for use by him and at any or all of the premises of his wholly owned subsidiaries at which distilled spirits are bottled. The bottler shall furnish notification of such selection to the assistant regional commissioner of each region where such indicia is to be used. The symbol and number so selected may be used interchangeably with the symbol and number assigned to the particular premises where the bottling is to be conducted. Stocks of liquor bottles bearing such selected indicia may be shipped by the bottle manufacturer direct to the premises of the parent company or to any of its wholly owned subsidiaries and may be transferred between such premises, without obtaining from the assistant regional commissioner a permit authorizing such shipment or transfer; however, bottles bearing any symbol and number assigned to the parent company or to any of its wholly owned subsidiaries, other than those bearing the selected indicia, may not be shipped by the bottle manufacturer, or transferred, to any premises other than those of the bottler to whom the symbol and number were assigned, without first obtaining a permit, on Form 98, from the assistant regional commissioner of the region in which the transferor-permittee is located.

§ 175.61 *Authorized receipt of liquor bottles.* No bottler shall accept shipment or delivery of new liquor bottles except from persons holding permits under the provisions of § 175.30. No bottler shall accept shipment or delivery of used liquor bottles except (a) from the owner or occupant of the premises upon which such bottles may lawfully be emptied, or (b) from storage premises established under the provisions of § 175.64.

§ 175.62 *Use and resale of liquor bottles.* No bottler shall use any liquor bottle except for packaging distilled spirits, or resell any liquor bottle except in connection with the sale of its contents, or divert any liquor bottle from his own use except upon application (Form 98) to and authorization by the assistant regional commissioner, as provided by § 175.111.

§ 175.63 *Reuse of liquor bottles.* The reuse for packaging distilled spirits for sale of liquor bottles is prohibited: *Provided*, That liquor bottles used for packaging domestic distilled spirits may be reused (a) by the bottler whose permit number is blown therein; (b) by the parent company or wholly-owned subsidiary under the provisions of § 175.60; or (c) by the person acquiring stocks of liquor bottles in the possession of a permittee when any permit is suspended, revoked, or surrendered, as authorized by § 175.111; and liquor bottles used for packaging imported distilled spirits may be exported for reuse under the provisions of § 175.101.

§ 175.64 *Storage of liquor bottles.* Each person authorized to bottle distilled spirits, including any parent company that selects one symbol and number to be legibly marked in liquor bottles for use by it and by one or more of its wholly-owned subsidiaries as authorized by § 175.60, shall store new and used liquor bottles bearing the indicia assigned to him in a safe and secure place on the qualified premises: *Provided*, That such person, under permit issued by the assistant regional commissioner of the region pursuant to an application filed on Form 98, may store such liquor bottles off his qualified premises, in a room or warehouse securely constructed and adequately protected. The bottler may store used liquor bottles bearing permit numbers of other authorized bottlers for the purpose of facilitating their return to the respective bottlers. He may also store liquor bottles used for packaging imported distilled spirits for exportation as authorized by § 175.101, and miscellaneous items of equipment and supplies. An importer, under permit issued by the assistant regional commissioner of the region in which the storage place is located, pursuant to an application filed on Form 98, may store liquor bottles used for packaging imported distilled spirits, for exportation as authorized by § 175.101, in a room or warehouse securely constructed and adequately protected. He may also store liquor bottles used for packaging domestic distilled spirits, bearing permit numbers of authorized bottlers, for the purpose of facilitating their return to the respective bottlers. Each such bottler or importer must maintain suitable commercial records covering the receipt, disposition, and stocks of all such liquor bottles. Report of shipment to the bottling premises of used liquor bottles for packaging domestic distilled spirits as prescribed by § 175.71 and notice of receipt as prescribed by § 175.72 are not required.

SUBPART F—REPORTS AND INVENTORIES

SHIPMENT OF LIQUOR BOTTLES

§ 175.70 *Orders for shipment.* Each order for the shipment or delivery of liquor bottles shall show the name of the manufacturer-consignor, the date of the order, the shipping or delivery destination, the name and address of the consignee, the method of forwarding, and the shipment or delivery date requested by the consignee.

§ 175.71 *Report of shipment.* A report showing the name of the manufacturer-consignor, the date of the order, the shipping or delivery destination, the name and address of the consignee, the method of forwarding, the number of packages, and the size, quantity, and description of liquor bottles furnished, shall be forwarded by the manufacturer-consignor with each shipment or delivery.

§ 175.72 *Notice of receipt.* A notice of the receipt of shipment or delivery,

showing the name of the manufacturer-consignor, the date of the order, the date of shipment or delivery, the date of receipt, the method of forwarding, the destination, the number of packages, and the size, quantity, and description of liquor bottles received, shall be forwarded by the consignee to the manufacturer-consignor upon receipt of any shipment or delivery of liquor bottles. A similar notice shall be forwarded by the consignee to the manufacturer-consignor upon the return of any unused liquor bottles.

§ 175.73 *Records of orders for, and reports of shipment and receipt of, liquor bottles.* The person placing the order shall keep in his place of business a copy of each order, the original report of shipment or delivery, and a copy of the notice of receipt of shipment or delivery. The manufacturer-consignor shall keep in his place of business the original order, a copy of the report of shipment or delivery, and the original notice of receipt of the shipment or delivery. Where stocks of liquor bottles bearing the same indicia authorized under § 175.60 are ordered by a parent company for shipment direct to a wholly owned subsidiary, the parent company shall furnish such subsidiary with a copy of the order. Where such bottles are ordered and received by the parent company and subsequently transferred to a wholly owned subsidiary, the parent company shall furnish the subsidiary with a notice of such shipment and the subsidiary company shall furnish the parent company with a notice of the receipt of such bottles. Where such liquor bottles are transferred between the wholly owned subsidiaries, the transferor shall furnish the transferee with a notice of shipment and the transferee shall furnish the transferor with a notice of receipt. The records prescribed by this subpart shall be maintained for a period of two years, available for inspection by internal revenue officers.

REPORTS

§ 175.74 *Requirements.* Each manufacturer, bottler, and importer shall keep such records and furnish such inventories and reports relating to the manufacture, shipment, delivery, purchase, use, or sale of all liquor bottles, as the assistant regional commissioner may from time to time require.

§ 175.75 *Inspection of stocks and records of liquor bottles.* The records required to be kept under the provisions of this subpart, and all stocks of liquor bottles in the hands of manufacturers and bottlers, shall at all times be available for inspection by the assistant regional commissioner and other duly authorized officers of the Internal Revenue Service.

SUBPART G—IMPORTS AND EXPORTS

IMPORTATION OF EMPTY LIQUOR BOTTLES

§ 175.85 *General.* Distilled spirits packaged for sale in imported containers (as defined by § 175.11) shall be packaged only in liquor bottles which conform to the requirements of this part and to the provisions relating to the size and filling of bottles of 27 CFR Part 5.

§ 175.86 *Permit required.* Empty liquor bottles may be imported into the United States only pursuant to a permit issued in accordance with the provisions of §§ 175.87 to 175.90: *Provided,* That, where a permit has been issued covering the importation of liquor bottles through one port of entry, an additional permit for importation of such liquor bottles through another port will not be required if the importer furnishes photographic copies of the original permit to the collector of customs of each such other port and to the assistant regional commissioner (if the permit was not originally issued by him) of the region in which such other part is located.

§ 175.87 *Indicia for empty liquor bottles.* Upon application (Form 98) by any importer or bottler, the assistant regional commissioner of the region in which the applicant is situated may, by the issuance of an appropriate permit, authorize the importation, for the packaging of either domestic or imported distilled spirits, of empty liquor bottles. The assistant regional commissioner issuing the permit will furnish a copy to the assistant regional commissioner of the region in which the port of entry is situated. There shall be legibly blown, etched, sand-blasted, marked by underglaze coloring, or otherwise permanently marked by any method approved by the Director, Alcohol and Tobacco Tax Division, in the shoulder of each such bottle imported under this provision, the words "Federal Law Forbids Sale or Reuse of This Bottle," and either in the bottom or in the body thereof, the name of, and the name of the city or country of address of the manufacturer, and the permit symbol and number of the bottler: *Provided,* That liquor bottles which are authorized by the Director, Alcohol and Tobacco Tax Division, under §§ 175.88 to 175.90 may be imported, as excepted from the markings required by this section.

§ 175.88 *Empty distinctive liquor bottles (not costly) for distilled spirits.* Upon application (Form 98) by any importer or bottler, the assistant regional commissioner of the region in which the applicant is situated may, by the issuance of an appropriate permit, authorize the importation by such applicant of empty liquor bottles which are found by the Director, Alcohol and Tobacco Tax Division, to be of distinctive shape or design (but not costly of manufacture), and which bear the indicia required by § 175.87 anywhere on the bottle, for the packaging of distilled spirits including liqueurs, cordials, and specialties.

§ 175.89 *Empty distinctive liquor bottles (costly).* Upon application (Form 98) by any importers or bottler, the assistant regional commissioner of the region in which the applicant is situated may, by the issuance of an appropriate permit, authorize the importation by such applicant of empty liquor bottles (for the packaging of any distilled spirits), not marked as required by § 175.87, which, because of their unique design and cost to the applicant are found by the Director, Alcohol and Tobacco Tax Division, not to afford a jeopardy to the revenue.

§ 175.90 *Empty distinctive liquor bottles for liqueurs and cordials.* Upon application (Form 98) by any importer or bottler, the assistant regional commissioner of the region in which the applicant is situated may, by the issuance of an appropriate permit, authorize the importation by such applicant of empty liquor bottles which are found by the Director, Alcohol and Tobacco Tax Division, to be of distinctive shape or design for the packaging of liqueurs, cordials, bitters, cocktails, gin fizzes, and such other specialties as may be specified from time to time by the Director, Alcohol and Tobacco Tax Division, not marked as required by § 175.87.

§ 175.91 *Records of orders for, and notices of receipt of, empty liquor bottles.* After the issuance of the permit authorizing the importation of liquor bottles for packaging imported or domestic distilled spirits, the importer or bottler placing the order shall forward a certified copy of the order to the assistant regional commissioner of the region who issued the permit and a copy to the assistant regional commissioner of the region in which the consignee is located. The certified copy of the order shall show the name, and the name of the city and country of address, of the manufacturer abroad, the date of the order, the place from which shipped, the name and address of the consignee, the method of forwarding, the size, quantity, and description of the bottles ordered, and the shipment or delivery date requested by the consignee. Upon receipt by the consignee of any shipment or delivery of such liquor bottles, the importer or bottler placing the order shall forward to each such assistant regional commissioner a notice of the receipt of shipment or delivery, showing the name, and the name of the city and country of address, of the manufacturer abroad, the date of the order, the place from which shipped, the date of receipt, the name and address of the consignee, the method of forwarding, and the size, quantity, and description of the bottles furnished.

IMPORTATION OF FILLED LIQUOR BOTTLES

§ 175.92 *General.* Distilled spirits imported into the United States for sale in containers (as defined by § 175.11) shall be imported only in liquor bottles which conform to the requirements of this part and to the provisions relating to the size and filling of bottles of 27 CFR Part 5.

§ 175.93 *Permit required.* Liquor bottles containing distilled spirits, other than bottles conforming to the provisions of § 175.94, may be imported into the United States only pursuant to a permit issued in accordance with the provisions of §§ 175.95 to 175.98 and § 175.100: *Provided,* That, where a permit has been issued covering the importation of filled liquor bottles through one port of entry, an additional permit for importation of such liquor bottles through another port will not be required if the importer furnishes photographic copies of the original permit to the collector of customs at each such other port and to the assistant regional commissioner (if the permit was not originally issued by him) of the region in which such other port is located.

§ 175.94 *Indicia.* There shall be legibly blown, etched, sand-blasted, marked by underglaze coloring, or otherwise permanently marked by any method approved by the Director, Alcohol and Tobacco Tax Division, either in the bottom or in the body of all liquor bottles containing distilled spirits imported from foreign countries the name, and the name of the city or country of address, of the manufacturer of the spirits, or of the exporter abroad, or the name, and the name of the city of address, of the importer in the United States, and there shall be similarly marked in the shoulder of each such bottle the words "Federal Law Forbids Sale or Reuse of This Bottle," except as provided in §§ 175.95 to 175.98 and § 175.100.

§ 175.95 *Distinctive liquor bottles (not costly) for distilled spirits.* Upon application (Form 98) the assistant regional commissioner of the region in which the port of entry is situated may issue a permit authorizing the importation by such applicant of distilled spirits including liqueurs, cordials, and specialties in liquor bottles which are found by the Director, Alcohol and Tobacco Tax Division, to be of distinctive shape or design (but not costly of manufacture), and which bear the indicia required by § 175.94 anywhere on the bottle.

§ 175.96 *Distinctive liquor bottles (costly).* Upon application (Form 98) the assistant regional commissioner of the region in which the port of entry is situated may issue a permit authorizing the importation of any distilled spirits in liquor bottles not marked as required by § 175.94 which, because of their unique or distinctive shape or design and cost to the importer, are found by the Director, Alcohol and Tobacco Tax Division, not to afford a jeopardy to the revenue.

§ 175.97 *Distinctive liquor bottles for liqueurs and cordials.* Upon application (Form 98) the assitsant regional commissioner of the region in which the port of entry is situated may issue a permit authorizing the importation of liqueurs, cordials, bitters, cocktails, gin fizzes, and such other specialties as may be specified from time to time by the Director, Alcohol and Tobacco Tax Division, in bottles which are found by the Director, Alcohol and Tobacco Tax Division, to be of distinctive shape or design, not marked as required by § 175.94.

§ 175.98 *Vintage spirits.* Upon application (Form 98), the assistant regional commissioner of the region in which the port of entry is situated may issue a permit authorizing the importation, in bottles not marked as provided by § 175.94 of vintage spirits, if accompanied by authenticated certificates of origin establishing such spirits to be as defined in § 175.22.

§ 175.99 *Approval of distinctive liquor bottles.* Approval of distinctive liquor bottles shall be procured in accordance with the procedure prescribed by § 175.59.

§ 175.100 *Liquor bottles denied entry.* Liquor bottles, whether filled or empty, imported in violation of the provisions of this subpart shall be denied entry into the United States: *Provided,* That upon application (Form 98) the assistant regional commissioner of the region in which the port of entry is situated may, in nonrecurring cases, authorize the release from customs custody of distilled spirits in liquor bottles which, through unintentional error, are not marked completely in accordance with the provisions of this part, if the Director, Alcohol and Tobacco Tax Division, finds that such release will not afford a jeopardy to the revenue.

EXPORTS

§ 175.101 *Exports.* Containers in which distilled spirits are to be exported shall not be subject to the indicia requirements of this part and the procurement and use of containers other than liquor bottles for this purpose may be authorized under permit upon application (Form 98) to the assistant regional commissioner of the region in which the bottler is located. The manufacture and exportation of empty liquor bottles for bottling distilled spirits abroad for importation into the United States may be authorized under permit upon application (Form 98) to the assistant regional commissioner of the region in which the bottles are to be manufactured; similarly the exportation of used liquor bottles for reuse by the original bottler abroad for packaging distilled spirits for importation into the United States may be authorized under permit issued by the assistant regional commissioner of the region in which such used bottles are stored, pursuant to an application (Form 98) filed by the importer.

§ 175.102 *Language of indicia.* Wherever in this part the name of any city or country is required to be legibly marked in any bottle, the name may be either in the language of such country or in English.

SUBPART H—PERMITS, REVOCATION PROCEEDINGS

§ 175.105 *Application.* Permits shall be issued only upon application therefor, filed with the assistant regional commissioner in such form and in accordance with such rules as may be prescribed by the Director, Alcohol and Tobacco Tax Division.

§ 175.106 *Investigation.* The assistant regional commissioner shall make such investigation of any application as may be necessary to ascertain any facts required to be taken into account by him in acting thereon.

§ 175.107 *Approval.* If, after considering an application, together with all material facts ascertained by investigation (if any), the assistant regional commissioner is of the opinion that the applicant is entitled to a permit under the law and regulations, the assistant regional commissioner shall issue the permit as applied for.

§ 175.108 *Contemplated disapproval.* If, upon examination of an application for a permit, the assistant regional commissioner has reason to believe that the applicant is not entitled to a permit, he shall institute proceedings for the denial of such application in accordance with the procedure set forth in Part 200 of this chapter, which part is made applicable to such proceedings.

§ 175.109 *Terms and conditions of permit.* Permits shall be conditioned upon compliance with the applicable provisions of this part. All statements, evidence, affidavits and other documents filed in support of an application for a permit shall be considered as a part of the application. Each permit shall specify the authority conveyed and all conditions applicable to its issuance. Unless such permit is limited to a specified quantity of bottles or a specified period of time, it shall continue in effect until suspended, revoked, or voluntarily surrendered.

§ 175.110 *Violation of permit.* If the assistant regional commissioner has reason to believe that the permittee has made any material misrepresentation in his application or has violated, or is violating, any of the provisions of section 5214, I. R. C., the regulations thereunder, or any of the terms or conditions of the permit, he shall institute proceedings for the revocation or suspension of such permit in accordance with the procedure set forth in Part 200 of this chapter, which part is made applicable to such proceedings.

§ 175.111 *Disposition of stocks of liquor bottles.* When the permit of a bottle manufacturer or bottler is suspended, revoked, or surrendered, stocks of liquor bottles on hand or in process may be destroyed or disposed of under permit to a person authorized to receive liquor bottles, in accordance with the directions of the assistant regional commissioner of the region in which the applicant is located. When a bottler permanently discontinues the use of a particular size or type of liquor bottle, the stocks of such liquor bottle on hand may be disposed of under permit to a person authorized to receive liquor bottles in accordance with the directions of the assistant regional commissioner. Applications shall be made on Form 98 by such person for permission to acquire the entire stock, regardless of place of storage or persons or concerns holding title thereto, and submitted to the assistant regional commissioner: *Provided,* That, where it is found that the entire stock cannot be disposed of to one authorized bottler, the assistant regional commissioner may authorize the disposal of such liquor bottles, in lots, by size or type, to more than one bottler if he finds that such authorization will not afford a jeopardy to the revenue. The application on Form 98 shall be supported by a statement filed by the vendor setting forth whether the Form 98 covers his entire stock, or his entire stock of a particular size or type of bottle. If such stocks are not disposed of in ac-

cordance with the directions of the assistant regional commissioner, they shall be seized and forfeited.

SUBPART I—PURCHASE, SALE, AND POSSESSION OF USED LIQUOR BOTTLES

§ 175.120 *Purchase or sale of used liquor bottles.* The purchase or sale of used liquor bottles, except as provided in this part, is prohibited.

§ 175.121 *Reuse of liquor bottles.* No liquor bottle shall be reused for the packaging of distilled spirits for sale, except as provided in § 175.63, nor shall the original contents, or any portion of such original contents, remaining in a liquor bottle be increased by the addition of any substance.

§ 175.122 *Possession of used liquor bottles.* The possession of used liquor bottles by any person other than the person who empties the contents thereof, or the bottler or the importer, as authorized under § 175.64, is prohibited: *Provided*, That this shall not prevent the owner or occupant of any premises upon which such bottles may lawfully be emptied from assembling the same upon such premises (a) for the purpose of destruction or (b) for delivery to a bottler or importer who maintains a storage place for used liquor bottles authorized under § 175.64.

[SEAL] T. COLEMAN ANDREWS,
Commissioner of Internal Revenue.

Approved: April 19, 1955.

M. B. FOLSOM,
Acting Secretary of the Treasury.

[F. R. Doc. 55-3326; Filed, Apr. 22, 1955; 8:46 a. m.]

TITLE 30—MINERAL RESOURCES

Chapter I—Bureau of Mines, Department of the Interior

Subchapter B—Respiratory Protective Apparatus; Tests for Permissibility; Fees

[Bureau of Mines Schedule 14F]

PART 13—GAS MASKS

Part 13 is hereby amended to read as follows:

Preliminary statement. The Bureau of Mines is prepared at its Central Experiment Station, Pittsburgh, Pennsylvania, to conduct tests of gas masks to determine their permissibility.

The authority for conducting such tests and investigations is contained in the act of February 25, 1913 (37 Stat. 681), as amended June 30, 1932 (47 Stat. 410), and in Executive Order No. 6611, February 22, 1934 (30 U. S. C. secs. 3, 5, 7). The act, as so amended, contains the following provision:

> For tests or investigations authorized by the Secretary of the Interior under the provisions of this act, as amended and supplemented, except those performed for the Government of the United States or State governments within the United States, a fee sufficient in each case to compensate the Bureau of Mines for the entire cost of the services rendered shall be charged, according to a schedule prepared by the Director of the Bureau of Mines and approved by the Secretary of the Interior, who shall prescribe rules and regulations under which such tests and investigations may be made. All moneys received from such sources shall be paid into the Treasury to the credit of miscellaneous receipts.

This document, consisting of §§ 13.1 to 13.12 inclusive, is Schedule 14F and supersedes Schedule 14, Procedure for Establishing a List of Permissible Gas Masks, issued May 22, 1919; Supplement to Schedule 14, issued January 6, 1920; Schedule 14A (revision of Schedule 14) issued August 25, 1923; Schedule 14B (Revision of Schedule 14A) issued August 7, 1930; Schedule 14C (revision of Schedule 14B) issued August 20, 1934; Schedule 14D (revision of Schedule 14C) issued May 9, 1935; and Schedule 14E (revision of Schedule 14D) issued December 24, 1941.

Sec.

13.1 Definition of a permissible gas mask.
13.2 Type of gas masks.
13.3 Purpose of testing for permissibility.
13.4 Range of concentrations within which gas masks will be approved.
13.5 Conditions under which gas masks will be tested.
13.6 Requirements for Bureau of Mines approval.
13.7 Changing details of test.
13.8 Notification of approval or disapproval.
13.9 Approval markings.
13.10 Material required for Bureau of Mines record.
13.11 Changes subsequent to approval.
13.12 Withdrawal of approval.

AUTHORITY: §§ 13.1 to 13.12 issued under sec. 5, 36 Stat. 370, as amended, 30 U. S. C. 7. Interpret or apply secs. 2, 3, 36 Stat. 370, as amended, 30 U. S. C. 3, 5.

§ 13.1 *Definition of a permissible gas mask.* (a) A gas mask is permissible for use in air containing limited percentages of certain irrespirable gases and vapors, with or without particulate contaminants (dusts, fumes, mists, fogs, and smokes),[1] if all the materials and details of construction and the chemical and physical properties of the absorbents are the same in all respects as those of the gas masks that meet the requirements and passed the inspection and tests of the Bureau of Mines as hereinafter described.

(b) Bureau of Mines approval applies only to a complete gas mask and not to integral parts thereof.

§ 13.2 *Types of gas masks.* For the purpose of the regulations in this part gas masks are classified as follows:

(a) *Type A.* For protection against acid gases such as chlorine, formic acid, hydrogen chloride, hydrogen cyanide, hydrogen sulfide, phosgene, and sulfur dioxide.

(b) *Type B.* For protection against organic vapors such as acetone, alcohol, aniline, benzene, carbon disulfide, carbon tetrachloride, chloroform, ether, formaldehyde, gasoline and petroleum distillates, toluene, and similar volatile organic compounds.

(c) *Type C.* For protection against ammonia.

(d) *Type D.* For protection against carbon monoxide. In addition to the type designed for regular service, a special self-rescue device will be approved. This special device is to enable the wearer to escape if dangerous concentrations of carbon monoxide should occur, as in a mine fire or explosion.

(e) *Types AB, ABC, etc.* For protection against combinations of gases and vapors as indicated by type letters.

(f) *Types AE, BE, CE, DE, etc.* For protection against the gases and vapors indicated by the first type letter, and dusts, fumes, mists, fogs, and smokes. The type letter E is used to indicate protection against particulate contaminants.

(g) *Type N.* For protection against all of the contaminants listed under the preceding types.

§ 13.3 *Purpose of testing for permissibility.* (a) The Bureau of Mines conducts tests of gas masks for the purpose of determining their permissibility for use in air containing certain gases, vapors, and particulate matter.

(b) This part is for the information and guidance of those who may desire to submit gas masks for approval and also to inform consumers and other interested persons regarding qualities the Bureau believes such devices should have.

§ 13.4 *Range of concentrations within which gas masks will be approved.* (a) The maximum concentration for which approval will be granted is 2 percent of acid gases, 2 percent of organic vapors, 2 percent of carbon monoxide, 3 percent of ammonia, or a total of 2 percent of toxic gases or vapors when more than one is present at a time.

(b) The minimum concentrations for which approval will be granted on a gas mask are as follows: 1 percent of an acid gas for a gas mask designed to protect against a single acid gas, with the exception of hydrocyanic acid gas, which is 2 percent; 2 percent of acid gases for gas masks designed to protect against acid gases in combination with other classes of gases, as in an acid gas and organic vapor mask or a universal gas mask; 2 percent of organic vapors; 2 percent of carbon monoxide; and 3 percent of ammonia. Gas masks approved for these minimum concentrations will afford approved respiratory protection for lower concentrations.

§ 13.5 *Conditions under which gas masks will be tested.*—(a) *Consultation.* Manufacturers or their representatives may visit or communicate with the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pennsylvania, to obtain criticism of proposed designs or to discuss the requirements or regulations in this part in connection with a device to be submitted. No charge is made for this consultation and no written report will be made to the manufacturer.

(b) *Application.* An application for investigation under this part shall be in the form of a letter (in duplicate) addressed to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pennsylvania, which contains: (1) Duplicate descriptions and complete drawings of the device (supplemented by available printed matter); (2) a statement that the device is completely developed and of the design and materials which the applicant believes suitable for a finished marketable device; (3) a statement that the device has been subjected to inspections and tests of the nature described in this part and that it has met these requirements when tested by the applicant or his testing agency; (4) two copies of the results of the applicant's inspection and tests; (5) a statement describing the nature, adequacy, and continuity of control of the quality of the gas mask (see paragraph (e) of this section); (6) a request that the necessary inspections and tests leading to approval be made; and (7) a check, draft, or money order, payable to the United States Bureau of Mines, to cover the fee for inspection and tests. The fee will be placed on special deposit in the Treasury of the United States, pending disposal as hereinafter specified. No gas mask will be accepted for permissibility tests unless it is substantially in the completed form in which it is to be marketed. Application for tests shall be indicative of this understanding by the applicant. One complete specimen of the device for which approval is desired shall be sent to the Central Experiment Station. On receipt of this application, fee, descriptive material, test data, and specimen to be tested, the applicant will be notified by the Bureau of its action on the application, the material required for test, and any additional information or specifications that are deemed necessary.

(c) *Fees for testing gas masks.* (1) The following fees are charged for testing gas masks under this part:

1. Type A—Acid gases, complete mask	$765
2. Type B—Organic vapors, complete mask	410
3. Type C—Ammonia, complete mask	410
4. Type D—Carbon monoxide self-rescuer	390
5. Type AE, BE, etc.—Dusts, fumes, mists, fogs, and smokes in combination with any of the above types. Fee in addition to that required for tests with gases or vapors	175
6. Type AB—Acid gases and organic vapors, complete mask	975
7. Complete mask with canister designed for a single gas or vapor	410
8. Facepiece, complete	60
9. Canister alone, fee for complete mask minus fee for facepiece.	
10. Extension of approval to another gas or vapor, or complete retesting with a gas or vapor in case of failure	350
11. Type N—Universal gas mask for all gases and vapors ordinarily encountered in industry, including filters for dusts, fumes, mists, fogs, and smokes	1,300
12. Additional examination and tests in connection with other tests, per man-day required	30
13. Fees for tests of unusually complicated apparatus or for unusual tests or other tests not included in this list or for portions of tests that may be required for extensions of approval will be based on the actual costs of testing, which shall be determined by the Bureau, and the applicant will be notified of the fee before the tests are begun.	

(2) If a gas mask fails to pass any of the specified tests and the applicant notifies the Bureau to terminate further consideration of the device, the Bureau will return the fee to the applicant, less such portion of the fee as the Bureau determines is sufficient to cover the work done. If the applicant resubmits the gas mask for approval after the necessary improvements have been made, an additional fee will be required. The amount of fee charged will be proportional to the additional tests that must be made and will be specified in writing to the applicant in advance of further testing of the gas mask.

(d) *Drawings and specifications required.* (1) Masks submitted for approval will not be inspected or tested until a complete description and two full sets of drawings showing all the details of construction have been delivered to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pennsylvania. The description of the mask shall include a statement of the chemical composition of the absorbent, which will be kept confidential by the Bureau if so requested in writing by the applicant.

(2) The Bureau of Mines will not be responsible for any disclosure of ideas, principles, or patentable features apparent from visual inspections, because under the terms of the application for tests it is understood that the device is ready for release to public market. Caution will be exercised to prevent disclosure of details of the device to the public during approval testing.

(e) *Chemical control of absorbents.* The capacities of absorbents for gases or vapors may vary over wide limits, depending on the materials used and the conditions under which each lot is manufactured. To maintain the quality of protection equal to that required by this part, each lot of absorbent produced or obtained by a manufacturer must have been adequately sampled and tested for capacity before being used in approved gas masks. Each application for permissibility tests shall be accompanied by a statement showing the nature, adequacy, and continuity of control provided by the applicant. Upon request of the Bureau, the applicant shall grant permission for a representative of the Bureau to inspect the control-test equipment and control-test records and to interview the personnel conducting the control tests. Tests for approval will be made only after the Bureau is satisfied that such control is effective, and approvals once granted will remain in force only while the control is sustained.

(f) *Material required for approval testing.* The number of complete gas masks, canisters, and other parts required will depend on the type and design of the device. After application for tests is received, the applicant will be notified concerning the material that it will be necessary for him to submit. All materials for tests shall be delivered gratis, with transportation charges prepaid by the applicant, to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pennsylvania. The Bureau of Mines may retain as its own property any or all material submitted by the applicant that may be required for record. Material not required for record will be available to the applicant and will be returned at his expense on shipping instructions made in writing to the Central Experiment Station.

(g) *Where investigations will be conducted.* All investigations are conducted at the Bureau of Mines Central Experiment Station, 4800 Forbes Street, Pittsburgh 13, Pennsylvania.

(h) *Date for conducting tests.* Tests will be made in the order of fulfillment of pretest conditions. The applicant will be notified of the date on which tests will be begun. If a device fails to meet any of the requirements it shall lose its order of precedence. Tests will be resumed following completion of other approval work which is in progress at the time both the request and materials for retesting are received. Exceptions may be made only for minor tests and inspections that may be performed simultaneously with other work in the laboratory.

(i) *Observers at formal investigations and demonstrations.* No one shall be present during any part of the formal investigation conducted by the Bureau which leads to approval for permissibility except the necessary Government personnel, representatives of the applicant, and such other persons as may be mutually agreed upon by the applicant and the Bureau. Upon granting approval for permissibility, the Bureau will announce that such approval has been granted to the device and may thereafter conduct, from time to time in its discretion, public demonstrations of the tests conducted on the approved device. Those who attend any part of the investigation, or any public demonstration, shall be present solely as observers; the conduct of the investigation and of any public demonstration shall be controlled wholly by the Bureau's personnel. Results of chemical analyses of material and all information contained in the drawings, specifications, and instructions shall be deemed confidential and their disclosure will be appropriately safeguarded by the Bureau.

§ 13.6 *Requirements for Bureau of Mines approval.* To obtain the approval of the Bureau of Mines a gas mask must pass the following inspection and tests:

(a) *Color and markings.* (1) Distinctive colors and markings to indicate the purpose of each canister are required to safeguard wearers. Table 1 contains a list of the required colors.

(2) All colors used shall be clearly identifiable by the user and clearly distinguishable from one another. The color coating used shall offer a high degree of resistance to chipping, scaling, peeling, blistering, and fading and to the effects of the ordinary atmospheres to which they may be exposed under normal conditions of storage and use.

(b) *Materials.* The gas mask shall be constructed in all of its parts of materials suitable for the purpose they must serve; this applies to the fabric, rubber, metal, chemical, and other parts. All parts (especially rubber) that come into contact with the skin must be of nonirritating composition. All materials used in the construction of facepieces

[1] This part does not provide for the approval of respirators designed for protection against particulate contaminants alone. Such is done by Part 14 of this subchapter.

and breathing tubes shall be of a composition that will withstand repeated disinfection by methods recommended by the applicant and approved by the Bureau of Mines. These approved methods for disinfection shall be described in the instructions for use of the device supplied by the manufacturer.

TABLE 1—COLOR OF GAS MASK CANISTERS

Canister, type letter	Contaminants protected against	Colors[1]
A	Acid gases	White.[2]
A	Hydrocyanic acid gas	White with ½-inch green stripe around the canister near the bottom.
A	Chlorine gas	White with ½-inch yellow stripe around the canister near the bottom.
B	Organic vapors	Black.[2]
C	Ammonia	Green.
D	Carbon monoxide	Blue.
AE, etc	Dusts, fumes, mists, fogs, and smokes in combination with any of the above gases or vapors.	One-half inch contrasting black or white stripe around the canister near the top.
AB	Acid gases and organic vapors	Yellow.
ABC	Acid gases, organic vapors, and ammonia	Brown.
N	All of the above atmospheric contaminants	Red. Filters are included in this canister, but stripes to indicate them are unnecessary.

[1] Grey will not be assigned as the color of any gas mask canister.
[2] Canisters for a single gas or vapor other than ammonia or carbon monoxide shall have a ½-inch colored stripe around the canister near the bottom. The color of the stripe will be assigned.

(c) *Design and construction.* (1) Design, mechanical construction, durability, and workmanship shall be satisfactory from the standpoint of safety of the wearer, freedom of movement, field and clearness of vision, fit of the facepiece, and comfort under all conditions of use. Canisters and other parts of necessarily short life or period of use shall be easily replaceable by new or reconditioned parts, and the tightness of the whole apparatus shall be such as to assure the wearer against leaks of contaminated air both before and after such changes have been made.

(2) The gas mask case shall be made of materials suitable for the purpose and shall be designed so that the mask is properly protected and may be removed from the case readily in an emergency.

(d) *Requirements and tests for facepiece*—(1) *General requirements.* (i) The facepiece shall be so constructed as to assure a quick, gastight fit on persons of widely varying facial shapes and sizes.

(ii) The eyepieces shall be of the nonshatter type and so located as to provide a satisfactory field of vision for persons of widely varying facial shapes and sizes. Air shall enter the facepiece in a manner that will inhibit the accumulation of moisture on the eyepieces.

(iii) The exhalation valve shall be guarded to prevent distortion and injury.

(iv) The elastic headbands shall be adjustable and replaceable.

(2) *Tightness test.* (i) Two men, each wearing a facepiece attached to an ammonia canister and canister harness, will enter air containing 1 percent by volume[3] of ammonia. Ten minutes will be spent in work designed to provide observation on freedom from leaks and freedom of movement and comfort allowed the wearers. The time will be divided as follows:

5 minutes—Walking, turning head, dipping chin.
5 minutes—Pumping air with a hand-operated tire pump into a 1-cubic-foot cylinder to a pressure of 25 pounds per square-inch gage, or equivalent work.

[3] All concentrations given in this part have been calculated on a basis of 25° C. and 760 mm. mercury pressure.

(ii) To meet the requirements of this test no ammonia shall be detected in the air breathed, and undue encumbrance and discomfort shall not be experienced because of the fit or other features of the gas mask.

(e) *Requirements and tests for breathing tube.* The flexible rubber breathing tube shall extend from the facepiece to the canister connection. The tube shall permit free head movement and shall not close off by kinking or by chin or arm pressure, or unduly disturb the wearer.

(f) *Requirements and tests for canister harness.* The canister harness shall be constructed so that it will hold the canister securely and comfortably in place against the body of the wearer. It shall permit canisters to be replaced readily, and shall provide for holding the facepiece in the "ready" position when the facepiece is not being used.

(g) *Requirements and tests for canister*—(1) *Resistance to air flow.* Resistance of the canisters to air flowing at a rate of 85 liters (3 cubic feet) per minute before and after the following machine tests shall not exceed 3 inches (3.25 for Type N or canisters with special mechanical filters) of water-column height at any time.

(2) *Machine tests.* Canisters separated from the facepiece and harness shall meet the requirements of the machine tests as set forth in the following sections. These tests are made on an apparatus constructed to allow the test atmosphere to enter the canister continuously at predetermined concentrations and rates of flow and that has means for determining the life of the canisters.

(i) *Low-concentration and low-rate-of-flow tests.* (a) Tests are made on canisters against low concentrations and at low rates of flow of the appropriate gases or vapors to determine primarily the chemical characteristics of the canisters.

(b) Table 2 lists the conditions for the low-concentration and low-rate-of-flow tests.

(ii) *Chemical stability.* (a) To determine the chemical stability of the canister under dry and moist conditions, four canisters (for each type of gas) will be treated as follows:

(1) Two canisters will be individually equilibrated at room temperature[3] by passing through them carbon dioxide-free air of 25 percent relative humidity at a rate of 64 liters per minute for 6 hours.

(2) Two canisters will be individually equilibrated at room temperature by passing through them carbon dioxide-free air of 85 percent relative humidity at a rate of 64 liters per minute for 6 hours.

(3) After equilibration, these canisters will be tested within 18 hours against gases or vapors as described in subdivision (i) of this subparagraph. If not tested immediately, the canisters will be resealed and kept in an upright position at room temperature. The gases or vapors against which the equilibrated canisters will be tested are as follows:

Acid gas canister: Chlorine or specific acid gas for which approval is requested.

TABLE 2—LOW CONCENTRATION AND LOW-RATE-OF-FLOW TESTS

[Relative humidity of test atmosphere: 50±5 percent. Temperature: Room temperature (approximately 25° C.). Rate of air flow: 32 liters per minute continuous flow. Number of canisters: 3 for each test atmosphere.]

Type of canister and gas or vapor	Concentration, percent	Maximum leakage allowed	Minimum life, minutes[1]
A:			
Chlorine	0.5	5 p. p. m.	[2] 88
Hydrogen cyanide	.5	5 p. p. m.	88
Sulfur dioxide	.5	5 p. p. m.	[2] 88
B:			
Carbon tetrachloride.	.5	5 p. p. m.	96
C:			
Ammonia	2.0	100 p. p. m.	36
D:			
For regular service—Carbon monoxide.	1.0	Total: 770 cc.[3]	240
	.5	Total: 770 cc.[3 4]	60
For self-rescue—Carbon monoxide.	1.0	Total: 770 cc.[3]	60
	.5	Total: 770 cc.[3 4]	30
AB, AC, BC, ABC.			(5)
N:			
Chlorine	.5	5 p. p. m.	44
Hydrogen cyanide	.5	5 p. p. m.	44
Sulfur dioxide	.5	5 p. p. m.	44
Carbon tetrachloride.	.5	5 p. p. m.	48
Ammonia	2.0	100 p. p. m.	18
Carbon monoxide	1.0	Total: 770 cc.[3]	240
	.5	Total: 770 cc.[3 4]	60

[1] Tests should be continued until maximum allowable leakage occurs.
[2] This value is for canisters on which approval for the maximum permissible concentration is desired. It should be reduced proportionately for canisters on which approval for a lower concentration is desired. For example, the minimum life would be 44 minutes for canisters on which approval for a concentration of 1 percent is desired.
[3] This represents total carbon monoxide leakage for entire minimum life period shown in next column. In terms of concentration it is equivalent to a uniform flow of 0.04 percent carbon monoxide for 1 hour at 32 liters per minute. Maximum leakage shall not exceed 1,000 p. p. m.
[4] This test is made to determine the activity of the catalyst, which effects the oxidation of carbon monoxide to carbon dioxide, under the adverse condition of a low temperature. The canister and a precooling coil for the entering test atmosphere are immersed in an ice-water bath. The relative humidity of the test atmosphere is 100 percent at 0° C.
[5] These combination gas canisters must meet the life requirements for each type of contaminant against which they are designed to protect.

Organic vapor canister: Carbon Tetrachloride.
Ammonia canister: Ammonia.

[3] For uniformity of test conditions, this temperature should be between 23° and 27° C.

Carbon monoxide canister: No test.
Combination gas canister, types AB, AC, BC, or ABC: Two or more of the above gases or vapors.

(4) To meet the requirements of these chemical-stability tests, the life of each canister shall be at least one-half of the minimum life requirement as given in Table 2 of this subdivision.

(b) (1) In canisters designed to protect against carbon monoxide as one of a combination of gases or vapors, the life of a canister for protection against carbon monoxide is directly related to the ability of the drying agent or agents in the canister to remove water vapor from the air passed through it. Such containers should contain enough drying agent to protect the catalyst adequately from water vapor during a 2-hour period of use. Hence, air of 85 percent relative humidity will be passed through two of the canisters individually at a rate of 25 liters per minute for 2 hours. They will be allowed to cool to room temperature and then will be tested within 18 hours against carbon monoxide as described in subdivision (iii) of this subparagraph.

(2) To meet the requirements of this test, the life of each canister shall be at least 15 minutes to a leakage of 770 cc. of carbon monoxide, and during this period leakage shall not exceed 1,500 p. p. m. of carbon monoxide at any time.

(iii) *High-concentration and high-rate-of-flow tests.* (a) Tests are made on the canister at high concentrations and high rates of flow of the appropriate gases or vapors as a measure of the protection afforded the wearer in high concentrations of these gases or vapors at high rates of breathing. The minimum life requirements of these tests has been chosen so that canisters that meet the requirements should meet the life requirements of the man tests.

(b) Table 3 lists the conditions for the high-concentration and high-rate-of-flow tests.

(iv) *Tests on filters for protection against particulate matter.* (a) Gas-mask canisters containing filters for protection against dust, fumes, mists, fogs, and smokes in combination with gases or vapors will be tested to determine the adequacy of the protection afforded in emergencies. No canister will be tested under the regulations in this part for use in dusts, fumes, mists, fogs, and smokes alone. All filters designed for this purpose will be tested under Part 14 of this subchapter.

(b) Three canisters containing the filters will be tested as follows: Air containing specially prepared tobacco smoke[4] will be admitted to the canister at a rate of 85 liters per minute. The minimum filtering efficiency shall be 50 percent. Efficiency will be determined during the first 5 (approximately) minutes of test.

(3) *Indicator for service-life of canister.* Gas masks for protection against carbon monoxide must have a suitable means of indicating when the protection afforded by the canister against carbon monoxide has ended. Tests of such indicators will be arranged by the Bureau to suit the particular case. This requirement does not pertain to the self-rescue devices.

(h) *Requirements and tests for complete gas masks*—(1) *Check valve.* The gas mask shall have a check valve which will prevent exhaled air from entering the canister.

TABLE 3—HIGH-CONCENTRATION AND HIGH-RATE-OF-FLOW TESTS

[Relative humidity of test atmosphere: 50±5 percent. Temperature: Room temperature (approximately 25° C.). Concentration of gas or vapor: Concentration for which approval is requested.[1] Rate of air flow: 64 liters per minute, continuous flow. Number of canisters: 2 for each test atmosphere]

Type of canister and gas or vapor	Maximum approval concentration, percent	Maximum leakage allowed	Minimum life, minutes
A:			
Chlorine	2.0	5 p. p. m.	11
Hydrogen cyanide	2.0	5 p. p. m.	11
Phosgene	2.0	5 p. p. m.	11
Sulfur dioxide	2.0	5 p. p. m.	11
B:			
Carbon tetrachloride.	2.0	5 p. p. m.	12
C:			
Ammonia	3.0	100 p. p. m.	12
D:			
For regular service—Carbon monoxide.	2.0	Total 770 cc.[2]	15
For self-rescue—Carbon monoxide.			No test
AB, AC, BC, ABC.			(3)
N:			
Chlorine	2.0	5 p. p. m.	5.5
Hydrogen cyanide	2.0	5 p. p. m.	5.5
Phosgene	2.0	5 p. p. m.	5.5
Sulfur dioxide	2.0	5 p. p. m.	5.5
Carbon tetrachloride.	2.0	5 p. p. m.	6
Ammonia	3.0	100 p. p. m.	6
Carbon monoxide	2.0	Total 770 cc.[2]	15

[1] See § 13.4.
[2] Maximum leakage shall not exceed 1,000 p. p. m.
[3] These combination gas canisters must meet the life requirements for each type of contaminant against which they are designed to protect.

(2) *Resistance to air flow.* The maximum resistance requirements of the complete gas mask, including facepiece, breathing tube, timer (if part of the gas mask), and canister, to a continuous flow of air at a rate of 85 liters per minute are as follows: Inhalation, 3.5 inches of water (3.75 for Type N or those with canisters with special mechanical filters); exhalation, 1.25 inches of water.

(3) *Man tests.* The final criterion for judging a gas mask for approval will be the protection afforded by the complete gas mask when worn by men.

(i) *Gases and vapors.* (a) The complete gas mask will be tested against each of the gases or vapors at the concentrations for which approval is requested, within the limits imposed by paragraphs (a) and (b) of § 13.4. Self-rescue devices for protection against carbon monoxide will be tested against 1 percent of carbon monoxide. These tests will be made in duplicate, starting with unused canisters for testing against each gas or vapor. If the test atmosphere does not cause marked discomfort through irritation of the skin or poisoning by absorption through the skin, as by hydrocyanic acid gas,[6] two men will wear the complete masks in the test atmosphere. Otherwise the men will wear the mask for 2 minutes (1 minute in hydrocyanic acid gas) in the test atmosphere; and immediately following this the test will be continued with the canister of the mask attached to a source of the test atmosphere, so that the men are in uncontaminated air.

(b) During these tests the men will perform the schedule of exercise listed in table 4 below.

(c) The average breathing rate of each man while wearing the gas mask and performing the above schedule of exercise will be about 25 liters per minute.

TABLE 4—SCHEDULE OF EXERCISE FOR MAN TESTS

Schedule	Time, minutes			
	Type N			All other types
	Carbon monoxide	Organic vapors	Acid gases and ammonia	
Walking vigorously	5	5	5	5
Sitting at rest	5	5	5	5
Stationary running and calisthenic arm movements	10	5	5	10
Sitting at rest	5	5	-------	5
Pumping air with a hand-operated tire pump into a 1-cubic foot cylinder to a pressure of 25 lb./sq. in. gage, or equivalent work	5	5	-------	5

(d) To meet the requirements of this test the gas masks shall give complete respiratory protection to wearers for 30 minutes for all types except Type N, which shall give complete respiratory protection against carbon monoxide for 30 minutes, organic vapors for 25 minutes, acid gases for 15 minutes, and ammonia for 15 minutes. Excessive fogging of the eyepieces must not occur, and undue discomfort must not be experienced because of fit or other physical or mechanical features of the gas mask.

(ii) *Particulate matter.* Gas masks designed for protection against dusts, fumes, mists, fogs, and smokes will be tested by two men wearing them under the conditions set forth below:

(a) *Cotton smoke.* (1) Two men will wear the gas masks for 10 minutes in a room of about 1,000 cubic feet capacity filled with the smoke from the smudge-burning of 1 pound of cotton waste.

(2) To meet the requirements of this test, the gas masks must afford such protection to the wearers that they will experience no ill effects, such as discomforting irritation of the eyes or respiratory system during or after the test period.

(b) *Tin tetrachloride.* (1) Two men will wear the gas masks for 20 minutes with the canister connected to a room of about 1,000 cubic feet capacity in which

[4] Katz, S. H., Smith, G. W., and Meiter, E. G., Dust Respirators, Their Construction and Filtering Efficiency: Bureau of Mines Tech. Paper 394, 1926, 52 pp.

[6] With 2 percent of hydrocyanic acid gas in the air, absorption of the gas through the skin is rapid enough so that poisoning may occur after 3 minutes' exposure; 1 percent may be dangerous after 10 minutes; 0.5 percent may produce symptoms after 30 minutes.

is an atmosphere prepared by vaporizing enough tin tetrachloride to give a calculated concentration of 500 p. p. m. by volume of tin tetrachloride in the air. (Vaporized tin tetrachloride hydrolyses rapidly in moist air to form hydrogen chloride and a dense cloud of stannic hydroxide.)

(2) To meet the requirements of this test, the gas masks must afford such protection to the wearers that they will experience no ill effects, such as discomforting irritation of the eyes or respiratory system, during or after the test period.

§ 13.7 *Changing details of tests.* If it is advisable to omit any of the tests or part of a test previously described or to perform accessory tests, the Bureau may modify the test in such manner as to obtain substantially the same information and degree of safety as is provided by the tests described. The applicant will be notified of any changes that may be necessary.

§ 13.8 *Notification of approval or disapproval.* (a) After the Bureau has considered the results of the inspection and tests, a formal written notification of approval or disapproval of the gas mask will be supplied to the applicant by the Bureau. If the device meets all requirements of this part, the notification will not be accompanied by test data or detailed results of tests. If the device fails to meet any of the requirements of this part, notification of such failure will be accompanied by details of the failure with a view to possible remedy of the defect or defects in gas masks submitted in the future. Otherwise, results of tests of gas masks that fail to meet the requirements will not be made public by the Bureau.

(b) No verbal reports of the Bureau's decisions concerning the investigations will be given, and no informal approvals will be granted.

§ 13.9 *Approval markings.* (a) With formal notification of approval the applicant will receive photographs of designs of the official approval labels, one for the complete gas mask and one for the canister. These labels will bear the seal of the Bureau of Mines and be inscribed substantially as follows:

Permissible gas mask or permissible canister for ----------
(Name of atmospheric contaminant)
U. S. Bureau of Mines Approval No. --------
Issued to ----------
(Name of manufacturer)
Approved for respiratory protection in atmospheres containing not more than ---- percent by volume of ----------
----
(Name of atmospheric contaminant)

(b) Appropriate instruction and caution statements on the use and limitations of the gas mask will be included in these labels.

(c) One label shall be reproduced on the outside of the container of the gas mask. It shall be attached securely and, if a paper label is used, be waterproofed.

(d) The approval label for the canisters shall be suitably reproduced on each canister. If a paper label is used it must be attached to the canister with heat-proofed cement. Should the approval label for the canister not be plainly visible when the latter is attached to the canister harness, it may be necessary to attach a similar label to the canister harness.

(e) The main parts of the gas mask, such as the facepiece, canister harness, and canister, shall be marked by stamping, stenciling, or labeling in a legible and permanent manner with the appropriate approval number in letters and figures at least ⅛ inch high placed in a position plainly visible.

(f) Full-scale designs or reproductions of approval labels and markings and a sketch or description of their position shall be submitted to the Central Experiment Station for approval before final adoption.

(g) Permission to place the Bureau's marks of approval on his gas mask obligates a manufacturer to maintain the quality of his product and to have each mask, and all parts thereof, strictly according to the drawings and records that have been accepted by the Bureau for that mask and are in the Bureau's files. Gas masks that exhibit changes in design or include parts that have not been approved for use with the gas mask are not permissible gas masks and must not bear the Bureau's approval label.

§ 13.10 *Material required for Bureau of Mines record.* In order that the Bureau may know exactly what it has tested and approved, detailed records of each investigation are kept. These include drawings and actual equipment, as follows:

(a) *Drawings and specifications.* Drawings and specifications submitted with application for tests and final drawings and specifications that the applicant must submit to the Bureau before approval is granted to show the details of the gas mask as approved, will be retained by the Bureau. The company receiving the approval shall keep an exact duplicate of the set of drawings and specifications that are in the Bureau's records. These are to be adhered to in commercial production of the approved device.

(b) *Actual equipment.* (1) Parts of the gas mask or a complete mask used in the tests may be retained by the Bureau as a permanent record of the investigation and of the mask submitted. Material not required for record will be returned to the applicant at his expense on written shipping instructions to the Central Experiment Station.

(2) If the gas mask is approved, the applicant shall deliver to the Central Experiment Station, gratis, one complete gas mask in the form in which it is to be sold, to serve as a record of the commercial product.

§ 13.11 *Changes subsequent to approval.* All approvals are granted with the understanding that the manufacturer will make his gas mask according to final drawings and specifications submitted to the Bureau. Therefore, before making any change in an approved gas mask the manufacturer shall first obtain the Bureau's approval of the change. This procedure is as follows:

(a) The manufacturer shall write to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pennsylvania, requesting an extension of his original approval and stating the change or changes desired. He shall send two sets of revised drawings and specifications showing the changes in detail, and one each of the gas mask parts affected to the Central Experiment Station.

(b) The Bureau will consider the application and inspect the drawings and parts to determine whether it will be necessary to make tests.

(c) If tests are unnecessary, the applicant will be advised formally by the Bureau of the approval or disapproval of the change.

(d) If tests are necessary, the applicant will be advised of the fee and material required.

§ 13.12 *Withdrawal of approval.* The Bureau reserves the right to rescind for cause any approval granted under the regulations of this part.

CLARENCE A. DAVIS,
Acting Secretary of the Interior.

APRIL 18, 1955.

[F. R. Doc. 55-3319; Filed, Apr. 22, 1955; 8:45 a. m.]

[Bureau of Mines Schedule 23A]

PART 14a—NONEMERGENCY GAS RESPIRATORS (CHEMICAL CARTRIDGE RESPIRATORS)

Part 14a is hereby amended to read as follows:

Preliminary statement. This Part 14a does not provide for the approval of respirators designed for protection against particulate contaminants alone. That is done by Part 14, entitled "Filter-type Dust, Fume, and Mist Respirators," of this Subchapter B.

The purpose of investigations under this Part 14a is to provide a list of nonemergency gas respirators that meet the Bureau's requirements for safety, efficiency, and durability in their fields of industrial use.

Lists of permissible nonemergency gas respirators will be published from time to time for the guidance of consumers.

The authority for conducting such tests and investigations is contained in the act of February 25, 1913 (37 Stat. 681), as amended June 30, 1932 (47 Stat. 410), and in Executive Order No. 6611, February 22, 1934 (30 U. S. C. secs. 3, 5, 7). The act, as so amended, contains the following provision:

For tests or investigations authorized by the Secretary of the Interior under the provisions of this act, as amended and supplemented, except those performed for the Government of the United States or State governments within the United States, a fee sufficient in each case to compensate the Bureau of Mines for the entire cost of the services rendered shall be charged, according to a schedule prepared by the Director of the Bureau of Mines and approved by the Secretary of the Interior, who shall prescribe rules and regulations under which such tests and investigations may be made. All moneys received from such sources shall be paid into the Treasury to the credit of miscellaneous receipts.

This document, consisting of §§ 14a.1 to 14a.12, inclusive, is Schedule 23A and supersedes Schedule 23 issued on November 13, 1944.

Sec.
14a.1 Definition of a permissible nonemergency gas respirator (chemical cartridge respirator).
14a.2 Types of nonemergency gas respirators.
14a.3 Purpose of testing for permissibility.
14a.4 Maximum concentration for which Type B or BE nonemergency gas respirators will be tested.
14a.5 Conditions under which nonemergency gas respirators will be tested.
14a.6 Requirements for Bureau of Mines approval.
14a.7 Changing details of test.
14a.8 Notification of approval or disapproval.
14a.9 Approval markings.
14a.10 Material required for Bureau of Mines record.
14a.11 Changes subsequent to approval.
14a.12 Withdrawal of approval.

AUTHORITY: §§ 14a.1 to 14a.12 issued under sec. 5, 36 Stat. 370, as amended, 30 U. S. C. 7. Interpret or apply secs. 2, 3, 36 Stat. 370, as amended, 30 U. S. C. 3, 5.

§ 14a.1 *Definition of a permissible nonemergency gas respirator (chemical cartridge respirator).* (a) A nonemergency gas respirator (chemical cartridge respirator) is a device designed to give respiratory protection against atmospheres which are not immediately dangerous to life but which may produce discomfort, a chronic type of infection or poisoning after repeated exposure, or mild or acute symptoms after a prolonged exposure.

(b) A nonemergency gas respirator is permissible if all the materials and details of construction and the chemical and physical properties of the absorbents are the same in all respects as those of the nonemergency gas respirators that meet the requirements and pass the inspection and tests of the Bureau of Mines as hereinafter described.

(c) Bureau of Mines approval applies only to a complete nonemergency gas respirator and not to integral parts thereof.

§ 14a.2 *Types of nonemergency gas respirators.* (a) Although there are various types of nonemergency gas respirators available, this part is limited at the present time to those designed to protect against organic vapors or organic vapors and dusts, fumes, and mists. Consideration will be given to the other types at a future date. It is proposed to classify the various types of nonemergency gas respirators in a manner analogous to that used for similar types of gas masks.

(b) The two types considered in this part are:

Type B. For protection against organic vapors such as acetone, alcohol, benzene, carbon tetrachloride, ether, formaldehyde, gasoline and petroleum distillates, and toluene.

Type BE. For protection against organic vapors, and dusts, fumes, and mists. The type letter E is used to indicate protection against particulate contaminants.

§ 14a.3 *Purpose of testing for permissibility.* (a) The Bureau of Mines conducts tests of nonemergency gas respirators for the purpose of determining their permissibility for use in air containing limited concentrations of organic vapors with or without particulate contaminants (dusts, fumes, and mists).

(b) This part is for the information and guidance of those who may desire to submit nonemergency gas respirators for approval and also to inform consumers and other interested persons regarding qualities the Bureau believes such devices should have.

§ 14a.4 *Maximum concentration for which Type B or BE nonemergency gas respirators will be approved.* Type B and BE nonemergency gas respirators will be approved for protection against atmospheres containing not more than 0.1 percent by volume (1,000 parts per million (p. p. m.)) of organic vapors.

§ 14a.5 *Conditions under which nonemergency gas respirators will be tested*—(a) *Consultation.* Manufacturers or their representatives may visit or communicate with the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pennsylvania, to obtain criticisms of proposed designs or to discuss the requirements of this part in connection with a device to be submitted. No charge is made for this consultation and no written report will be made to the manufacturer.

(b) *Application.* An application for investigation under this part shall be in the form of a letter (in duplicate) addressed to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pennsylvania, which contains: (1) Duplicate description and complete drawings of the device (supplemented by available printed matter); (2) a statement that the device is completely developed and of the design and materials which the applicant believes suitable for a finished marketable device; (3) a statement that the device has been subjected to inspections and tests of the nature described in this part and that it has met these requirements when tested by the applicant or his testing agency; (4) two copies of the results of the applicant's inspection and tests; (5) a statement describing the nature, adequacy, and continuity of control of the quality of the respirator (see paragraph (e) of this section); (6) a request that the necessary inspections and tests leading to approval be made; and (7) a check, draft, or money order, payable to the United States Bureau of Mines, to cover the fee for inspection and tests. The fee will be placed on special deposit in the Treasury of the United States, pending disposal as hereinafter specified. No nonemergency gas respirator will be accepted for permissibility tests unless it is substantially in the completed form in which it is to be marked. Application for tests shall be indicative of this understanding by the applicant. One complete specimen of the device for which approval is desired shall be sent to the Central Experiment Station. On receipt of this application, fee, descriptive material, test data, and specimen to be tested, the applicant will be notified by the Bureau of its action on the application, the material required for test, and any additional information or specifications that are deemed necessary.

(c) *Fees for testing nonemergency gas respirators.* (1) The following fees are charged for testing nonemergency gas respirators under this part:

1. Type B—Organic vapors, complete respirator	$390
2. Type BE—Dusts, fumes, or mists in combination with organic vapors. Fee in addition to that required for Type B:	
(i) Pneumoconiosis-producing and nuisance dusts	90
(ii) Toxic dusts	105
(iii) Dusts	125
(iv) Fumes	125
(v) Silica mist	105
(vi) Chromic acid mist	145
3. Facepiece	40
4. Cartridge alone, fee for complete respirator minus fees for facepiece.	
5. Additional examination and tests of respirator in connection with other tests, per man-day required	30
6. Fees for tests of unusually complicated apparatus or for unusual tests or other tests not included in this list or for portions of tests that may be required for extensions of approval will be based on the actual costs of testing, which shall be determined by the Bureau, and the applicant will be notified of the fee before the tests are begun.	

(2) If a respirator fails to pass any of the specified tests and the applicant notifies the Bureau to terminate consideration of the device, the Bureau will return the fee to the applicant, less such portion of the fee as the Bureau determines is sufficient to cover the work. If the applicant resubmits the respirator for approval after the necessary improvements have been made, an additional fee will be required. The amount of fee charged will be proportional to the additional tests that must be made and will be specified in writing to the applicant in advance of resubmission of the respirator.

(d) *Drawings and specifications required.* (1) Respirators submitted for approval will not be inspected or tested until a complete description and two full sets of drawings showing all the details of construction have been delivered to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pennsylvania. The description of the respirator shall include a statement of the chemical composition of the absorbent.

(2) The Bureau of Mines will not be responsible for any disclosure of ideas, principles, or patentable features apparent from visual inspections, because under the terms of the application for tests it is understood that the device is ready for release to public market. Caution will be exercised to prevent disclosure of details of the device to the public during approval testing.

(e) *Statement concerning chemical control of absorbents.* The capacities of absorbents for gases or vapors may vary

over wide limits, depending on the materials used and the conditions under which each lot is manufactured. To maintain the quality of protection equal to that required by this part, each lot of absorbent produced or obtained by a manufacturer must have been adequately sampled and tested for capacity before being used in approved nonemergency gas respirators. Each application for permissibility tests shall be accompanied by a statement showing the nature, adequacy, and continuity of control provided by the applicant. Upon request of the Bureau, the applicant shall grant permission for a representative of the Bureau to inspect the control-test equipment and control-test records and to interview the personnel conducting the control tests. Tests for approval will be made only after the Bureau is satisfied that such control is effective, and approvals once granted will remain in force only while the control is sustained.

(f) *Material required for approval testing.* The number of complete nonemergency gas respirators, cartridges, and other parts required will depend on the type and design of the device. After application for tests is received, the applicant will be notified concerning the material that it will be necessary for him to submit. All materials for test shall be delivered gratis, with transportation charges prepaid by the applicant, to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pennsylvania. The Bureau of Mines may retain as its own property any or all material submitted by the applicant that may be required for record. Material not required for record will be available to the applicant and will be returned at his expense on shipping instructions made in writing to the Central Experiment Station.

(g) *Where investigations will be conducted.* All investigations are conducted at the Bureau of Mines Central Experiment Station, 4800 Forbes Street, Pittsburgh 13, Pennsylvania.

(h) *Date for conducting tests.* Tests will be made in the order of fulfillment of pre-test conditions. The applicant will be notified of the date on which tests will be begun. If a device fails to meet any of the requirements, it shall lose its order of precedence. Tests will be resumed following completion of other approval work which is in progress at the time both the request and materials for retesting are received. Exceptions may be made only for minor tests and inspections that may be performed simultaneously with other work in the laboratory.

(i) *Observers at formal investigations and demonstrations.* No one shall be present during any part of the formal investigation conducted by the Bureau which leads to approval for permissibility except the necessary Government personnel, representatives of the applicant, and such other persons as may be mutually agreed upon by the applicant and the Bureau. Upon granting approval for permissibility, the Bureau will announce that such approval has been granted to the device and may thereafter conduct, from time to time in its discretion, public demonstrations of the tests conducted on the approved device. Those who attend any part of the investigation, or any public demonstration, shall be present solely as observers; the conduct of the investigation and of any public demonstration shall be controlled wholly by the Bureau's personnel. Results of chemical analyses of material and all information contained in the drawings, specifications, and instructions shall be deemed confidential and their disclosure will be appropriately safeguarded by the Bureau.

§ 14a.6 *Requirements for Bureau of Mines approval.* To obtain the approval of the Bureau of Mines, a Type B or BE nonemergency gas respirator must pass the following inspection and tests:

(a) *Color and markings.* (1) The predominating color of Type B cartridge shall be black, in accordance with the color code adopted for gas-mask canisters, to indicate that it affords protection against organic vapors only.

(2) If the cartridge is designed to protect against dusts, fumes, and mists, in addition to organic vapors, a white stripe shall be placed conspicuously on the cartridge to indicate the presence of a special filter. If the filter is not an integral part of the cartridge, the cartridge shall not be marked with a white stripe.

(b) *Materials.* The respirator shall be constructed in all its parts of materials suitable for the purpose they must serve; this applies to the fabric, rubber, metal, chemical, and other parts. All parts (especially rubber) that come into contact with the skin must be of nonirritating composition. All materials used in the construction of facepieces shall be of a composition that will withstand repeated disinfection by methods recommended by the applicant and accepted by the Bureau of Mines. These accepted methods for disinfection shall be described in the instructions for use of the device supplied by the manufacturer.

(c) *Design and construction.* Design, mechanical construction, durability, and workmanship shall be satisfactory from the standpoint of safety of the wearer, freedom and movement, field clearness of vision, fit of the facepiece, and comfort under all conditions of use. Cartridges and other parts of necessarily short life or period of use shall be easily replaceable, and the tightness of the whole apparatus shall be such as to assure the wearer against leaks of contaminated air after such changes have been made.

(d) *Requirements and tests*—(1) *Facepiece*—(i) *General requirements.* (a) The facepiece may be either the half-mask or the mouthpiece type and shall be so constructed as to assure a quick, gas-tight fit on persons of widely varying facial shapes and sizes. Half-mask facepieces must not interfere with the use of goggles. Mouthpiece types must have a means of preventing nasal inhalation.

(b) An inhalation check valve (or valves) shall be provided to prevent exhaled air from coming in contact with the absorbent or the mechanical filter. An exhalation valve shall also be provided.

(c) The elastic head bands shall be adjustable and replaceable.

(ii) *Tightness test.* (a) Two men, each wearing a complete nonemergency gas respirator for protection against organic vapors, will enter air containing 0.01 percent by volume [1] (100 p. p. m.) of isoamyl acetate vapor. Ten minutes will be spent in work designed to provide observation on freedom from leaks and freedom of movement and comfort allowed the wearers. The time will be divided as follows:

5 minutes----	Walking, moving head from side to side, nodding, and bending the body at the waist.
5 minutes----	Pumping air with a hand-operated tire pump into a 1-cubic-foot cylinder to a pressure of 25 pounds per square inch gage, or equivalent work.

(b) To meet the requirements of this test no isoamyl acetate shall be detected in the air breathed, and undue encumbrance and discomfort shall not be experienced because of the fit or other features of the respirator.

(2) *Breathing tube.* If a flexible rubber breathing tube is used, it shall permit free head movement and shall not close off by kinking or by chin or arm pressure, or unduly disturb the wearer.

(3) *Harness.* If a harness is used, it shall be constructed so that it will hold the cartridge securely and comfortably in place against the body of the wearer. It shall permit cartridges to be replaced readily and shall provide for holding the facepiece in the "ready" position when it is not being used.

(4) *Cartridges.* If two cartridges are used in parallel on the respirator, the tests will be performed with the cartridges arranged in parallel and the test requirements will apply to the combination rather than to the individual cartridges.

(i) *Resistance to air flow.* See subparagraph (5) of this paragraph for resistance requirements. If two cartridges are used in parallel on the respirator, their resistances to air flow should be essentially equal.

(ii) *Machine tests.* Cartridges shall meet the requirements of the machine tests as set forth below. These tests are made on a apparatus that is constructed to allow the test atmosphere to enter the cartridges continuously at pre-determined concentrations and rates of flow and that has means for determining the life of the cartridges.

(a) *Low-rate-of-flow and high-rate-of-flow tests.* The test conditions and requirements for these tests are listed in Table 1.

(b) *Chemical stability.* To determine the chemical stability of the cartridges under dry and humid conditions, four of them will be treated as follows:

(1) Two cartridges or two pairs of cartridges will be equilibrated at room temperature [2] by passing carbon dioxide-free air of 25 percent relative humidity through them at a rate of 25 liters per minute for 6 hours.

[1] All concentrations given in this part have been calculated on a basis of 25° C. and 760 mm. mercury pressure.

TABLE 1—REQUIREMENTS FOR MACHINE TESTS

[Relative humidity of test atmosphere: 50±5 percent. Temperature: Room temperature (approximately 25° C.). Test atmosphere: Carbon tetrachloride vapor, 0.1 percent by volume (1,000 p. p. m.)]

	Number of cartridges [1]	Rate of air flow, liters per minute	Maximum allowable leakage, p. p. m.	Minimum life, minutes [3]
Low-rate-of-flow	3	32	5	100
High-rate-of-flow	2	64	5	50
Chemical stability	4	32	5	45

[1] This number refers to pairs of cartridges if 2 are used in parallel on the respirator.

[2] The values given for minimum life apply to each cartridge or to each pair of cartridges. Tests should be continued until the maximum allowable leakage occurs.

(2) Two cartridges or two pairs of cartridges will be equilibrated at room temperature by passing carbon dioxide-free air of 85 percent relative humidity through them at a rate of 25 liters per minute for 6 hours.

(3) After equilibration, these cartridges will be resealed as received, kept in an upright postion at room temperature, and tested within 18 hours under the conditions given in table 1 for chemical stability.

(c) *Test on cartridges for protection against dusts, fumes, mists.* Cartridges containing, or having attached to them, filters for protection against dusts, fumes, and mists will be tested according to the requirements of this part and in addition will be tested according to the requirements of Part 14 of this subchapter. However, the maximum allowable inhalation resistance of complete Type BE respirators shall be 3 inches (75 millimeters) of water rather than 2 inches (50 millimeters) of water allowed for dust, fume, or mist respirators by Part 14 of this subchapter.

(5) *Complete nonemergency gas respirator*—(i) *Resistance to air flow.* There are no specific requirements for the resistance of the cartridges to air flow; only the resistance of the complete respirator to air flow will be considered. The maximum allowable resistance of the complete respirator to a continuous flow of air at a rate of 85 liters per minute is as follows:

(a) Respirators for protection against organic vapors only: Inhalation, 2.0 inches of water; exhalation, 1.0 inch of water.

(b) Respirators for protection against organic vapors and dust, fumes, and mists: Inhalation, 3.0 inches of water; exhalation, 1.0 inch of water.

(ii) *Man tests.* (a) Complete nonemergency gas respirators will be worn by two subjects in an atmosphere containing 0.5 percent by volume (5,000 p. p. m.) of carbon tetrachloride vapor.[3]

[2] For uniformity of test conditions, this temperature should be between 23° and 27° C.

[3] A concentration of 5,000 p. p. m. was chosen to shorten the man-test time to about one-fifth of that required for 1,000 p. p. m. The use of this high concentration under carefully controlled laboratory conditions by experienced personnel does not in any way alter the maximum concentration for which approval will be granted, namely, 0.1 percent (1,000 p. p. m.) of organic vapors.

(b) During this test the subjects will perform the following schedule of exercise:

5 minutes----	Walking vigorously.
5 minutes----	Sitting at rest.
10 minutes---	Stationary running and calisthenic arm movements.
5 minutes----	Sitting at rest.
5 minutes----	Pumping air with a hand-operated tire pump into a 1-cubic-foot cylinder to a pressure of 25 lb. per sq. in. gage, or equivalent work.
5 minutes----	Sitting at rest.

(c) The test should be continued until the odor of carbon tetrachloride is detected by the subjects, repeating the schedule if necessary.

(d) To meet the requirements of this test the respirators shall give complete respiratory protection to the wearers for 30 minutes. Undue discomfort must not be experienced because of fit or other physical or mechanical features of the respirator.

§ 14a.7 *Changing details of tests.* If it is advisable to omit any of the tests or part of a test previously described or to perform accessory tests, the Bureau may modify the test in such manner as to obtain substantially the same information and degree of safety as is provided by the tests described. The applicant will be notified of any changes that may be necessary.

§ 14a.8 *Notification of approval or disapproval.* (a) After the Bureau has considered the results of the inspection and tests, a formal written notification of approval or disapproval of the nonemergency gas respirator will be supplied to the applicant by the Bureau. If the device meets all requirements of this part, the notification will not be accompanied by test data or detailed results of tests. If the device fails to meet any of the requirements of this part, notification of such failure will be accompanied by details of the failure with a view to possible remedy of the defects in respirators submitted in the future. Otherwise, results of tests of respirators that fail to meet the requirements will not be made public by the Bureau.

(b) No verbal reports of the Bureau's decisions concerning the investigations will be given and no informal approvals will be granted.

§ 14a.9 *Approval markings.* (a) With formal notification of approval the applicant will receive photographs of designs of the official approval labels, one for the complete nonemergency gas respirator and one for the cartridge. These labels will bear the seal of the Bureau of Mines and be inscribed substantially as follows:

PERMISSIBLE NONEMERGENCY GAS RESPIRATOR OR PERMISSIBLE CARTRIDGE FOR ORGANIC VAPORS

U. S. Bureau of Mines Approval No. ----------
Issued to ----------
(Name of manufacturer)

Approved for respiratory protection in atmospheres not immediately dangerous to life and containing not more than 0.1 percent by volume of organic vapors.

(b) Appropriate instruction and caution statements on the use and limitations of the respirator will be included in these labels.

(c) One label shall be reproduced legibly on the outside of the container of the nonemergency gas respirator. The label for the cartridge shall be reproduced legibly on the outside of the cartridge.

(d) The facepiece shall be marked in a legible and permanent manner with the approval number. The cartridge shall be marked legibly with the approval number and a statement essentially as follows:

Permissible cartridge for organic vapor only. Approved for respiratory protection in atmospheres not immediately dangerous to life and containing not more than 0.1 percent by volume of organic vapors.

(e) Full-scale designs or reproductions of approval labels and markings and a sketch or description of their position shall be submitted to the Central Experiment Station, for approval before final adoption.

(f) Permission to place the Bureau's marks of approval on his respirator obligates a manufacturer to maintain the quality of his product and to have each respirator, and all parts thereof, constructed strictly according to the drawings and records that have been accepted by the Bureau for that respirator and are in the Bureau's files. Nonemergency gas respirators that exhibit changes in design or include parts that have not been approved for use with the respirator are not permissible nonemergency gas respirators and must not bear the Bureau's approval label.

§ 14a.10 *Material required for Bureau of Mines record.* In order that the Bureau may know exactly what it has tested and approved, detailed records of each investigation are kept. These include drawings and actual equipment, as follows:

(a) *Drawings and specifications.* Drawings and specifications submitted with application for tests and final drawings and specifications that the applicant must submit to the Bureau before approval is granted to show the details of the respirator as approved, will be retained by the Bureau. The company receiving the approval shall keep an exact duplicate of the set of drawings and specifications that are in the Bureau's records. These are to be adhered to in commercial production of the approved device.

(b) *Actual equipment.* (1) Parts of the respirator or a complete respirator used in the tests may be retained by the Bureau as a permanent record of the investigation and of the respirator submitted. Material not required for record will be returned to the applicant at his expense on written shipping instructions to the Central Experiment Station.

(2) If the respirator is approved, the applicant shall deliver to the Central Experiment Station, gratis, one complete respirator in the form in which it is to be

sold, to serve as a record of the commercial product.

§ 14a.11 *Changes subsequent to approval.* All approvals are granted with the understanding that the manufacturer will make his respirator according to final drawings and specifications submitted to the Bureau. Therefore, before making any change in an approved nonemergency gas respirator, the manufacturer shall first obtain the Bureau's approval of the change. This procedure is as follows:

(a) The manufacturer shall write to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pennsylvania, requesting an extension of his original approval and stating the change or changes desired. He shall send two sets of revised drawings and specifications showing the changes in detail, and one of each of the parts affected to the Central Experiment Station.

(b) The Bureau will consider the application and inspect the drawings and parts to determine whether it will be necessary to make tests.

(c) If tests are unnecessary, the applicant will be advised formally by the Bureau of the approval or disapproval of the change.

(d) If tests are necessary, the applicant will be advised of the fee and material required.

§ 14a.12 *Withdrawal of approval.* The Bureau reserves the right to rescind for cause any approval granted under this part.

CLARENCE A. DAVIS,
Acting Secretary of the Interior.

APRIL 18, 1955.

Subchapter D—Electrical Equipment, Lamps, Methane Detectors; Tests for Permissibility; Fees

[Bureau of Mines Schedule 6D, Supp. 1]

PART 19—ELECTRIC CAP LAMPS

MISCELLANEOUS AMENDMENTS

Part 19 is hereby amended as follows:

1. Section 19.1 is amended by the addition of new paragraph (c) to read as follows:

(c) *Definition of permissible.* Completely assembled and conforming in every respect with the design formally approved by the Bureau of Mines under this part. (Approvals under this part are given only to equipment for use in gassy and dusty mines.)

2. Section 19.2 (a) (1) is amended by substituting "$565.00" for "$200.00" and "United States Bureau of Mines" for "Treasurer of the United States."

3. Section 19.2 (b) (1) is revised to read as follows:

(1) The fee for a partial investigation leading to the extension of an approval to cover modifications involving tests shall be proportional to the work involved. The applicant in this case will be advised of the amount of the deposit he should submit after an examination of the modified lamp has been made. Extensions of approval that do not require conducting of tests will be made without charge.

4. Section 19.2 (c) is deleted; also, § 19.2 (d) is renumbered as § 19.2 (c) and is amended by changing the headnote Item 4 to read Item 3 and by deleting the words "Director of the Bureau of Mines" and substituting the words "Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pa."

5. Section 19.3 (a) is amended by rewording as follows:

(a) *Applications.* Before the Bureau of Mines will undertake the active investigation leading to approval of any lamp, the manufacturer shall make application by letter for an investigation leading to approval of his lamp. This application in duplicate, accompanied by a check, bank draft, or money order, payable to the United States Bureau of Mines, to cover all the necessary fees, shall be sent to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pa., together with the required drawings, one complete lamp, and instructions for its operation.

6. Section 19.3 (b) is deleted.

7. Section 19.4 (a) is amended by deleting the words "marked, Attention of the Electrical Engineer."

8. Section 19.4 (d) is amended by rewording as follows:

(d) *Observers at formal investigations and demonstrations.* No one shall be present during any part of the formal investigation conducted by the Bureau which leads to approval for permissibility except the necessary Government personnel, representatives of the applicant, and such other persons as may be mutually agreed upon by the applicant and the Bureau. Upon granting approval for permissibility, the Bureau will announce that such approval has been granted to the device and may thereafter conduct, from time to time in its discretion, public demonstrations of the tests conducted on the approved device. Those who attend any part of the investigation, or any public demonstration, shall be present solely as observers; the conduct of the investigation and of any public demonstration shall be controlled wholly by the Bureau's personnel. Results of chemical analyses of material and all information contained in the drawings, specifications, and instructions shall be deemed confidential and their disclosure will be appropriately safeguarded by the Bureau.

9. Section 19.4 (g) is amended by deleting the words "Director of the Bureau of Mines" and substituting the words "Central Experiment Station."

10. Section 19.11 (a) is amended by rewording the first sentence to read as follows: "All approvals are granted by official letter from the Bureau of Mines."

11. Section 19.13 (a) is amended by deleting the words "Director of the Bureau at Washington, D. C.," and substituting the words "Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pa."; also, the second sentence of paragraph (a) is revised to read as follows: "With this letter he should submit a revised drawing or drawings showing the changes in detail, and one of each of changed lamp parts."

12. Section 19.13 (c) is revised by deleting the words "through the Director's office" and substituting the words "by letter from the Bureau of Mines."

(Sec. 5, 36 Stat. 370, as amended, 30 U. S. C. sec. 7. Interpret or apply secs. 2, 3, 36 Stat. 370, as amended, 30 U. S. C. 3, 5)

CLARENCE A. DAVIS,
Acting Secretary of the Interior.

APRIL 18, 1955.

[F. R. Doc. 55-3317; Filed, Apr. 22, 1955; 8:45 a. m.]

[Bureau of Mines Schedule 10C, Supp. 1]

PART 20—ELECTRIC MINE LAMPS OTHER THAN STANDARD CAP LAMPS

MISCELLANEOUS AMENDMENTS

Part 20 is hereby amended as follows:

1. Section 20.2 (b) is amended by deleting the words "issued only by the Director of" and substituting the word "from."

2. Section 20.2 (d) is amended to read as follows:

(d) *Permissible.* Completely assembled and conforming in every respect with the design formally approved by the Bureau of Mines under this part. (Approvals under this part are given only to equipment for use in gassy and dusty mines.)

3. Section 20.3 is amended by rewording as follows:

§ 20.3 *Applications.* Before the Bureau of Mines will undertake the active investigation leading to approval of any lamp, the manufacturer shall make application by letter for an investigation of his lamp. This application in duplicate, accompanied by a check, bank draft, or money order, payable to the United States Bureau of Mines, to cover all the necessary fees, shall be sent to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pa., together with the required drawings, one complete lamp, and instructions for its operation.

4. Section 20.4 is amended to read as follows:

§ 20.4 *Fees charged for investigations of lamps.* (a) Complete investigation of a storage-battery lamp, $225.

(b) Complete investigation of a lamp using dry cells, $85.

(c) The Bureau reserves the right to charge amounts proportionate to the work involved in case an unusually complicated design of lamp is to be investigated.

(d) The fee for a partial investigation leading to the extension of an approval to cover modifications involving tests shall be proportional to the work involved. The applicant in this case will be advised of the amount of the deposit he should submit after an examination of the modified lamp has been made.

(e) Extensions of approval that do not require conducting of tests will be made without charge.

(f) Tests to assist manufacturers in the development of electric lamps may be made upon request to the Central Experiment Station and will be charged for in amounts proportionate to the work involved. The making of this class of tests shall, however, be optional with the Bureau.

5. Section 20.5 (a) is amended by deleting the words "marked 'Attention of Electrical Engineer'."

6. Section 20.5 (c) is deleted and new paragraph (c) added as follows:

(c) *Observers at formal investigations and demonstrations.* No one shall be present during any part of the formal investigation conducted by the Bureau which leads to approval for permissibility except the necessary Government personnel, representatives of the applicant, and such other persons as may be mutually agreed upon by the applicant and the Bureau. Upon granting approval for permissibility, the Bureau will announce that such approval has been granted to the device and may thereafter conduct, from time to time in its discretion, public demonstrations of the tests conducted on the approved device. Those who attend any part of the investigation, or any public demonstration, shall be present solely as observers; the conduct of the investigation and of any public demonstration shall be controlled wholly by the Bureau's personnel. Results of chemical analyses of material and all information contained in the drawings, specifications, and instructions shall be deemed confidential and their disclosure will be appropriately safeguarded by the Bureau.

7. Section 20.5 (f) is amended by deleting the words "the Director of."

8. Section 20.12 (a) is amended by revising the first sentence as follows: "All approvals are granted by official letter from the Bureau of Mines."

9. Section 20.14 (a) is amended by deleting the words "Director of the Bureau of Mines at Washington 25, D. C.," and substituting the words "Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pa."; also, the second sentence of this paragraph is revised to read as follows: "With this letter he should submit a revised drawing or drawings showing the changes in detail, and one of each of the changed lamp parts."

10. Section 20.14 (c) is amended by deleting the words "through the Director's Office" and substituting the words "by letter from the Bureau of Mines."

(Sec. 5, 36 Stat. 370, as amended; 30 U. S. C. 7. Interpret or apply secs. 2, 3, 36 Stat. 370, as amended; 30 U. S. C. 3, 5)

CLARENCE A. DAVIS,
Acting Secretary of the Interior.

APRIL 18, 1955.

[F. R. Doc. 55-3316; Filed, April 22, 1955; 8:45 a. m.]

[Bureau of Mines Schedule 12D, Supp. 1]

PART 24—SINGLE-SHOT BLASTING UNITS

MISCELLANEOUS AMENDMENTS

Part 24 is hereby amended as follows:

1. Section 24.0 is amended by the addition of a new paragraph (d) to read as follows:

(d) *Definition of permissible.* Completely assembled and conforming in every respect with the design formally approved by the Bureau of Mines under this part. (Approvals under this part are given only to equipment for use in gassy and dusty mines.)

2. Section 24.1 (a) is amended to read as follows:

(a) The fee for a complete investigation under this part is $155.00 for units of the storage-battery and magneto types. The fee shall accompany the application, in the form of a check, draft, or money order, payable to the United States Bureau of Mines.

3. Subparagraph (1) of § 24.1 (b) is deleted.

4. Section 24.1 (b) (2) is amended by renumbering it (1) and rewording as follows:

(1) The fee for a partial investigation leading to the extension of approval shall be proportional to the work involved. The applicant in this case will be advised of the amount of the deposit he should submit after an examination of the redesigned unit has been made.

5. Section 24.1 (d) is amended by deleting the words "Director of the Bureau of Mines" and substituting the words "Central Experiment Station."

6. Section 24.2 (a) is amended by rewording as follows:

(a) *Applications.* Before the Bureau of Mines will undertake the active investigation leading to approval of any single-shot blasting unit, the manufacturer shall make application by letter for an investigation leading to approval of his unit. This application in duplicate, accompanied by a check, bank draft, or money order, payable to the United States Bureau of Mines, to cover all the necessary fees, shall be sent to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pa., together with the required drawings, one complete blasting unit, and instructions for its operation.

7. Section 24.2 (b) is deleted.

8. Section 24.3 (d) is deleted and new paragraph (d) substituted as follows:

(d) *Observers at formal investigations and demonstrations.* No one shall be present during any part of the formal investigation conducted by the Bureau which leads to approval for permissibility except the necessary Government personnel, representatives of the applicant, and such other persons as may be mutually agreed upon by the applicant and the Bureau. Upon granting approval for permissibility, the Bureau will announce that such approval has been granted to the device and may thereafter conduct, from time to time in its discretion, public demonstrations of the tests conducted on the approved device. Those who attend any part of the investigation, or any public demonstration, shall be present solely as observers; the conduct of the investigation and of any public demonstration shall be controlled wholly by the Bureau's personnel. Results of chemical analyses of material and all information contained in the drawings, specifications, and instructions shall be deemed confidential and their disclosure will be appropriately safeguarded by the Bureau.

9. Section 24.3 (g) is amended by deleting the words "the Director of."

10. Section 24.4 (c) is amended by deleting the words in parentheses "(whether of the storage type or dry cells)."

11. Section 24.4 (g) is deleted.

12. Section 24.6 is amended by deleting the words "through the office of the Director of the Bureau of Mines at Washington 25, D. C.," and substituting the words "from the Bureau of Mines" in the first sentence; also by deleting the word "Washington" from the last sentence and substituting the words "Bureau of Mines."

13. Section 24.9 (a) is amended by deleting the words "Director of the Bureau of Mines, Washington 25, D. C.," in the first sentence and substituting the words "Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pa."; also, in the last sentence by deleting the words "marked 'Attention of the Supervising Engineer, Electrical-Mechanical Section'."

14. Section 24.9 (c) is amended by deleting the words "through the Director's Office" and substituting the words "in writing from the Bureau of Mines."

(Sec. 5, 36 Stat. 370, as amended, 30 U. S. C., sec. 7. Interpret or apply secs. 2, 3, 36 Stat. 370, as amended, 30 U. S. C. 3, 5)

CLARENCE A. DAVIS,
Acting Secretary of the Interior,

APRIL 18, 1955.

[F. R. Doc. 55-3318; Filed, Apr. 22, 1955; 8:45 a. m.]

Subchapter E—Mechanical Equipment for Mines; Tests for Permissibility and Suitability; Fees [1]

[Bureau of Mines Schedule 22, Supp. 1]

PART 31—DIESEL MINE LOCOMOTIVES

MISCELLANEOUS AMENDMENTS

Part 31 is hereby amended as follows:

1. Section 31.1 is amended by deleting the word "three" and substituting the word "four"; by deleting the word "and" after the word "equipment" and inserting the following at the end of the first sentence: "and (d), mechanical hazards"; also by deleting the words "or other situations where inflammable atmospheres" and substituting the words "where methane" in the second sentence.

2. Section 31.2 (b) is amended by deleting the words "only by the Director of the Bureau of Mines" and substituting the words "by the Bureau of Mines."

3. Section 31.2 (g) is amended by revising to read as follows:

[1] For change in Subchapter E heading, see Part 32 of this subchapter, *infra*.

(g) *Permissible.* Completely assembled and conforming in every respect with the design formally approved by the Bureau of Mines under this section. (Approvals under this section are given only to equipment for use in gassy and dusty mines.)

4. Section 31.3 (b) is amended by revising to read as follows:

(b) *Application.* Before the Bureau of Mines will undertake the active investigation leading to approval of any locomotive, the manufacturer shall make application by letter for an investigation leading to approval of his locomotive. This application in duplicate, accompanied by a check, bank draft, or money order, payable to the United States Bureau of Mines, to cover all the necessary fees, shall be sent to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pa., together with the required drawings and specifications.

5. Section 31.3 (c) is amended to read as follows:

(c) *Fees.*

1. For preliminary review of drawings and specifications and related data, for each new machine	$30
2. For tests to determine the composition of exhaust gases from the engine under various conditions	320
NOTE: When preliminary or check tests are made and only carbon monoxide and carbon dioxide determinations are involved, the fee shall be $160.	
3. For tests to determine the effectiveness of engine flame arrester	110
NOTE: For check tests on redesigned machines where less than 20 tests are required the fee shall be $55.	
4. For detailed inspection of engine flame arrester	30
5. For detailed inspection of manifolds, exhaust conditioners, and other parts making up the intake and exhaust systems	40
6. For detailed inspection of each explosion-proof enclosure of electrical units	45
NOTE: When the enclosure is of such a nature that only a nominal amount of work is involved in the inspection, the fee shall be $22.50.	
7. For explosion test of each explosion-proof enclosure of electrical units	35
NOTE: When the explosion-proof qualities can be demonstrated in less than 20 tests, the fee shall be $17.50.	
8. For exhaust conditioner performance tests to determine rate of water consumption	40
9. For each inspection of a completely assembled machine at the factory or elsewhere	[1] 65
10. For tests of exhaust gas dilution not made concurrently with factory inspection of completely assembled machine	[1] 50
11. For the final examination and recording of all the necessary drawings and specifications preparatory to issuing approval	40
12. For the examination and recording of drawings and specifications necessitated in consideration of changes subsequent to the initial investigation	$40
NOTE: If only a nominal amount of work is involved, the fee shall be $15.	

[1] In addition, the company shall pay the inspector's traveling expenses and subsistence as allowed by standard Government travel regulations.

6. Section 31.3 (d) is amended by deleting the words "Engineer in Charge of Diesel Testing" and substituting the words "Central Experiment Station."

7. Section 31.3 (h) is amended by deleting the words "and should be plainly marked for the attention of the Engineer in Charge of Diesel Testing."

8. Section 31.3 (j) is amended by revising to read as follows:

(j) *Observers at formal investigations and demonstrations.* No one shall be present during any part of the formal investigation conducted by the Bureau which leads to approval for permissibility except the necessary Government personnel, representatives of the applicant, and such other persons as may be mutually agreed upon by the applicant and the Bureau. Upon granting approval for permissibility, the Bureau will announce that such approval has been granted to the device and may thereafter conduct, from time to time in its discretion, public demonstrations of the tests conducted on the approved device. Those who attend any part of the investigation, or any public demonstration, shall be present solely as observers; the conduct of the investigation and of any public demonstration shall be controlled wholly by the Bureau's personnel. Results of chemical analyses of material and all information contained in the drawings, specifications, and instructions shall be deemed confidential and their disclosure will be appropriately safeguarded by the Bureau.

9. Section 31.6 (a) (1) is amended by deleting the words "the Director of" and substituting the words "letter from."

10. Section 31.6 (b) (2) is amended by deleting the words "Engineer in Charge of Diesel Testing" and substituting the words "Central Experiment Station."

11. Section 31.8 (a) is amended by deleting the words "Director, Bureau of Mines, Washington 25, D. C." and substituting the words "Central Experiment Station," in the first sentence; also, the second sentence is revised to read: "With this letter he should submit a set of revised drawings and specifications showing the change or changes in detail."

12. Section 31.8 (c) is amended by deleting the words "the Director of the Bureau" and substituting the words "letter from the Bureau of Mines."

13. Section 31.9 (c) (1) is amended by deleting "150° F." and substituting "140° F."; also, by deleting "0.2" and substituting "0.5" in the last sentence.

(Sec. 5, 36 Stat. 370, as amended, 30 U. S. C. sec. 7. Interpret or apply secs. 2, 3, 36 Stat. 370, as amended, 30 U. S. C. 3, 5)

CLARENCE A. DAVIS,
Acting Secretary of the Interior.

APRIL 18, 1955.

[F. R. Doc. 55-3312; Filed, Apr. 22, 1955; 8:45 a. m.]

[Bureau of Mines Schedule 24, Supp. 1]

PART 32—MOBILE DIESEL-POWERED EQUIPMENT FOR NON-COAL MINES

MISCELLANEOUS AMENDMENTS

A. The heading of Subchapter E is revised to read as follows: "Subchapter E—Mechanical Equipment for Mines; Tests for Permissibility and Suitability; Fees."

B. Part 32 is hereby amended as follows:

1. Section 32.1 is amended by deleting, in the first sentence, the word "three" and substituting the word "four"; by deleting, in the first sentence, the word "and" after the word "equipment" and inserting the following at the end of the first sentence: "and (4), mechanical hazards"; also, by deleting the words "or other situations where flammable atmospheres" and substituting the words "where methane" in the second sentence; also, by adding the following sentence at the end of the first paragraph of § 32.1: "Since the latter equipment is not to be used in coal mines or other situations where inflammable atmospheres may be encountered, equipment approved under this part will be referred to as 'approved equipment' rather than as 'permissible equipment', and will carry an 'approval plate' rather than a 'permissibility plate'.

2. Section 32.2 is amended by deleting paragraph (h) and relettering paragraphs (i), (j) and (k) as (h), (i) and (j), respectively.

3. Section 32.3 (b) is amended by revising to read as follows:

(b) *Application.* Before the Bureau of Mines will undertake the active investigation leading to approval of any equipment, the manufacturer shall make application by letter for an investigation leading to approval of that equipment. This application in duplicate, accompanied by a check, bank draft, or money order payable to the United States Bureau of Mines, to cover all necessary fees, shall be sent to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pa., together with the required drawings and specifications.

4. Section 32.3 (c) is amended to read as follows:

(c) *Fees.*

1. For preliminary review of drawings, specifications, and related data for each new machine	$30
2. For tests to determine the composition of exhaust gases from the engine under various conditions	320
NOTE: When preliminary or check tests are made and only carbon monoxide and carbon dioxide determinations are involved, the fee shall be $160.	
3. For detailed inspection of exhaust gas cooling system	30
4. For detailed inspection of the electrical system	15
5. For each inspection of a completely asembled machine at the factory or elsewhere	[1] 65
6. For exhaust gas dilution tests made independently of factory inspection	[1] 50
7. For the final examination and recording of all the necessary drawings and specifications preparatory to issuing an approval	40
8. For each half day, or fraction thereof, spent in the examination and recording of drawings and specifications preparatory to issuing an extension of approval	12

[1] In addition, the company shall pay the inspector's traveling expenses and subsistence as allowed by standard Government travel regulations.

5. Section 32.3 (d) (1) is amended by deleting the words "Engineer in Charge of Diesel Testing" and substituting the words "Central Experiment Station."

6. Section 32.3 (h) is amended by deleting the words "and should be plainly marked for the attention of the Engineer in Charge of Diesel Testing."

7. Section 32.3 (j) is deleted and new paragraph (j) added as follows:

(j) *Observers at formal investigations and demonstrations.* No one shall be present during any part of the formal investigation conducted by the Bureau which leads to approval except the necessary Government personnel, representatives of the applicant, and such other persons as may be mutually agreed upon by the applicant and the Bureau. Upon granting approval, the Bureau will announce that such approval has been granted to the device and may thereafter conduct, from time to time in its discretion, public demonstrations of the tests conducted on the approved device. Those who attend any part of the investigation, or any public demonstration, shall be present solely as observers; the conduct of the investigation and of any public demonstration shall be controlled wholly by the Bureau's personnel. Results of chemical analyses of material and all information contained in the drawings, specifications, and instructions shall be deemed confidential and their disclosure will be appropriately safeguarded by the Bureau.

8. Section 32.4 (e) (2) is amended by redesignating the present material as (i) and by adding the following additional subdivision (ii):

(ii) Provisions shall be made to dilute the exhaust gas with air before it is discharged from the machine into the surrounding atmosphere.

9. Section 32.4 (f) is amended by redesignating the present material as subparagraph (1) and by adding the following additional subparagraph (2):

(2) The exhaust gas after dilution with air shall contain not more than 100 parts per million, by volume, of carbon monoxide; 25 parts per million, by volume, of oxides of nitrogen (as equivalent nitrogen peroxide); or 10 parts per million, by volume, of aldehydes (as equivalent formaldehyde) under any condition of operation.

10. Section 32.5 (a) (4) is amended by revising the first sentence in the last undesignated paragraph of subdivision (iv) to read as follows: "The water consumed in cooling the exhaust gas under the test conditions shall not exceed by more than approximately 15 percent that required for the adiabatic saturation of the exhaust gas at the outlet temperature of the exhaust gas cooler."

11. Section 32.6 (b) (2) is amended by deleting the words "Engineer in Charge of Diesel Testing" and substituting the words "Central Experiment Station."

12. Section 32.8 (a) is amended by revising to read as follows:

(a) The manufacturer shall write to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pa., requesting an extension of his original approval and describing the changes proposed. With this request he should submit a revised drawing or drawings and specifications showing the changes in detail.

(Sec. 5, 36 Stat. 370, as amended, 30 U. S. C. sec. 7. Interpret or apply secs. 2, 3, 36 Stat. 370, as amended, 30 U. S. C. 3, 5)

CLARENCE A. DAVIS,
Acting Secretary of the Interior.

APRIL 18, 1955.

[F. R. Doc. 55-3313; Filed, Apr. 22, 1955; 8:45 a. m.]

[Bureau of Mines Schedule 25A]

PART 33—DUST COLLECTORS FOR USE IN CONNECTION WITH ROCK DRILLING IN COAL MINES

Part 33 is hereby amended as follows:

Preliminary statement. The Bureau of Mines is prepared to inspect and test dust collectors at its Central Experiment Station, Pittsburgh, Pennsylvania, for the purpose of determining whether such equipment may be approved for use in coal mines in connection with rock drilling. Applications for approval are voluntary with manufacturers of such equipment. This regulation relates to the requirements of performance of dust-collecting equipment which may be approved for use in coal mines and the conditions under which inspections and tests will be made and approvals will be granted.

The authority for conducting such tests and investigations is contained in the act of February 25, 1913 (37 Stat. 681), as amended June 30, 1932 (47 Stat. 410), and in Executive Order No. 6611, February 22, 1934 (30 U. S. C. secs. 3, 5, 7). The act, as so amended, contains the following provision:

For tests or investigations authorized by the Secretary of the Interior under the provisions of this Act, as amended and supplemented, except those performed for the Government of the United States or State governments within the United States, a fee sufficient in each case to compensate the Bureau of Mines for the entire cost of the services rendered shall be charged, according to a schedule prepared by the Director of the Bureau of Mines and approved by the Secretary of the Interior, who shall prescribe rules and regulations under which such tests and investigations may be made. All moneys received from such sources shall be paid into the Treasury to the credit of miscellaneous receipts.

This document, consisting of §§ 33.1 to 33.12, inclusive, is Schedule 25A and supersedes Schedule 25 issued on January 23, 1952.

Sec.
33.1 Definitions.
33.2 Type of equipment that may be approved.
33.3 Purpose of testing for permissibility.
33.4 Conditions under which dust collectors will be tested; preliminary steps preceding approval tests and inspections.
33.5 General requirements for Bureau of Mines approval.
33.6 Inspection.
33.7 Methods of testing.
33.8 Changing details of tests.
33.9 Notification of approval or disapproval.
33.10 Approval plate.
33.11 Changes subsequent to approval.
33.12 Withdrawal of approval.

AUTHORITY: §§ 33.1 to 33.12 issued under sec. 5, 36 Stat. 370, as amended, 30 U. S. C. 7. Interpret or apply secs. 2, 3, 36 Stat. 370, as amended, 30 U. S. C. 3, 5.

§ 33.1 *Definitions.* Certain terms used in this part are defined as follows:

(a) *Equipment.* Dust collectors to be used in connection with rock drilling in coal mines.

(b) *Unit.* The complete assembly of parts comprising one dust collector.

(c) *Combination unit.* A drilling device with internal dust collecting system.

(d) *Normal operations.* The performance by each part of the equipment of those functions for which the part was designed.

(e) *Adequate.* Appropriate and sufficient as determined by the Bureau of Mines.

(f) *Test conditions; test period.* The prescribed conditions under which a set of 10 test holes is to be drilled with a given type of drilling equipment, and in a given type of stratum, is designated as a test condition. The time interval within which these holes are drilled is designated as a test period.

(g) *Permissible.* As used in this part, the term "permissible" relates to equipment conforming in all details of material and construction to equipment that meet the requirements and pass the inspection and tests of the Bureau of Mines as hereinafter described.

(h) *Approval.* Official, formal, written notification by the Bureau of Mines stating that upon investigation the equipment has met satisfactorily the requirements of this part.

(i) *Extension of approval.* Official, written notification from the Bureau of Mines to the equipment manufacturer, by which the latter is authorized to make changes in approved equipment after the proposed changes have been duly examined, accepted, and recorded by the Bureau.

§ 33.2 *Type of equipment that may be approved.* (a) Approval may be granted for dust collecting or combination units designed specifically to prevent the dissemination of air-borne dust generated by drilling into various coal mine rock strata in quantities in excess of the concentration hereinafter designated as allowable, and to confine or control the collected dust in such manner that it may be removed or disposed of without

being disseminated into the mine atmosphere in quantities that would create unhygenic conditions. Approval will not be granted for individual parts used in the assembly of dust collecting or combination units.

(b) Units shall be designed for application to percussion and/or rotary drilling in any one or any combination of the following positions: (1) Vertically upward, (2) at angles to the vertical, upward, (3) horizontally, and (4) downward. The manufacturer should state the intended application of his equipment when applying for approval.

§ 33.3 *Purpose of testing for permissibility.* Safe operation of dust collectors underground involves consideration of three functional features, namely: (a) Prevention of the dissemination of objectionable or harmful concentrations of dust into the mine atmosphere, (b) protection from the hazard of exposed moving mechanical parts, and (c) protection from shock, explosion, and fire hazards by electrical equipment. Dust collectors for use in coal mines will be considered permissible only when proved by test and inspection to be adequate in these respects.

§ 33.4 *Conditions under which dust collectors will be tested; preliminary steps preceding approval tests and inspection*—(a) *Consultation.* Manufacturers or their representatives may visit or communicate with the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pennsylvania, to discuss the requirements of this part or to obtain criticisms of proposed design of equipment to be submitted for test. No charge is made for such consultation, and no written report will be made to the manufacturer.

(b) *Requirements for electrical parts.* Electrical parts of dust-collector units or combination units shall meet the requirements of the Bureau of Mines in accordance with the provisions of Part 18 of this chapter, and the examination and testing of the electrical parts shall be entirely separate from the approval testing of dust collecting equipment, as such.

(c) *Application.* An application for investigation under this part shall be in the form of a letter (in duplicate) addressed to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pennsylvania, which contains: (1) A request that the necessary inspections and tests leading to approval be made; (2) a statement that the equipment is completely developed and of the design and materials which the applicant believes suitable for a finished marketable device; (3) one set of detailed drawings of the equipment; and (4) a check, draft, or money order, payable to the United States Bureau of Mines, to cover the investigation fee. The fee will be placed on special deposit in the Treasury of the United States, pending disposal as hereinafter specified. On receipt of this application, fee, and drawings, the applicant will be notified by the Bureau of its action on the application, the material required for test, the date upon which tests of his equipment will be started, and any additional information deemed necessary.

(d) *Fees charged for investigation.* The following fees are charged for inspecting and testing dust collectors under this part:

1. For preliminary review of drawings, specifications, and related data, for each new unit	$35
2. For detailed inspection of equipment to determine adequacy of design and materials, for each new unit	50
3. For detailed inspection of equipment to determine adequacy of design and materials in consideration of changes subsequent to the initial investigation, made at the factory or elsewhere, per man-day or fraction thereof	[1] 30
4. For drilling each set of 10 test holes to determine adequacy of performance	100
5. For final examination and recording of all necessary drawings and specifications, and issuing approval	50
6. For final examination and recording of all drawings and specifications and issuing extension of approval	20

[1] In addition, the company shall pay the inspector's travel expenses and subsistence as allowed by standard Government travel regulations.

(1) If the applicant is uncertain as to the amount of fee that should be sent with his application, the information will be given him upon inquiry addressed to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pennsylvania.

(2) If a dust collecting or combination unit fails to pass any of the specified tests and the applicant notifies the Bureau to terminate further consideration of the equipment, the Bureau will return the fee to the applicant, less such portion of the fee as the Bureau determines is sufficient to cover the work done. If the applicant resubmits the dust collecting unit for approval after the necessary improvements have been made, an additional fee will be required. The amount of fee charged will be proportional to the additional investigative work that must be done and will be specified in writing to the applicant in advance of further testing of the equipment.

(e) *Drawings and specifications required.* (1) The Bureau will not inspect and test equipment until a set of legible drawings, bill of material, and specifications sufficient in number and detail to identify the parts fully have been delivered to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pennsylvania. Drawings should be numbered and dated to facilitate identification and reference.

(2) The drawings and specifications to be submitted shall include the following:

(i) Drawings clearly showing the overall dimensions, character, size, and relative arrangement of all parts of the unit.

(ii) Dust storage capacity of the various stages of collection in the dust separator.

(iii) Net filter area in the dust separator, and specifications of filter material.

(iv) Total weight of unit.

(v) Any other drawings or illustrations necessary to identify or explain any feature that is to be considered in the approval of the equipment.

(3) The Bureau will not be responsible for any disclosure of ideas, principles, or patentable features apparent from visual inspection, because under the terms of the application for tests it is understood that the device is ready for release to public market. Caution will be exercised to prevent disclosure of details of the device to the public during approval testing.

(f) *Material required for investigation.* The manufacturer shall furnish a complete unit for the purpose of inspection and test. Sufficient spare parts, such as gaskets or other components subject to wear in normal operation, should be furnished to permit continuous operation during test periods. Any special tools necessary to disassemble any parts for inspection or test shall be furnished with the equipment submitted.

(g) *Factory inspection form.* Each unit shall be carefully inspected by the manufacturer before it leaves the factory, and the results of the inspection shall be recorded on a Factory Inspection Form. The manufacturer will be required to furnish the Bureau a copy of that form. The form shall draw special attention to the points that must be checked in making certain that all parts of the unit are in proper condition, complete in all respects, and in agreement with the drawings and specifications filed with the Bureau.

(h) *Operating and servicing instructions.* The manufacturer shall furnish to the Bureau, before the start of tests, complete instructions covering operation and servicing of the unit. These instructions shall be reviewed by the Bureau, and a copy in the final form, which is to be furnished to the purchaser of the equipment, shall be submitted to the Bureau for examination when the reproduction of the approval plate is submitted.

(i) *Site of tests.* Tests of the unit shall be conducted at the Bureau of Mines Experimental Mine, Bruceton, Pennsylvania, or at other locations designated by the Bureau of Mines.

(j) *Shipment of material.* All shipments must be prepaid. Before making any shipments, the manufacturer shall obtain shipping instructions from the Bureau. The manufacturer also shall be responsible for removal of the equipment promptly upon completion of the investigation.

(k) *Assistance required during investigation.* When requested to do so, the manufacturer shall provide men to assist in disassembling parts for inspection, preparing parts for tests, and operating combination-unit drills.

(l) *Observers at formal investigations and demonstrations.* No one shall be present during any part of the formal investigation conducted by the Bureau which leads to approval for permissibility except the necessary Government personnel, representatives of the applicant, and such other persons as may be mutually agreed upon by the applicant and the Bureau. Upon granting approval for permissibility, the Bureau will announce that such approval has been granted to the device and may thereafter conduct, from time to time in its discretion, public demonstrations of the tests conducted on the approved device. Those who attend any part of the investigation, or any public demonstration, shall be present solely as observers; the conduct of the investigation and of any public demonstration shall be controlled wholly by the Bureau's personnel. Results of chemical analyses of material and all information contained in the drawings, specifications, and instructions shall be deemed confidential and their disclosure will be appropriately safeguarded by the Bureau.

§ 33.5 *General requirements for Bureau of Mines approval*—(a) *Quality of material, workmanship, and design.* The Bureau may refuse to test any equipment any part of which, in the opinion of qualified representatives of that Bureau, is not constructed of suitable materials, or indicates faulty workmanship, or is not designed upon sound engineering principles, whether or not the points in question are covered specifically by the requirements of this part.

(b) *Manner of actuation.* The unit may be actuated pneumatically, electrically, or by other means that comply with the provisions of this part.

(c) *Positioning of parts.* All parts of the unit essential to the dust-collection operation shall be provided with adequate and positive mechanical means for positioning and maintaining such parts properly in relation to the stratum being drilled.

(d) *Allowable escape of dust.* Under each test condition prescribed in this part, the net concentration of air-borne dust resulting from the escape of dust from the unit into the atmosphere of the test space shall not exceed 10 million particles (10 microns or less in size) per cubic foot of air, determined as stated in § 33.7 (d).

§ 33.6 *Inspection.* A detailed inspection shall be made by engineers of the Bureau of all parts of the unit covered by the requirements of this part or any parts or features that are associated with performance of the unit in the intended application or with safety of operation. This inspection will include a detailed examination to determine the adequacy of materials, workmanship, and design; and a detailed comparison of parts of assemblies with drawings to check materials, dimensions, and positions. Notes will be made of significant discrepancies that may exist between the drawings and the parts or assemblies. Satisfactory adjustment and correction of such discrepancies will be required before approval is granted.

§ 33.7 *Methods of testing*—(a) *Modification of equipment.* For test purposes the unit may be modified, as by the attachment of instruments or measuring devices, at the discretion of the Bureau: *Provided, however,* That such modification shall not alter the performance of the unit in the intended application.

(b) *Methods of drilling*—(1) *Dust collecting units.* Drilling shall be done with conventional, commercial drilling equipment of the pneumatic percussion, hydraulic rotary, and/or electric rotary types, as follows:

(i) *Percussion drilling.* (*a*) A stoper-type drill having a piston diameter of between 2½ and 3 inches shall be used for roof drilling. A hand-held sinker-type drill having a piston diameter of between 2½ and 3 inches shall be used for down drilling. The sinker-type drill, supported mechanically, shall be used for horizontal drilling. Compressed air shall be supplied to the drill at 85 to 95 pounds per square inch gage pressure.

(*b*) Bits shall be of the detachable, cross type with hard inserts, and shall be sharp at the start of drilling of each set of 10 holes, as hereinafter specified. In roof drilling, 1¼-inch diameter bits shall be used; in horizontal and down drilling, 1¾-inch diameter bits shall be used. Hollow ⅞-inch hexagonal drill steel shall be used, and compressed air may be admitted through the drill steel if necessary to clear the hole.

(ii) *Rotary drilling.* (*a*) A hydraulic rotary drill with a rated drilling speed of 18 feet per minute free lift, capable of rotating the drill steel at 900 revolutions per minute with 100 foot-pounds torque, and having a feed force of 7,000 pounds shall be used for roof drilling. A post-mounted electric rotary drill with a rated drilling speed of 30 inches per minute and powered by a 2.25 horsepower motor shall be used for horizontal drilling.

(*b*) Hard-tipped rock-drill bits, 1⅜ inches in outside dimension, and 1¼-inch auger-type drill steel shall be used for roof drilling. Hard-tipped fork-type bits, 2 inches in outside dimension, and 1¾-inch auger-type steel shall be used for horizontal drilling. Bits shall be sharp at the start of drilling of each set of 10 holes, as hereinafter specified.

(2) *Combination dust-collecting and drilling units.* Combination units shall be operated in accordance with the manufacturer's instructions. If special drill steel or bits are required, they shall be used and shall be furnished by the manufacturer. If special drill steel or bits are not required, the provisions of subparagraph (1) (i) and (ii) of this paragraph shall apply as regards drill steel and bits.

(c) *Test space.* Tests shall be conducted in a section of coal mine entry or other appropriate space designated by the Bureau. No mechanical ventilation shall be provided in the test space during actual test periods except such air movement as may be induced by the operation of drilling or dust-collecting equipment. All parts of equipment under test shall be within the test space during test periods.

(d) *Determination of dust concentrations.* (1) Concentrations of air-borne dust in the test space shall be determined by sampling with the midget impinger apparatus, and a light-field microscopic technique shall be employed in evaluating concentrations of dust in terms of millions of particles (10 microns or less in size) per cubic foot of air sampled.

(2) The test space shall be essentially cleared of air-borne dust by ventilation or other means before the start of drilling of each set of 10 holes. Two curtains then shall be placed across the test space in such manner that the volume of this space shall be approximately 2,000 cubic feet. After placing these curtains, and before drilling starts, a 5-minute sample of air-borne dust, designated as a control sample, shall be collected approximately at the mid-point of the test space.

(3) A sample of air-borne dust, designated as a test sample, shall be collected in the breathing zone of the drill operator during the drilling of each hole. Sampling shall begin when drilling starts and shall continue until drilling stops. Time consumed in changing drill steel shall not be considered as drilling time, and sampling shall cease during these intervals.

(4) The concentration of dust determined by the control sample collected before each test period shall be subtracted from the average concentration of dust determined by the test samples collected at each drill during each test period, and the difference shall be designated as the net concentration of dust resulting from the escape of dust from the collecting unit. Calculations of the average concentration of dust determined by the test samples shall be based upon the results of at least 80 percent of the samples collected at each drill during each test period.

(e) *Conduct of tests.* The unit shall be operated in accordance with the manufacturer's instructions. Receptacles and filters for collecting drill cuttings and dust shall be emptied and cleaned before the start of drilling of each set of 10 holes, and the surfaces of the test space shall be wetted before the drilling of each set of 10 holes. Holes shall be spaced to prevent interference, and may be plugged, if conditions warrant, to prevent dissemination of dust during subsequent drilling. All holes shall be drilled to a depth of 4 feet (±3 inches). Holes designated as "vertical" shall be drilled within 10 degrees of vertical, and "angle" holes shall be drilled at between 30 degrees and 45 degrees from vertical. "Horizontal" holes shall be drilled within 15 degrees of horizontal.

(1) *Roof drilling.* Units designed for use with both percussion and rotary drills shall be tested with both types of drills; otherwise tests shall be confined to the type of drill for which the unit is designed.

Drilling shall be done in friable strata that tends to produce large scale-like cuttings, as exemplified by the roof of the Bureau of Mines Experimental Mine, Bruceton, Pennsylvania.

(i) With units under consideration for approval for use in connection with drilling vertical roof holes only, holes shall be drilled as follows:

10 holes with pneumatic percussion drill.
10 holes with hydraulic rotary drill operated at maximum drilling speed.

(ii) With units under consideration for approval for use in connection with drilling roof holes at an angle, the procedure described in subdivision (i) of this subparagraph shall be followed, except that holes shall be drilled at an angle.

(iii) With units under consideration for approval for use in connection with drilling through holes in steel shapes, channels 4 inches across the web, or steel track-tie sections, or other steel shapes, shall be used at the discretion of the

Bureau of Mines in order that test conditions conform to actual practice in the coal-mining industry. If tests with special shapes or sizes are desired by the applicant, it shall be so stated in the application for approval. Holes shall be drilled as follows:

5 holes vertically and 5 holes at an angle, with pneumatic percussion drill.
5 holes vertically and 5 holes at an angle, with hydraulic rotary drill operated at maximum drilling speed.

(iv) If necessary to determine the adequacy of equipment, the test conditions stated in subdivision (i), (ii), or (iii) of this subparagraph may be modified to conform to the intended application of the equipment, provided that the number of test holes drilled under such modified test conditions is not less than prescribed by subdivision (i), (ii), or (iii) of this subparagraph.

(2) *Horizontal drilling.* Units designed for use with both percussion and rotary drills shall be tested with both types of drill; otherwise tests shall be confined to the type of drill for which the unit is designed. Holes shall be drilled in strata comparable in hardness to that of the draw slate encountered in coal mining. Holes shall be drilled near the roof of the test space, and under conditions simulating the drilling of draw slate in coal mining, as follows:

10 holes with pneumatic percussion drill.
10 holes with electric rotary drill.

(3) *Down drilling.* With units under consideration for approval for use in connection with down drilling, holes shall be drilled in typical mine floor strata, and with pneumatic percussion-type drilling equipment. Holes shall be drilled as follows:

5 holes vertically, and 5 holes at an angle.

§ 33.8 *Changing details of tests.* If it is advisable to omit any of the tests or parts of a test previously described or to perform accessory tests, the Bureau may modify the tests in such a manner as to obtain substantially the same information and degree of safety as is provided by the tests described. The applicant will be notified of any changes that may be necessary.

§ 33.9 *Notification of approval or disapproval.* (a) After the Bureau has considered the results of the investigation, and suitable drawings and specifications have been placed on file, a formal written notification of approval or disapproval of the unit will be supplied to the applicant by the Bureau. If the unit meets all requirements of this part, the notification will not be accompanied by test data or detailed results of tests. If the unit fails to meet any of the requirements of this part, notification of such failure will be accompanied by details of the failure with a view to possible remedy of defect or defects in units submitted in the future. Otherwise, results of tests of units that fail to meet the requirements will not be made public by the Bureau.

(b) No verbal reports of the Bureau's decision concerning the investigations will be given, and no informal approvals will be granted.

(c) A drawing list numbered to correspond to the approval number will accompany the notification of approval. This list will include the drawings and specifications covering the details of construction upon which the approval is based. The applicant receiving an approval shall keep exact duplicates of the drawings and specifications retained by the Bureau. These are to be adhered to in commercial production of the approved unit.

§ 33.10 *Approval plate.* (a) With the notification of approval the applicant will receive a photograph of a design of approval plate. The plate will bear the seal of the Bureau of Mines, the approval number, designation of the type of unit for which the approval is granted, and the name of the manufacturer.

(b) The manufacturer shall have this design reproduced as a plate for attachment to each approved unit. A sample plate and sketch or description of its proposed mounting on the unit, accompanied by a copy of the operating and servicing instructions as required in § 33.4 (h), shall be sent to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pennsylvania, for approval before its final adoption.

(c) The approval plate identifies the unit as having met the requirements of the Bureau of Mines for use in coal mines. The use of the approval plate on his unit obliges the manufacturer to maintain the quality of his product and to see that each unit is constructed according to drawings and specifications accepted by, and on file with, the Bureau of Mines. Each unit sold as approved shall carry an approval plate permanently attached to the unit. Units exhibiting changes in design that do not have official authorization from the Bureau are not approved and therefore must not bear the approval plate.

§ 33.11 *Changes subsequent to approval.* All approvals are granted with the understanding that the manufacturer will make his unit according to final drawings and specifications submitted to the Bureau of Mines. Therefore, before changing any feature of the unit considered in the original approval, the manufacturer shall first obtain the Bureau's approval of the change. This procedure is as follows:

(a) The manufacturer shall write to the Central Experiment Station, Bureau of Mines, 4800 Forbes Street, Pittsburgh 13, Pennsylvania, requesting an extension of his original approval and stating the change or changes desired. He shall send a set of revised drawings and specifications showing the changes in detail to the Central Experiment Station.

(b) The Bureau will consider the application and inspect the drawings and specifications to determine whether inspection and testing of the modified part or parts will be necessary. In general, inspection will be necessary. Testing will be necessary if there is a possibility that the modification may affect adversely the performance of the equipment.

(c) The applicant will be informed by the Bureau of the extent of the investigation, parts or material that should be submitted if tests or examinations are necessary, and the amount of the investigation fee.

(d) If the proposed modification complies with requirements of the regulations in this part, formal written authorization, known as extension of approval, allowing the modification, will be issued to the applicant by the Bureau. The letter notifying the applicant of extension of approval will be accompanied by a list of new and corrected drawings to be added to the list of official drawings relating to the unit.

§ 33.12 *Withdrawal of approval.* The Bureau reserves the right to rescind for cause, at any time, any approval granted under this part.

CLARENCE A. DAVIS,
Acting Secretary of the Interior.

WISCONSIN

RESERVING PUBLIC LAND IN CONNECTION WITH THE UPPER MISSISSIPPI RIVER WILDLIFE AND FISH REFUGE

By virtue of the authority vested in the President and in order to effectuate further the purposes of the Upper Mississippi River Wildlife and Fish Refuge Act (43 Stat. 650), and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

Subject to valid existing rights, the following-described public lands in Crawford County, Wisconsin, are hereby withdrawn from all forms of appropriation under the public-land laws, including the mining but not the mineral-leasing laws, and reserved under jurisdiction of the Department of the Interior as a part of the Upper Mississippi River Wildlife and Fish Refuge:

FOURTH PRINCIPAL MERIDIAN

T. 7 N., R. 7 W.,
Sec. 14, lot 4.

The area described contains 53.57 acres.

ORME LEWIS,
Assistant Secretary of the Interior.

APRIL 18, 1955.

[F. R. Doc. 55-3311; Filed, Apr. 22, 1955; 8:45 a. m.]

TITLE 50—WILDLIFE

Chapter I—Fish and Wildlife Service, Department of the Interior

PART 17—LIST OF AREAS

NATIONAL WILDLIFE REFUGES

CROSS REFERENCE: For order affecting the tabulation in § 17.3, see Title 43, Chapter I, Appendix C, PLO 1133, *supra*, reserving certain public lands as a part of the Upper Mississippi River Wildlife and Fish Refuge.

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 53]

CERTAIN PORK CARCASSES AND CERTAIN SWINE

OFFICIAL UNITED STATES STANDARDS FOR GRADES

Notice is hereby given in accordance with section 4 of the Administrative Procedure Act (5 U. S. C. 1003) that the Department of Agriculture has under consideration proposed revisions of the official United States standards for grades of certain pork carcasses (§§ 53.-140 to 53.143) and the official United States standards for grades of certain swine (§§ 53.150 to 53.153) under the provisions of sections 203 and 205 of the Agricultural Marketing Act of 1946 (7 U. S. C. 1622 and 1624) and the general language in the item for the Agricultural Marketing Service contained in the Department of Agriculture and Farm Credit Administration Appropriation Act, 1955 (68 Stat. 313).

The major provisions of the proposed changes are as follows:

The minimum and maximum back fat thickness, as outlined in the measurement guides to grade, would each be reduced by 0.2 inch in each weight or length group for Choice No. 1 and Choice No. 2; the minimum back fat thickness for Choice No. 3 and the maximum back fat thickness for Medium would likewise be reduced by 0.2 inch in each weight or length group. The minimum back fat thickness for Medium and the maximum back fat thickness for Cull would be reduced by 0.1 inch.

For barrows and gilts and carcasses thereof, the grade designations "Choice No. 1", "Choice No. 2", and "Choice No. 3" would be changed, respectively, to "U. S. No. 1", "U. S. No. 2", and "U. S. No. 3". The Medium and Cull grade names for barrows and gilts and carcasses thereof would remain unchanged.

Minor changes would also be made in the descriptive specifications for each grade to facilitate their interpretation and to coincide with the changes in back fat thickness.

Pork carcasses. 1. Section 53.142 would be amended to read as follows:

§ 53.142 *Application of standards for grades of barrow and gilt carcasses.* (a) Differences in barrow and gilt carcasses due to sex condition are minor, and the grade standards are equally applicable for grading both classes.

(b) Barrow and gilt carcasses are graded primarily on the basis of (1) differences in yields of lean cuts and of fat cuts, and (2) differences in quality of cuts. These factors vary rather uniformly and consistently from one grade to another. The U. S. No. 1 grade combines an optimum ratio of lean to fat with quality characteristics indicative of acceptable palatability. U. S. No. 2 and U. S. No. 3 grades have higher degrees of finish with resulting lower yields of lean cuts and higher yields of fat cuts than U. S. No. 1 grade. In addition, the cuts from U. S. No. 2 and U. S. No. 3 grades have more internal fat remaining after trimming of external fat than do the cuts from U. S. No. 1 grade carcasses. Medium grade carcasses have a lower degree of finish and a resulting higher ratio of lean to fat than U. S. No. 1, U. S. No. 2, and U. S. No. 3 grades; however, Medium grade carcasses are underfinished and lack the quality characteristics associated with acceptable palatability as evidence by a lack of firmness and indications of little or no marbling in the lean. Cull grade carcasses are decidedly underfinished and the pork is soft and watery with no visible marbling. Only carcasses with the firmness appropriate to their degree of finish are included under the standards described in this part. However, carcasses which are typically soft or oily as a result of feeds producing soft or oily fat may be graded in accordance with these standards provided they are specially identified as soft or oily along with the grade.

(c) Measurements of average back fat thickness in relation to carcass weight or length are closely related to yields of cuts and the quality of the cuts. The following table of measurements provides an objective guide in determining the barrow and gilt carcass grades.

WEIGHT AND MEASUREMENT GUIDES TO GRADES FOR BARROW AND GILT CARCASSES

Carcass weight or carcass length [1]	Average back fat thickness (inches)[2] by grade				
	U. S. No. 1	U. S. No. 2	U. S. No. 3	Medium	Cull
Under 120 pounds or under 27 inches.	1.2 to 1.5	1.5 to 1.8	1.8 or more	0.9 to 1.2	Less than 0.9.
120 to 164 pounds or 27 to 29.9 inches.	1.3 to 1.6	1.6 to 1.9	1.9 or more	1.0 to 1.3	Less than 1.0.
165 to 209 pounds or 30 to 32.9 inches.	1.4 to 1.7	1.7 to 2.0	2.0 or more	1.1 to 1.4	Less than 1.1.
210 or more pounds or 33 or more inches.	1.5 to 18	1.8 to 2.1	2.1 or more	1.2 to 1.5	Less than 1.2

[1] Either carcass weight or length may be used with back fat thickness as a reliable guide to grade. The table shows the normal length range for given weights. In extreme cases where the use of length with back fat thickness indicates a different grade than by using weight, final grade is determined subjectively as provided in the standards. Carcass weight is based on a chilled, packer style carcass. Carcass length is measured from the forward point of the aitch bone to the forward edge of the first rib.

[2] Average of measurements made opposite the first and last ribs and last lumbar vertebra.

(d) The standards for grades of barrow and gilt carcasses include carcass measurements and descriptions of carcass characteristics which indicate the lean and fat yields and imply the quality of meat typical of the minimum degree of finish of each grade. Visual estimates of fat thickness normally alleviate the necessity for measuring carcasses in the grading operation. In addition to the measurement guides to grade differences, the standards also provide the basis for consideration of other characteristics. While carcass measurements furnish a reliable general guide to grade, the final grade of borderline carcasses may vary from that indicated by measurements due to consideration of other characteristics such as visual evidences of quality; meatiness; conformation of hams, loins, bellies, and shoulders; and fat distribution. However, application of these additional factors is limited to borderline carcasses, and in no case may the final grade be more than one-half of the width of a grade different than that indicated by carcass measurements. The standards describe carcasses typical of each grade and no attempt is made to describe the nearly limitless number of combinations of characteristics that may qualify a carcass for a particular grade.

2. Section 53.143 would be amended to read as follows:

§ 53.143 *Specifications for official United States standards for grades of barrow and gilt carcasses*—(a) *U. S. No. 1 grade.* Carcasses in this grade have near the minimum degree of finish required for the production of acceptable quality cuts. Meatiness based on yield of lean cuts in relation to carcass weight is slightly high; yield of fat cuts is slightly low. The ratio of total lean and fat to bone is slightly high. Carcasses possessing the minimum finish for U. S. No. 1 grade are slightly wide and moderately long in relation to weight. The back and loins are moderately full and

thick with a well-rounded appearance. Hams are usually moderately thick, plump, and smooth and are slightly full in the lower part toward the hocks. Bellies are moderately long and smooth, slightly thick, and moderately uniform in thickness; the belly pocket is slightly thick. Shoulders are slightly thick and full but usually blend smoothly into the sides. The carcass is moderately well-balanced and smooth with moderately uniform development of the various parts. There are moderate quantities of interior fat in the region of the pelvis, a slightly thin but fairly extensive layer of fat lining the inside surface of the ribs, and a slightly small quantity of feathering. The flesh is firm. Both exterior and interior fats are firm, white, and of excellent quality. Carcasses with fat thickness typical of the thinner one-half of the U. S. No. 1 grade but with the firmness, quantity and distribution of interior fats, and belly thickness typical of the Medium grade shall be graded Medium. Carcasses with fat thickness typical of the fatter one-half of the U. S. No. 1 grade but with the fat distribution, meatiness, and thickness and fullness of hams, loins, shoulders, and bellies typical of the U. S. No. 2 grade shall be graded U. S. No. 2.

(b) *U. S. No. 2 grade.* Carcasses in this grade have a higher degree of finish than the minimum required for the production of acceptable quality cuts. Meatiness based on yield of lean cuts in relation to carcass weight is slightly low; yield of fat cuts is slightly high. The ratio of total lean and fat to bone is moderately high. Carcasses with the minimum finish for U. S. No. 2 grade are moderately wide and slightly short in relation to weight. The back and loins are full and thick and appear fuller near the edges than at the center. Hams are usually thick, plump, and smooth and are moderately full in the lower part toward the hocks. Bellies are moderately thick, smooth, slightly short, and rather uniform in thickness; the belly pocket is moderately thick. Shoulders are moderately thick and full but usually blend smoothly into the sides. The carcass is well-balanced and smooth with rather uniform development of the various parts. There are slightly large quantities of interior fat in the region of the pelvis, a slightly thick and moderately extensive layer of fat lining the inside surface of the ribs, and moderate feathering. The flesh is firm. Both exterior and interior fats are firm, white, and of excellent quality. Carcasses with fat thickness typical of the thinner one-half of the U. S. No. 2 grade but with the fat distribution, meatiness, and thickness and fullness of hams, loins, shoulders, and bellies typical of the U. S. No. 1 grade shall be graded U. S. No. 1. Carcasses with fat thickness typical of the fatter one-half of the U. S. No. 2 grade but with the fat distribution, meatiness, and thickness and fullness of hams, loins, shoulders, and bellies typical of the U. S. No. 3 grade shall be graded U. S. No. 3.

(c) *U. S. No. 3 grade.* Carcasses in this grade have a decidedly higher degree of finish than the minimum required for the production of acceptable quality cuts. Meatiness based on yield of lean cuts in relation to carcass weight is low; yield of fat cuts is high. The ratio of total lean and fat to bone is high. Carcasses with the minimum finish for U. S. No. 3 are wide and short in relation to weight. The back and loins are very full and thick and appear especially full near the edges. Hams are usually thick, very plump, and smooth and are full in the lower part toward the hocks. Bellies are short, thick, smooth, and uniform in thickness; the belly pocket is thick. Shoulders are thick and full but usually blend smoothly into the sides. The carcass is well-balanced and smooth with uniform development of the various parts. There are large quantities of interior fat in the region of the pelvis, a moderately thick and extensive layer of fat lining the inside surface of the ribs, and slightly abundant feathering. The flesh is firm. Both exterior and interior fats are firm, white, and of excellent quality. Carcasses with nearly minimum fat thickness for the U. S. No. 3 grade but with the fat distribution, meatiness, and thickness and fullness of hams, loins, shoulders, and bellies typical of the. U. S. No. 2 grade shall be graded U. S. No. 2.

(d) *Medium grade.* Carcasses in this grade have a lower degree of finish than the minimum required for the production of acceptable quality cuts. Yield of lean cuts in relation to carcass weight is moderately high; yield of fat cuts is moderately low. The ratio of total lean and fat to bone is moderately low. Carcasses with the minimum finish for Medium grade are rather narrow and long in relation to weight. The back and loins are rather thin and deficient in fullness and slope away from the center toward the sides. Hams are usually slightly thin and lacking in plumpness and taper slightly toward the hocks. Bellies are moderately thin, long, slightly wrinkled, and moderately uneven in thickness; the belly pocket is moderately thin. Shoulders tend to be thin and flat but often show prominence at the junction with the sides. The carcass tends to be uneven and rough with slightly irregular development of the various parts. There are slightly small quantities of interior fat in the region of the pelvis, a scanty and incomplete layer of fat lining the inside surface of the ribs, and only a small quantity of feathering. Both exterior and interior fats are moderately soft, white to creamy white, and of low quality. The flesh is moderately soft and has little evidence of marbling. Carcasses with the fat thickness typical of the fatter one-half of the Medium grade but with the firmness, quantity and distribution of interior fats, and belly thickness typical of the U. S. No. 1 grade shall be graded U. S. No. 1. Carcasses with the fat thickness typical of the thinner one-half of the Medium grade but with the firmness, quantity and distribution of interior fats, and belly thickness typical of the Cull grade shall be graded Cull.

(e) *Cull grade.* Carcasses in this grade have a considerably lower degree of finish than the minimum required for the production of acceptable quality cuts, and most cuts are suitable only for processing. Yield of lean cuts in relation to carcass weight is high; yield of fat cuts is low. The ratio of total lean and fat to bone is low. Carcasses with the degree of finish typical of the Cull grade are narrow and long in relation to weight. The back and loins are thin and decidedly lacking in fullness and have a definite slope away from the center toward the sides. Hams are usually thin, flat, and wrinkled, and show a definite taper toward the hocks. Bellies are very long, thin, wrinkled, and uneven in thickness; the belly pocket is very thin. Shoulders are thin and flat but often prominent at the junction with the sides. The carcass is uneven and rough with irregular development of the various parts. There are only small quantities of interior fat in the region of the pelvis and little or no fat as lining on the inside surface of the ribs or as feathering between the ribs. Both exterior and interior fats are soft, creamy white to white, and of low quality. The flesh is soft and watery and has no evidence of marbling. Carcasses with nearly maximum fat thickness for the Cull grade but with the firmness, quantity and distribution of interior fats, and belly thickness typical of the Medium grade shall be graded Medium.

Swine. 1. Section 53.151 would be amended to read as follows:

§ 53.151 *Slaughter swine classes.* There are five classes of slaughter swine—barrows, gilts, sows, stags, and boars—defined as follows:

(a) *Barrow.* A barrow is a male swine castrated when young and before development of the secondary physical characteristics of a boar.

(b) *Gilt.* A gilt is a young female swine that has not produced young and has not reached an advanced stage of pregnancy.

(c) *Sow.* A sow is a mature female swine that shows evidence of having reproduced or has reached an advanced stage of pregnancy.

(d) *Stag.* A stag is a male swine castrated after development or beginning of development of the secondary physical characteristics of a boar. Typical stags are somewhat coarse and lack balance—the head and shoulders are more fully developed than the hindquarter parts, bones and joints are large, the skin is thick and rough, and the hair is coarse.

(e) *Boar.* A boar is an uncastrated male swine.

2. Section 53.152 would be revised to appear as follows:

§ 53.152 *Application of standards for grades of slaughter barrows and gilts.* (a) In the barrow and gilt classes, sex condition has exerted little effect on secondary physical characteristics, and barrows and gilts are treated as a single class in marketing and for standardization purposes. Therefore, the grade standards are equally applicable to both slaughter barrows and gilts.

(b) The standards are based on the standards for grades of barrow and gilt carcasses. The two major factors forming the bases for the grades are (1) differences in yield of lean cuts and of fat cuts, and (2) differences in quality of cuts. There are rather consistent variations in these characteristics from one grade of barrows and gilts to another. U. S. No. 1 grade barrows and gilts have about the minimum finish required to produce pork cuts of acceptable quality in which the lean is firm and has sufficient marbling, or fat interspersed within the lean, to result in the tenderness, juiciness, and flavor associated with desirable palatability. U. S. No. 2 grade barrows and gilts are overfinished and U. S. No. 3 grade barrows and gilts are decidedly overfinished in relation to the minimum finish required for the production of cuts of acceptable quality; yields of lean are lower and yields of fat are higher in these grades than in U .S. No. 1 grade. Medium grade barrows and gilts are underfinished, and although the ratio of lean to fat is higher than in U. S. No. 1 grade, the lean is soft and has little or no marbling. Cull grade barrows and gilts are decidedly underfinished and the pork is soft and watery with no visible evidence of marbling in the lean.

(c) Application of the standards requires an accurate appraisal of the live animal characteristics which indicate the grade. The standards describe the characteristics of typical animals having the minimum degree of finish for each grade. No attempt is made to describe the numerous combinations of characteristics that may qualify an animal for a specific grade, and making appropriate compensations for varying combinations requires the use of sound judgment.

(d) The general limits of grades for barrows and gilts are determined by degree of finish, but other factors are considered in certain cases to accomplish further refinement of the grades. Animals at the borderlines between grades with respect to degree of finish are graded by consideration of meatiness as evidenced by thickness and fullness (fat covering considered) of hams, loins, shoulders, and bellies; apparent firmness of fleshing; and distribution of fat covering. The application of these compensating factors is limited to borderline cases between grades, and in no case is the final grade of an animal more than one-half the width of a grade different than that indicated by apparent degree of finish.

3. Section 53.153 would be amended to read as follows:

§ 53.153 *Specifications for official United States standards for grades of slaughter barrows and gilts*—(a) *U. S. No. 1 grade.* Slaughter barrows and gilts in this grade have an intermediate degree of finish. Hogs of the minimum finish for U. S. No. 1 are moderately wide over the top, and width of body over the top appears nearly equal to that at the underline. The back, from side to side, is moderately full and thick and usually appears well-rounded and blends smoothly into the sides. Width through the hams is usually nearly equal to width through the shoulders. The sides are moderately long, slightly thick, and usually smooth; the flanks are slightly thick and full. Depth at the rear flank may be slightly less than depth at the fore flank. Hams tend to be moderately thick and full with a slightly thick covering of fat. Jowls are moderately full and thick but are usually trim. Barrows and gilts in this grade produce U. S. No. 1 carcasses. Barrows and gilts with apparent degree of finish typical of the fatter one-half of the U. S. No. 1 grade but with the evidences of meatiness, firmness of fleshing, and distribution of finish more nearly typical of the U. S. No. 2 grade shall be graded U. S. No. 2.

(b) *U. S. No. 2 grade.* Slaughter barrows and gilts in this grade have a moderately high degree of finish. Hogs of the minimum finish for U. S. No. 2 are wide over the top, and width of body appears slightly greater over the top than at the underline. The back, from side to side, is full and thick and often appears slightly flat with a noticeable break into the sides. Width may be slightly greater through the shoulders than through the hams. The sides are slightly short, moderately thick, and smooth; the flanks are moderately thick and full. Depth at the rear flank is nearly equal to depth at the fore flank. Hams tend to be thick and full with a moderately thick covering of fat, especially over the lower part. Jowls are usually full and thick, and the neck appears rather short. Barrows and gilts in this grade produce U. S. No. 2 carcasses. Barrows and gilts with apparent degree of finish typical of the fatter one-half of the U. S. No. 2 grade but with the evidences of meatiness, firmness of fleshing, and distribution of finish more nearly typical of the U. S. No. 1 grade shall be graded U. S. No. 1.

(c) *U. S. No. 3 grade.* Slaughter barrows and gilts in this grade have a high degree of finish. Hogs possessing the minimum finish for U. S. No. 3 are very wide over the top, and width of body appears somewhat greater over the top than at the underline. The back, from side to side, is very full and thick and often appears nearly flat with a pronounced break into the sides. Width may be greater through the shoulders than through the hams. The sides are short, thick, and smooth; the flanks are thick and full. Depth at the rear flank is equal to depth at the fore flank. Hams tend to be very thick and full with a thick covering of fat, especially over the lower part. Jowls are very thick and full, and the neck appears short. Barrows and gilts in this grade produce U. S. No. 3 carcasses. Barrows and gilts with apparent degree of finish near the minimum for U. S. No. 3 grade but with evidences of meatiness, firmness of fleshing, and distribution of finish more nearly typical of the U. S. No. 2 grade shall be graded U. S. No. 2.

(d) *Medium grade.* Slaughter barrows and gilts in this grade have a low degree of finish. Hogs of the minimum finish for the grade are moderately narrow over the top, and width over the top appears less than at the underline. The back, from side to side, is slightly thin and appears rather peaked at the center, especially at and immediately behind the shoulders, with a distinct slope toward the sides. Hips may appear slightly prominent. Width may be slightly less through the shoulders than through the hams. The sides are long, moderately thin, and wrinkled; the flanks are thin. Depth at the rear flank is less than depth at the fore flank. Hams tend to be thin and flat with a slight taper toward the shanks. Jowls are usually slightly thin and flat, and the neck appears rather long. Barrows and gilts in this grade produce medium grade carcasses.

(e) *Cull grade.* Slaughter barrows and gilts in this grade have a very low degree of finish. Hogs with the fleshing typical of the grade are narrow over the top, and width of body appears somewhat less over the top than at the underline. The back, from side to side, is thin, lacks fullness, and appears peaked at the center with a decided slope toward the sides. The hips are prominent. Width may be somewhat less through the shoulders than through the hams. The sides are very long, thin, and wrinkled; the flanks are very thin. Depth at the rear flank is considerably less than depth at the fore flank. Hams are very thin and flat with a decided taper toward the shanks. Jowls are usually thin and flat, and the neck appears long. Barrows and gilts in this grade produce Cull grade carcasses.

Any interested person who wishes to submit written data, views, or arguments concerning the proposed amendments may do so by filing them with the Director of the Livestock Division, Agricultural Marketing Service, U. S. Department of Agriculture, Washington 25, D. C., within 30 days after publication of this notice in the FEDERAL REGISTER.

Done at Washington, D. C., this 19th day of April 1955.

[SEAL] ROY W. LENNARTSON,
Deputy Administrator,
Agricultural Marketing Service.

[7 CFR Part 965]

[Docket No. AO-166-A19]

MILK IN CINCINNATI, OHIO, MARKETING AREA

DECISION WITH RESPECT TO PROPOSED MARKETING AGREEMENT AND PROPOSED ORDER, AS AMENDED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), a public hearing was conducted at Cincinnati, Ohio, on January 11, 12, and 13, 1955, pursuant to notice thereof issued January 7, 1955 (20 F. R. 179).

Upon the basis of the evidence introduced at the hearing and the record thereof, the Deputy Administrator, Agricultural Marketing Service on April 7, 1955, filed with the Hearing Clerk, United States Department of Agricul-

ture, his recommended decision in this proceeding. The notice of filing such recommended decision and opportunity to file written exceptions thereto was published in the FEDERAL REGISTER on April 9, 1955 (20 F. R. 2313; F. R. Doc. 55-2946).

Ruling on exceptions. Within the period reserved for filing exceptions, to the recommended decision, exceptions were submitted on behalf of certain producers and handlers. These exceptions have been fully considered. To the extent to which the findings and conclusions of this decision are at variance with the exceptions, such exceptions are hereby overruled.

The material issues of record relate to:

(1) Adoption of a "withholding" and "pay-back" method of distributing among producers the proceeds from the sale of their milk to handlers.

(2) Reclassification of certain milk products now included in Class II, Class III, and Class IV milk.

(3) Revision of the formulas for pricing Class III milk and Class IV milk.

(4) Modification of the Class I and Class II price differentials (over the basic formula price) to eliminate seasonal price changes; and revision of the automatic supply-demand "adjustor" (affecting Class I and Class II price levels).

(5) Revision of the location adjustments applicable at pool plants supplying milk to distributing plants (fluid milk plants) which service the marketing area.

(6) Modification of butterfat differentials to handlers as a corollary to changes in class prices.

(7) Adoption of definitions of "dairy farmer" and "producer-handler."

(8) Revision of the butterfat differential to producers for administrative purposes.

(9) The emergency nature of marketing conditions.

Revisions of the price formulas for Class III and Class IV milk on a temporary basis (for the month of March 1955 only) were adopted in a decision issued on February 17, 1955, by the Assistant Secretary of Agriculture. Such revised formulas became effective on March 1, 1955. It was determined also in such decision that all other issues, including any consideration of Class III and Class IV milk pricing on a longer-term basis, should be submitted to interested parties for exceptions prior to final consideration and issuance. Such opportunity for exceptions was provided by the recommended decision.

Findings and conclusions. The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

(1) The returns to producers should be seasonally adjusted to provide additional price incentive for increased production of milk in the fall and winter months and a lower level of production in the spring and summer months.

Producer organizations proposed that the uniform price per hundredweight to producers be decreased by deducting 20 cents in April, 35 cents in May and June, and 30 cents in July. The monies accruing from such deductions from the price would be held in reserve for payment to producers during the months from September through January next following. One-eighth of the amount held in reserve would be returned to producers by addition to the uniform price for each of the months of September and January and one-fourth of such reserve would be added to the uniform price for each of the months of October, November, and December. As a corollary change the seasonal variations in the Class I price differential which occur twice a year, in April and August, would be eliminated and a single price differential for such class would be effective throughout the year.

The purpose of the provision is to widen the seasonal variation in uniform prices to producers between the period of seasonally highest production and the months of lowest seasonal production, thus to encourage a seasonal shift in milk deliveries to accommodate the need for a relatively even market supply of milk throughout the year. The record indicates that, typically, an average of 1.46 million pounds of milk were received daily from regular producers in May 1954 but that by November such receipts had dropped to 1.09 million pounds per day. Although the seasonal variation in the supply of producer milk has narrowed considerably during recent years, the variation is still sufficient to cause serious problems in the disposition of the seasonal reserve supply during the spring and summer. Any reduction in the seasonal level of supplies during such months is desirable because it will reduce the problem of disposing of milk which is excess to the needs of the market for inspected milk. The wider seasonal variation in returns should provide further encouragement to producers for increasing their production when returns are high and to reduce production when returns are low.

In certain of the larger markets with which Cincinnati competes for supplies, systems highly similar to that adopted for Cincinnati are used for adjusting uniform prices to producers on seasonal basis. The wider seasonal variation to be effected by the plan herein adopted should result in an improved seasonal relationship throughout the year between producer prices in Cincinnati and such competing markets.

It is concluded that the amount per hundredweight of producer milk to be retained should be 30 cents in April, 35 cents in May and June, and 20 cents in July. The total amount so retained should be divided so as to return to producers one-fourth of the total amount in each of the months of August through November. These rates of withholding and disbursement do not correspond precisely with the rates suggested by proponents. However, an analysis of the supply data indicates that a greater stimulus to the desired production pattern may be effected by making the rate of deduction somewhat higher for the period just prior to the peak of the flush season and by starting payments from the reserve fund to producers somewhat in advance of the months of lowest production. It may be noted, for example, that payments for April milk are received by producers at approximately the time of the production peak. Thus, it would appear that a given rate of deduction on April milk would be more effective in discouraging high production in the spring than a similar rate applied to July milk. Also, producers do not receive payment for September milk until more than half of the month of October has passed, i. e., immediately prior to the date of lowest seasonal production. It would appear that greater stimulation to shift the seasonal production pattern of supply will be afforded by revising the rates of deduction suggested for April and July by proponents and by a somewhat earlier disposition of the fund. Under such a plan payments out of the fund should begin with respect to August deliveries for which payment is made on the 20th day of September.

(2) The classification provisions of the order should be revised.

Eight proposals, as summarized below, were presented involving the classification of various products of milk.

Producer groups proposed, in essence, that milk, skim milk, and cream disposed of as plain, or sweetened, condensed and evaporated milk, animal feed, spray process and roller process nonfat dry milk solids, milk and skim milk dumped and spilled, and inventory variations other than Class III, be reclassified to Class IV from Class III milk.

One handler proposed that (1) all milk used to produce cheddar cheese, ice cream, ice cream mix, frozen cream, and frozen desserts, be reclassified from Class III to Class IV milk.

Certain other handlers proposed that (1) all milk, skim milk, and cream disposed of as cultured sour cream be reclassified from Class II to Class III milk, and (2) all milk, skim milk, and cream disposed of as plain, or sweetened, condensed and evaporated milk, and as spray and roller process nonfat milk solids be classified as Class IV instead of Class III milk.

The Dairy Division, Agricultural Marketing Service, proposed that, in view of the above proposals by producers and handlers, the entire classification structure of the market be reviewed.

Class I milk should include all milk and butterfat (1) disposed of in fluid form as milk, skim milk, flavored milk, milk drink, and buttermilk; (2) used to produce concentrated milk (except those products commonly known as evaporated milk and condensed milk); (3) disposed of in the form of fluid sweet or cultured sour cream, whipped cream, any product in fluid form containing 8 percent or more of butterfat not specified in Class II or Class III milk (excluding any mixture disposed of in containers or dispensers under pressure for the purpose of dispensing a whipped or aerated product), and eggnog; and (4) butterfat shrinkage from producers' milk in excess of 2.5 percent of such milk. This classification differs from that currently in the order in that buttermilk and items specified in (3) above have been added to Class I milk.

Testimony introduced into the record states that health regulations require the use of Grade A milk for those products added to Class I when such products are sold within the city of Cincinnati. In addition, these products are sold on a year-round basis and compete for the supply of inspected milk with other items which require milk of similar quality and have been included in Class I milk in the past. In view of the above these products should be included in Class I to return to the producers a price commensurate with their use value and in order that they will carry their proportionate share of the costs of inducing an adequate supply of Grade A milk for all purposes for which this type of milk is required.

Although some opposition to the reclassification of cream to Class I milk was expressed at the hearing, it may be noted that such reclassification will increase handlers' costs only 45 cents per hundredweight of 40 percent cream, or $0.00241 per half-pint, since the price applicable to the butterfat component (through the butterfat differential) which represents the major factor in the cost of such product to handlers already is identical to that applicable to Class I milk.

This conclusion disposes also of the proposal that milk used for "cultured sour cream" be reclassified from the present Class II to present Class III milk. Attention is called to the decision of the Assistant Secretary dated June 9, 1954 which states, "Local health regulations require that sour cream be made from milk produced and handled in full compliance with these regulations—the same quality of milk as is required for cream for fluid consumption. The only available source of milk of this quality has been from producers as defined in the Cincinnati order, except in times of milk shortages when health authorities have permitted limited amounts of other milk to be used for short periods of time for this and other fluid uses. Thus, the market requirements for milk for sour cream are regularly supplied with producer milk. This use of milk should carry its share of the burden of maintaining producer milk supplies at a level sufficient to meet market requirements." Evidence presented at the hearing on January 11, 12, and 13, 1955 was essentially the same as the evidence presented at the hearing in 1954 upon which the decision of June 9, 1954, was based. The proponent handler, who is the primary processor of cultured sour cream in the market, stated that he would buy only milk of high quality for this use regardless of applicable health requirements. Although proponent indicated instances of competition with cultured sour cream originating in other markets, the testimony on this point is vague. It is concluded therefore that the record does not support the inclusion of cultured sour cream in a class lower than sweet cream.

Similar reasoning may be applied to the classification of eggnog and whipped cream; therefore, these products should be included in Class I milk also.

Class II milk as revised should include all skim milk and butterfat used to produce (1) ice cream, ice cream mix, frozen desserts, milk (or skim milk) and cream mixtures testing more than 8.0 percent butterfat in fluid form disposed of in containers or dispensers under pressure; (2) cottage cheese; and (3) inventories of fluid products items. This classification differs from that currently in the order in that skim milk and butterfat used for eggnog have been reclassified from the present Class III to Class I milk as stated above, and in that milk used for condensed milk (or skim milk), frozen cream, evaporated milk, cheese (other than cottage cheese), nonfat dry milk solids, margarine, animal feed, and dumped and spilled milk have been reclassified from the present Class III to the new Class III milk.

Class II milk, as adopted, is made up of milk products that have common characteristics from the points of view of use and competitive conditions. In the main these items, as well as Class I products, require year-round supply of inspected milk for a substantial portion of the market and are therefore different from items included in the lower-priced Class III milk. All are of a perishable nature but may be stored considerably longer than the items which make up Class I milk. The use of Grade A inspected milk is required for most products of Class II milk sold within the city limits of Cincinnati. Testimony introduced into the record indicated, however, that within the periphery of the city limits of Cincinnati, there are three municipalities, Norwood, Elmwood Place, and St. Bernard, which have separate corporate identities. Health regulations for the city of Cincinnati do not apply in these three municipalities; nor do these health regulations apply to the sales territory adjacent to Cincinnati and within the defined marketing area which is regularly covered by handlers manufacturing ice cream whose plants are located in Cincinnati.

Handlers who make ice cream or cottage cheese and who use Grade A inspected milk compete on sales made within the city limits only with other handlers who likewise purchase inspected milk for this use. With respect to such business all handlers are on a similar competitive basis in the purchase of their supplies. It is recognized, however, that such handlers have competition in other parts of the marketing area and in adjacent areas from manufacturers who are not required to use Grade A milk. Evidence introduced into the record indicated that as to ice cream this competition comes from ice cream manufacturers located in Dayton and Columbus, Ohio, and Louisville, Kentucky, among others. Official notice is taken of the fact that the 1950 population of Cincinnati was about 504,000 while that of Hamilton County (the order marketing area) for the same date was about 724,000. In addition, the ice cream sales distribution area of handlers extends considerably beyond Hamilton County. This indicates that a considerable portion of the ice cream sales by Cincinnati handlers are in areas where there is definite competition from unregulated ice cream manufacturers. One manufacturer testified, for example, that 40 percent of his sales were in the city of Cincinnati and that 60 percent were in surrounding territory.

Because of this competition from manufacturers who may use uninspected milk for their products, it would be unrealistic to include ice cream and other Class II products in the same price classifications as milk utilized for Class I purposes, even though the use of Grade A inspected milk is required for such product within Cincinnati. To do so would place Cincinnati manufacturers in an unfavorable competitive position in a large part of their sales territory and would result in the loss of a considerable market for producers' milk.

Because of the concentrated nature of cottage cheese as compared with milk supplied for fluid use, outlying plants that are qualified, from a health standpoint, to supply milk to the city of Cincinnati can ship cottage cheese into the market at a considerable saving over the cost of shipping whole milk which would otherwise be required for the processing of these products. The classification and pricing of cottage cheese should not be such as to increase the price appreciably above the level at which it could be, and sometimes is, obtained elsewhere in processed form since to do so would place undue burden upon the marketing of producer milk with possible disruptive effect upon the market.

At the same time, the products covered by Class II milk should be placed in a higher price classification than those products in Class III milk. With the exception of milk utilized to process whipped cream substitutes, handlers require a regular supply of inspected milk for such products on a year-round basis even though a portion of the products must be disposed of in open competition with similar products made in other nearby areas. It may be noted further that cream and other milk ingredients of ice cream which would be suitable for Cincinnati handlers can be obtained from outside inspected sources only at a price considerably above the price level of manufacturing milk. If handlers choose to utilize producer milk for the processing of whipped cream substitutes, the return to producers should be somewhat greater than for milk which represents an extra reserve supply and does not require delivery to the marketing area for processing. There would appear to be no reason why milk from regular producers for the Cincinnati market used for any of such purposes should be classified strictly on a manufacturing basis.

Inventories are placed in Class II milk but should be limited to stocks on hand of bulk milk, skim milk, and cream and bottled milk and other fluid items in Class I milk. Processed products in Class I (such as cultured sour cream) and those in Class II and Class III milk should not be included in inventory since the milk used to produce such products will have been accounted for in the proper class.

Because inventories of fluid items are to be accounted for in Class II, it is necessary to provide a method for handling producer milk in inventory which is utilized in the current month for Class I purposes, but which the handler accounted for in Class II at the end of the preceding month. An additional fac-

tor to be considered is that handlers frequently use other source milk in their operations. Producer milk from inventory should have prior claim on Class I milk over current receipts of other source milk. This should be accomplished by considering the opening inventory of a month as a receipt in the same month and subtracting such receipt (under allocation procedure), in series, starting with Class II milk, following the subtraction of other source milk. To the extent that the opening inventory is allocated to Class I and there was an equivalent amount of producer milk classified in Class II in the previous month (after allocating other source milk) a reclassification charge should be made at the difference between the Class II price in the previous month and the Class I price in the current month. This will result in equity of cost of milk among handlers and returns to producers irrespective of whether or not such producer milk is from the opening inventory or is a current receipt. This change will greatly simplify the accounting procedures for handling inventory without increasing costs to handlers. The proposed system should be easier to administer and should reduce the reporting requirements on handlers.

Class III milk should include all milk and butterfat (1) used to produce plain, or sweetened, condensed milk or evaporated milk in bulk or in hermetically sealed cans, nonfat dry milk solids, and margarine; (2) used to produce cheese (not including cottage cheese), frozen cream, and butter; (3) specifically accounted for as dumped and spilled; (4) in milk, skim milk, and cream disposed of in bulk during March through August for commercial food processing; and (5) in butterfat shrinkage up to 2.5 percent of total receipts of butterfat in producer milk and shrinkage of butterfat in other source milk. Such classification differs from that currently in the order in that all such products, except butter, have been reclassified into the lowest price class of the market.

This classification structure puts into Class III all products which are essentially outlets for extra reserve supplies of milk. Within the Cincinnati milkshed milk is used for all such products at some time during the flush season. For the most part these products do not represent normal requirements of the market and do not require a supply of inspected milk. Also, there are no health regulations governing the type of milk to be used for the products of Class III milk while the milk used for products in the other classes must be Grade A inspected to the extent already described. Further, products such as butter, nonfat dry milk solids, and cheese are manufactured and sold on a nationwide basis wherever produced, and are priced on the basis of central markets. Consequently, if milk is to be utilized for these products during the season when the local milk supply is in excess of normal market needs, the pricing classification must be in line with that of manufacturing milk in other areas. It is appropriate, therefore, that such products be grouped into a separate price classification.

The inclusion of bulk condensed milk (or skim milk) and frozen cream in this class should encourage handlers to convert producer milk into these products for later use in ice cream, ice cream mix, and frozen desserts which are included in Class II milk. However, if, in a later month such Class III milk products, regardless of source, are allocated to Class II milk a "reclassification" charge should be applied to insure equity of cost among handlers for Class II milk. Such a charge is provided in the order.

(3) The price formulas for Class II and Class III milk as defined above should be revised.

Producer groups proposed that Class IV milk (as presently defined) be priced the same as present Class III milk for the months of September through February and be priced at a lower level for the months of March through August. A handler proposed a dual pricing structure for milk used to produce ice cream and related products, i. e., milk so used would be priced at one level if sold within the city of Cincinnati and at a different level if disposed of outside the city. An alternative proposal by the same proponent would price all milk used to produce ice cream at the price level of milk sold by dairy farmers to local condenseries. It was further proposed that milk used to produce Cheddar cheese be priced at the latter level. Another handler proposed that such Class III milk be priced at the higher of a butter-nonfat dry milk solids formula price or the local condensery price, and that present Class IV milk be priced at the lower of such butter-nonfat dry solids formula price or the local condensery price.

One proponent of a lower price for milk used as ice cream contended that handlers are placed at a competitive disadvantage in the sale of ice cream outside Cincinnati on the basis that they are forced to pay a higher price than their competitors who use ungraded milk for this purpose. It was further contended that because of proponent's present unfavorable competitive position in purchasing milk, ice cream sales have been lost and returns to Cincinnati producers thereby have been reduced. Testimony offered in opposition to the proposal contended that any lowering of the price of milk used to manufacture ice cream would reduce the uniform price and consequently would create added pressure on Class I prices.

Revised Class II milk, as in the case of Class I milk, represents year-round usage of producer milk. However, ice cream and cottage cheese, the principal products of Class II milk, while requiring Grade A milk for manufacture and sale within the city of Cincinnati, need not be made from such quality of milk to be sold in other parts of the marketing area and is found in competition with similar products made from ungraded milk when sold in the segment of the marketing area which lies outside the city.

Because of these factors milk used for ice cream and cottage cheese should be priced independently from the other classes of milk. Under current competitive sales conditions milk used for such products should be priced lower than milk used for Class I products; on the other hand, since they require a year-round supply of inspected milk in a major portion of the marketing area, they should be regarded as a regular rather than a distress use of milk and therefore should be priced somewhat above the prevailing price for milk for manufacturing purposes.

The suggestion that the price for milk for ice cream should be the same as the average of prices paid by local condenseries does not take recognition of the fact that, because of the city health regulations, Cincinnati handlers, must use inspected milk for ice cream sold within the city. It might well be argued that if milk used to produce ice cream for sales within the city of Cincinnati alone was to be considered, the price should be the same as that for Class I milk.

It may be noted also that proponents on inquiry agreed that the price paid to Cincinnati producers for milk used in ice cream, even when disposed of outside the city, should not be less than the cost of obtaining the required ingredients from other sources. The price formula for 3.5 percent milk adopted in this decision when adjusted by the class butterfat differential to the appropriate test is believed to be one which will result in an average cost to handlers for mix used in ice cream that is reasonably related to the prices which would be necessary to purchase the ingredients used therein if obtained from alternative sources. Such cost also will be in reasonable alignment with the respective costs of ice cream mix (at appropriate butterfat test) as computed under the provisions of other nearby Federal orders.

In consideration of exceptions to the recommended decision, a further review of the record evidence has been made of the Class II milk price. It is concluded herein that this price should be reduced somewhat from the level previously indicated to assure Cincinnati ice cream manufacturers a reasonable competitive position in relation to those manufacturers who may use ungraded milk for such purposes.

During the flush months of 1954 the total volume of milk going to Class II and Class III uses was, seasonally, the largest in the history of the market. Testimony introduced into the record showed that early in the flush season of 1954, substantial quantities of milk were turned back to cooperatives to be disposed of at any price the cooperatives might be able to obtain through disposal to unregulated plants. Recognition was taken of the fact that the prices then prevailing in the order were at a level that would not permit excess milk to move to normal outlets. In March 1954, the order was revised on a seasonal basis to provide a price for excess milk closely in line with the prevailing price of manufacturing milk. Production during recent months has continued at a relatively high level, indicating that volume of producer milk to be disposed of as excess milk during the flush season this year will be approximately as great as the volume so utilized in the same months of 1954. Although the pricing structure is designed to encourage a more even production pattern, a wide variation in production has been characteristic of the market.

In the interest of orderly marketing, it is concluded that the pricing structure for milk which must be used for the revised category of Class III milk should be so established as to enable such milk to move into manufacturing uses when seasonal excesses of supply exist. This may be accomplished by pricing such milk at the average price paid by local condenseries during the flush production season. It is concluded further that while the latter price should prevail during the flush season, a somewhat higher price (same as Class II price) should prevail during the remainder of the year. This price plan will promote the orderly marketing of excess milk during the flush season but also will encourage handlers to direct producer milk into higher-valued classifications during the short production season when such milk is needed for the various fluid uses, as indicated by the apparent continuing need for supplemental supplies from outside sources in such months. For the same reason the proposal to establish on a year-round basis the local condensery price as the producer price for milk used to produce Cheddar cheese should not be adopted. It is noted that proponents of the latter proposal indicated that the price problem encountered relates primarily to the flush production season.

Attention is called to the fact that basic formula price provision (§ 965.50 (a)) of the order has been changed to reduce the list of "midwest condenseries" contained therein from eighteen to thirteen plants by taking official notice of the fact that the five plants which have been eliminated from the list are no longer in operation.

(4) The Class I price provisions of the order, including the automatic supply-demand adjustor, should be revised.

Producer groups proposed that Class I milk be priced at a differential of $1.30 above the basic formula price on a year-round basis. Under the present order provisions Class I milk is priced at $1.05 above the basic formula during April through July, and $1.35 above the basic formula during August through March.

The Dairy Division, Agricultural Marketing Service, proposed that, in view of the various proposals for reclassification and pricing submitted by interested parties, the whole pricing structure should be reviewed.

The proposal for a uniform year-round Class I differential should be adopted. It does not appear that a seasonal variation of Class I prices will be necessary following adoption of the fall incentive payment plan as discussed elsewhere in this decision. The present system of seasonal pricing was adopted for the purpose of emphasizing the need for less milk in the flush production season of April, May, June, and July and of additional production during those months of the year when production is seasonally low. With the adoption of the fall incentive plan the seasonal variation in payments to producers should be appreciably greater than that provided by the present plan of seasonal variation in Class I prices.

Considerable evidence was introduced into the record on the subject of whether or not the proposed $1.30 Class I differential would constitute a net increase or decrease in the Class I price when compared to the annual weighted average of the seasonal differentials ($1.05 and $1.35) now in effect. It is concluded the proposed differential in conjunction with other changes as described below will result in a Class I price level substantially unchanged on an annual average basis. Such level of Class I differential should be adequate to bring forth a sufficient supply of milk.

Following the filing of exceptions a revision of the Class II milk price and butterfat differential on the basis of the record was made which alters the level of the Class I butterfat differential. The order as contained in the recommended decision has been revised to retain the level of Class I butterfat differential provided by such decision.

The supply-demand adjustment should be revised on a seasonal basis. In the present order three schedules of adjustment rates are provided: one for the months of January, February, March, August, and September; a second schedule for April, May, June, and July; a third for October, November, and December. Under this system considerable variation in Class I prices has resulted, e. g., during 1954 the supply-demand adjustment varied from a plus $0.26 to a minus $0.26, or a total difference of $0.52 per hundredweight of milk. Part, although not all, of this difference was caused by the varying rates provided in the order.

It has been stated that a constant year-round Class I price differential has been adopted to eliminate variations in the Class I price from a seasonal standpoint in view of the alternative fall incentive payment plan discussed herein. Similar reasoning might be applied in connection with supply-demand adjustments since it is planned to accomplish appropriate seasonal variations in uniform prices to producers by the "take out" and "pay back," or fall incentive payment plan.

The supply-demand adjustments are designed to result in automatic changes in Class I prices as market supplies of producer milk change in relation to the quantity of Class I milk sold. In order to provide consistency in the data used to compute the base percentages and to simplify the computations, the disposition of items covered by § 965.41 (a) (1) and (3) is used as the measure of demand. To determine changes in the "supply-demand ratio" from a norm, the percentage of such sales to supplies in a recent two-month period is compared with a "base utilization percentage." Since plus or minus adjustments may reflect variations from seasonally established relationships of supply to demand in the base percentages, the supply-demand adjustment for a given month will be proper only so long as supply conditions and demand conditions continue in the pattern established as "normal." However, "normal" is a relative term and what may be considered appropriate as base percentages at one time may not be considered so at some later date. If either the supply pattern or the demand pattern shift from that established as normal, the supply-demand adjustments will cease to function properly from a seasonal standpoint. The fact that the supply-demand adjustment may result in unusual pluses or minuses to the price for any given month or season does not mean, necessarily, that normal relationships have changed. Such changes from the standard pattern may result from unusual conditions, such as a very late spring or extraordinary pasture for the particular season. However, when it is evident that there is a consistent change in the pattern, it may be assumed that new supply-demand relationships (on a seasonal basis) have developed and that the prior base percentages which had been considered normal no longer will give satisfactory results.

Such a situation appears to have developed in the Cincinnati market. As a result of an increased rate of production in the winter months and a relatively smaller increase in the spring and summer months (the flush season), seasonal variations in production have decreased rapidly during the past four years. This may be simply illustrated in the table below:

PRODUCER RECEIPTS: PERCENT OF VARIATION FROM ANNUAL AVERAGE (BASED UPON DAILY RECEIPTS)

		1951	1952	1953	1954
May, June, July	Above average by	Percent 29	Percent 22	Percent 20	Percent 12
December, January, February	Below average by	18	15	12	8

The shifting seasonal production pattern may be shown also by the relationship of production in the month of lowest supply to the month of highest supply. During the past four years this relationship (percentage-wise) has been: 1951, 52 percent; 1952, 61 percent; 1953, 64 percent; 1954, 67 percent.

During this same four-year period Class I usage has increased substantially but at a lesser rate than producer receipts; also, Class I usage has not shifted to a significant degree on a seasonal basis. As a result of the seasonal shift in production and the relatively stable seasonal pattern of Class I usage, supply-demand relationships have changed considerably during the four-year period. On an annual basis the producer receipts—Class I usage ratio has dropped from 66 percent in 1951 to 60 percent in 1954. A somewhat different result may be shown for various seasons of the year: for the months of December, January and February, the ratio has declined from 80 percent to 69 percent; for the three flush production months of May, June, and July the ratio has remained fairly stable, declining only from 51 percent to 50 percent; and for the two months of shortest production, October and November, the ratio has declined from 79 percent to 73 percent.

Thus, the evidence in the record indicates that supply-demand relationships have changed and that the base supply-demand percentages should be revised. Moreover, without modification of such

tor to be considered is that handlers frequently use other source milk in their operations. Producer milk from inventory should have prior claim on Class I milk over current receipts of other source milk. This should be accomplished by considering the opening inventory of a month as a receipt in the same month and subtracting such receipt (under allocation procedure), in series, starting with Class II milk, following the subtraction of other source milk. To the extent that the opening inventory is allocated to Class I and there was an equivalent amount of producer milk classified in Class II in the previous month (after allocating other source milk) a reclassification charge should be made at the difference between the Class II price in the previous month and the Class I price in the current month. This will result in equity of cost of milk among handlers and returns to producers irrespective of whether or not such producer milk is from the opening inventory or is a current receipt. This change will greatly simplify the accounting procedures for handling inventory without increasing costs to handlers. The proposed system should be easier to administer and should reduce the reporting requirements on handlers.

Class III milk should include all milk and butterfat (1) used to produce plain, or sweetened, condensed milk or evaporated milk in bulk or in hermetically sealed cans, nonfat dry milk solids, and margarine; (2) used to produce cheese (not including cottage cheese), frozen cream, and butter; (3) specifically accounted for as dumped and spilled; (4) in milk, skim milk, and cream disposed of in bulk during March through August for commercial food processing; and (5) in butterfat shrinkage up to 2.5 percent of total receipts of butterfat in producer milk and shrinkage of butterfat in other source milk. Such classification differs from that currently in the order in that all such products, except butter, have been reclassified into the lowest price class of the market.

This classification structure puts into Class III all products which are essentially outlets for extra reserve supplies of milk. Within the Cincinnati milkshed milk is used for all such products at some time during the flush season. For the most part these products do not represent normal requirements of the market and do not require a supply of inspected milk. Also, there are no health regulations governing the type of milk to be used for the products of Class III milk while the milk used for products in the other classes must be Grade A inspected to the extent already described. Further, products such as butter, nonfat dry milk solids, and cheese are manufactured and sold on a nationwide basis wherever produced, and are priced on the basis of central markets. Consequently, if milk is to be utilized for these products during the season when the local milk supply is in excess of normal market needs, the pricing classification must be in line with that of manufacturing milk in other areas. It is appropriate, therefore, that such products be grouped into a separate price classification.

The inclusion of bulk condensed milk (or skim milk) and frozen cream in this class should encourage handlers to convert producer milk into these products for later use in ice cream, ice cream mix, and frozen desserts which are included in Class II milk. However, if, in a later month such Class III milk products, regardless of source, are allocated to Class II milk a "reclassification" charge should be applied to insure equity of cost among handlers for Class II milk. Such a charge is provided in the order.

(3) The price formulas for Class II and Class III milk as defined above should be revised.

Producer groups proposed that Class IV milk (as presently defined) be priced the same as present Class III milk for the months of September through February and be priced at a lower level for the months of March through August. A handler proposed a dual pricing structure for milk used to produce ice cream and related products, i. e., milk so used would be priced at one level if sold within the city of Cincinnati and at a different level if disposed of outside the city. An alternative proposal by the same proponent would price all milk used to produce ice cream at the price level of milk sold by dairy farmers to local condenseries. It was further proposed that milk used to produce Cheddar cheese be priced at the latter level. Another handler proposed that such Class III milk be priced at the higher of a butter-nonfat dry milk solids formula price or the local condensery price, and that present Class IV milk be priced at the lower of such butter-nonfat dry solids formula price or the local condensery price.

One proponent of a lower price for milk used as ice cream contended that handlers are placed at a competitive disadvantage in the sale of ice cream outside Cincinnati on the basis that they are forced to pay a higher price than their competitors who use ungraded milk for this purpose. It was further contended that because of proponent's present unfavorable competitive position in purchasing milk, ice cream sales have been lost and returns to Cincinnati producers thereby have been reduced. Testimony offered in opposition to the proposal contended that any lowering of the price of milk used to manufacture ice cream would reduce the uniform price and consequently would create added pressure on Class I prices.

Revised Class II milk, as in the case of Class I milk, represents year-round usage of producer milk. However, ice cream and cottage cheese, the principal products of Class II milk, while requiring Grade A milk for manufacture and sale within the city of Cincinnati, need not be made from such quality of milk to be sold in other parts of the marketing area and is found in competition with similar products made from ungraded milk when sold in the segment of the marketing area which lies outside the city.

Because of these factors milk used for ice cream and cottage cheese should be priced independently from the other classes of milk. Under current competitive sales conditions milk used for such products should be priced lower than milk used for Class I products; on the other hand, since they require a year-round supply of inspected milk in a major portion of the marketing area, they should be regarded as a regular rather than a distress use of milk and therefore should be priced somewhat above the prevailing price for milk for manufacturing purposes.

The suggestion that the price for milk for ice cream should be the same as the average of prices paid by local condenseries does not take recognition of the fact that, because of the city health regulations, Cincinnati handlers, must use inspected milk for ice cream sold within the city. It might well be argued that if milk used to produce ice cream for sales within the city of Cincinnati alone was to be considered, the price should be the same as that for Class I milk.

It may be noted also that proponents on inquiry agreed that the price paid to Cincinnati producers for milk used in ice cream, even when disposed of outside the city, should not be less than the cost of obtaining the required ingredients from other sources. The price formula for 3.5 percent milk adopted in this decision when adjusted by the class butterfat differential to the appropriate test is believed to be one which will result in an average cost to handlers for mix used in ice cream that is reasonably related to the prices which would be necessary to purchase the ingredients used therein if obtained from alternative sources. Such cost also will be in reasonable alignment with the respective costs of ice cream mix (at appropriate butterfat test) as computed under the provisions of other nearby Federal orders.

In consideration of exceptions to the recommended decision, a further review of the record evidence has been made of the Class II milk price. It is concluded herein that this price should be reduced somewhat from the level previously indicated to assure Cincinnati ice cream manufacturers a reasonable competitive position in relation to those manufacturers who may use ungraded milk for such purposes.

During the flush months of 1954 the total volume of milk going to Class II and Class III uses was, seasonally, the largest in the history of the market. Testimony introduced into the record showed that early in the flush season of 1954, substantial quantities of milk were turned back to cooperatives to be disposed of at any price the cooperatives might be able to obtain through disposal to unregulated plants. Recognition was taken of the fact that the prices then prevailing in the order were at a level that would not permit excess milk to move to normal outlets. In March 1954, the order was revised on a seasonal basis to provide a price for excess milk closely in line with the prevailing price of manufacturing milk. Production during recent months has continued at a relatively high level, indicating that volume of producer milk to be disposed of as excess milk during the flush season this year will be approximately as great as the volume so utilized in the same months of 1954. Although the pricing structure is designed to encourage a more even production pattern, a wide variation in production has been characteristic of the market.

In the interest of orderly marketing, it is concluded that the pricing structure for milk which must be used for the revised category of Class III milk should be so established as to enable such milk to move into manufacturing uses when seasonal excesses of supply exist. This may be accomplished by pricing such milk at the average price paid by local condenseries during the flush production season. It is concluded further that while the latter price should prevail during the flush season, a somewhat higher price (same as Class II price) should prevail during the remainder of the year. This price plan will promote the orderly marketing of excess milk during the flush season but also will encourage handlers to direct producer milk into higher-valued classifications during the short production season when such milk is needed for the various fluid uses, as indicated by the apparent continuing need for supplemental supplies from outside sources in such months. For the same reason the proposal to establish on a year-round basis the local condensery price as the producer price for milk used to produce Cheddar cheese should not be adopted. It is noted that proponents of the latter proposal indicated that the price problem encountered relates primarily to the flush production season.

Attention is called to the fact that basic formula price provision (§ 965.50 (a)) of the order has been changed to reduce the list of "midwest condenseries" contained therein from eighteen to thirteen plants by taking official notice of the fact that the five plants which have been eliminated from the list are no longer in operation.

(4) The Class I price provisions of the order, including the automatic supply-demand adjustor, should be revised.

Producer groups proposed that Class I milk be priced at a differential of $1.30 above the basic formula price on a year-round basis. Under the present order provisions Class I milk is priced at $1.05 above the basic formula during April through July, and $1.35 above the basic formula during August through March.

The Dairy Division, Agricultural Marketing Service, proposed that, in view of the various proposals for reclassification and pricing submitted by interested parties, the whole pricing structure should be reviewed.

The proposal for a uniform year-round Class I differential should be adopted. It does not appear that a seasonal variation of Class I prices will be necessary following adoption of the fall incentive payment plan as discussed elsewhere in this decision. The present system of seasonal pricing was adopted for the purpose of emphasizing the need for less milk in the flush production season of April, May, June, and July and of additional production during those months of the year when production is seasonally low. With the adoption of the fall incentive plan the seasonal variation in payments to producers should be appreciably greater than that provided by the present plan of seasonal variation in Class I prices.

Considerable evidence was introduced into the record on the subject of whether or not the proposed $1.30 Class I differential would constitute a net increase or decrease in the Class I price when compared to the annual weighted average of the seasonal differentials ($1.05 and $1.35) now in effect. It is concluded the proposed differential in conjunction with other changes as described below will result in a Class I price level substantially unchanged on an annual average basis. Such level of Class I differential should be adequate to bring forth a sufficient supply of milk.

Following the filing of exceptions a revision of the Class II milk price and butterfat differential on the basis of the record was made which alters the level of the Class I butterfat differential. The order as contained in the recommended decision has been revised to retain the level of Class I butterfat differential provided by such decision.

The supply-demand adjustment should be revised on a seasonal basis. In the present order three schedules of adjustment rates are provided: one for the months of January, February, March, August, and September; a second schedule for April, May, June, and July; a third for October, November, and December. Under this system considerable variation in Class I prices has resulted, e. g., during 1954 the supply-demand adjustment varied from a plus $0.26 to a minus $0.26, or a total difference of $0.52 per hundredweight of milk. Part, although not all, of this difference was caused by the varying rates provided in the order.

It has been stated that a constant year-round Class I price differential has been adopted to eliminate variations in the Class I price from a seasonal standpoint in view of the alternative fall incentive payment plan discussed herein. Similar reasoning might be applied in connection with supply-demand adjustments since it is planned to accomplish appropriate seasonal variations in uniform prices to producers by the "take out" and "pay back," or fall incentive payment plan.

The supply-demand adjustments are designed to result in automatic changes in Class I prices as market supplies of producer milk change in relation to the quantity of Class I milk sold. In order to provide consistency in the data used to compute the base percentages and to simplify the computations, the disposition of items covered by § 965.41 (a) (1) and (3) is used as the measure of demand. To determine changes in the "supply-demand ratio" from a norm, the percentage of such sales to supplies in a recent two-month period is compared with a "base utilization percentage." Since plus or minus adjustments may reflect variations from seasonally established relationships of supply to demand in the base percentages, the supply-demand adjustment for a given month will be proper only so long as supply conditions and demand conditions continue in the pattern established as "normal." However, "normal" is a relative term and what may be considered appropriate as base percentages at one time may not be considered so at some later date. If either the supply pattern or the demand pattern shift from that established as normal, the supply-demand adjustments will cease to function properly from a seasonal standpoint. The fact that the supply-demand adjustment may result in unusual pluses or minuses to the price for any given month or season does not mean, necessarily, that normal relationships have changed. Such changes from the standard pattern may result from unusual conditions, such as a very late spring or extraordinary pasture for the particular season. However, when it is evident that there is a consistent change in the pattern, it may be assumed that new supply-demand relationships (on a seasonal basis) have developed and that the prior base percentages which had been considered normal no longer will give satisfactory results.

Such a situation appears to have developed in the Cincinnati market. As a result of an increased rate of production in the winter months and a relatively smaller increase in the spring and summer months (the flush season), seasonal variations in production have decreased rapidly during the past four years. This may be simply illustrated in the table below:

PRODUCER RECEIPTS: PERCENT OF VARIATION FROM ANNUAL AVERAGE (BASED UPON DAILY RECEIPTS)

		1951	1952	1953	1954
May, June, July	Above average by	Percent 29	Percent 22	Percent 20	Percent 12
December, January, February	Below average by	18	15	12	8

The shifting seasonal production pattern may be shown also by the relationship of production in the month of lowest supply to the month of highest supply. During the past four years this relationship (percentage-wise) has been: 1951, 52 percent; 1952, 61 percent; 1953, 64 percent; 1954, 67 percent.

During this same four-year period Class I usage has increased substantially but at a lesser rate than producer receipts; also, Class I usage has not shifted to a significant degree on a seasonal basis. As a result of the seasonal shift in production and the relatively stable seasonal pattern of Class I usage, supply-demand relationships have changed considerably during the four-year period. On an annual basis the producer receipts—Class I usage ratio has dropped from 66 percent in 1951 to 60 percent in 1954. A somewhat different result may be shown for various seasons of the year: for the months of December, January and February, the ratio has declined from 80 percent to 69 percent; for the three flush production months of May, June, and July the ratio has remained fairly stable, declining only from 51 percent to 50 percent; and for the two months of shortest production, October and November, the ratio has declined from 79 percent to 73 percent.

Thus, the evidence in the record indicates that supply-demand relationships have changed and that the base supply-demand percentages should be revised. Moreover, without modification of such

percentages it appears from operation of the formula over the past two years that plus or minus adjustments resulting from the provision could work in a manner contrary to the fall incentive payment plan. If this were to occur consistently, as the result an unrealistic seasonal pattern of base percentages, the effectiveness of the fall incentive plan would be greatly reduced. The revised schedule of percentages have been designed to prevent this occurrence.

As in the case of the present order a limitation of 50 cents per hundredweight has been placed on the amount of the supply-demand adjustment. It is concluded that further review in hearing would be appropriate if the adjustment for any month were to exceed this amount.

(5) The provision for a location differential to handlers should be modified; the rate of such location differential should not be changed.

The present order provides for a location differential which is credited to handlers with respect to each hundredweight of producer milk (a) received and utilized at a pool plant located more than 45 miles from the City Hall in Cincinnati as any item of Class I and Class II milk or in the production of cottage cheese, ice cream or frozen desserts, or (b) which is moved from such a pool plant in the form of any product designated as Class I and Class II milk or as condensed skim milk, ice cream mix, or frozen cream to a fluid milk plant less than 45 miles from Cincinnati and utilized as any item of Class I and Class II milk or in the production of cottage cheese, ice cream or frozen desserts. In the case of such movements to fluid milk plants less than 45 miles from Cincinnati, the differential allowed is limited to that portion of product moved and so utilized which is in excess of the total producer receipts at such transferee-plant. Under the present provision the credit is allowed the handler who transfers the milk.

The proposal would allow the credit to the transferee-handler under certain conditions. Proponents offered two reasons in support of the proposal. They contend that it would simplify the application of location differential credits when more than one outlying pool plant moves milk to the same fluid milk plant. In such instances a decision must be made as to the amount of credit to be allowed each of the pool plants that supply the milk. Also, it is believed by proponents that by allowing the transferee-handler the credit as proposed a somewhat lower cost of milk to such handler will result and such handler will be in a better position to reflect the lower cost in his resale prices, thus encouraging additional Class I utilization to the advantage of producers. It was alleged that the prices agreed upon between handlers in connection with interhandler transfers of milk have not been materially reduced during the several months the 15 cents per hundredweight location credit has been allowable.

It is concluded that the revised method of applying the location differential will tend to simplify accounting procedure and may encourage a greater reflection of the allowable credit in the prices of finished Class I products. For these reasons the proposal should be adopted.

A handler proposed a change in the rate of location adjustment from 15 cents to 25 cents per hundredweight. As in the case of the present location adjustment the revised rate would be credited to the handler with respect to Class I milk and Class II milk, as revised in this decision, at pool plants more than 45 miles from Cincinnati, or shipped in such forms from pool plants so located to fluid milk plants within a 45-mile radius of Cincinnati which serve the marketing area. However, the proposal provides that, when used as an adjustment to the uniform price to producers at such country pool plant the revised rate would be applied only on the quantity of milk physically moved from such plant to fluid milk plants within the 45-mile radius from Cincinnati, and the resulting monies would be divided by the hundredweight of producer milk receipts of the country pool plant. This would result generally in a deduction from the uniform price of substantially less than 25 cents per hundredweight at the country pool plant and in some months a zero adjustment would be applicable.

Proponent contended that the proposed change in the order would be justified on two bases: (1) The suggested 25-cent deduction represents the actual cost of transporting milk from the country pool plants into Cincinnati and, therefore, producers should pay the full cost of having their milk delivered to the place of ultimate use; and (2) producers should pay the transportation costs only on that milk which actually moves into Cincinnati; consequently, no deduction from the uniform price should be made on any milk which is received and used at the location of the country pool plant.

In the decision of the Assistant Secretary of Agriculture dated July 1, 1954, it was concluded that a location differential should be adopted to reflect prices to producers based upon the relative costs of moving milk from farms to various segments of the milkshed to the marketing area. It was indicated by the record which preceded such decision that the cost of hauling incurred by producers in making their milk available to the market through a country pool plant was approximately 15 cents per hundredweight higher than in the case of milk direct-shipped from farms to city plants. Obviously, milk to be used in Cincinnati is worth somewhat less if delivered to a location at a substantial distance from the city than if delivered directly to Cincinnati. Although proponent contended that it costs 25 cents per hundredweight to transport milk in tanks from existing country pool plants to Cincinnati and that producers should pay for the cost of such movement computed at this rate, there is no evidence in the present record to refute the relative costs of moving milk from farms to city plants as compared with delivery from farms to country pool plants as shown by the prior record. It would not be reasonable to compensate the handler for moving milk to the city plant from his country plant at a rate greater than that which would be incurred by the producer if the latter were to shift his point of delivery to a city outlet instead of a country pool plant.

Proponent contends also that in computing the uniform price per hundredweight to the producer at the outlying pool plant the actual cost incurred by the handler in moving milk from such country pool plant to the city should be deducted. Thus, the rate of deduction per hundredweight of producer milk at a given country plant would vary from month to month (sometimes being zero) and also would vary from one plant to another during the same month. As previously stated, the purpose of the location differential is to reflect the location disadvantage of distant producers as compared with nearby producers based upon the relative costs of moving their milk to market. Whatever location disadvantage exists is rather constant, changing only as there may be a change in the relative costs of hauling service for milk. The location disadvantage is not related in any way to the respective amounts of milk which may be shipped from country plants to city plants. It is concluded, therefore, that the proposed changes in the rate and application of location adjustments should not be adopted.

A handler stated that when, during the flush production season of the year, milk received at the handler's plant is in excess of requirements, such milk frequently must be shipped to outlying manufacturing plants for processing and that under the present provisions of the order, there is no way that he may recover the costs of transporting such excess milk. As a solution to this problem it was proposed that the order be amended to allow a $0.20 per hundredweight reduction in the price of milk which is received at a handler's plant and then transported to any manufacturing plant at a distance of 60 to 100 miles from Cincinnati for processing.

If this proposal were to be adopted, it seems probable that the optimum utilization of milk for the market as a whole would be discouraged; also that uneconomic movements of milk might be encouraged, with the result that producers would pay not only the cost of transporting milk into the market from the farm but also pay the cost of the hauling of excess milk out of the market. A more logical solution to this problem would be to amend the order so as to permit proprietary handlers as well as cooperatives, under certain limitations, to divert milk in excess of city plant requirements to manufacturing outlets while such milk is still in the country. This has been done by amending the "producer" definition in § 965.8.

(6) The butterfat differentials applied in adjusting the Class II and Class III prices should be revised.

For milk used to produce certain products the butterfat differential is as important to the ultimate cost of the milk to the handler as the level of the class price established on the basis of a butterfat content of 3.5 percent. This has been referred to above in connection with the reclassification of fluid cream.

In order to achieve a uniform price for each pound of butterfat in ice cream use, it is concluded that the Class II butterfat differential should be determined in direct relationship to the value placed on butterfat in such class under the Class II price formula for milk testing 3.5 percent.

Class III milk as established by this decision includes the principal uses to which seasonal reserves of milk may be put. The butterfat in milk so used is in excess of market needs during the flush production months and should be priced accordingly during the months of March through August. Therefore, the differential now contained in the order is continued in such months. During the months of September through February, the differential is made the same as that for Class II butterfat except for milk used to produce butter. In the case of milk used for the latter product the current butterfat differential is continued. Although the market is normally short of serum solids in the fall and winter months there is frequently an excess of butterfat because of the relatively high test of producers' milk at that time of year. This should permit the orderly marketing of any excess quantities of butterfat in all months.

(7) A definition of "producer-handler" should be included in the order; a corollary definition of "dairy farmer" should also be adopted.

It has been necessary to define the term "handler" essentially for the purpose of identifying those persons on whom obligations and requirements are, or may be, imposed by the order, including the obligation to pay the minimum prices established. The order has provided, however, that persons referred to therein as "producer-handlers" shall be exempt from all the regulatory provisions of the order, except that requiring the filing of reports as requested by the market administrator.

The producer-handler maintains control of his milk until ultimate disposition and in this respect his situation, from a minimum price standpoint, is substantially different from the regular producer whose milk is marketed through a handler. In exempting producer-handlers when the order was first initiated it was determined that full regulation of such persons would add to the administrative burden without assisting in a substantial measure to the operation of a program designed to bring orderly marketing conditions to producers generally.

The producer-handler would be permitted a competitive advantage over other handlers in the purchase of milk from farm sources for sale in the marketing area if the order were to allow him to buy freely from farms other than one operated as his personal enterprise and to continue his exemption from the order. It should not be possible, of course, for such a person to purchase milk from farms operated by other persons at their individual risks, unless such person is fully regulated in the same manner as other handlers. Such purchases made by the producer-handler, even if made under arrangements where either the cows or the farm are leased by him, while other handlers are fully regulated as to their prices and payments to producers, would tend to defeat the classified plan of pricing which is basic to the entire marketing plan provided by the regulation.

Recent complaints concerning the exempt status of persons claiming to operate as producer-handlers have been filed with the market administrator. Since the present order contains no definition or description of the type of operation meant by the term, it is administratively difficult to determine precisely whether a person is actually a producer-handler who operates within the limitations outlined, i. e., the present order does not provide the market administrator a standard against which he can compare the type of operation carried on by any person who claims producer-handler status.

For this reason a definition of producer-handler should be adopted. The definition included provides that if the producer-handler is to be exempt he must both operate in his capacity as a handler and maintain all his farm supply of milk as a matter of personal enterprise and at his own risk. Since producer-handlers frequently change their method of operation, it is necessary to continue the requirement that they file reports as requested by the market administrator in order that the basis for exemption as a handler in individual cases may be reviewed and affirmed from time to time and to provide complete market data concerning the supply and sales of milk.

In view of the fact that the alternative sources of information available to the market administrator concerning the actual extent of the farm operation carried on by any particular producer-handler, it is necessary to provide also that the burden of proof for information on which exemption may be granted or continued, as the case may be, should rest upon the person claiming producer-handler status rather than upon the market administrator.

A definition of "dairy farmer" will assist to clarify the application of the definition of producer-handler.

(8) The provision for a butterfat differential to producers should be modified for simplification.

It was proposed by producers that the computation of the butterfat differential used to adjust the uniform price be modified for the purpose of simplifying payments to individual producers for milk.

The order currently provides for the uniform price to be computed on the basis of the even cent for milk testing 3.5 percent in butterfat. It is provided also that a butterfat differential be paid to the individual producer as an adjustment to the uniform price when the milk delivered by such producer varies above or below 3.5 percent in butterfat. Under current order provisions this differential is rounded to the nearest tenth of a cent but since the individual producer's milk is tested to the nearest half point, the payment rate to the individual producer becomes a four decimal number whenever the last digit of the butterfat differential is an odd number.

If the butterfat differential were rounded to the nearest even (0, 2, 4, 6, 8) one-tenth cent, the rate of payment to the individual producer would be a three decimal number. Since there are more than 5,000 individual producers for whom payment checks must be written each month, a substantial reduction in the amount of work involved in computing producer payments could be effected by adopting the proposed method of rounding fractions.

The amount of money payable to producers through the butterfat differential is derived from the total pool value of milk. Therefore, the adoption of such a provision would not change the total cost of milk to handlers. Although for any given month some producers might be paid a small fraction of a cent more and others a small fraction of a cent less per hundredweight of milk, monthly adjustments of the differential by such means could be expected to offset each other over a period of time, and thus on an annual basis it is likely that the individual producer would experience little, if any, net change in his returns as the result of the simpler computation.

It is concluded that the computation of the butterfat differential to producers should be modified to the extent described.

General findings. (a) The proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, and all of the terms and conditions thereof will tend to effectuate the declared policy of the act:

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(c) The proposed order, as amended, and as hereby proposed to be further amended will regulate the handling of milk in the same manner as, and will be applicable to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

Determination of representative period. The month of February 1955 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of an order, as amended, regulating the handling of milk in the Cincinnati, Ohio, marketing area in the manner set forth in the attached amending order is approved or favored by producers who during such period were engaged in the production of milk for sale in the marketing area specified in such marketing order, as hereby amended.

Marketing agreement and order. Annexed hereto and made a part hereof are two documents entitled, respectively,

"Marketing Agreement Regulating the Handling of Milk in the Cincinnati, Ohio, Marketing Area," and "Order, as amended, Regulating the Handling of Milk in the Cincinnati, Ohio, Marketing Area," which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

It is hereby ordered, That all of this decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the order, as amended, and as hereby proposed to be further amended by the attached order which will be published with this decision.

This decision filed at Washington, D. C., this 21st day of April 1955.

[SEAL] EARL L. BUTZ,
Assistant Secretary of Agriculture.

Order,[1] *as Amended, Regulating the Handling of Milk in the Cincinnati, Ohio, Marketing Area*

§ 965.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto, and all said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the Cincinnati, Ohio, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds, and other ecnomic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(3) The said order, as amended, and as hereby further amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered, That on and after the effective date hereof, the handling of milk in the Cincinnati, Ohio, marketing area shall be in conformity to and in compliance with the following terms and conditions:

DEFINITIONS

§ 965.1 *Act.* "Act" means Public Act No. 10, 73d Congress, as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.).

§ 965.2 *Secretary.* "Secretary" means the Secretary of Agriculture of the United States or any other employee of the United States authorized to exercise the powers and to perform the duties of the said Secretary of Agriculture.

§ 965.3 *Cincinnati, Ohio, marketing area.* "Cincinnati, Ohio, marketing area," hereinafter called the "marketing area," means the city of Cincinnati, Ohio, and the territory geographically included within the boundary lines of Hamilton County, Ohio.

§ 965.4 *Person.* "Person" means any individual, partnership, corporation, association, or any other business unit.

§ 965.5 *Route.* "Route" means a delivery (including a sale from a store) of milk, buttermilk, flavored milk drinks, or cream in fluid form to a wholesale or retail stop(s) other than to a milk processing plant(s).

§ 965.6 *Fluid milk plant.* "Fluid milk plant" means a plant or other facilities used in the preparation or processing of milk all or a portion of which is disposed of on a route(s) operated wholly or partially in the marketing area.

§ 965.7 *Pool plant.* "Pool plant" means any milk plant, other than a fluid milk plant operated by a producer-handler or a plant at which the milk of dairy farmers is priced by another milk marketing agreement or order issued pursuant to the act, which is:

(a) A fluid milk plant as described in § 965.6 located in the marketing area;

(b) A fluid milk plant located outside the marketing area and disposing of not less than 10 percent of its entire route disposition of Class I milk on a route(s) operated wholly or partially within the marketing area; or

(c) A plant, receiving milk from dairy farms, which the market administrator determines has moved to a plant(s) described under paragraph (a) or (b) of this section an amount of milk or skim milk in fluid form equal to not less than one percent of the total Class I utilization of plants described in paragraphs (a) and (b) of this section during the second month preceding such movement as specified in the following schedule:

Months milk is moved:	*Months plant is pool plant*
One of the months of October and November.	November.
Two of the months of October, November, and December.	December.
Three of the months of October, November, December, and January.	January through October.

Provided, That upon written request to the market administrator by the operator of a plant which is a pool plant pursuant to this paragraph for the discontinuance of such plant as a pool plant, such plant shall cease to be a pool plant in the first month, following such request, during which no milk is moved to a plant described in paragraph (a) or (b) of this section and shall not become a pool plant until such plant again meets the requirements for a pool plant pursuant to this paragraph.

§ 965.8 *Producer.* "Producer" means any person operating a dairy farm who produces milk under a dairy farm permit issued by an appropriate health authority which is received at a "pool plant" described in § 965.7, or is caused to be diverted by a handler for his account from a pool plant to a nonpool plant during any of the months of March through August, inclusive, and milk so diverted shall be deemed to have been received by the transferor-handler at the pool plant from which it was diverted, except that the application of §§ 965.53 and 965.73 (c) to any such diverted milk shall be made on the basis of the location (whether more or less than 45 miles from the City Hall in Cincinnati) of the nonpool plant where received, subject to the following conditions:

(a) Milk which is physically received from a farm at a fluid milk plant(s) located less than 45 miles from the City Hall in Cincinnati on 60 percent or more of the days of its delivery during the next preceding period September through December, inclusive, shall be priced during the period of diversion as if received at such fluid milk plant(s); and

(b) Milk which does not qualify for diversion pursuant to paragraph (a) of this section, but which was physically received from a farm at a fluid milk plant(s) located less than 45 miles from the City Hall in Cincinnati on 60 percent or more of the days of its delivery from the date of first delivery of such milk through the last day of February next preceding shall be priced during the period of diversion as if received at such fluid milk plant(s): *Provided further*, That any producer whose milk has been approved as "Grade A milk" by an appropriate health authority for any month, or portion thereof, shall be a "Grade A producer" for such month, and any producer whose milk has not been so approved shall be a "Grade B producer."

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

§ 965.9 *Handler.* "Handler" means (a) any person who operates (1) a pool plant; or (2) a nonpool plant and either directly or indirectly disposes of Class I milk on a route(s) extending into the marketing area; or (b) any cooperative association with respect to the milk of any producer(s) whose milk has been received previously at a pool plant described in § 965.7 which milk has been caused to be diverted by the cooperative association under the conditions set forth in § 965.8 to a nonpool plant, if payment therefor has been collected by such association; and such milk shall be deemed to have been received from producers by such cooperative association.

§ 965.10 *Producer milk.* "Producer milk" means milk produced by one or more producers under the conditions set forth in § 965.8.

§ 965.11 *Dairy farmer.* "Dairy farmer" means any person who is engaged in the production of milk.

§ 965.12 *Producer-handler.* "Producer-handler" means any person who is both a dairy farmer and a handler, but who receives no milk from other dairy farmers: *Provided*, That such person provides proof satisfactory to the market administrator that (a) the maintenance, care and management of all the dairy animals and other resources necessary to produce the entire amount of milk handled is the personal enterprise of and at the personal risk of such person in his capacity as a dairy farmer, and (b) the operation of a fluid milk plant is the personal enterprise of and at the personal risk of such person in his capacity as a handler.

§ 965.13 *Other source milk.* "Other source milk" means all milk and butterfat contained in:

(a) Receipts during the month in the form of products designated as Class I milk pursuant to §§ 965.41 (a) (1) and (2), except (1) such products received from other fluid milk plants, or (2) producer milk; and

(b) Products other than those referred to in §§ 965.41 (a) (1) and (2) from any source (including those derived from producer milk) which are reprocessed or converted to another product during the month.

MARKET ADMINISTRATOR

§ 965.20 *Designation.* The agency for the administration of this part shall be a market administrator, who shall be a person selected by the Secretary. Such person shall be entitled to such compensation as may be determined by, and shall be subject to removal at the discretion of, the Secretary.

§ 965.21 *Powers.* The market administrator shall have the power to:

(a) Administer the terms and provisions of this part;

(b) Report to the Secretary complaints of violations of the provisions of this part;

(c) Make rules and regulations to effectuate the terms and provisions of this part; and

(d) Recommend to the Secretary amendments to this part.

§ 965.22 *Duties.* The market administrator, in addition to the duties hereinafter described, shall:

(a) Within 45 days following the date on which he enters upon his duties, execute and deliver to the Secretary a bond, conditioned upon the faithful performance of his duties, in an amount and with surety thereon satisfactory to the Secretary;

(b) Employ and fix the compensation of such persons as may be necessary to enable him to administer the terms and provisions of this part;

(c) Pay, out of the fund provided by § 965.74, the cost of his bond and of the bonds of those of his employees who handle funds entrusted to the market administrator, his own compensation, and all other expenses which will necessarily be incurred by him in the maintenance and functioning of his office and in the performance of his duties;

(d) Keep such books and records as will clearly reflect the transactions provided for in this part, and surrender the same to his successor or to such other person as the Secretary may designate;

(e) Publicly disclose to handlers and producers, unless otherwise directed by the Secretary, the name of any person who, within 2 days after the date upon which he is required to perform such acts, has not made reports pursuant to § 965.30 or has not made payments pursuant to §§ 965.70 and 965.72;

(f) Promptly verify the information contained in the reports submitted by handlers;

(g) Furnish such information and verified reports as the Secretary may request, and submit his books and records to examination by the Secretary at any and all times; and

(h) Publicly announce, by posting in a conspicuous place in his office and by such other means as he deems appropriate, the prices determined for each month as follows:

(1) On or before the 5th day after the end of such month, the minimum class prices computed pursuant to § 965.51 and the butterfat differentials computed pursuant to § 965.52; and

(2) On or before the 20th day after the end of such month the uniform prices computed pursuant to § 965.64, and the producer butterfat differential.

REPORTS, RECORDS, AND FACILITIES

§ 965.30 *Reports of handlers to market administrator.* Each handler, under his own signature or under that of a person certified by such handler to the market administrator as being authorized to sign the reports required by this section, shall report to the market administrator, in the detail and on forms prescribed by the market administrator as follows:

(a) On or before the 10th day after the end of each month, each handler who receives milk from producers shall report with respect to all milk, skim milk, cream and other milk products handled by him during the month as follows:

(1) The total quantities at each plant from producers, from his own production, and from other handlers;

(2) The total quantities of other source milk together with the butterfat content;

(3) The quantities of skim milk and butterfat contained in inventories of items designated as Class I milk pursuant to § 965.41 (a) on hand at the beginning and end of the month;

(4) The utilization during the month of all milk and milk products referred to subparagraphs (1), (2), and (3) of this paragraph;

(5) The name and address of each new producer; and

(6) His producer payroll, which shall show for each producer the total receipts of milk with the average butterfat test thereof, the amount of the advance payment to such producer made pursuant to § 965.70 and the deductions and charges made by the handler.

(b) Each handler who receives no milk from producers shall make reports to the market administrator at such times and in such manner as the market administrator may request.

§ 965.31 *Verification of handler reports.* Each handler shall make available to the market administrator or to his agent, or to such other person as the Secretary may designate, those records which are necessary for the verification of the information contained in the reports submitted pursuant to § 965.30, and those facilities which are necessary for the sampling, weighing, and testing of the milk of each producer.

§ 965.32 *Reports of market administrators to cooperative associations.* On or before the 13th day after the end of each month, the market administrator shall report to each cooperative association the amount and class utilization of milk caused to be delivered by such association, either directly or from producers who have authorized such association to receive payments for them under § 965.73 (b), to each handler to whom the cooperative association sells milk. For the purpose of this report the milk so received shall be prorated to each class in the proportions that the total receipts of milk from producers by such handler were used in each class.

§ 965.33 *Records and facilities.* Each handler required to make reports to the market administrator shall maintain, and make available to the market administrator during the usual hours of business, such accounts and records of his operations and such facilities as in the opinion of the market administrator are necessary to verify reports, or to ascertain the correct information with respect to (a) the receipts and utilization of all skim milk and butterfat received, including all milk products received and disposed of in the same form; (b) the weights and tests for butterfat, and for other contents, of all milk and milk products handled; and (c) payments to producers and cooperative associations.

§ 965.34 *Retention of records.* All books and records required under this subpart to be made available to the market administrator shall be retained by the handler for a period of three years to begin at the end of the calendar month to which such books and records pertain:

Provided, That if, within such three-year period, the market administrator notifies a handler in writing that the retention of such books and records or of specified books and records, is necessary in connection with a proceeding under section 8c (15) (A) of the act or a court action specified in such notice the handler shall retain such books and records, or specified books and records, until further written notification from the market administrator. In either case the market administrator shall give further written notification to the handler promptly upon the termination of the litigation or when the records are no longer necessary in connection therewith.

CLASSIFICATION

§ 965.40 *Basis of classification.* Milk and milk products received by each handler, including milk produced by him, which are required to be reported pursuant to § 965.30 (a) shall be classified by the market administrator in the classes set forth in § 965.41, subject to the provisions of §§ 965.42 through 965.46.

§ 965.41 *Classes of utilization.* The classes of utilization shall be as follows:

(a) Class I milk shall be all milk and butterfat (1) disposed of (except as provided in paragraph (c) (2) and (3) of this section) in fluid form as milk, skim milk, buttermilk, flavored milk, and milk drink, (2) disposed of in the form of fluid sweet or cultured sour cream, whipped cream, any product in fluid form containing 8 percent or more of butterfat not specified in Class II milk or Class III milk (excluding any mixture of milk (or skim milk) and cream containing 8.0 percent or more butterfat disposed of in containers or dispensers under pressure for the purpose of dispensing a whipped, or aerated, product), and eggnog; (3) used to produce concentrated milk (excluding those products commonly known as evaporated milk and condensed milk) for fluid consumption; and (4) in shrinkage of butterfat from receipts of producer milk which is in excess of 2.5 percent of such receipts.

(b) Class II milk shall be all milk and butterfat (1) used to produce ice cream, ice cream mix, frozen desserts, milk (or skim milk) and cream mixtures containing 8.0 percent or more butterfat disposed of in containers or dispensers under pressure for the purpose of dispensing a whipped, or aerated, product, and cottage cheese; and (2) in inventories of all items named in § 965.41 (a) (1) and (2).

(c) Class III milk shall be all milk and butterfat (1) used to produce butter, frozen cream, spray and roller process nonfat dry milk solids, all cheese (other than cottage cheese), and evaporated and condensed milk (or skim milk) either in bulk or in hermetically sealed cans; (2) specifically accounted for as dumped, spilled or disposed of for animal feed; (3) disposed of in bulk during the months of March through August, inclusive, as milk, skim milk, or cream to any commercial food processing establishment where food products are prepared only for consumption off the premises; (4) in shrinkage computed pursuant to § 965.44 (b) (1) up to 2.5 percent of butterfat from receipts of producer milk; and (5) in shrinkage of other source milk computed pursuant to § 965.44 (b) (3).

§ 965.42 *Responsibility of handlers.* In establishing the classification as required in §§ 965.41 and 965.43, the burden rests upon the handler to account for all milk and milk products received by him and to prove to the market administrator that such milk, or milk products, should not be classified as Class I milk.

§ 965.43 *Transfers.* (a) Milk, skim milk, and cream transferred in fluid form from a pool plant to the pool plant of another handler shall be Class I milk, unless another class use is indicated in writing to the market administrator by the operators of both plants on or before the 10th day after the end of the month within which such transfer was made: *Provided*, That if either or both plants received milk other than producer milk, the milk, skim milk, or cream so transferred shall be classified at both plants so as to allocate the highest possible utilization to producer milk: *Provided further*, That milk may be transferred in farm delivery containers from one pool plant to another under the conditions of this paragraph if both such plants are fluid milk plants pursuant to § 965.7 (a) or (b).

(b) Except as provided in paragraph (c) of this section, milk, skim milk and cream transferred or diverted in fluid form in bulk from a pool plant to a plant other than a pool plant shall be classified as Class I milk: *Provided*, That if the operator of such pool plant, or the diverting handler, as the case may be, on or before the 10th day after the end of the month, furnishes to the market administrator a statement which is signed by all parties to the transaction, that such milk, skim milk, or cream was used in a lower class, such milk, skim milk, or cream shall be classified accordingly, subject to verification by the market administrator: *And provided further*, That if the preceding proviso applies, the market administrator, shall assign milk, skim milk, or cream so transferred or diverted to (1) the highest-valued use classification (as described in § 965.41) in the plant of the receiver if the transfer or diversion is to a plant located in Campbell County or Kenton County, Kentucky, from which a route(s) as defined in § 965.5 is operated, and (2) the uses covered by Class III milk to the extent available prior to the assignment of any such quantity moved in sequence to Class II milk and Class I milk if the movement is to any other plant which is not a pool plant.

(c) Milk, skim milk, and cream transferred or diverted in fluid form from a pool plant to the fluid milk plant of a producer-handler shall be classified as Class I milk.

§ 965.44 *Shrinkage.* The market administrator shall allocate shrinkage over a handler's receipts as follows:

(a) Compute the total shrinkage of butterfat for each handler; and

(b) Prorate the resulting amounts among the receipts of butterfat in (1) producer milk, (2) milk received from other pool plants, and (3) other source milk.

§ 965.45 *Computation of milk and butterfat in each class.* For each month, the market administrator shall correct for mathematical and for obvious errors the report submitted by each handler and compute the total pounds of milk and butterfat, respectively, in Class I milk, Class II milk, and Class III milk for such handler.

§ 965.46 *Allocation of milk and butterfat classified.* The pounds of milk and butterfat remaining in each class after making the following computations shall be the pounds of milk and butterfat, respectively, in such class allocated to producer milk:

(a) The pounds of milk in Class III milk shall be decreased by any excess of utilization of all classes over total receipts and shall be increased by any excess of total receipts over total utilization of all classes;

(b) Subtract from the pounds of butterfat in Class III milk the pounds of producer butterfat in plant shrinkage which is not in excess of 2.5 percent of all butterfat received from producers and from all other sources except a pool plant(s);

(c) Subtract from the remaining pounds of milk and butterfat, respectively, in series beginning with the lowest-priced use available, the pounds of milk and butterfat, respectively, received as other source milk;

(d) Subtract from the remaining pounds of milk and butterfat, respectively, in each class, the pounds of milk and butterfat, respectively, received from other pool plants as transferred pursuant to § 965.43;

(e) Subtract from the remaining pounds of milk and butterfat in series from Class II milk and Class I milk, the pounds of milk and butterfat in inventory at the beginning of the month in the form of items named in § 965.41 (a) (1) and (2);

(f) Add to Class III butterfat the pounds of butterfat subtracted pursuant to paragraph (b) of this section; and

(g) If the pounds of butterfat remaining in all classes exceed the pounds of butterfat received from producers, subtract such excess from the remaining pounds of butterfat in each class in series beginning with the lowest-priced class.

MINIMUM PRICES

§ 965.50 *Basic formula price.* The basic formula price per hundredweight of milk to be used in computing the minimum price for Class I milk shall be the higher of the prices computed by the market administrator pursuant to paragraphs (a) and (b) of this section:

(a) The average of the basic (or field) prices per hundredweight ascertained to have been paid, or to be paid, for milk of 3.5 percent butterfat content received from farmers during such month at the following plants or places for which prices are reported to the market administrator or to the United States Department of Agriculture:

Company and Location
Borden Co., Mount Pleasant, Mich.
Borden Co., New London, Wis.
Borden Co., Orfordville, Wis.
Carnation Co., Oconomowoc, Wis.
Carnation Co., Richland Center, Wis.
Carnation Co., Sparta, Mich.
Pet Milk Co., Belleville, Wis.
Pet Milk Co., Coopersville, Mich.
Pet Milk Co., Hudson, Mich.
Pet Milk Co., New Glarus, Wis.
Pet Milk Co., Wayland, Mich.
White House Milk Co., Manitowoc, Wis.
White House Milk Co., West Bend, Wis.

(b) The price per hundredweight computed by the market administrator by adding together the plus amounts calculated pursuant to subparagraphs (1) and (2) of this paragraph:

(1) Multiply by 3.5 the simple average, as computed by the market administrator, of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago, as reported by the United States Department of Agriculture during the month for which payment is to be made, and add 20 percent thereof;

(2) From the simple average, as computed by the market administrator, of the weighted average of carlot prices per pound for nonfat dry milk solids, spray and roller process, respectively, for human consumption f. o. b. manufacturing plants in the Chicago area, as published for the period from the 26th of the immediately preceding month through the 25th day of the current month by the United States Department of Agriculture, deduct 5.5 cents and multiply the result by 8.2.

§ 965.51 *Class prices.* Each handler shall pay, at the time and in the manner set forth in § 965.72, not less than the following prices per hundredweight, on the basis of milk of 3.5 percent butterfat content, for the respective quantities of milk in each class computed pursuant to § 965.46.

(a) The price for Class I milk shall be the basic formula price plus $1.30, plus or minus "a supply-demand adjustment" of not more than 50 cents computed as follows:

(1) Divide the total gross volume of that portion of Class I milk set forth in § 965.41 (a) (1) and (3) (adjusted to eliminate duplications due to interhandler transfers) in the second and third months preceding by the total receipts of producer milk for the same months, multiply the result by 100, and round to the nearest whole number. The result shall be known as the "Class I utilization percentage";

(2) For each full percentage point that the Class I utilization percentage is above the applicable maximum base percentage listed below increase the Class I price by 3 cents; and for each full percentage point that the Class I utilization percentage is below the applicable minimum base percentage listed below decrease the Class I price by 3 cents: *Provided*, That the Class I differential adjusted pursuant to this subparagraph for the month of June shall not be higher than such adjusted differential for the immediately preceding month of May; and that the Class I differential so adjusted for the month of January shall not be less than the adjusted differential for the immediately preceding month of December.

Month for which price is being computed	Base utilization percentages	
	Minimum	*Maximum*
January	71	73
February	75	77
March	69	71
April	63	65
May	60	62
June	57	59
July	51	53
August	46	48
September	46	48
October	48	50
November	53	55
December	64	66

(b) The price for Class II milk shall be the sum of the plus adjustments computed pursuant to subparagraphs (1) and (2) of this paragraph.

(1) Multiply by 1.18 the simple average, as computed by the market administrator, of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago, as reported by the United States Department of Agriculture during the month for which payment is to be made, and then multiply such result by 3.5; and

(2) From the simple average, as computed by the market administrator, of the weighted average of carlot prices per pound for nonfat dry milk solids, spray process for human consumption f. o. b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the immediately preceding month through the 25th day of the current month by the United States Department of Agriculture, deduct 5.5, cents and multiply the result by 8.2.

(c) The price for Class III milk during each of the months of March through August shall be the price computed pursuant to subparagraph (1) of this paragraph; and the price for Class III milk during each of the months of September through February, respectively, shall be the same as the Class II price:

(1) The simple average, as computed by the market administrator of the basic (or field) prices per hundredweight ascertained to have been paid for milk of 3.5 percent butterfat content received from farmers during the month at the following plants:

M and R Dietetic Laboratories, Inc., Chillicothe, Ohio.
Carnation Milk Co., Hillsboro, Ohio.
Nestles Milk Products, Inc., Greenville, Ohio.
Nestles Milk Products, Inc. (Osgood Milk Co.), Osgood, Ind.
Carnation Milk Co., Maysville, Ky.

§ 965.52 *Butterfat differentials to handlers.* If the weighted average butterfat test of producer milk which is classified in any class, respectively, for any handler, is more or less than 3.5 percent there shall be added to, or subtracted from, as the case may be, the price for such class, for each point (one-tenth of one percent) that such weighted average butterfat test is above or below 3.5 percent, a butterfat differential calculated by the market administrator as follows: For Class I milk, add 1.25 cents per point to the butterfat differential computed below in this section for Class II milk. For Class II milk multiply the average price per hundred pounds of 92-score butter as described in § 965.51 (b) (1) by 1.18, subtract therefrom the amount per hundredweight computed pursuant to § 965.51 (b) (2), and divide the result by 1000. For Class III milk subtract $5.00 from the average price per hundred pounds of 92-score butter as described in § 965.50 (b) (1), multiply by 1.2, subtract therefrom the amount per hundredweight computed pursuant to § 965.50 (b) (2), and divide the result by 1,000: *Provided*, That for each of the months of September through February, inclusive, the butterfat differential for Class III milk other than that used to produce butter shall be the same as the butterfat differential for Class II milk for such month and the butterfat differential for milk used to produce butter shall be the amount computed for such month pursuant to the formula for Class III milk immediately preceding this proviso.

§ 965.53 *Location differentials to handlers.* In computing the value of each handler's milk pursuant to § 965.60 a location differential of 15 cents per hundredweight shall be credited to the handler with respect to each hundredweight of producer milk (a) received and utilized at a pool plant located more than 45 miles by shortest hard-surfaced highway distance, as determined by the market administrator, from the City Hall in Cincinnati, Ohio, as any item of Class I milk or in the production of ice cream, frozen desserts, and cottage cheese, or (b) moved from such a pool plant in the form of any product designated as Class I milk or as condensed skim milk, ice cream mix, or frozen cream to a fluid milk plant less than 45 miles from the City Hall in Cincinnati, Ohio, and utilized as any item of Class I milk or in the production of ice cream, frozen desserts, and cottage cheese: *Provided*, That in the case of transfers made under paragraph (b) of this section the location differential credit (1) shall apply to the actual weight of product moved, which total quantity shall not exceed the difference between the sum of milk represented by Class I milk utilization and milk used to produce ice cream, frozen desserts, and cottage cheese at the transferee's plant and the total quantity of producer milk receipts at the latter plant, and (2) shall be allowed to the transferee-handler if such credit does not exceed the obligation of the latter handler to the producer-settlement fund for the month.

§ 965.60 *Computation of value of milk for each handler.* For each month the value of milk received at a pool plant(s) by each handler, and of milk diverted by a cooperative association under the conditions of § 965.9 (b), shall be a sum of money computed by the market administrator by multiplying the hundredweight of such milk received and classi-

fied in each class by the applicable class price, subject to the butterfat differential for such class provided in § 965.52 and the location differential credits, if any, applicable pursuant to § 965.53, and adjusting such total by the monies resulting from the following computations:

(a) Add: The hundredweight of butterfat subtracted pursuant to § 965.46 (g) multiplied by the price for the applicable class adjusted by the butterfat differential for such class;

(b) Add: The pounds, if any, that the milk or butterfat in inventory subtracted from Class I milk, pursuant to § 965.46 (e), is not in excess of the pounds of producer milk classified as Class II milk for the preceding month multiplied by the difference between the current price of Class I milk and the Class II price for the preceding month, each adjusted by the appropriate butterfat differential, and

(c) Add: The hundredweight of milk and butterfat subtracted from Class I milk and Class II milk pursuant to § 965.46 (c) (but not including any such milk and butterfat received from a plant regulated under a marketing agreement or order issued pursuant to the act for another fluid milk marketing area) multiplied by the difference between the price for the class from which subtracted, adjusted by the butterfat differential for such class (based on the butterfat tests of the milk subtracted), and the price computed pursuant to § 965.50 (b) adjusted to the same test by the butterfat differential (§ 965.52) for Class III milk (other than butter): *Provided,* That for any month when the aggregate utilization of Class I milk for all handlers at pool plants is 90 percent or more of the quantity of producer milk received by such handlers, the payments described pursuant to this paragraph and § 965.61 shall not be required.

§ 965.61 *Computation of obligation to the producer-settlement fund for handlers operating a fluid milk plant which is not a pool plant.* For each month, the obligation to the producer-settlement fund for each handler operating a fluid milk plant which is not a pool plant shall be computed by the market administrator by multiplying each hundredweight of milk disposed of as Class I milk (less the hundredweight of any Class I milk purchased by such handler during the month from a pool plant) by such handler on routes operated within the marketing area, by the difference between the price of the class of disposition computed pursuant to §§ 965.51, 965.52, and 965.53, and the price computed pursuant to § 965.50 (b) adjusted by the Class III butterfat differential (§ 965.52). On or before the 13th day after the end of each month, the market administrator shall notify each such handler of the amount so computed for him, subject to adjustment pursuant to § 965.62, and on or before the 17th day after the end of each month each such handler shall make payment to the market administrator.

§ 965.62 *Correction of errors.* If, in the verification of reports submitted by a handler, the market administrator discovers errors in such reports which result in payment due the producer-settlement fund or the handler for any previous month, there shall be added or subtracted as the case may be, the amount necessary to correct such errors.

§ 965.63 *Notification to handler of the value of his milk.* On or before the 13th day after the end of each month, the market administrator shall notify each handler of the value of milk computed for him in accordance with § 965.60 and of any adjustments pursuant to § 965.62.

§ 965.64 *Computation of uniform prices for Grade A producers and Grade B producers*—(a) *Computation of uniform price for Grade A producers.* For each month, the market administrator shall compute the uniform price per hundredweight of milk received by handlers from Grade A producers as follows:

(1) Add together the values of milk as computed pursuant to § 965.60 for handlers other than those in arrears in payment (other than in payment for any amount pursuant to § 965.62) to the producer-settlement fund as required by § 965.72 for the preceding month;

(2) Subtract, if the weighted average butterfat test of all producer milk represented in the sum computed under subparagraph (1) of this paragraph, is greater than 3.5 percent, or add, if the weighted average butterfat test of such milk is less than 3.5 percent, an amount computed as follows: Multiply the hundredweight of such milk by the difference of its weighted average butterfat test from 3.5 percent, and multiply the resulting amount by the butterfat differential computed pursuant to § 965.76 times 10;

(3) Subtract for each of the months of April, May, June, and July an amount computed by multiplying the total hundredweight of milk received from producers during such month by the following amounts, respectively: 30 cents in April; 35 cents in May and June; and 20 cents in July;

(4) Add for each of the months of August, September, October, and November an amount computed by dividing the total amount of the obligated balance in the producer-settlement fund pursuant to § 965.71 (b) on August 31 immediately preceding by 4;

(5) Add the sum of the values of the location differentials allowable pursuant to § 965.73 (c);

(6) Add the unobligated balance in the producer-settlement fund;

(7) Add an amount computed by multiplying the total hundredweight of milk received from Grade B producers by $0.40;

(8) Divide by the total hundredweight of milk of all producers represented in the sum computed pursuant to subparagraph (1) of this paragraph; and

(9) Subtract from the figure obtained in subparagraph (8) of this paragraph not less than 4 cents or more than 5 cents per hundredweight for the purpose of retaining a cash balance to provide against errors in reports and in payments by handlers. The result shall be known as the uniform price per hundredweight for such month for milk (on the basis of 3.5 percent of butterfat) received from Grade A producers.

(b) *Computation of uniform price for Grade B producers.* For each delivery period, the market administrator shall compute the uniform price per hundredweight of milk received by handlers from Grade B producers as follows: From the uniform price computed pursuant to paragraph (a) (7) of this section subtract 40 cents. The result shall be known as the uniform price per hundredweight for such month for milk (on the basis of 3.5 percent of butterfat) received from Grade B producers.

PAYMENT FOR MILK

§ 965.70 *Payments to producers.* On or before the 5th day after the end of each month, each handler shall pay, with respect to all milk received during the month, $1.00 per hundredweight of milk to each producer: *Provided,* That in the event the total amount of deductions and charges authorized by any producer against payments due such producer for the month next preceding is greater than the payment computed for such producer pursuant to § 965.73 (a) with respect to the milk received from such producer during such preceding month, the handler may deduct from the payment required by this section a sum equal to the difference between such amounts.

§ 965.71 *Producer-settlement fund.* The market administrator shall establish and maintain a separate fund, known as the "producer-settlement fund", which shall function as follows:

(a) All payments made by handlers pursuant to §§ 965.61 and 965.72 shall be deposited in this fund, and all payments made pursuant to § 965.73 shall be made out of this fund;

(b) All amounts subtracted pursuant to § 965.64 (a) (3) shall be deposited in this fund and shall remain therein as an obligated balance until withdrawn for the purpose of effectuating § 965.64 (a) (4); and

(c) The difference between the amount added pursuant to § 965.64 (a) (6) and the amount resulting from the subtraction pursuant to § 965.64 (a) (9) shall be deposited in, or withdrawn from, this fund, as the case may be, to effectuate § 965.64 (a) (6) and (9).

§ 965.72 *Payments to producer-settlement fund.* On or before the 17th day after the end of each month, each handler shall pay to the market administrator the amount of money which represents the value of milk for such month of which he is notified pursuant to § 965.63 less the amount paid out to each producer in accordance with § 965.70, and less the amount of the deductions and charges authorized by such producer which are itemized on the handler's producer payroll: *Provided,* That in the calculation of the total amount of such deductions and charges to be subtracted, the deductions and charges to be considered with respect to each individual producer shall not be greater than an amount which, when added to the payment made to such producer in accordance with § 965.70 (inclusive of the deductions and charges authorized by

§ 965.70), will not exceed the total value of the milk received from such producer.

§ 965.73 *Payments from producer-settlement fund.* (a) For each month the market administrator shall compute, subject to the provisions of paragraph (c) of this section, the payment due each producer for milk received during such month from such producer by a handler who made the payments for such month pursuant to § 965.72, by multiplying the hundredweight of such milk by the uniform price computed to § 965.64 adjusted to the butterfat test of such milk by adding or subtracting, respectively, for each one-tenth of one percent that the butterfat content of such milk is above or below 3.5 percent, a butterfat differential as computed pursuant to § 965.76, and subtracting any charges and deductions made pursuant to § 965.72.

(b) On or before the 20th day after the end of each month, the market administrator shall pay, subject to the provisions of § 965.75, to each cooperative association authorized to receive payments due producers who market their milk through such cooperative association, the aggregate of payments calculated pursuant to paragraph (a) of this section, for all producers certified to the market administrator by such cooperative association as having authorized such cooperative association to receive such payments. On or before the 20th day after the end of each month, the market administrator shall pay, subject to the provisions of § 965.75, direct to each producer who has not authorized a cooperative association to receive payments for such producer, the amount of the payment calculated for such producer pursuant to paragraph (a) of this section.

(c) In computing the payment due each producer pursuant to paragraph (a) of this section, the following differential for location is applicable: A deduction of 15 cents per hundredweight shall be made with respect to milk received from such producer at a pool plant located more than 45 miles, by shortest hard-surfaced highway distance as determined by the market administrator, from the City Hall in Cincinnati, Ohio.

§ 965.74 *Expense of administration.* As his pro rata share of the expense incurred in the maintenance and functioning of the office of the market administrator and in the performance of the duties of the market administrator, each handler shall pay to the market administrator, on or before the 17th day after the end of each month, 2 cents per hundredweight or such lesser amount as the Secretary may from time to time prescribe, with respect to all milk received from producers and produced by him during the month: *Provided,* That any cooperative association which has handled milk during the month under the conditions set forth in § 965.9, shall pay such pro rata share of expense of administration on only that quantity of milk so handled.

§ 965.75 *Marketing services.* (a) The market administrator shall deduct an amount not exceeding 6 cents per hundredweight (the exact amount to be determined by the market administrator) from the payments made pursuant to § 965.73 (b), with respect to the milk of those producers for whom the marketing services set forth in paragraph (b) of this section are not being performed by a cooperative association which the Secretary determines to be qualified under the provisions of the act of Congress of February 18, 1922, as amended; known as the "Capper-Volstead Act," for the purpose of performing the services set forth in paragraph (b) of this section.

(b) The moneys received by the market administrator pursuant to paragraph (a) of this section shall be expended by the market administrator for market information to, and for the verification of weights, samples, and tests of milk of, producers for whom a cooperative association, as described in paragraph (a) of this section, is not performing the same services on a comparable basis, as determined by the market administrator, subject to review of the Secretary.

§ 965.76 *Butterfat differential to producers.* In making payments for milk pursuant to § 965.73 (a) there shall be added to, or subtracted from the uniform price per hundredweight, for each one-tenth of 1 percent of butterfat content in such milk above or below 3.5 percent, as the case may be, a butterfat differential computed by the market administrator as follows:

(a) Compute the percentage of butterfat in each class derived from producer milk, as computed pursuant to § 965.46;

(b) Multiply each such percentage figure by the butterfat differential for the respective class pursuant to § 965.52; and

(c) Add into one total the value obtained in paragraph (b) of this section, rounding off the result to the nearest even one-tenth cent.

§ 965.77 *Termination of obligation.* (a) The obligation of any handler to pay money required to be paid under the terms of this subpart shall, except as provided in paragraphs (b) and (c) of this section, terminate two years after the last day of the calendar month during which the market administrator receives the handler's utilization report on the milk involved in such obligation, unless within such two-year period the market administrator notifies the handler in writing that such money is due and payable. Service of such notice shall be complete upon mailing to the handler's last known address and it shall contain, but need not be limited to, the following information:

(1) The amount of the obligation;

(2) The month(s) during which the milk, with respect to which the obligation exists, was received or handled; and

(3) If the obligation is payable to one or more producers or to a cooperative association, the name of such producers or cooperative association, or if the obligation is payable to the market administrator, the account for which it is to be paid.

(b) If a handler fails or refuses, with respect to any obligation under this subpart, to make available to the market administrator or his representatives all books and records required by this subpart to be made available, the market administrator may within the two-year period provided for in paragraph (a) of this section, notify the handler in writing of such failure or refusal. If the market administrator so notifies a handler, the said two-year period with respect to such obligation shall not begin to run until the first day of the calendar month following the month during which such books and records pertaining to such obligation are made available to the market administrator or his representatives.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, a handler's obligation under this subpart to pay money shall not be terminated with respect to any transaction involving fraud or willful concealment of a fact, material to the obligation, on the part of the handler against whom the obligation is sought to be imposed.

(d) Any obligation on the part of the market administrator to pay a handler any money which such handler claims to be due him under the terms of this subpart shall terminate two years after the end of the calendar month during which milk involved in the claim was received if an underpayment is claimed, or two years after the end of the calendar month during which the payment (including deduction or set-off by the market administrator) was made by the handler if a refund on such payment is claimed, unless such handler, within the applicable period of time, files, pursuant to section 8c (15) (A) of the act, a petition claiming such money.

EFFECTIVE TIME, SUSPENSION OR TERMINATION

§ 965.80 *Effective time.* The provisions of this subpart, or any amendment to this subpart shall become effective at such time as the Secretary may declare and shall continue in force until suspended or terminated.

§ 965.81 *Suspension or termination.* Any or all provisions of this subpart, or amendments to this subpart, shall be suspended or terminated as to any or all handlers after such reasonable notice as the Secretary may give, and shall terminate in any event, whenever the provisions of the act authorizing it cease to be in effect.

§ 965.82 *Continuing power and duty of the market administrator.* If upon the suspension or termination of any or all provisions of this subpart, there are any obligations arising under this subpart, the final accrual or ascertainment of which requires further acts by any handler, by the market administrator, or by any other person, the power and duty to perform such further acts shall continue notwithstanding such suspension or termination: *Provided,* That any such acts required to be performed by the market administrator shall, if the Secretary so directs, be performed by such other person, persons, or agency as the Secretary may designate. The market administrator, or such person as the Secretary may designate, shall continue

in such capacity until removed by the Secretary; account from time to time for all receipts and disbursements and, when so directed by the Secretary, deliver all funds on hand, together with the books and records of the market administrator or such other person to such person as the Secretary shall direct and execute, if so directed by the Secretary, such assignments or other instruments necessary or appropriate to vest in such person full title to all funds, property, and claims vested in the market administrator or such person pursuant thereto.

§ 965.83 *Liquidation after suspension or termination.* Upon the suspension or termination of any or all provisions of this subpart the market administrator, or such person as the Secretary may designate, shall, if so directed by the Secretary, liquidate the business of the market administrator's office and dispose of all funds and property then in his possession or under his control, together with claims for any funds which are unpaid or owing at the time of such suspension or termination. Any funds collected pursuant to the provisions of this subpart, over and above the amount necessary to meet outstanding obligations and the expenses necessarily incurred by the market administrator or such person in liquidating and distributing such funds, shall be distributed to the contributing handlers and producers in an equitable manner.

MISCELLANEOUS PROVISIONS

§ 965.90 *Agents.* The Secretary may, by designation in writing, name any officer or employee of the United States to act as his agent or representative in connection with any of the provisions of this subpart.

§ 965.91 *Separability of provisions.* If any provision of this subpart, or its application to any person or circumstances, is held invalid the application of such provisions, and of the remaining provisions of this subpart, to other persons or circumstances shall not be affected thereby.

§ 965.92 *Producer handler.* Sections 965.40 to 965.77 inclusive, shall not apply to a producer-handler.

Commodity Stabilization Service

[7 CFR Part 722]

UPLAND COTTON

MEASUREMENT OF 1955 ACREAGE, MARKETING, COLLECTION OF MARKETING PENALTIES, AND RECORDS AND REPORTS FOR 1955-56 MARKETING YEAR

A national marketing quota proclamation for the 1955 crop of upland cotton was issued by the Secretary of Agriculture on October 14, 1954 (19 F. R. 6669), and the quota was approved by upland cotton producers voting in a referendum on December 14, 1954. Farm acreage allotments for the 1955 crop of upland cotton were established pursuant to section 344 of the Agricultural Adjustment Act of 1938, as amended; and notices thereof mailed to farm operators prior to the date of the referendum in accordance with section 362 of the act.

Pursuant to the authority contained in the applicable provisions of the act, as amended (7 U. S. C. 1301-1376), the Secretary of Agriculture is preparing to formulate and issue marketing quota regulations covering the identification and measurement of farms; the amount, adjustment and review of the farm marketing quota and farm marketing excess; the issuance of marketing cards and certificates; the identification of upland cotton which is marketed as being subject to or not subject to the penalty and lien for the penalty; the rate of the penalty and the manner in which penalties shall be paid by producers and buyers; the refunding of penalty overpayments; the records and reports required to be made by upland cotton producers, ginners, buyers and others; and other miscellaneous provisions regarding the production and marketing of upland cotton.

It is proposed that the regulations be substantially the same as the regulations in effect for the 1954-55 marketing year (19 F. R. 3124, 4126, 4262, and 20 F. R. 509) except that § 722.546 relating to measurements of farms will be written so as more fully to set out the responsibilities and duties of county committees and producers relating to measurements of farms, and a new section will be added to provide for the handling of cases where erroneous notices of cotton acreage allotments are issued.

Prior to the issuance of such regulations, consideration will be given to any data, views, or information pertaining thereto which are submitted in writing to the Director, Cotton Division, Commodity Stabilization Service, United States Department of Agriculture, Washington 25, D. C. All submissions must be postmarked not later than 15 calendar days from the date of publication of this notice in the FEDERAL REGISTER in order to be considered. The date of the postmark will be considered as the date of any submission.

Issued this 19th day of April 1955.

[SEAL] WALTER C. BERGER,
Acting Administrator.

[F. R. Doc. 55-3331; Filed, Apr. 22, 1955; 8:47 a. m.]

[7 CFR Part 722]

EXTRA LONG STAPLE COTTON

MEASUREMENT OF 1955 ACREAGE, MARKETING, COLLECTION OF MARKETING PENALTIES, AND RECORDS AND REPORTS FOR 1955-56 MARKETING YEAR

A national marketing quota proclamation for the 1955 crop of extra long staple cotton was issued by the Secretary of Agriculture on October 14, 1954 (19 F. R. 6671), and the quota was approved by extra long staple cotton producers voting in a referendum on December 14, 1954. Farm acreage allotments for the 1955 crop of extra long staple cotton were established pursuant to sections 347 (c) and 344 of the Agricultural Adjustment Act of 1938, as amended; and notices thereof mailed to farm operators prior to the date of the referendum in accordance with section 362 of the act.

Pursuant to the authority contained in the applicable provisions of the act, as amended (7 U. S. C. 1301-1376), the Secretary of Agriculture is preparing to formulate and issue marketing quota regulations covering the identification and measurement of farms; the amount adjustment and review of the farm marketing quota and farm marketing excess; the issuance of marketing cards and certificates; the identification of extra long staple cotton which is marketed as being subject to or not subject to the penalty and lien for the penalty; the rate of the penalty and the manner in which penalties shall be paid by producers and buyers; the refunding of penalty overpayments; the records and reports required to be made by extra long staple cotton producers, ginners, buyers and others; and other miscellaneous provisions regarding the production and marketing of extra long staple cotton.

It is proposed that the regulations be substantially the same as the regulations in effect for the 1954-55 marketing year (19 F. R. 3133, 4262, 4591, and 20 F. R. 511) except that § 722.1146 relating to measurements of farms will be written so as more fully to set out the responsibilities and duties of county committees and producers relating to measurements of farms, and a new section will be added to provide for the handling of cases where erroneous notices of cotton acreage allotments are issued.

Prior to the issuance of such regulations, consideration will be given to any data, views, or information pertaining thereto which are submitted in writing to the Director, Cotton Division, Commodity Stabilization Service, United States Department of Agriculture, Washington 25, D. C. All submissions must be postmarked not later than 15 calendar days from the date of publication of this notice in the FEDERAL REGISTER in order to be considered. The date of the postmark will be considered as the date of any submission.

Issued this 19th day of April 1955.

[SEAL] WALTER C. BERGER,
Acting Administrator.

NOTICES

DEPARTMENT OF COMMERCE

Bureau of Foreign Commerce

[Case No. 195]

ORCHARD REFINING & SMELTING WORKS, INC. ET AL.

ORDER REVOKING LICENSES AND DENYING EXPORT PRIVILEGES

In the matter of Orchard Refining & Smelting Works, Inc., Saul L. Friedman, Samuel I. Friedman, individually and as officers thereof, 9-37 Victoria Street, Newark, N. J.; Israel Bresler, 100 West 55th Street, New York, N. Y., respondents; Case No. 195.

The respondents, Orchard Refining & Smelting Works, Inc., a corporation, Samuel I. Friedman and Saul L. Friedman, individually and as officers thereof (herein referred to as the Orchard respondents), and Israel Bresler, have been charged by the Director, Export Control Investigation Staff of the Bureau of Foreign Commerce, Department of Commerce, with having violated the Export Control Act of 1949, as amended, and regulations promulgated thereunder, in that, as alleged (a) on January 18, 1954 the Orchard respondents gave to a licensing officer of the Bureau of Foreign Commerce at Washington, D. C. the sum of $150, and (b) on or about January 26, 1954 the Orchard respondents, in concert with respondent Bresler and upon his advice and with his assistance made or caused to be made an unauthorized exportation of copper scrap from the United States to a customer in Japan under an export license issued to the Orchard respondents for an unrelated customer in Japan and concealed and misrepresented the true consignee and purchaser on the shipper's export declaration.

The respondents were duly served with charging letters in which they have been fully informed of the charges against them and have filed their answers and statements in opposition to the charges and have demanded a formal hearing. This proceeding has therefore been duly submitted to a Compliance Commissioner for hearing, report and recommendation. A hearing has been duly held and the Orchard respondents have appeared and were represented by counsel thereat, and respondent Bresler has appeared in person. The Compliance Commissioner has heard the evidence, filed his report herein, and made his recommendation.

The Director, Office of Export Supply has carefully considered the whole record, the report and the recommendation, and has made the finding that on January 18, 1954 the Orchard respondents gave $150 to an official of the Bureau of Foreign Commerce known to them to be a licensing officer responsible for issuing licenses for the exportation of metal scrap; that it was given with the intention of influencing the issuance of the corporation's license application then before such officer for action and with respect to future applications, as prohibited by § 384.2 of the export control regulations (15 CFR 384.2). He has rejected the respondents' contention that the money was a belated Christmas gift and was given without intent to influence the officer's acts as aforesaid. He has made the finding that respondents did not intend, however, to violate any other export control regulation thereby.

The Director, Office of Export Supply has made the further finding that on or about January 26, 1954, the Orchard respondents made an unauthorized exportation to a customer in Japan of 120,536 pounds of mixed copper scrap under a license held by the corporation for the shipment of similar material to an unrelated customer in Japan and effected the exportation by an authenticated shipper's export declaration, prepared or caused to be prepared by the Orchard respondents, on which the true consignee and purchaser in Japan was knowingly concealed and the unrelated customer was falsely represented as the consignee-purchaser. He has made the further finding that respondent Bresler, an independent sales agent of the Orchard respondents but not an employee of the corporation, acted in concert with the Orchard respondents and aided and advised them in making the aforesaid exportation, although not participating in the preparation of the falsified shipper's export declaration as aforesaid.

The Director, Office of Export Supply has concluded, therefore, that the respondents have committed the acts as charged and have thereby violated the export control law and regulations alleged to have been violated in the charging letters.

The Compliance Commissioner stated in his report that in connection with the making of his recommendation he took into consideration the involvement of respondent Bresler in only one of the violations, the absence of a prior record of export control violations on the part of any of the respondents, their standing and reputation in the trade, their relatively limited export experience at the time the violations occurred, the present realization of the import of their violative acts, and the voluntary abandonment of all export transactions by the Orchard respondents. The recommendation of the Compliance Commissioner, upon the facts and circumstances appearing in the record, appears to be fair, reasonable and necessary to achieve effective enforcement of the export control law, and it is accordingly adopted: *It is now, therefore, ordered:*

I. All outstanding validated export licenses held by or issued in the names of respondents, or any of them, or to which they may be parties, are hereby revoked and shall be returned forthwith to the Bureau of Foreign Commerce for cancellation.

II. The Orchard respondents, their officers, directors, representatives, agents and employees, and respondent Bresler, are hereby denied all privileges of participating, directly or indirectly, in any manner, form, or capacity, in an exportation of any commodity or technical data from the United States to any foreign destination, including Canada. Without limitation of the generality of the foregoing denial, participation in an exportation shall be deemed to include and prohibit the respondents' participation (a) as a party or as a representative of a party to any validated export license application, (b) in the obtaining or using of any validated or general export license or other export control document, (c) in the receiving, ordering, buying, selling, using, or disposing in any foreign country of any commodities in whole or in part exported or to be exported from the United States, and (d) in the financing, forwarding, transporting, buying, selling, processing, or other servicing of exports from the United States.

III. Such denial of export privileges shall apply not only to the respondents herein and the other persons or firms within the scope of Part II hereof, but shall apply and extend also to any other person, firm, corporation, or other business organization with which the respondents, or any of them, may be now or hereafter related by ownership, control, position of responsibility, or other connection in the conduct of trade involving exports from the United States or services connected therewith.

IV. This order shall be effective from the date hereof, and as to the Orchard respondents shall extend for a period of six months from the date hereof; as to respondent Bresler for a period of two months from the date hereof.

V. No person, firm, corporation, or other business organization, whether in the United States or elsewhere, and whether or not engaged in trade relating to exports from the United States, shall, without prior disclosure of the facts to, and specific authorization from, the Bureau of Foreign Commerce, directly or indirectly, in any manner, form or capacity, (a) apply for, obtain, transfer, or use any license, shipper's export declaration, bill of lading, or other export control document relating to an exportation of commodities from the United States, or (b) order, receive, buy, use, process, dispose of, finance, transport, forward, store, or otherwise service or participate in an exportation from the United States, with respect to which any of the respondents herein or any person or firm not excluded from the scope of Parts II and III hereof have any interest or participation of any kind or nature, direct or indirect.

Dated: April 19, 1955.

JOHN C. BORTON,
Director,
Office of Export Supply.

CIVIL AERONAUTICS BOARD

[Order E-9114; Docket No. 1705 et al.]

AIR FREIGHT RATE INVESTIGATION; SLICK AIRWAYS, INC.'S, PETITION TO MODIFY MINIMUM RATES APPLICABLE TO CUT FLOWERS

OPINION AND ELEVENTH SUPPLEMENTAL ORDER MODIFYING MINIMUM RATES

APRIL 20, 1955.

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 19th day of April 1955.

Slick Airways, Inc. (Slick), on February 18, 1955, filed a petition requesting that the Board's Tenth Supplemental Order Modifying Prescribed Minimum Rates[1] be amended so as to exclude cut flowers from the increase in minimum rates therein prescribed.

History of this proceeding relating to Slick's petition. The Board on June 2, 1948, entered an order[2] prescribing lawful minimum rates for the transportation of property by air (except for property carried in the air express service) of 16 cents per ton mile for the first one thousand ton miles in any one shipment and 13 cents per ton mile for all ton miles in excess thereof. This order provided that the record be held open for any party of interest to petition for modification of the minimum rates as to any commodity or group of commodities between any points. By opinion and order dated April 10, 1950,[3] the Board found that the directional imbalance of air cargo movements resulted in low load factors in the backhaul direction and the consequent loss of revenue with its restrictive effect upon the development of traffic in the dominant direction. In order that the carriers might have an opportunity to increase their backhaul traffic by a rate inducement, the Board modified the minimum rate order to provide "below minimum" rates, based upon percentages of the minimum rates, for long haul shipments in easterly and northerly directions.[4] The Board, however, specifically excluded application of the "below minimum" directional rates to cut flowers and certain other commodities with characteristics which enabled them to move at or above the minimums prescribed in Order No. E-1639. This order was modified on November 30, 1950,[5] so as to permit "below minimum" northbound directional rates on gladioli. Thereafter, the Board in its Tenth Supplemental Order Modifying Prescribed Minimum Rates, dated October 21, 1953,[6] amended Order No. E-1639 by increasing minimum rates to 20 cents for the first one thousand ton miles and 16.25 cents for all ton miles in excess thereof. This order also modified the "below minimum" directional rate orders[7] so that the percentages of the minimums specified in said orders would be applicable to the increased minimum rates therein prescribed.

Contention of parties. Slick alleges that while cut flowers previously moved in substantial volume at the minimum rates prescribed by Order No. E-1639, subsequent rate increases had a depressing effect on the volume of cut flower movements and contends that an increasing amount of flowers are moving from west coast points by other modes of transportation; that a reduction in rates would increase the air freight volume and the total revenues received by air carriers from the shipment of cut flowers by air, and that there is available the capacity to carry the additional movement which would be generated by lower rates. Slick does not advocate reduction in rates to the extent which would be permitted if the directional rate Order No. E-4048 were amended so as to permit directional rates to apply to cut flowers but requests that the Tenth Supplemental Order No. E-7837 be amended to provide that the increase therein prescribed raising the minimum rate level from 16–13 cents to 20–16.25 cents not apply to cut flowers. Slick's allegations relative to the movement of cut flowers are restricted to movements from the west coast to the midwest and east and Slick's request is limited to apply only on cut flowers moving from the west coast to the midwest and east.[8]

United Airlines, Inc. (United), filed Answer in Opposition to Slick's petition but subsequently withdrew its Answer. No other objections have been filed. Consolidated Flower Shipments, Inc.-Bay Area, filed Petition for Leave to Intervene in Support of Slick's Petition.

Following the establishment of minimum rates by the Board's order of June 2, 1948, there have been several increases in the rates on cut flowers. The rates from Los Angeles to New York and Chicago were increased approximately 10 percent in April 1952 and a second increase of a similar amount was placed in effect in November 1953 required by the Tenth Supplemental Order Modifying Minimum Rates. The effect of these raises has been to increase rates approximately 25 percent above the level of the minimum rates established in the original order. Examples of these rate increases are set out in Appendix A. It was stipulated by the parties to the proceeding that the facts set out in material circulated to the parties by Slick in support of its position be incorporated into and considered part of the record in this proceeding. From the record before us, it appears that the increase in rates on cut flowers has been accompanied by a decline in the acreage of cut flower production in Southern California and a decline in the total pounds of flowers shipped by air from California.[9] Cut flowers moved by Slick have declined from 3.3 million pounds for the period January through October 1951 to 1.5 million pounds for the same period in 1954.[10] Data from representative carriers, for the period January 1, 1955, through March 19, 1955, discloses a decline of shipments from Southern California to New York of 52.1 percent and a decline in shipments from Southern California to Chicago of 43.4 percent, as compared with the same period in 1954.[11] The California State Florists' Association and the Southern California Floral Association, who state their associations speak for 90 percent of the floral industry of California, contend that the decline in movement by air of flowers from California has been due to the increased rates. Support for this contention is found from data which indicates that the gross margins of wholesale florists have decreased substantially between April 1951 and November 1954.[12]

Findings and conclusions. Based upon the foregoing, we are satisfied that there has been a decline in the eastbound movement by air of cut flowers, and that a reduction in rates would be reasonably calculated to increase the movement of cut flowers and to that extent alleviate the directional imbalance of traffic and improve the position of the carriers.

In authorizing "below minimum" directional rates in our previous orders, we excluded cut flowers upon a finding that cut flowers was a commodity which would move at or above existing minimums. In view of our finding that the increase in rates has restricted the movement of cut flowers, the basis for excluding cut flowers from "below minimum" rates no longer prevails.

We find no reason to permit minimums lower than those proposed by Slick nor has there been any contention or showing for a need for "below minimum" rates except for the movement of cut flowers in an easterly direction and our order will therefore be restricted accordingly.

It is ordered, That:

1. The lawful minimum rates and charges to be demanded, charged, collected or received for the interstate transportation of property by air from airport to airport (except for property carried in the air express service) determined and prescribed by Order No. E-1639 as amended and modified, are hereby further modified as follows:

For any shipment of cut flowers moving in an easterly direction from any point in any State on the west coast of the United States to any point in any State in the United States or the District of Columbia, on or north of the 37th parallel of latitude, the minimum rates are determined and prescribed to be the rates computed as follows:

(a) 16 cents per ton mile for the first one thousand ton miles of any one shipment.

(b) 13 cents per ton mile for all ton miles in excess of one thousand ton miles of any one shipment.

2. The petition to intervene filed by Consolidated Flower Shipments, Inc.—Bay Area be granted.

3. This order be published in the FEDERAL REGISTER.

NOTE: Appendices A, B, C, D, and E, filed as part of the original document.

Rizley, Chairman, Adams, Vice Chairman, Lee and Denny, Members of the Board, concurred in the above opinion and order. Gurney, Member, did not take part in the decision.

[SEAL] M. C. MULLIGAN, *Secretary.*

[Docket No. 6786]

PIONEER AIR LINES; CERTIFICATE RENEWAL CASE

NOTICE OF PREHEARING CONFERENCE

In the matter of the application of Pioneer Air Lines under section 401 of the Civil Aeronautics Act of 1938, as amended, for a renewal of its temporary certificate.

Notice is hereby given that a prehearing conference in the above-entitled matter is assigned to be held on May 13, 1955, at 10:00 a. m., e. d. s. t., in Room E-210, Temporary building No. 5, Seventeenth and Constitution Avenue NW., Washington, D. C., before Examiner Herbert K. Bryan.

Notice is also given that in connection with the above-numbered application consideration will be given at the conference to consolidating for hearing and decision the applications of Pioneer in Dockets Nos. 3376, 5562, and 6623. In order to facilitate the conduct of this conference interested parties are requested to present motions for consolidation or modification of the issues in this proceeding to Examiner Bryan on or before May 9, 1955, with copies to other interested parties. It is also requested that any requests for evidence should be circulated at the same time.

Dated at Washington, D. C., April 15, 1955.

[SEAL] FRANCIS W. BROWN, *Chief Examiner.*

FEDERAL COMMUNICATIONS COMMISSION

[Docket Nos. 11124, 11125; FCC 55M-352]

HAROLD M. GADE AND MONMOUTH COUNTY BROADCASTERS

ORDER SCHEDULING CONFERENCE

In re applications of Harold M. Gade, Eatontown, New Jersey, Docket No. 11124, File No. BP-9096; Monmouth County Broadcasters, Long Branch, New Jersey, Docket No. 11125, File No. BP-9231; for construction permits.

The Hearing Examiner having under consideration a Petition Requesting Resumption of Hearing filed April 6, 1955, by Harold M. Gade, and the facts shown by the files, records and orders in this proceeding; and

It appearing that these procedural steps place the instant petition in proper perspective: (1) The applications herein were designated for hearing at a time and place to be specified later by a Commission order released August 9, 1954; (2) on August 18, 1954, Broadcast Bureau filed herein a petition to enlarge the issues and to add a party which was opposed by Monmouth County Broadcasters, and which was granted by the Commission's memorandum opinion and order released November 5, 1954; (3) by Motions Commissioner's order dated September 21, 1954, Harold M. Gade was permitted to amend his application in certain respects not here material; (4) by Commission's order released December 3, 1954, the hearing was scheduled to be commenced in Washington, D. C. on February 8, 1955; (5) by Hearing Examiner's order dated January 5, 1955, a prehearing conference was scheduled for January 19, 1955, which was duly commenced as shown by Volume 1 of the transcript, being pages 1 through 23; (6) the prehearing conference and the hearing date were continued to a date to be fixed by subsequent order, as shown by the transcript and by Hearing Examiner's order dated January 20, 1955, in order to permit Broadcast Bureau to carry out its stated intention to file a petition to enlarge the issues, and to allow time for Commission action thereon; (7) on April 5, 1955, Harold M. Gade filed with the Commission under the caption of this proceeding a petition requesting the Commission to return as unacceptable for filing an application by Long Branch Broadcasting Company which is therein alleged to be mutually exclusive with the applications herein; (8) on April 6, 1955, Long Branch Broadcasting Company filed, also under the caption of this proceeding, a reply to the preceding petition; and (9) on April 6, 1955, Harold M. Gade filed the petition now under consideration; and

It further appearing that petitioner requests that the hearing be "forthwith" resumed, points out that Broadcast Bureau has not yet filed any petition for enlargement of the issues, and asserts that further delay will not conduce to the orderly dispatch of this matter; and

It further appearing that no opposition to the petition before us has been filed or tendered by any party or person and that the time allowed for the filing thereof has elapsed; and

It further appearing that the matters presented by the pleadings referred to in (7) and (8) above are not properly a part of this proceeding within the jurisdiction of the Hearing Examiner under the Commission's rules; and

It further appearing that the granting of the petition as hereinafter ordered will conduce to the orderly dispatch of the Commission's business and will serve the ends of justice, now therefore

It is ordered, This 19th day of April 1955, that the petition filed April 6, 1955, by Harold M. Gade is granted and the further prehearing conference in this proceeding shall be convened at 10:00 a. m. on Wednesday, April 27, 1955, in Washington, D. C.

FEDERAL COMMUNICATIONS COMMISSION,

FEDERAL POWER COMMISSION

[Docket No. E-6617]

IDAHO POWER CO.

NOTICE OF APPLICATION

APRIL 19, 1955.

Take notice that on April 15, 1955, an application was filed with the Federal Power Commission, pursuant to Part 34 of the Commission's general rules and regulations under the Federal Power Act, by the Idaho Power Company (Applicant), for authorization to issue 1,125,000 shares of its Common Stock (par value $10 per share).

Applicant, a corporation organized and existing under the laws of the State of Maine, and qualified to do business as a foreign corporation in the States of Oregon, Idaho and Nevada, with its principal place of business in Boise, Idaho, states that the shares to be issued will effect a proposed reclassification of its presently outstanding shares of Common Stock (par value $20 per share). Under the reclassification plan Applicant proposes to reduce the par value of its shares of Common Stock from $20 to $10 per share. The holders of the 1,125,000 shares of $20 par value Common Stock of the Applicant presently outstanding will receive one share of the new $10 par value Common Stock for each share of the $20 par value stock

[1] Order No. E-7837, dated October 21, 1953.
[2] Order No. E-1639, 9 CAB 340, 357.
[3] Order No. E-4048, 11 CAB 228.
[4] Directional rates were authorized up to and including September 1, 1951. By Order No. E-5648, dated August 24, 1951, "below minimum" directional rates were extended to and including September 21, 1952. By Order No. E-6698, August 18, 1952, "below minimum" directional rates were extended indefinitely.
[5] Order No. E-4890.
[6] Order No. E-7837, granting petition of Slick Airways, Inc., to increase minimum rates because of increased costs.
[7] Order Nos. E-4048, E-4890 and E-6698.
[8] Slick agreed at the prehearing conference to limit its request to lower maximums from the west coast to the midwest and east.
[9] Cut Flower Shipments by Air Freight from Northern and Southern California, Appendix B.
[10] Flowers Moved Via Slick Airways, Pounds Enplaned, by Months, 1950–1954. Appendix C.
[11] Cut Flower Shipments from Southern California to New York and Chicago of Selected Carriers. Appendix D.
[12] Effects of Percentage Increase of Los Angeles to New York Air Freight Rates on New York Wholesale Florists' Margins, April 22, 1951 and November 20, 1954. Appendix E.

presently held. The Applicant states that the outstanding certificates currently evidencing its $20 par value shares will not be exchanged under the reclassification plan for new certificates but rather will remain outstanding, representing the same number of shares but of the decreased par value Common Stock.

The application states that the proposed reclassification will, among other things, improve the marketability of Applicant's Common Stock. The proposed reclassification plan is to be submitted to Applicant's stockholders for approval at its forthcoming annual meeting to be convened May 4, 1955; all as more fully appears in the application on file with the Commission.

Any person desiring to be heard, or to make any protest with reference to said application, or to request further period of time within which to request to be heard or to make any protest with reference to said application, should, on or before the 29th day of April 1955, file with the Federal Power Commission, Washington 25, D. C., a petition or protest, as the case may be, in accordance with the Commission's general rules and regulations. The Application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
Secretary.

GENERAL SERVICES ADMINISTRATION

SECRETARY OF DEFENSE

DELEGATION OF AUTHORITY WITH RESPECT TO DISPOSAL OF REAL PROPERTY AT DETROIT DAM AND RESERVOIR, OREGON, BY THE DEPARTMENT OF DEFENSE

1. Pursuant to authority vested in me by the Federal Property and Administrative Services Act of 1949, 63 Stat. 377, as amended, herein called the act, authority is hereby delegated to the Secretary of Defense to determine that certain property, consisting of 16.094 acres of land owned in fee and 3.757 acres in railroad right-of-way easements, being a portion of Tract A-1 of the Detroit Dam and Reservoir, Marion County, Oregon, is not required for the needs and responsibilities of Federal agencies; and thereafter to dispose of such property by negotiated sale or otherwise as the interest of the Government may require.

2. The authority conferred herein shall be exercised in accordance with the act and regulations issued pursuant thereto, and in particular section 203 (e) of the act, requiring that an explanatory statement be prepared and submitted to the appropriate committees of Congress and a copy preserved in the file of all cases where negotiated disposal occurs. Such statements shall be submitted to the committees at least thirty (30) days prior to consummation of any negotiated disposal, and a copy of each such statement shall be furnished this Administration.

3. The Secretary of Defense may redelegate this authority to any officer or employee of the Department of Defense.

4. This delegation of authority is effective immediately.

Dated: April 20, 1955.

EDMUND F. MANSURE,
Administrator.

[Amdt. 2]

NICKEL-GRAPHITE COMMITTEE

PROVISION FOR PERFORMANCE OF LEGAL SERVICES BY OFFICE OF GENERAL COUNSEL

Pursuant to the authority vested in me by the Federal Property and Administrative Services Act of 1949, as amended, and the Defense Production Act of 1950, as amended, the Delegation of Authority to the Nickel-Graphite Committee issued by me on August 25, 1953 (18 F. R. 5285), and Amendment 1 thereof issued by me on June 9, 1954 (19 F. R. 3497), are hereby amended as follows:

1. The second sentence of paragraph 3 of the said Delegation of August 25, 1953, is hereby amended to read as follows: "The Office of General Counsel shall perform all legal services required in connection with the programs, functions, and administration of the Committee."

2. Paragraph 1 of the said Amendment 1 of June 9, 1954, (amending paragraph 1 of the said delegation of August 25, 1953) is hereby amended by deleting therefrom the phrase "with the advice of the Committee Staff Counsel", and inserting in lieu thereof the phrase "with the advice of counsel detailed from the Office of General Counsel to perform legal services for the Committee".

Dated: April 21, 1955.

EDMUND F. MANSURE,
Administrator.

SECURITIES AND EXCHANGE COMMISSION

[File No. 70-3362]

NATIONAL FUEL GAS CO.

NOTICE OF FILING REGARDING PROPOSED PURCHASE BY HOLDING COMPANY OF PROMISSORY NOTES TO BE ISSUED BY EXEMPT SUBSIDIARY

APRIL 19, 1955.

Notice is hereby given that National Fuel Gas Company ("National"), a registered holding company, has filed with this Commission an application-declaration pursuant to the Public Utility Holding Company Act of 1935 ("act"), designating sections 3 (b), 7, 9 (a), 10, 12 (b) and 12 (f) of the act and Rules U-23, U-43 and U-45 thereunder as applicable to the proposed transactions, which are summarized as follows:

National proposes to purchase from Provincial Gas Company, Ltd. ("Provincial"), an exempt Canadian subsidiary, from time to time during 1955 promissory notes aggregating in principal amount not to exceed $300,000 in United States currency. Said purchases will be made pursuant to a credit agreement between National and Provincial dated March 25, 1955, which provides that National will make loans to Provincial in multiples of $20,000 to be evidenced by Provincial's unsecured promissory notes, the first of which will mature on June 1, 1956, and each succeeding note in the series will mature on June 1 of the calendar year following the maturity date of the next prior note in the series. The notes will bear interest at the rate of 3⅜ percent per annum, payable in United States funds semiannually on June 1 and December 1 of each year until paid in full. Provincial reserves the right to prepay any of said notes at any time, or from time to time, in whole or in part, without premium, upon paying all the interest accrued to the date of such prepayment on the amount of principal then prepaid.

Provincial proposes to use the proceeds of such notes, together with funds available from current operations, to make needed plant additions and to increase its working capital.

National estimates the expenses to be incurred herein at $1,200, including $1,000 for legal fees and $200 for printing and miscellaneous.

It is stated that no other regulatory Commission, state or federal, has jurisdiction over the proposed transactions.

Notice is further given that any person may, not later than May 5, 1955 at 5:30 p. m., request in writing that a hearing be held on such matter, stating the

nature of his interest, the reasons for such request, and the issues of fact or law, if any, raised by said application-declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D. C. At any time after said date said application-declaration, as filed or as amended, may be granted and permitted to become effective as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may take such other action as it may deem appropriate under the circumstances.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

EXECUTIVE ORDER 10604

DELEGATING TO THE DIRECTOR OF THE BUREAU OF THE BUDGET THE AUTHORITY OF THE PRESIDENT TO APPROVE REGULATIONS RELATING TO THE OPERATION OF VENDING STANDS ON FEDERAL PROPERTY BY BLIND PERSONS

By virtue of the authority vested in me by section 301 of title 3 of the United States Code (65 Stat. 713), and as President of the United States, it is ordered that the Director of the Bureau of the Budget be, and he is hereby, designated and empowered to exercise the authority vested in the President by the first section of the act entitled "An Act to authorize the operation of stands in Federal buildings by blind persons, to enlarge the economic opportunities of the blind, and for other purposes," approved June 20, 1936 (49 Stat. 1559), as amended by section 4 (a) of the Vocational Rehabilitation Amendments of 1954 (68 Stat. 663; 20 U. S. C. 107), to approve regulations prescribed by the heads of the respective departments and agencies under the said section as amended.

DWIGHT D. EISENHOWER

EXECUTIVE ORDER 10605

AMENDMENT OF EXECUTIVE ORDER NO. 10119 [1] OF MARCH 27, 1950, PRESCRIBING REGULATIONS GOVERNING THE PAYMENT OF BASIC ALLOWANCES FOR SUBSISTENCE TO MEMBERS OF THE UNIFORMED SERVICES

By virtue of the authority vested in me by section 301 of the Career Compensation Act of 1949 (63 Stat. 812), and as President of the United States and Commander in Chief of the armed forces of the United States, section 1 of Executive Order No. 10119 of March 27, 1950, prescribing regulations governing the payment of basic allowances for subsistence to members of the uniformed services, is hereby amended to read as follows:

"SECTION 1. Enlisted members who are being subsisted in kind in a mess and whose duties require them to be absent from their station during one or more meals shall be entitled for each such meal to a pro-rated share of the daily basic allowance for subsistence authorized for members on duty at stations where rations in kind are not available. The Secretary of Defense, the Secretary of the Treasury, and the Secretary of Commerce are hereby authorized to establish the amount of the pro-rated share of the daily basic allowance for subsistence applicable to each one of the three daily meals, which amount shall be uniform for all the services concerned. The total of the amounts of the shares for the three daily meals shall not exceed the amount of the basic daily allowance for subsistence authorized by section 301 of the Career Compensation Act of 1949, as heretofore or hereafter amended."

DWIGHT D. EISENHOWER

FEDERAL REGISTER

Published daily, except Sundays, Mondays, and days following official Federal holidays, by the Federal Register Division, National Archives and Records Service, General Services Administration, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U. S. C., ch. 8B), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President. Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15 cents) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, directly to the Government Printing Office, Washington 25, D. C.

The regulatory material appearing herein is keyed to the CODE OF FEDERAL REGULATIONS, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended August 5, 1953. The CODE OF FEDERAL REGULATIONS is sold by the Superintendent of Documents. Prices of books and pocket supplements vary.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER, or the CODE OF FEDERAL REGULATIONS.

CFR SUPPLEMENTS
(For use during 1955)

The following Supplements are now available:

Titles 10–13 ($0.50)
Title 14: Part 400 to end ($0.65)
Title 16 ($1.25)
Titles 28–29 ($1.25)

FEDERAL REGISTER (19 F. R. 5562) regarding a proposed issuance of United States Standards for Grades of Frozen Concentrate for Limeade.

After consideration of all relevant matters presented, including the proposal set forth in the aforesaid notice, the following United States Standards for Grades of Frozen Concentrate for Limeade are hereby promulgated pursuant to the authority in the Agricultural Marketing Act of 1946 (60 Stat. 1087 et seq., 7 U. S. C. 1621 et seq.).

PRODUCT DESCRIPTION AND GRADES

Sec.
52.2521 Product description.
52.2522 Grades of frozen concentrate for limeade.

FILL OF CONTAINER

52.2523 Recommended fill of container.

FACTORS OF QUALITY

52.2524 Ascertaining the grade.
52.2525 Ascertaining the rating for the factors which are scored.
52.2526 Color.
52.2527 Defects.
52.2528 Flavor.

EXPLANATIONS AND METHODS OF ANALYSES

Sec.
52.2529 Definition of terms.
52.2530 Explanation of analyses.

LOT CERTIFICATION TOLERANCE

52.2531 Tolerances for certification of officially drawn samples.

SCORE SHEET

52.2532 Score sheet for frozen concentrate for limeade.

AUTHORITY: §§ 52.2521 to 52.2532 issued under sec. 205, 60 Stat., 1090; 7 U. S. C. 1624.

PRODUCT DESCRIPTION AND GRADES

§ 52.2521 *Product description.* Frozen concentrate for limeade is the product prepared from lime juice and one or more nutritive sweetening ingredients to which may be added oil derived from limes for added flavor, and may or may not contain water in sufficient quantities to standardize the product. The lime juice is produced from fresh, sound, mature, and thoroughly cleansed fruit of one or more of the varieties of the species citrus aurantifolia. Such juice may be fresh or frozen or may be fresh juice concentrated or frozen concentrated. The concentrate for limeade is processed in accordance with good commercial practice and is frozen and maintained at temperatures sufficient for the preservation of the product.

§ 52.2522 *Grades of frozen concentrate for limeade.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of frozen concentrate for limeade which mixes readily into a limeade that possesses an amount of pulp and cloud, so as to substantially reflect the appearance of limeade prepared from freshly expressed lime juice; that possesses a good color; that is practically free from defects; that possesses a good flavor; and that scores not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade B" or "U. S. Choice" is the quality of frozen concentrate for limeade which mixes readily into a limeade that possesses at least a slight, but not an excessive, amount of pulp and cloud so as to reasonably reflect the appearance of limeade prepared from freshly expressed lime juice; that possesses a reasonably good color; that is reasonably free from defect; that possesses a reasonably good flavor; and that scores not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "Substandard" is the quality of frozen concentrate for limeade that fails to meet the requirements of "U. S. Grade B" or "U. S. Choice."

FILL OF CONTAINER

§ 52.2523 *Recommended fill of container.* The recommended fill of container is not incorporated in the grades of the finished product since fill of container, as such, is not a factor of quality for the purpose of these grades. It is recommended that each container be filled as full as practicable with frozen concentrate for limeade.

FACTORS OF QUALITY

§ 52.2524 *Ascertaining the grade—(a) General.* The grade of frozen concentrate for limeade is ascertained by considering the factors of quality which are not scored and those which are scored as follows:

(1) *Factors which are not scored.*
(i) Ease of mixing into limeade.
(ii) Amount of pulp and cloud.

(2) *Factors which are scored.* The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given such factors are:

Factors:	Points
Color	20
Defects	20
Flavor	60
Total score	100

(b) The scores for the factors of color, defects, and flavor are determined immediately after the product has been prepared as limeade by thoroughly mixing the frozen concentrate for limeade with a specific volume of water as directed by the manufacturer.

§ 52.2525 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive. (For example, "17 to 20 points" means 17, 18, 19, or 20 points.)

§ 52.2526 *Color*—(a) *(A) classification.* Frozen concentrate for limeade which, when prepared as limeade, possesses a good color may be given a score of 17 to 20 points. "Good color" means a good bright characteristic color that reflects the appearance of limeade prepared from freshly expressed lime juice.

(b) *(B) classification.* If the frozen concentrate for limeade, when prepared as limeade, possesses a reasonably good color a score of 14 to 16 points may be given. Frozen concentrate for limeade that falls into this classification shall not be graded above "U. S. Grade B" or "U. S. Choice," regardless of the total score for the product (this is a limiting rule). "Reasonably good color" means a characteristic color that reflects to a reasonable extent the color of limeade prepared from freshly expressed lime juice and is not dark or otherwise discolored for any reason.

(c) *(SStd.) classification.* If the limeade fails to meet the requirements of paragraph (b) of this section, a score of 0 to 13 points may be given. Frozen concentrate for limeade that falls into this classification shall not be graded above "Substandard" regardless of the total score for the product (this is a limiting rule).

§ 52.2527 *Defects*—(a) *General.* The factor of defects refers to the degree of freedom from seeds or portions of seeds, from harmless extraneous material, from objectionable material and from other defects not specifically mentioned that affect the appearance or drinking quality of the product.

(1) "Harmless extraneous material" includes, but is not limited to, particles of seeds, rag, peel and pulp that will pass through round perforations not exceeding ⅛ inch in diameter.

(2) "Seeds or portions of seeds" means (i) any intact seed or (ii) any portion of a seed that will not pass through a round perforation ⅛ inch in diameter.

(b) *(A) classification.* Frozen concentrate for limeade which, when prepared as limeade, is practically free from defects may be given a score of 17 to 20 points. "Practically free from defects" means that there may be present not more than an average of one seed or portion of seed for each quart of prepared limeade; and that the appearance and drinking quality of the limeade is not materially affected by the presence of seeds, portions of seeds, objectionable material, harmless extraneous material, any other defects not specifically mentioned, or any combination thereof.

(c) *(B) classification.* If the limeade is reasonably free from defects a score of 14 to 16 points may be given. Frozen concentrate for limeade that falls into this classification shall not be graded above "U. S. Grade B" or "U. S. Choice" regardless of the total score for the product (this is a limiting rule). "Reasonably free from defects" means that there may be present not more than an average of two seeds or portions of seeds for each quart of limeade; and that the appearance and drinking quality of the limeade is not seriously affected by the presence of seeds, portions of seeds, objectionable material, harmless extraneous material, any other defects not specifically mentioned, or any combination thereof.

(d) *(SStd.) classification.* If the limeade fails to meet the requirements of paragraph (c) of this section a score of 0 to 13 points may be given. Frozen concentrate for limeade that falls into this classification shall not be graded above "Substandard" regardless of the total score for the product (this is a limiting rule).

§ 52.2528 *Flavor*—(a) *(A) classification.* Frozen concentrate for limeade which, when prepared as limeade, possesses a good flavor may be given a score of 51 to 60 points. "Good flavor" means a fine, distinct, and substantially typical flavor of limeade prepared from freshly expressed lime juice and which flavor is free from terpenic, oxidized, rancid, or other off flavors. To score in this classification, the limeade shall test not less than 10.5 degrees Brix; shall contain not less than 0.7 gram of acid per 100 ml. of the limeade; may not contain more than 0.020 ml. or less than 0.003 ml. of recoverable oil per 100 ml. of the limeade; and the Brix-acid ratio shall not exceed 18:1.

(b) *(B) classification.* If the prepared limeade possesses a reasonably good flavor a score of 42 to 50 points may be given. Frozen concentrate for limeade that falls into this classification shall not be graded above "U. S. Grade

B" or "U. S. Choice" regardless of the total score for the product (this is a limiting rule). "Reasonably good flavor" means a fairly typical flavor of limeade prepared from freshly expressed lime juice and which flavor is practically free from terpenic, oxidized, rancid, or other off flavors and is free from abnormal flavors of any kind. To score in this classification the limeade shall test not less than 10.5 degrees Brix; shall contain not less than 0.7 gram of acid per 100 ml. of the limeade; may not contain more than 0.030 ml. or less than 0.003 ml. of recoverable oil per 100 ml. of the limeade; and the Brix-acid ratio shall not exceed 18:1.

(c) *(SStd.) classification.* If the prepared limeade fails to meet the requirements of paragraph (b) of this section, a score of 0 to 41 points may be given. Frozen concentrate for limeade that falls into this classification shall not be graded above "Substandard" regardless of the total score for the product (this is a limiting rule).

EXPLANATIONS AND METHODS OF ANALYSES

§ 52.2529 *Definition of terms.* (a) "Brix" means the degree Brix of the limeade when tested with a Brix hydometer calibrated at 20 degrees C. (68 degrees F.) If used in testing limeade at a temperature other than 20 degrees C. (68 degrees F.) the applicable temperature correction shall be made to the reading of the scale as prescribed in "Official Methods of Analysis of the Association of Official Agricultural Chemists." The degrees Brix of limeade may be determined by any other method which gives equivalent results.

(b) "Acid" means the grams of acid (calculated as anhydrous citric acid) per 100 ml. of the prepared limeade determined by titration with standard sodium hydroxide solution using phenolphthalein as an indicator.

(c) "Brix-acid ratio" means the ratio between the degrees "Brix" as determined in this section and the acid in grams per 100 ml. of limeade.

(d) "Dilution factor" is the value obtained by dividing a volume of limeade by the volume of concentrate for limeade used in its preparation when such limeade is prepared in accordance with the manufacturer's directions.

§ 52.2530 *Explanation of analyses.* Recoverable oil is determined by the following method:

(a) *Equipment.* Oil separatory trap similar to either of those illustrated in figure 1 [1] and figure 2.[1]

Gas burner or hot plate.
Ringstand and clamps.
Rubber tubing.
3-liter narrow-neck flask.

(b) *Procedure.* Place exactly one liter of the concentrate for limeade with approximately one liter of water in a 3-liter flask. Close the stopcock, place distilled water in the graduated tube, run cold water through the condenser from bottom to top, and bring the mixture to a boil. Continue boiling for one hour at the rate of approximately 50 drops per minute. By means of the stopcock, lower the oil into the graduated portion of the separatory trap, remove the trap from the flask, allow it to cool, and record the amount of oil recovered. The number of milliliters of oil recovered divided by 10 times the dilution factor is equivalent to the number of milliliters of oil per 100 milliliters of the limeade.

[1] Filed as part of original document.

LOT CERTIFICATION TOLERANCES

§ 52.2531 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of frozen concentrate for limeade the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if, (1) all containers comprising the sample meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification; and (2) with respect to those factors which are scored:

(i) Not more than one-sixth of the containers fails to meet the grade indicated by the average of such total scores;

(ii) None of the containers falls more than 4 points below the minimum score for the grade indicated by the average of such total scores;

(iii) None of the containers falls more than one grade below the grade indicated by the average of such total scores; and

(iv) The average score of all containers for any factor subject to a limiting rule is within the score range of that factor for the grade indicated by the average of the total scores of the containers comprising the sample.

SCORE SHEET

§ 52.2532 *Score sheet for frozen concentrate for limeade.*

Size and kind of container	----
Container mark or identification	----
Label (including dilution factor)	----
Liquid measure (fluid ounces)	----
Brix of the limeade	----
Anhydrous citric acid in the limeade (grams per 100 ml.)	----
Brix/acid ratio	----
Recoverable oil (milliliter/100 milliliter of the limeade)	----
Reconstitutes properly (yes) (no)	----

Factors		Score points	
Color	20	(A)	17–20
		(B) [1]	14–16
		(SStd.) [1]	0–13
Defects	20	(A)	17–20
		(B) [1]	14–16
		(SStd.) [1]	0–13
Flavor	60	(A)	51–60
		(B) [1]	42–50
		(SStd.) [1]	0–41
Total score	100		
Grade			

[1] Indicates limiting rule.

Effective time. It is hereby found and determined that good cause exists for making these standards effective upon publication in the FEDERAL REGISTER, instead of waiting 30 days after such publication, for the reasons that: (1) The lime juice industry has long been aware of the nature of these standards in that notice of proposed rule making in this regard was published in the FEDERAL REGISTER issue of August 31, 1954 (19 F. R. 5562), and numerous and detailed discussions of the several provisions have been had with industry representatives generally since that time; (2) such industry generally has expressed agreement with those provisions, and has expressed the desire that they be put into effect as soon as practicable; and (3) no special preparation by the persons affected for the putting of these standards in effect will be necessary. It is therefore ordered that these United States Standards for Grades of Frozen Concentrate for Limeade (which is the first issue) contained in this subpart shall become effective upon the publication of this document in the FEDERAL REGISTER.

Dated: April 21, 1955.

[SEAL] ROY W. LENNARTSON,
Deputy Administrator,
Marketing Services.

[F. R. Doc. 55-3385; Filed, Apr. 25, 1955; 8:51 a. m.]

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders), Department of Agriculture

[Lemon Reg. 585, Amdt. 1]

PART 953—LEMONS GROWN IN CALIFORNIA AND ARIZONA

LIMITATION OF SHIPMENTS

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 53, as amended (7 CFR Part 953; 19 F. R. 7175), regulating the handling of lemons grown in the State of California or in the State of Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of the quantity of such lemons which may be handled, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice and engage in public rule-making procedure, and postpone the effective date of this amendment until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the Agricultural Marketing Agreement Act of 1937, as amended, is insufficient, and this amendment relieves restriction on the handling of lemons grown in the State of California or in the State of Arizona.

(b) *Order, as amended.* The provisions in paragraph (b) (1) (ii) of § 953.692 Lemon Regulation 585; 20 F. R. 2509) are hereby amended to read as follows:

(ii) District 2: 400 carloads.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: April 21, 1955.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

TITLE 32—NATIONAL DEFENSE

Chapter I—Office of the Secretary of Defense

PART 143—EXEMPTION OF CERTAIN PERSONNEL FROM OPERATION OF SECTIONS 281–284, 434 AND 1914 OF TITLE 18, UNITED STATES CODE

CORRECTION

Section 143.1 (e) is hereby corrected, retroactive to February 28, 1951, as follows:

Delete the "s" in the word "sections" and the words "and 1914". Section 143.1 (e), as corrected, will read as follows:

(e) Exemption from section 434 of Title 18, United States Code, shall not extend to persons appointed as experts or consultants under section 704 aforesaid.

MAURICE W. ROCHE,
Administrative Secretary,
Office of the Secretary of Defense.

[F. R. Doc. 55-3351; Filed, Apr. 25, 1955; 8:46 a. m.]

TITLE 35—PANAMA CANAL

Chapter I—Canal Zone Regulations

[Canal Zone Order 40]

PART 24—SANITATION, HEALTH, AND QUARANTINE

MISCELLANEOUS AMENDMENTS

By virtue of the authority vested in the President of the United States by section 371 of title 2 of the Canal Zone Code, approved June 19, 1934, and delegated to me by Executive Order No. 9746 of July 1, 1946, as amended by Executive Order No. 10595 of February 7, 1955, §§ 24.46, 24.56 (a) (1), (c) and 24.58 of Title 35 of the Code of Federal Regulations as adopted and amended by Canal Zone Order 39 of February 26, 1955, 20 F. R. 1392, are further amended to read as follows:

§ 24.46 *Administration of quarantine laws, rules and regulations.* The Health Bureau, under the supervision of the Health Director, through the Division of Preventive Medicine and Quarantine, with respect to all quarantine matters other than animal quarantine, and through the Division of Veterinary Medicine with respect to animal quarantine, under the immediate supervision and direction of the Chiefs of those divisions, is hereby charged with the administration of all laws, rules and regulations governing maritime and aircraft quarantine in the Canal Zone.

§ 24.56 *General provisions.* (a) • • •

(1) In the current voyage the vessel or aircraft has not touched at any port other than ports under the control of the United States or ports in Canada, the Islands of St. Pierre and Miquelon, Iceland, Greenland, the West Coast of Lower California, Cuba, the Bahama Islands, the Bermuda Islands, the British Virgin Islands, or the Islands of Aruba and Curacao; or

• • • • • •

(c) Notwithstanding the provisions of paragraph (a) (2) and (3) of this section, a vessel or aircraft having received pratique at a port under the control of the United States, or possessing a duplicate pratique from Canada:

(1) Shall comply with any conditions and carry out any additional measures specified in the pratique; and

(2) May be required to undergo quarantine inspection if the quarantine officer in charge has reason to believe that the entry of the vessel or aircraft would be likely to cause the introduction of communicable disease.

§ 24.58 *Exempt vessels and aircraft subject to sanitary regulations.* A vessel or aircraft which has been exempted from quarantine inspection under § 24.56 or § 24.57 shall nevertheless be subject to the provisions of §§ 24.87 through 24.93.

(Sec. 1, 39 Stat. 527, as amended; 2 CZ Code 371, 372, 48 U. S. C. 1310)

ROBERT T. STEVENS,
Secretary of the Army.

APRIL 16, 1955.

[F. R. Doc. 55-3357; Filed, Apr. 25, 1955; 8:47 a. m.]

TITLE 38—PENSIONS, BONUSES, AND VETERANS' RELIEF

Chapter I—Veterans' Administration

PART 21—VOCATIONAL REHABILITATION AND EDUCATION

MISCELLANEOUS AMENDMENTS

1. In § 21.0, paragraphs (b), (c) and (e) (1), (2) and (3) are amended to read as follows:

§ 21.0 *Appeals from vocational rehabilitation and education determinations.* • • •

(b) *Questions subject to appellate review.* All questions involving determinations made as to rights and benefits to education or training under Part VII or Part VIII, Veterans Regulation 1 (a), as amended, (38 U. S. C. ch. 12), or Public Law 550, 82d Congress, as amended, are subject to review on appeal to the Administrator of Veterans Affairs, decisions in such cases to be made by the Board of Veterans Appeals. A letter of notification of each determination will advise the veteran of this right and of the time limit in which an appeal must be filed. Appeal questions will include any determinations by the vocational rehabilitation and education agency of original jurisdiction, including questions of basic eligibility, extent of entitlement, need for training, extension of training, amounts of subsistence and education and training allowance and periods for which payable, determination of employability, change of employment objective or course, change in place of training, etc. (See §§ 19.0 and 19.1 of this chapter.)

(c) *Agency of original jurisdiction.* For the purpose of this section, the agency of original jurisdiction means the vocational rehabilitation and education activity in the field which is charged with the responsibility of making original determinations of rights and benefits under Part VII or Part VIII, Veterans Regulation 1 (a), as amended, or Public Law 555, 82d Congress, as amended.

• • • • • •

(e) *Development of appeals.* • • •

(1) For administrative purposes, the educational benefits activity, field offices and Veterans Benefits Office, D. C., will have responsibility for acknowledging and developing appeals, and for making all arrangements for the docketing of hearings on appeals which are requested by the veteran or his accredited representative.

(2) A veteran may request on VA Form 1–9 that a hearing be conducted for the purpose of his appeal. If such a request is not made, it will be understood that a hearing is not desired by the veteran, and therefore, certification of the appeal will not be delayed for the purpose of ascertaining whether a hearing is desired by the veteran. No change is made in the procedure for notice regarding hearing and presentation of appeal by the designated representative.

(3) In case of a request by the veteran or his accredited representative, a hearing will be scheduled before a hearing group. The hearing group on vocational rehabilitation and education appeals is not defined as to permanent membership, but it shall always include a staff member of the educational benefits activity and a member of the activity of the vocational rehabilitation and education division which was responsible for the decision appealed from. The group will not in any instance act as a reviewing or appellate authority. If the argument or additional material evidence presented to the hearing group is such as to require reconsideration by the originating activity of entitlement to the benefits sought, the entire record will be referred for reconsideration to the activity which denied the benefits.

• • • • • •

2. In § 21.1, a new paragraph (a) is added as follows:

§ 21.1 *Finality of action.* • • •

(a) The exercise of the delegations of authority to positions in the vocational rehabilitation and education divisions of field offices is to be performed under the direction of, and authority vested in, the manager of the field station.

3. In § 21.2, that portion of paragraph (b) preceding subparagraph (1) is amended to read as follows:

§ 21.2 *Revision of vocational rehabilitation and education decisions.* • • •

(b) Whenever a vocational rehabilitation and education activity may be of the opinion that a revision or an amendment of a previous decision is warranted on the facts of record in the case at the time the decision in question was rendered, a difference of opinion being involved rather than a finding of clear and unmistakable error, the complete file will be forwarded, accompanied by a complete and comprehensive statement of the facts in the case and a detailed explanation of the matters supporting the conclusion that a revision or amendment of the prior decision is in order, to the Assistant Deputy Administrator, Vocational Rehabilitation and Education. Such references will, in every case, be made without any action toward amendment of the questioned decision. The question will be resolved and the regional office so advised. The commencing date of benefits in such cases, if otherwise allowable, will be the date of the letter signed by the Assistant Deputy Administrator, Vocational Rehabilitation and Education authorizing a favorable determination based on a difference of opinion.

* * * * *

4. Section 21.5 is revised to read as follows:

§ 21.5 *Jurisdiction and authority of the eligibility clerk and educational benefits representative.* The eligibility clerk in a field office is delegated authority in individual veterans' cases for making entitlement audits and for determining whether wages or income reported by veterans have any effect on the rate of subsistence or education and training allowance being paid. The educational benefits representative in a field office is authorized to conduct surveys by personal visits to schools and training establishments for the purpose of assuring the propriety of payments of educational benefits to and on behalf of veterans under the provisions of Public Law 346, 78th Congress, as amended, and Public Law 550, 82d Congress, as amended, and, except for those authorities specifically delegated to the eligibility clerk in the preceding sentence of this section, is delegated authority for all determinative actions involving individual veterans (including veterans who are Veterans' Administration employees) in matters coming under the jurisdiction of the educational benefits activity. The educational benefits representative will act as authorizing officer executing all original and amended authorizations including those found necessary as a result of such surveys. Additionally the eligibility clerk and the educational benefits representative in the Veterans Benefits Office, D. C., will have the authority for determinative actions in the cases of veterans pursuing education and training in foreign countries for which that office is the agency of original jurisdiction.

5. In § 21.6, paragraph (a) is amended to read as follows:

§ 21.6 *Application for a course of education or training.* * * *

(a) If an application is not complete at the time of the original submission, the veteran will be notified of the evidence necessary to complete the application, and, if such evidence is not received within 1 year from the date of request therefor, benefits may not be paid by virtue of the application. (See par. Ia (2), Part I, Veterans Regulation 2 (a), as amended by Veterans Regulation 2 (d) under Public No. 2, 73d Congress).

* * * * *

6. In § 21.7, paragraph (a) (1) is amended to read as follows:

§ 21.7 *Application for a course of institutional on-farm training.* (a) * * *

(1) The educational benefits representative will determine whether the veteran meets the eligibility requirements as set forth in § 21.30. If the veteran is eligible, the institution will be notified through the channels designated by the State approval agency of the beginning date of his subsistence allowance and the period of his entitlement.

* * * * *

7. In § 21.11, paragraph (c) (3) (iii) is amended and former paragraph (d) is deleted, former paragraph (e) is redesignated paragraph (d), so that the amended and redesignated material reads as follows:

§ 21.11 *Certificate of eligibility and entitlement.* * * *

(c) * * *

(3) * * *

(iii) In view of the fact regional offices will seldom have readily available the information necessary to designate a firm commencing date, Legend "C" will be inscribed on all supplemental certificates of eligibility issued for use at approved foreign educational institutions (except in the Philippine Republic) after applicable delimiting dates. In such cases, the date "on or about" will be construed to mean within 30 days preceding or following the date shown, unless the veteran concerned can demonstrate to the satisfaction of the Veterans Benefits Office, D. C., or the Attaché for Veterans Affairs Office concerned that the date indicated by the issuing office was unrealistic.

(d) The Veterans' Administration will require an affirmative report of conduct and progress from the school or training establishment in all cases where the veteran requests a supplemental Certificate of Eligibility and Entitlement for the purpose of changing his course or his institution or for securing additional education or training, since such a report serves as a basis for determining whether a supplemental certificate may be issued.

8. In § 21.21, that portion of paragraph (f) (1) preceding subdivision (i) is amended to read as follows:

§ 21.21 *Determinations of active service in allied armed forces.* * * *

(f) *Service in the Canadian armed forces.* (1) In order to permit determination of eligibility and entitlement in the case of veterans who served in the Canadian armed forces, whenever possible without referral to the Veterans Benefits Office, D. C., there is listed below the dishonorable discharges issued by the Canadian Army, the Royal Canadian Navy, and the Royal Canadian Air Force:

* * * * *

9. In § 21.23, paragraphs (c) (2) (ii) (b), (d), (e), (f) (h), and (i) are amended to read as follows:

§ 21.23 *Citizenship; establishment of, in connection with active service in Allied armed forces.* * * *

(c) * * *

(2) * * *

(ii) * * *

(b) Certificate of naturalization: The following statement will be accepted as evidence of citizenship by naturalization when prepared and certified to by an educational benefits representative, contact representative, or notary public in event it is not practicable for the veteran to appear before an educational benefits representative or contact representative: "I have this date reviewed the Certificate of Naturalization issued to (name of veteran) on (date), at (city), (State), by the United States District Court, (judicial subdivision) of (State), Certificate Number ____ was issued in response to Petition Number ____."

* * * * *

(d) Any person born in the Canal Zone on or after February 26, 1904, whose father or mother, or both, at the time of birth of such person was, or is, a citizen of the United States, is declared to be a citizen of the United States (sec. 303 (a), Public Law 414, 82d Congress).

(e) Any person born in the Republic of Panama on or after February 26, 1904, whose father or mother, or both, at the time of the birth of such person was, or is, a citizen of the United States, employed by the Government of the United States or by the Panama Railroad Company, is declared to be a citizen of the United States (sec. 303 (b), Public Law 414, 82d Congress).

(f) All persons born in Puerto Rico on or after April 11, 1899, subject to the jurisdiction of the United States, residing on January 13, 1941, in Puerto Rico or other territory over which the United States exercises rights of sovereignty, and who are not citizens of the United States under any other act, are citizens of the United States (sec. 302, Public Law 414, 82d Congress). Puerto Rican veterans should contact the Officer-in-Charge, Immigration and Naturalization Service, San Juan, Puerto Rico, in order to obtain evidence of their American citizenship.

* * * * *

(h) Where the evidence submitted by the veteran clearly shows that he was not a citizen of the United States at the time of his enlistment in the Allied armed forces, the regional office will take the appropriate action to disallow the claim.

(i) Where any question arises concerning a veteran's citizenship status, the case will be developed, and the necessary facts and evidence to substantiate the claim of citizenship will be referred to the Assistant Deputy Administrator, Vocational Rehabilitation and Education, central office, for a determination where, if necessary, the case will be presented to the Immigration and Naturalization Service of the Department of Justice for an opinion.

10. In § 21.25, paragraph (g) (2) is amended to read as follows:

§ 21.25 *Benefits applied for and received.* * * *

(g) * * *

(2) Where the veteran declares in his affidavit or states in a letter that he has applied for and received any education or training benefits from the Allied Government with which he served, this evidence is, by his own statement, sufficient to bar his entitlement to educational benefits under section 1506, and in such cases the claim will be disallowed.

* * * * *

11. In § 21.31, paragraphs (b) and (c) are amended to read as follows:

§ 21.31 *Basic evidence.* * * *

(b) *Questionable discharges.* In all cases where the discharge is neither honorable nor dishonorable, and it is not clear whether the circumstances under which the veteran was discharged or released from active duty under other than honorable conditions might bar eligibility to education or training, the cases will be referred by memorandum to the adjudication division, regional office, or veterans claims division, Veterans Benefits Office, D. C., (for jurisdiction of latter see § 3.1025 of this chapter), for appropriate certification, prior to initiating further action toward the issuance of Certificate of Eligibility and Entitlement to education or training. (See secs. 300 and 1503, Public Law 346, 78th Congress.)

(c) *Discharges for disability.* When an application for education or training is received and the veteran had fewer than 90 days service within the purview of Part VIII, Veterans Regulation 1 (a), as amended (38 U. S. C. ch. 12), but was discharged for disability, the vocational rehabilitation and education activity will refer the claim to the adjudication division (regional office cases) or the veterans claims division, Veterans Benefits Office, D. C. (for jurisdiction of latter see § 3.1025 of this chapter), for development of disability service data and a formal memorandum rating as to whether such discharge was by reason of an actual service-incurred injury or disability.

12. In § 21.36, new subparagraphs (5) and (6) of paragraph (d) are added and that portion of paragraph (e) preceding subparagraph (1) is amended to read as follows:

§ 21.36 *Special considerations concerning the pursuit of education or training after the statutory delimiting date.* * * *

(d) *Continuous pursuit of education or training; § 21.35 (c).* * * *

(5) A veteran who desires to pursue a graduate course under Public Law 346, 78th Congress, as amended, subsequent to the statutory delimiting date will be expected to pursue all work required for the completion of his elected degree course in an educational institution which offers the full degree course and which upon the successful completion thereof confers the graduate degree sought, except that under the following conditions an otherwise eligible veteran may pursue training in a second approved institution which does not confer the graduate degree in partial fulfillment of his graduate degree requirements:

(i) Where the degree granting institution certifies to the Veterans' Administration that the veteran has been accepted as a student for the pursuit of the graduate course identifying the degree objective for which he has made application, and

(ii) Where the degree granting institution specifically designates the subjects which may be pursued at the second institution. These subjects must be a part of the graduate degree course and may include:

(*a*) Required graduate subjects;

(*b*) Undergraduate subjects which are prerequisites for required graduate subjects; and

(*c*) Language courses which may be taken in an approved institution for the express purpose of satisfying the graduate degree language requirement.

(iii) And in addition, the degree granting institution certifies that, upon the successful completion of the designated subjects, it will accept the credit established in the second educational institution at full value in partial fulfillment of the veteran's elected degree course.

(6) Where a veteran submits an application for an additional course of education or training to be pursued upon completion of his present course, such application will not be approved under § 21.35 (e) unless the requested course is approved by the State approving agency on or prior to the date the veteran completes his present course, and such course is actually being conducted on or prior to that date.

(e) *Normal progression.* For the purpose of § 21.35 (e) (3) "normal progression" involves additional education or training which constitutes a true advancement or progression to a higher level of either knowledge or skills, or where, ordinarily or normally, and as a matter of custom and practice within the area where the training is being pursued, the satisfactory completion of the one course or program is essential for enrollment in and successful pursuit of the other.

* * * * *

13. In § 21.40, a new subdivision (i) to paragraph (a) (1) is added and paragraphs (a) (5), (b) (1) and (5) are amended to read as follows:

§ 21.40 *Conditions for vocational rehabilitation.* (a) * * *

(1) * * *

(i) Active military service in the Women's Army Auxiliary Corps where service connected disability has been determined by a duly constituted claims activity under the conditions and limitations specified in Public Law 650, 83d Congress.

* * * * *

(5) Vocational rehabilitation of veterans whose only service was during the period specified in subparagraph (1) of this paragraph, cannot be afforded beyond the date fixed by § 21.204 (b) or, where applicable, § 21.204 (c).

(b) * * *

(1) Active military, naval, or air service in the Armed Forces of the United States on or after June 27, 1950, and prior to February 1, 1955.

* * * * *

(5) Vocational Rehabilitation training under Public Law 894, 81st Congress, as amended, cannot be afforded beyond the date fixed by § 21.204 (b) or, where applicable, § 21.204 (c).

* * * * *

14. In § 21.54, paragraph (b) is amended to read as follows:

§ 21.54 *Election of benefit.* * * *

(b) For the purposes of election between Parts VII and VIII, a presumption of eligibility under Part VII will attach (if need has not been officially determined to exist or not to exist), when there is of record, an official finding by duly constituted claims authority that the veteran has a service-connected compensable disability incurred in or aggravated by service in the Armed Forces of the United States in World War II or on or after June 27, 1950, and prior to February 1, 1955. This presumption may be rebutted in any case only through filing by the veteran of VA Form 7–1900 and a subsequent determination that need for training does not exist.

* * * * *

15. In § 21.55, paragraph (a) (1) is amended to read as follows:

§ 21.55 *Entrance into training.* (a) * * *

(1) A claim on VA Form 7–1950 having been filed and eligibility having been determined, he presents a Certificate of Eligibility and Entitlement to an approved institution showing (i) his entitlement to a course of education or training (in years, months, and days), (ii) name of the course to be pursued, (iii) name of the approved school or training establishment, and (iv) the date on or before which pursuit of the course specified must be commenced or resumed.

* * * * *

16. In § 21.60, subparagraphs (1) and (2) of paragraph (d) are amended to read as follows:

§ 21.60 *Restrictions on the pursuit of courses avocational or recreational in character.* * * *

(d) * * *

(1) In any case wherein a veteran makes application to pursue any course comprehended by paragraphs (a), (b), or (c) of this section, the educational benefits representative will determine whether the justification or affidavit evidence meets the requirement of this section. If the determination is favorable, the course will not be considered avocational or recreational in character, but if the determination is unfavorable, the educational benefits representative will disapprove pursuit of the course and will notify the veteran. In any case where the veteran has previously pursued a course of education or training, the provisions of §§ 21.51 and 21.61 will also be for application as appropriate,

but an adjudication under the provisions of those sections will not be invoked in any case unless the educational benefits representative has first determined that the justification or affidavit evidence submitted has met the requirements of this section.

(2) Complete justification and affidavit evidence required by this section must be submitted to the regional offices and approved prior to the veteran's entrance into training. No payments for subsistence allowance or tuition may be authorized for any period prior to the date of such approval.

17. In § 21.61, paragraphs (h), (i), (j), and (k) are amended to read as follows:

§ 21.61 *Changes of course or additional education or training.* • • •

(h) All requests for a change of course or for additional education or training will be referred to an educational benefits representative for determination. If the veteran has not previously made a change of course and his conduct and progress have been satisfactory, the request will be approved without regard to whether the desired course is in the same or a different general field. If the desired course is in a different general field and the veteran has already made one change from one general field to another, the case will be immediately forwarded to the counseling activity where, upon the basis of a counseling interview conducted in accordance with counseling procedures under Part VIII, a determination will be made as to whether the veteran has need of the desired course to complete his educational or job objective and whether his aptitudes are such as to give reasonable assurance that he can successfully complete the course. The decision of the counselor will govern. If the veteran is not notified as to the decision within 45 calendar days from the date the VA Form 7-1905e is received in the Veterans' Administration office holding the veteran's records, the veteran's request for the second change of general field shall be deemed to have been approved, provided he has not failed to appear at the time required for counseling or has not otherwise failed to cooperate in receiving the service.

(i) A request for a third change from one general field to another may be approved only upon the established need for a short intensive course which will prepare the veteran for employment in a critical occupation for which there is a known shortage of trained workers. The burden of proof will be upon the veteran to establish these facts and the decision will be made by the educational benefits representative on the basis of the evidence of record.

(j) If a veteran requests counseling for the purpose of assisting him in arriving at the most suitable course, a decision on the request for change cannot be made until counseling is completed since the veteran will not previously have designated the course to which he desires to change. The 45-day limitation will not apply in such cases.

(k) Counseling will not be required in cases of veterans who at the time of making application for a change of general field are located in any foreign country or other area not under the jurisdiction of a regional office. In such cases, the educational benefits representative will, upon determination that a change in general field is involved, and that the veteran has previously had a change from one general field to another, inform the veteran that he will be required to submit complete justification to establish (1) that he has need of the desired course to complete his educational or job objective, and (2) that his educational qualifications are such as to give reasonable assurance that he can complete the course successfully. On the basis of the veteran's submission and the other evidence of record the educational benefits representative will determine whether the requested course will be approved or disapproved and will notify the veteran.

• • • • •

18. In § 21.66, paragraph (a) is amended to read as follows:

§ 21.66 *Conduct and progress*—(a) *Notification.* All schools and training establishments are responsible for immediately notifying the Veterans' Administration when a veteran drops out of training. When a veteran's conduct or progress is reported as unsatisfactory, the educational benefits activity will ascertain the school's or establishment's recommendation as to disposition to be made of the case were the veteran has not been dropped from the rolls of the school or establishment.

• • • • •

19. In § 21.70, paragraph (a) is amended to read as follows:

§ 21.70 *Jurisdiction over determinations.* (a) Determinations of domestic relations questions other than those indicated in § 13.402 of this chapter may be made by the vocational rehabilitation and education activity in regional office and Veterans Benefits Office, D. C. cases where, as contemplated by the last sentence of § 3.6 of this chapter, the circumstances involved are identical with those in a case in which a formal opinion has been rendered by the General Counsel. Except as provided in § 21.73 (b), determinations made by the vocational rehabilitation and education activity will be approved by the chief, vocational rehabilitation and education division.

• • • • •

20. Section 21.72 is revised to read as follows:

§ 21.72 *Determinations where evidence of martial status is incomplete.* Claims will not be disallowed merely because a claimant is unable to furnish satisfactory evidence of the dissolution of prior marriages of either spouse. In such instances, after all facts affecting the validity of the marriage are established by the best obtainable evidence, a determination of the validity of the marriage will be made on the evidence of record by the vocational rehabilitation and education activity, or, if necessary (§ 13.402 of this chapter and § 21.70), the case will be referred by the chief, vocational rehabilitation and education division, to the Chief Attorney for consideration; Veterans Benefits Office, D. C. cases will be referred to the General Counsel through the office of the Deputy Administrator for Veterans Benefits.

21. In § 21.74, paragraph (b) is amended to read as follows:

§ 21.74 *Illegitimate children of veterans.* • • •

(b) Determinations of relationship in all the above instances will be made in the vocational rehabilitation and education division of field offices. In cases in which none of the conditions of paragraph (a) (1), (2), or (3) of this section have been met and evidence has been submitted which is considered adequate to establish the reputed paternity of an illegitimate child, as contemplated by condition in paragraph (a) (4) of this section, a brief summary of the facts, including a description of the supporting evidence, will be submitted to the chief, vocational rehabilitation and education division, for a finding as to relationship. Evidence of reputed paternity may consist of, but is not limited to, a certified copy of the public record of birth showing that the veteran was named as father of the child; statements of persons who know that the veteran accepted the child as his; or information obtained from public records, such as school or welfare agencies, which shows that the veteran was reputed to be the father of this child. The sufficiency of such evidence will be determined in accordance with the facts in the individual case.

• • • • •

22. Section 21.75 is revised to read as follows:

§ 21.75 *Submission of questions for original opinion.* Requests for legal opinions concerning domestic relations of doubtful legality involving circumstances other than those outlined in § 21.70 (a) and (b) will be made in memorandum form, setting forth the question upon which an opinion is desired, together with a complete and accurate statement of the facts involved. The request, accompanied by the claims folder, will be addressed in regional office cases by the chief, vocational rehabilitation and education division, to the Chief Attorney; in Veterans Benefits Office, D. C., cases, by the chief, vocational rehabilitation and education division, to the General Counsel through the office of the Deputy Administrator for Veterans Benefits.

23. Section 21.90 is revised to read as follows:

§ 21.90 *Apportionment; general.* Where in order under the conditions specified in §§ 3.310 to 3.317 of this chapter, subsistence allowance payable on account of training will be apportioned at the rates provided in § 3.311 of this chapter. If the application of the above provision should in any case work a hardship upon the veteran or any of his dependents and relief can be afforded without undue hardship to other persons in interest, the chief, educational benefits, activity, will determine in cooperation with the adjudication officer, subject to regular appellate rights, the exact amount to be apportioned to each individual in interest. Current determinations of relationship or dependency made in accordance with existing instructions by either the adjudication activity or by the vocational rehabilitation and education activity will be binding one upon the other in the absence of clear and unmistakable error.

24. In § 21.93, paragraph (a) is amended to read as follows:

§ 21.93 *Effective date of apportionment.* (a) In order to avoid overpayments and disparities in effective dates of apportionments of subsistence allowance and compensation or pension—where the two benefits are being received concurrently—the vocational rehabilitation and education division, upon receipt of notice of estrangement or that a child or children are not in the custody of the claimant, will execute the proper VA Form of the 1907 series to authorize an apportionment of subsistence allowance, if in order, effective as provided in § 3.316 of this chapter. The claims folder with the proper form will be promptly forwarded to the adjudication division through the administrative division for action on apportionment of compensation or pension, if in order, whereupon both award actions will be submitted simultaneously by the adjudication division to the finance division. Conversely, if notice requiring apportionment of compensation or pension is received by the adjudication division, action taken by that division will likewise be forwarded to vocational rehabilitation and education division for necessary action and submission to finance. When, for good reason, the activity to which the authorization is referred may not be able to complete its action in time to avoid a discrepancy in effective dates of apportionment of the separate benefits, that agency will take its action in accord with established principles and return the record intact to the agency of first jurisdiction for reconciliation of its former action with that of the secondary activity.

• • • • •

25. In § 21.100, paragraphs (b) (3) and (d) are amended to read as follows:

§ 21.100 *Effective beginning dates for payment of benefits.* • • •

(b) • • •

(3) Where a veteran's application for education or training and/or subsistence allowance or the certification of his entrance or reentrance into training or evidence of dependency is received in the Veterans' Administration after the 90-day delimiting period prescribed in subparagraphs (1) and (2) of this paragraph, and where in view of all facts and circumstances it is the opinion of the chief, vocational rehabilitation and education division, that the case is meritorious and that the application of the 90-day rule would be inequitable, the 90-day rule may be waived by the Manager. If the 90-day rule is waived, the date of receipt of claim for education or training and/or subsistence allowance by the institution, or the date of entrance or reentrance into training as certified by the institution will be accepted by the Veterans' Administration, if otherwise in order.

• • • • •

(d) All authorization actions accomplished by the educational benefits activity entering veterans into education or training (full-time or part-time institutional training, on-the-job or apprenticeship training, etc.) will authorize subsistence allowance at the rate provided for a person without a dependent or dependents, unless satisfactory evidence of dependency accompanies his application or is of record which warrants an authorization of subsistence allowance on account of dependency. If evidence of dependency accompanies the veteran's application or is of record, the appropriate rate reflecting such dependency will be authorized.

• • • • •

26. In paragraph (b) of § 21.103, subparagraph (8) is amended and a new subparagraph (9) is added as follows:

§ 21.103 *Effective date of change or discontinuance of subsistence allowance* (See in addition § 21.107 (f), (h), and (i).) • • •

(b) • • •

(8) In the event the veteran shall forfeit all rights, claims, and benefits under the provisions of section 15, Title I, Public Law 2, 73d Congress (made applicable to benefits granted under Public Law 346, 78th Congress, by the first sentence of section 1500 thereof), as of the date preceding the date of the commission of the act upon which the Central Committee on Waivers and Forfeitures based the forfeiture: *Provided however,* That if the evidence of record establishes that the veteran was guilty of mutiny, treason, sabotage, or rendering assistance to an enemy of the United States or of its allies within the meaning of section 4, Public Law 144, 78th Congress, as of the date preceding the date of commission of the offense or of original entrance into training, whichever be the later.

(9) (i) In the event a veteran pursuing a course of institutional on-farm training engages in full-time or substantially full-time remunerative employment subsequent to the 1951 calendar year which employment is contrary to the provision of § 21.109 (d) (1), as of the date such employment commenced.

(ii) In the event a veteran engages in occasional, irregular or part-time employment subsequent to the 1951 calendar year which employment is prohibited under the provisions of § 21.109 (d) (1) because it exceeds a maximum of 180 hours during a 12 months' period, or a pro rata part thereof where the reporting period encompasses less than a full calendar year, as of the end of the month in which such employment exceeds the maximum of 180 hours or exceeds the pro rata part thereof where the reporting period encompasses less than a full calendar year.

(iii) In the event a veteran engages in occasional, irregular, or part-time employment which does not exceed a maximum of 180 hours during a 12 months' reporting period, or which does not exceed a pro rata part thereof where the reporting period encompasses less than a full calendar year, as of March 31 of the current calendar year unless the veteran's instructor finds and certifies (giving reasons for conclusion) to the Veterans' Administration (within 30 days of request) that the employment has not interfered with or impeded the veteran's pursuit of his farm training program.

(iv) In cases comprehended by subdivisions (i) and (ii) of this subparagraph, training status will be discontinued as of the end of the month in which the action to discontinue subsistence allowance is effected, and as of March 31 of the current calendar year in cases comprehended by subdivision (iii) of this subparagraph.

27. In § 21.114, paragraph (f) is amended to read as follows:

§ 21.114 *Repayment of value of training supplies; Part VIII, Veterans Regulation 1 (a), as amended (38 U. S. C., ch. 12).* • • •

(f) The provisions of this section will apply to cases where training is discontinued on or after June 29, 1951, and to cases where training was discontinued prior to June 29, 1951, but a disposition of the case was not made under the Veterans' Administration Regulation in effect at that time; except that, in any case where training was discontinued prior to June 29, 1951, and the decision as to liability or non-liability has not been made by April 26, 1955, the veteran will be deemed not to be liable for the repayment of the reasonable value of non-consumable training supplies, since experience has shown that the administrative cost of applying repayment collection procedures at this time on cases that were discontinued prior to June 29, 1951, far exceeds the amount of return to the Government.

28. In § 21.133, paragraph (b) (2) (i) is amended to read as follows:

§ 21.133 *Rates of subsistence allowance.* • • •

(b) *$65 or $90 per month.* • • •

(2) (i) In accordance with his agreement to train veterans on the job under Part VII, the employer will report in writing to the Veterans' Administration each month the amount of wage, compensation, or other income paid by him during the month, directly or indirectly, including a reasonable value of items for family living, such as food, fuel, and shelter, when such is furnished by the employer-trainer, to each veteran training on the job in his establishment under this law.

• • • • •

29. In the Provisional Regulations immediately following § 21.153, § 21.190 is revoked.

§ 21.190 *Extension of vocational rehabilitation under Public Law 16, 78th Congress, as amended, to veterans having service on and after June 27, 1950.* (Instruction 2, Public Law 894, 81st Congress, as amended by Public Law 170, 82d Congress.) [Revoked.]

30. The centerhead "Education and Training Under Part VII, Veterans Regulation 1 (a), as Amended (38 U. S. C. ch. 12)" immediately following § 21.191

is amended and an explanatory note and a new § 21.199 are added as follows:

VOCATIONAL REHABILITATION TRAINING UNDER PART VII, VETERANS REGULATION 1 (A), AS AMENDED (38 U. S. C. CH. 12)

NOTE: Veterans' Administration Regulations on vocational rehabilitation training under Part VII, Veterans Regulation 1 (a), as amended, are for application in the case of veterans training under both Public Law 16, 78th Congress, as amended, and Public Law 894, 81st Congress, as amended, except where the regulation itself specifies application to only one of the mentioned laws.

§ 21.199 *Responsibility of training officers.* Except where responsibility is otherwise assigned in Veterans' Administration Regulations to a committee, board or other official, training officers in field offices will be responsible for all determinative actions in matters under the jurisdiction of the education and training activity involving individual veterans whose cases are properly before them for action.

31. Existing centerhead "The Course of Vocational Rehabilitation" immediately preceding § 21.200 remains unchanged.

32. In paragraph (d) of § 21.201, the introduction and subparagraph (6) are amended to read as follows:

§ 21.201 *Types of courses.* • • •

(d) *Specialized restorative training course.* A course which is designed to overcome or minimize the handicap of a disability which interferes with the veteran's ability to undertake a regimen consisting of or including vocational training or employment. Specialized restorative training courses which may be furnished are: courses in language retraining, speech and voice correction, speech retention or voice retention, speech (lip) reading, auditory training, braille reading and writing, training in ambulation, one-hand typewriting, left-hand writing, work adjustment training, and personal adjustment training.

• • • • •

(6) Courses of specialized restorative training pursued under subparagraph (3), (4), or (5) of this paragraph will be limited to the minimum period necessary to accomplish the purpose stated in the applicable subparagraph, but will not exceed 9 months or 2 semesters in length.

• • • • •

33. In § 21.202, paragraphs (b), (c), (e), (3), and the introduction of paragraphs (d), (e), and (f) are amended to read as follows:

§ 21.202 *Devotion of full time to training.* • • •

(b) Where restoration of a veteran's employability is determined to be practicable through the pursuit of a course of training, but the assigned medical consultant determines that due to the limitations imposed by the veteran's disability the maximum time that should be devoted currently by the veteran to training is less than full time as contemplated in paragraph (a) of this section, the veteran may be placed in a reduced-time training program which can be completed within the limitations established by §§ 21.204 and 21.206, under the following conditions:

(1) The assigned medical consultant determines that the amount of time which can be devoted currently by the veteran to training is as great as the veteran's disability ever will permit, or

(2) The assigned medical consultant determines that the veteran is able to devote at least 4 hours per day, 5 days per week, to training exclusive of time, if any, required to travel to and from the place of training, and there is reasonable promise that during training the veteran's work tolerance will increase steadily to such extent that he will be able to pursue training on a full-time basis, and the chief education and training activity, determines that considering the determination of the assigned medical consultant there is reasonable assurance that the veteran will attain the selected employment objective within the statutory period of 48 months or within a period exceeding 48 months where authorized by Veterans' Administration Regulations: *Provided*, That the individual training program will be so developed that it will require the veteran to devote to his training that amount of time which was determined by the assigned medical consultant to be the maximum time which the veteran currently can devote to training. (In the case of a school course this will include any normal time required for preparation outside the school.)

(c) In the case of each veteran placed into reduced-time training under paragraph (b) (1) or (2) of this section, a statement will be prepared and placed in the veteran's records showing under which of these two subparagraphs reduced-time training was authorized and giving the facts upon which the determination to place the veteran into such training was made.

(d) Until a veteran placed into training under paragraph (b) (2) of this section is pursuing training on a full-time basis, at the end of each 90-day period (or at the end of each term or semester if the veteran is pursuing a school course conducted on a term or semester basis), the chief, education and training activity:

• • • • •

(e) A veteran placed into training under paragraph (b) (2) of this section will be removed from training under that subparagraph at any time that the chief, education and training activity, finds that one or more of the following conditions exist:

• • • • •

(3) The veteran will not attain the selected employment objective within 48 months or within a planned period exceeding 48 months which is authorized within the limitations established by §§ 21.204 and 21.206.

(f) Where, pursuant to the provisions of paragraph (e) of this section, a veteran is removed from training under paragraph (b) (2) of this section, the chief, education and training activity:

• • • • •

34. Section 21.204 is revised to read as follows:

§ 21.204 *Maximum duration of the course*—(a) *Length of the course.* The maximum duration of a course of vocational rehabilitation under Part VII, Veterans Regulation 1 (a), as amended (38 U. S. C. ch. 12), may not exceed the period necessary to restore employability. Nor may the maximum duration of a course under Public Law 16, 78th Congress, as amended, or under both Public Law 16, 78th Congress, as amended, and Public Law 346, 78th Congress, as amended, exceed a period of 4 years, except where it may properly be considered and authorized under conditions set forth in § 21.206. Nor may the maximum duration of a course under Public Law 894, 81st Congress, as amended, or under Public Law 894 together with any training pursued under other laws administered by the Veterans' Administration exceed a period of 4 years except where it may properly be considered and authorized under § 21.206, §21.296 or § 21.2015 (b), as applicable.

(b) *Basic termination date for vocational rehabilitation training.* Except for the veteran coming under paragraph (c) of this section, a veteran may not be placed into or continued in training under Public Law 16, 78th Congress, as amended, after the basic termination date of July 25, 1956, (9 years after the official termination of World War II). Nor may a veteran under Public Law 894, 81st Congress, except one falling under paragraph (c) of this section, be placed into or continued in training under Public Law 894, 81st Congress, after the basic termination date of:

(1) August 20, 1963, for a veteran discharged or released from active service prior to August 20, 1954; or

(2) January 31, 1964, or that date which is exactly 9 years after his discharge or release from active service, whichever is the earlier, for a veteran discharged or released from active service on or after August 20, 1954.

Nor may a veteran under Part VII other than one falling under paragraph (c) of this section, be placed into a course of vocational rehabilitation under Part VII which cannot be completed by his basic termination date except where a prescribed course of vocational rehabilitation leads to an objective the practice of which requires passing of an examination for licensure and the veteran is able to complete all of the course by his basic termination date but is unable to take the licensing examination prior to that date. Under such circumstances the veteran will be considered to have completed training necessary to qualify him for employment and will be notified that the matter of his becoming licensed will not be the responsibility of the Veterans' Administration. Where it is determined that a veteran properly in training under Part VII will not reach employability on or before his basic termination date for reasons beyond his control other than for reasons falling under paragraph (c) of this section, adjustment will be made by revising his individual training program where practicable to one which can be completed by his basic termination date and which will meet the requirements of employability; or, if such cannot be accomplished, by requesting revaluation to another employment objective which will capitalize the training already provided and which

can be attained on or before his basic termination date. If neither adjustment can be accomplished but it is determined that continuance of his course to his basic termination date will, with available self-aid or other-aid, assist the veteran to become rehabilitated, he may be permitted, subject to other applicable Veterans' Administration Regulations, to continue such course to said date, at which time all obligation of the Veterans' Administration will cease. If the veteran does not desire to pursue his course to his basic termination date, or becomes disentitled thereto, he will be placed in status "discontinued" under § 21.283. The veteran's records will be appropriately documented.

(c) *Conditions governing the providing of vocational rehabilitation training beyond the basic termination date under Public Law 16, 78th Congress, or under Public Law 894, 81st Congress, as amended by Public Law 610, 83d Congress.* When in accordance with subparagraph (1), (2) or (3) of this paragraph it is determined that an otherwise eligible veteran has been prevented from timely entering or, having entered, from completing training under Public Law 16 or Public Law 894 within the 9-year period ending with the veteran's basic termination date, he may be afforded training under the applicable law beyond his basic termination date but not beyond a date falling exactly 4 years after his basic termination date.

(1) *Prevented from timely entering training.* For purposes of Public Law 610, 83d Congress, a veteran who has not entered training under Public Law 894 or who had not entered training under Public Law 16 prior to August 20, 1954, shall be deemed to have been prevented from timely entering training under Public Law 894 or Public Law 16, as applicable, if it is determined that:

(i) The veteran's physical or mental condition was such as to make training medically infeasible during all or any part of the 90-day period immediately preceding the date falling exactly 4 years prior to his basic termination date: *Provided*, That such determination shall not be based upon an acute condition of transitory nature such as would have caused a temporary delay as distinguished from an indefinite postponement of the veteran's induction into training, or

(ii) The veteran's discharge from service was such as to meet the basic eligibility requirement for vocational rehabilitation for the first time on or subsequent to the beginning day of the 4-year and 90-day period immediately preceding his basic termination date; or

(iii) The veteran first established the existence of any service-connected compensable disability on or subsequent to the beginning day of the 4-year and 90-day period immediately preceding his basic termination date; or

(iv) The veteran, although having previously established a service-connected compensable disability, has, on or subsequent to the beginning day of the 4-year and 90-day period immediately preceding his basic termination date, established the existence of an increase in the degree of the disabling effect attributable to the previously established service-connected disability or an additional service-connected disability (whether secondary to or independent of the previous disability) which warrants a finding that need for vocational rehabilitation is attributable to the change in his service-connected physical or mental condition which has arisen on or subsequent to the beginning day of such 4-year and 90-day period. (The determination of this question in each case will be based on all the facts established to the date the determination is made and in accord with the provisions of regulations applicable on such date. In no case will it be determined that the veteran was prevented from timely entering training if an affirmative finding of need for vocational rehabilitation had been made at any time prior to the 4-year and 90-day period immediately preceding the veteran's basic termination date.)

(2) *Having timely entered training, prevented from completing training.* For purposes of Public Law 610, 83d Congress, a veteran who was not prevented from timely entering training under Public Law 16, 78th Congress, or Public Law 894, 81st Congress, and who was properly entered into training will be deemed to have been prevented from completing his training only when it is determined that one of the following conditions exist:

(i) As of the last day when sufficient time remained or remains to permit completion of the course within the 9-year period ending with his basic termination date, the veteran's physical or mental condition:

(*a*) Made or makes pursuit of training medically infeasible; or

(*b*) Requires a reduction in his scheduled hours of training; or

(*c*) Prevents an anticipated increase in his scheduled hours of training where the veteran is already pursuing training on a reduced-time basis.

(ii) Because of the veteran's physical or mental condition revaluation under § 21.252 (a) (1) is necessary, and the objective selected will require training beyond his basic termination date: *Provided*, That a veteran in interrupted or discontinued status, except where his physical or mental condition prevented him from doing so, must have made himself available for reentrance when there was sufficient time remaining before his basic termination date to complete the training which would have been required to attain the last established objective of record.

(3) *Prevented from timely entering a course which would assure vocational rehabilitation; Public Law 16 only.* For purposes of Public Law 610, 83d Congress, a veteran who met the conditions of subdivision (i), (ii), (iii) or (iv) of paragraph (c) (1) of this section having entered training subsequent to July 25, 1952 and prior to August 20, 1954 shall be deemed to have been prevented from timely entering training under Public Law 16 and may be afforded training under that law beyond July 25, 1956 but in no event beyond July 25, 1960, provided his case meets one of the following conditions:

(i) Based upon the facts of record it is established that the objective selected or the course prescribed was assuredly not the objective which would have been selected or the course which would have been prescribed had it not been for the termination date of July 25, 1956; and it is now determined that the action taken to approve the objective or to prescribe the course was in error because completion of the prescribed training will not lead to employability at a level which is reasonably consistent with the veteran's aptitudes, interests and abilities, and consequently will not result in bona fide vocational rehabilitation.

(ii) Based upon the facts of record it is established that the objective selected and the training prescribed are suitable to accomplish vocational rehabilitation but for reasons beyond the control of the veteran (such as the school or establishment going out of business, work stoppages interrupting apprenticeship or job training or acute illness of the veteran of a transitory nature) it is now shown that the course cannot be completed within the period anticipated, and in order to accomplish vocational rehabilitation in the objective it is necessary to extend the period of training beyond July 25, 1956.

(iii) Although the objective selected was considered to be entirely suitable for the veteran at the time he entered training, subsequent experience has demonstrated that vocational rehabilitation cannot be effected in that objective and a change of objective under § 21.252 (a) (1) to one that is suitable to accomplish vocational rehabilitation will require a period of training which will extend beyond July 25, 1956.

(4) *Authority to make determinations under paragraph (c) of this section.* (i) In each case in which the record does not bear a documented determination by the Vocational Rehabilitation Board as to the medical feasibility of training during the 90-day period immediately preceding the date falling exactly 4 years prior to the veteran's termination date, the determination as to whether an otherwise eligible veteran meets the condition set forth in subparagraph (1) (i) of this paragraph and the determination in each case as to whether an otherwise eligible veteran meets the condition set forth in subparagraph (2) (i) (*a*) of this paragraph will be made in the regional office by the Vocational Rehabilitation Board. All other determinations under this paragraph will be made by appropriate personnel in accordance with established regulations and mandatory procedures.

(ii) The record of each determination under this pargraph in which training is authorized beyond the veteran's basic termination date will cite the appropriate subparagraph or subparagraphs of this paragraph under which the authorization is made.

35. A new § 21.204a is added as follows:

§ 21.204a. *Maximum duration of the course for a seriously handicapped veteran.* A course of training longer than is ordinarily required to qualify for employment in a particular occupation may

be prescribed for a seriously handicapped veteran when the following conditions exist:

(a) The veteran is preparing for a type of work in which he will be at a definite disadvantage in competing with the non-disabled for jobs or business, i. e., his disability is such that it not only seriously limits the number of occupations which are feasible but it also seriously restricts the number of employment opportunities within the occupation for which employers will consider hiring him or which would otherwise be available to him; and

(b) A course of training is available which is more advanced than is ordinarily provided under Part VII, or an additional body of closely related training is available which affords substantial promise of offsetting the veteran's extra handicap.

36. In § 21.205, paragraph (a) is amended to read as follows:

§ 21.205 *Adjusting the duration of the course.* (a) Although Certificate B, VA Form VB 7–1902a, provides for indicating the estimated length of the course, that fact will not control the length of the course. It is the function and responsibility of the education and training activity to prescribe and provide the course of training necessary to restore employability in the occupation which has been determined by the counseling activity. The duration of the course will be determined by the education and training activity.

* * * * *

37. In § 21.206, that portion of paragraph (b) preceding subparagraph (1) and paragraph (d) (1) are amended to read as follows:

§ 21.206 *Limitations on training in excess of four years.* * * *

(b) *Training on the job in excess of four years.* The provisions of paragraph (a) (1) (i) and (ii) of this section will apply to on-the-job training courses which require more than 4 years. However, in no case will paragraph (a) (1) (iii) of this section be applicable to on-the-job training courses which require more than 4 years. If, through application of counseling procedure, it is indicated that a veteran, who does not meet the conditions set forth in paragraph (a) (1) (i) of this section, should be rehabilitated through a course of training on the job for an employment objective ordinarily requiring more than 4 years of training, he may be inducted into such a course, *Provided:*

* * * * *

(d) *Authority for approval of courses in excess of four years.* (1) Under the conditions set forth in paragraph (a) (1) (i), (ii), and (iii) of this section, Managers of regional offices are authorized to approve or disapprove courses of training in excess of 4 years, basing such action upon the recommendation of a committee composed of the chief, vocational rehabilitation and education division, the chief, education and training activity, and the chief, counseling activity, or their assistants.

* * * * *

38. In § 21.208, the introduction and paragraphs (c) and (g) are amended to read as follows:

§ 21.208 *Status "induction pending".* Following the signing of Certificate B on VA Form VB 7–1902a by the authorized official of the education and training activity and the receipt of the veteran's records by that activity, the veteran shall be regarded as in status "induction pending" until any one of the following occurs:

* * * * *

(c) The veteran's case is referred back to the counseling activity for some reason such as (1) reconsideration of the employment objective, or (2) reconsideration of medical feasibility.

* * * * *

(g) The veteran's statutory period has expired.

39. In § 21.211, paragraph (c) is amended to read as follows:

§ 21.211 *Factors to be considered in selecting the facility.* * * *

(c) *Ownership or control by veteran or relatives.* A proprietary school or training on the job establishment in which the veteran or a close family relative of the veteran has control or a pecuniary interest ordinarily shall not be selected as an appropriate training facility for training that veteran except where the chief of education and training determines that, beyond any reasonable doubt, another facility in which such control does not exist and which is satisfactory is not available, and the social and economic relationship of teacher to the veteran, who will be the pupil, will be satisfactory for the efficient promotion of learning activities. Where, after careful consideration of the foregoing, it is determined to be necessary and proper to induct the veteran into training at a school or establishment in which the veteran or a close family relative has control, the veteran's records will be documented to show the facts and circumstances which warranted this determination.

40. § 21.212, paragraph (c) is amended to read as follows:

§ 21.212 *Preparation and content.* * * *

(c) The individual training program, in order to take care of the peculiar requirements of the veteran, may include items over and above the complete training program for a particular occupation. For example, a complete training program for a lawyer commonly would not include the subject stenography, but for the purposes of a particular veteran, stenography might be necessary and might properly be made a part of his individual training program.

* * * * *

41. In § 21.220, the introduction and paragraphs (a), (b), and (c) are amended to read as follows:

§ 21.220 *Conditions to be met before induction into training.* The training officer is authorized to induct a veteran into training in an institution or other establishment for the purpose of pursuing a course of vocational rehabilitation which has been prescribed in accordance with the provisions of Part VII, Veterans Regulation 1 (a), as amended (38 U. S. C. ch. 12) (see §§ 21.40 and 21.701 (a)):

(a) When vocational counseling has been rendered, including the completion of the counseling record, with the recording of all pertinent information, the selection of the employment objective, and the execution of Certificate B on VA Form VB 7–1902a, to show the concurrence of the veteran, the medical adviser or consultant where required, the vocational adviser, the chief, counseling activity or designee, and the chief, education and training activity or designee;

(b) When there has been obtained and is waiting to be utilized a training facility which, on the basis of adequate investigation by the education and training activity is clearly qualified as to space, equipment, instructional material, and personnel to give the required course and has agreed to cooperate fully with the Veterans' Administration in accomplishing records of the trainee's attendance, performance, and progress in training, and, in the case of training on the job, to report to the Veterans' Administration monthly as required by the law any payments of money to the trainee;

(c) When an adequate individual training program for the veteran as required by § 21.212 has been prepared and prescribed by the training officer;

* * * * *

42. In § 21.223, paragraph (d) is amended to read as follows:

§ 21.223 *Authority to induct veterans into training on the job at subminimum wage rates.* * * *

(d) The chief, education and training activity, is authorized to issue a temporary certificate in accordance with vocational rehabilitation and education procedures permitting induction into training on the job under Part VII at subminimum rates, when, after investigation the conditions in paragraph (b) of this section are found to have been met.

43. Sections 21.223a and 21.224 are revised to read as follows:

§ 21.223a *Effective date of induction into training.* The effective date of induction of a veteran into training under Part VII, Veterans Regulation 1 (a), as amended (38 U. S. C. ch. 12), shall be the date the veteran, having met the requirements of § 21.220, actually commenced the prescribed course under that Part, even though the veteran may have pursued the course of training previously under Part VIII, Veterans Regulation 1 (a), as amended, or otherwise: *Provided,* That such date may not be earlier than the date specified by the Veterans' Administration as the date the veteran is authorized to commence the course under Part VII: *And provided further,* That in schools operated on a term basis, the date on which the school requires the veteran to report for prescribed activities, such as registration, may be considered the date of commencing the prescribed course, if the veteran reports on

that date. There shall be no retroactive dating of induction into training under Part VII except that in an individual case, if the facts, equities and demonstrated good faith on the part of the veteran justify such action, retroactive dating of induction into training may be approved by the Assistant Deputy Administrator, Vocational Rehabilitation and Education, or by appellate decision pursuant to the appeal of the veteran.

§ 21.224 *Release of information.* (a) When, for the purpose of making or carrying out arrangements for the training or employment of a veteran, it is necessary to release information regarding the disability or other matters to a person or establishment requested by the Veterans' Administration to provide training or employment for the veteran, the information directly pertinent to the purpose may be released to the appropriate party, provided the veteran authorizes such release by signing a statement such as follows:

I hereby authorize the Veterans' Administration to release to any person, institution, or establishment such information regarding me, including that relating to my disability, as is considered by the Veterans' Administration officials to be needed by such persons or establishments for the purpose of developing or carrying out arrangements for my training or employment.

(b) Ordinarily, the veteran will have authorized the release of information regarding disability or other matters by signing the Veteran's Affidavit on VA Form VB 7–1902a, Counseling Record. However, where the veteran objected to the release of such information at the time of counseling and the statement was crossed out on VA Form VB 7–1902a, information regarding his disability or other matters may not be released unless the veteran reconsiders and signs the statement. Care must be taken not to reveal any confidential information which has no significance to the veteran's training in terms of enabling the training institution better to serve the veteran in the pursuit of his course. With the release of any information which the trainee has authorized, there shall be included special notice that the information is strictly confidential, is furnished solely for it to serve the purpose of enabling the training institution better to serve the veteran in the pursuit of his course, and under no circumstances is to be released to any other parties.

44. A new § 21.225 is added as follows:

§ 21.225 *Training of psychiatric patients while on trial visit from Veterans' Administration hospital.* (a) Subject to the provisions of other applicable Veterans' Administration Regulations, eligible veterans may be entered or reentered into training under Part VII while on trial visit from a Veterans' Administration hospital under the following conditions:

(1) *Veteran currently rated competent.* A veteran who has been found in need of vocational rehabilitation and for whom training has been determined to be medically feasible and who is currently rated as competent may be entered or reentered into training under Part VII.

(2) *Veteran currently rated incompetent who has a legally appointed guardian.* A veteran who has been found in need of vocational rehabilitation and for whom training has been determined to be medically feasible and who is currently rated as incompetent but has a legally appointed guardian may be entered or reentered into training under Part VII.

45. The centerhead immediately preceding § 21.230 is amended to read as follows: "Supplies".

46. Section 21.233 is revised to read as follows:

§ 21.233 *Prevention of abuse.* The furnishing of supplies is fraught with possibilities of marked abuse. Accordingly, the entire matter of furnishing such articles is to be so administered as to avoid and prevent abuses. Care is to be exercised, including examination of the veteran's records, to make certain that articles will not be furnished to the veteran-trainee which duplicate those which have been previously furnished by the Veterans' Administration or which otherwise are in his possession. The provisions of the law and the instructions authorizing the furnishing of supplies are not to be construed as authorization for furnishing supplies except under the most careful checks as to what is required by the training institution of all trainees. It is to be emphasized and always borne in mind that the trainee is not to be allowed to determine what supplies will be furnished. An understanding of the law and the Veterans' Administration policy on this point and cooperation on the part of the institution or establishment should be encouraged and developed to the end that the institution or establishment will approve for the trainee only those items which it requires other students or trainees to personally possess in order to pursue the training. The training officer will be held responsible for determining, in individual cases, that the list of supplies to be furnished to the trainee by the Veterans' Administration has been determined by responsible officials of the institution rather than by the trainee himself and has been determined on the basis of actual training needs.

47. A new § 21.234a is added as follows:

§ 21.234a *General limitations where training under Part VII, Veterans Regulation 1 (a) (38 U. S. C. ch. 12), follows training under Public Law 550, 82d Congress.* (a) When a veteran enrolled in a course under Public Law 550 in a school operating on a quarter, semester or term basis is inducted into training under Part VII in the same course or for the same objective in such institution at any time after the beginning of a quarter, semester or term, the amount authorized for supplies under Part VII for the remainder of such quarter, semester or term will be limited to the pro rata part of the total value of the supplies which the time remaining for completion of the quarter, semester or term bears to the total length thereof.

(b) When a veteran enrolled under Public Law 550 in a school course operating on other than a quarter, semester or term basis or in an on-the-job course is inducted into training under Part VII to continue his training in the same objective in the same institution or establishment, the amount authorized for supplies under Part VII for the remainder of the course will be limited to the pro rata part of the total value of the supplies which the time remaining for completion of the course under Part VII bears to the total length thereof.

48. Section 21.236b is revised to read as follows:

§ 21.236b *Furnishing supplies to trainees in institutional on-farm training.* Before a veteran may be inducted into institutional on-farm training under Part VII, Veterans Regulation 1 (a), as amended (38 U. S. C. ch. 12), the farm on which he is to pursue the on-farm part of his course must be equipped with the kinds and amounts of supplies and equipment which are necessary to enable the trainee to pursue successfully that portion of the course. Accordingly, under no circumstances will the Veterans' Administration furnish any equipment or supplies which may be required to operate the farm. Where organized group instruction in a school is a part of the veteran's course as provided in § 21.201a (a) (1) the Veterans' Administration will furnish only those books and incidental consumable supplies required by the school to be personally owned by all students in the school portion of the course. Where all instruction is given on the veteran's farm by an individual instructor as provided in § 21.201a (a) (2) the Veterans' Administration will furnish only those text books and incidental consumable supplies required by the instructor to be owned by the veteran as a part of his individual training program with the use of such text books definitely arranged for on the basis of study assignments, the completion of which is checked and evaluated by the instructor and reported by the veteran on his monthly report of training: *Provided,* That such special equipment as may be authorized under § 21.241 (b) incident to the character of the veteran's disability may be furnished.

49. In § 21.240, former paragraph (a) is amended and former paragraphs (b) and (c) are revoked, so that § 21.240 reads as follows:

§ 21.240 *Furnishing clothing.* One of the purposes of the subsistence allowance is to enable the trainee to provide himself with clothing. Apparel worn in lieu of ordinary clothing will not be identified as articles of training equipment or supplies. Consequently, gymnasium clothing, laboratory coats and trousers, nurses or medical technicians uniforms, school or military uniforms, coveralls, work uniforms or other similar articles will not be furnished by the Veterans' Administration notwithstanding the fact that the training establishment may require a certain type or style of apparel to be worn by all students, trainees, or employees. Protective articles, such as laboratory aprons, rubber gloves, goggles, etc., which are required to be worn for

the purpose of protecting the trainee from physical harm incident to pursuit of the course and are not worn in lieu of, or for the purpose of protecting his personal clothing, may be furnished when required to be worn by all students taking the same course.

50. Section 21.240a and 21.241 are revised to read as follows:

§ 21.240a *Furnishing items susceptible of personal use.* Musical instruments, cameras and their accessories, tennis rackets, golf clubs, fountain pens, desk sets, and similar items which are susceptible of use for personal purposes will not be furnished unless indispensable to particular major or minor unit courses prescribed by the education and training activity as essential to accomplishing the selected employment objective, and such items are otherwise furnishable under §§ 21.230 through 21.240, as applicable. Such items will not be furnished for elective courses.

§ 21.241 *Furnishing special equipment.* (a) Supplies over and above those required by the school or establishment to be owned personally by all students pursuing the same course or over and above those furnishable under § 21.237a but which, because of the character of the veteran's disability, are necessary to enable the veteran to undertake and/or pursue, or continue to pursue, successfully the course of vocational rehabilitation which has been prescribed by the education and training activity, shall be considered to be special equipment and shall be referred to as such.

(b) Special equipment as defined in paragraph (a) of this section may be authorized and furnished to trainees under Part VII, Veterans Regulation 1 (a), as amended (38 U. S. C. ch. 12), for only two categories of conditions and purpose as follows:

(1) Where the equipment is necessary to enable the veteran to pursue the prescribed course of training which because of his disability he could not otherwise pursue successfully. That is, the equipment will enable the veteran to do and accomplish those things which persons not disabled are able to do without special equipment but which the particular veteran because of his disability cannot do and therefore cannot pursue the prescribed course satisfactorily. Equipment in this category ordinarily will be items not necessary to persons not disabled but may include such items modified in design and construction as, for example, a workbench or a work seat especially designed and constructed to compensate the veteran's inability to move about freely. Upon recommendation by the chief, vocational rehabilitation and education division, together with the presentation of a written statement setting forth: (i) An itemized list of the equipment to be furnished to the veteran, a brief description of each item of equipment including the manufacturer's brand and the approximate cost thereof; (ii) the facts which establish that such equipment or its equivalent has not been furnished previously to the veteran by the Veterans' Administration or otherwise; (iii) the facts and circumstances which, because of the character of the veteran's disability, establish need for such equipment for satisfactory pursuit of his course of training and which establish that the veteran has sufficient physical and mental ability to make adequate use of the requested equipment in the course of training; (iv) a brief description of the prescribed plan of the vocational rehabilitation training for the veteran showing how the requested equipment is to be used in such plan; and, (v) the recommendation of the special rehabilitation procedures training specialist; the Manager, if he concurs in the recommendation made by the chief, vocational rehabilitation and education division, may authorize the furnishing of such special equipment. In each case the records will be documented to show a completely identifying listing of each item of such special equipment furnished to the veteran and the basis upon which the furnishing of such special equipment was approved or disapproved by the manager.

(2) Where the equipment is necessary to a veteran for whom the education and training activity has prescribed and authorized a course of training in the home in accordance with § 21.201 (g) to enable the veteran to learn essential operations in the prescribed course. Equipment in this category is of a kind which ordinarily is made available by the school or training establishment but is not available to a veteran training in the home because of his inability to travel to a school or training establishment due to the limitations imposed by his disability. Upon recommendation by the chief, vocational rehabilitation and education division, together with the presentation of a written statement setting forth all the information as required in subparagraph (1) of this paragraph and additionally setting forth: (i) the facts and circumstances which establish that, because of the limitations imposed by his disability, the veteran is unable to travel to a school or training establishment to pursue his course of training; and (ii) an itemized list of all the equipment to be furnished to the veteran under the provisions of § 21.237a; the Manager, if he concurs in the recommendation made by the chief, vocational rehabilitation and education division, may authorize the furnishing of such special equipment. In each case the records will be documented as required in subparagraph (1) of this paragraph.

(c) Special equipment not required for training purposes but necessary to overcome the handicap of blindness as contemplated in Public Law 309, 78th Congress, will be furnished under that law rather than under Public Law 16, 78th Congress, as amended.

(d) Where need for training has been determined solely on the basis of the service-connected disability, and the objective and training facility have been so chosen that the non-service-connected disability will have no preventive effect, or the least possible effect, upon training to overcome the handicap of the service-connected disability but it later develops that the necessary training cannot be pursued because of the non-service-connected disability, but the effect of the non-service-connected disability assuredly will be overcome by furnishing an item of special equipment, such special equipment may be provided under and subject to conditions of this section.

(e) If for any reason the veteran fails to complete the prescribed course of training in the home for which special equipment has been furnished under paragraph (b) (2) of this section, the veteran will be deemed to be at fault under § 21.243 with respect to such special equipment only, and he will be required to return such equipment to the Veterans' Administration or to pay the reasonable value thereof: *Provided however*, That if the veteran has completed such part of the prescribed course of training that he is found to be employable and has been declared rehabilitated under § 21.281, he will not be deemed to be at fault and he will not be required to return such equipment to the Veterans' Administration or to pay the reasonable value thereof. The veteran will be advised accordingly. With respect to any special equipment furnished to the veteran under paragraph (b) (1) of this section, a separate finding will be made under § 21.243 of whether the veteran's failure was due to fault on his part.

(f) Regional office Managers are authorized to furnish to Part VII trainees consumable supplies as needed for training purposes in the operation of special equipment, such as sound recorders and braille writers, authorized under paragraph (b) (1) of this section or which would have been authorized except for the fact the equipment had already been issued under provisions of Public Law 309, 78th Congress. The amount, grade, quality and cost of such consumable supplies that may be furnished to any trainee will be limited to those commensurate with the veteran's actual need for the supplies in his training. Regional office Managers are also authorized to arrange for the reconditioning of sound recording discs furnished to Part VII trainees when such reconditioning is to the economic advantage of the Government, and to reissue such reconditioned discs.

51. In § 21.243, paragraphs (c), (g), and (h) are amended to read as follows:

§ 21.243 *Release of and repayment for training supplies.* • • •

(c) Determination whether the veteran's failure was or was not because of fault on his part will be made by the training officer. The records will be documented to show the facts upon which the decision was made.

• • • • • •

(g) Where it is determined that the veteran is at fault and repayment for supplies is not excused under paragraphs (d) and (f) of this section, the veteran will be required to repay the Veterans' Administration for the nonconsumable supplies furnished him at Veterans' Administration expense. The amount to be repaid will be the value at which the supplies were issued to the veteran less a percentage equivalent to the percentage of the prescribed course (or term, where applicable in the case of school training) completed. For example, a veteran who has completed one-third of the prescribed course or term for which supplies were furnished will be required to repay two-thirds of the value at which the supplies were issued to the veteran. Under no circumstances will supplies be accepted in lieu of repayment, except as provided in §§ 21.241 (e), 21.252 (d), and paragraph (d) of this section.

(h) The provisions of this section will apply to cases where training is discontinued on or after July 10, 1951, and to cases where training was discontinued prior to July 10, 1951, but disposition of the case was not made under the regulation in effect at that time; except that in any case where training was discontinued prior to July 10, 1951, and the decision as to liability or non-liability has not been made by April 26, 1955, the veteran will be deemed not to be liable for the repayment of the reasonable value of non-consumable training supplies, since experience has shown that the administrative cost of applying repayment collection procedures at this time on cases that were discontinued prior to July 10, 1951, far exceeds the amount of return to the Government.

52. Section 21.247 is revised to read as follows:

§ 21.247 *Records of supervision.* The recorded facts concerning the training situation, as determined through supervision of the trainee by the training officer, are the chief basis upon which the Veterans' Administration judges the progress of the trainee and determines that the training situation of each trainee is satisfactory or that adjustment of the training situation is necessary to meet the needs of the individual veteran. The recorded facts are also the basis upon which the chief of the activity can evaluate the performance of the individual training officer and thus be enabled to determine the efficiency of the Veterans' Administration service in administering the affairs of the individual trainee. Records of supervision must be used to improve the program in each individual case and also the vocational rehabilitation program as a whole. They must be studied and acted upon with a view to making the work of the training officer and the entire education and training activity more effective.

53. Immediately following § 21.255, a new centerhead and § 21.256 are added as follows:

VOCATIONAL REHABILITATION BOARD

§ 21.256 *Types of cases to be referred to the Vocational Rehabilitation Board by education and training activity.* (a) Cases of veterans in induction pending, training or interrupted status will be referred to the Vocational Rehabilitation Board for determination as to the medical feasibility of beginning, continuing or reentering training when the following conditions pertain:

(1) A substantial question as to the medical feasibility of training exists; and

(2) The medical condition of the veteran is other than temporary in nature, such as one involving a brief period of hospitalization or other medical treatment necessitating temporary absence from training or temporary cessation of effort to enter or reenter the veteran into training.

(b) Cases of veterans in discontinued status by reason of general medical infeasibility or for whom there was a finding of general medical infeasibility while in discontinued status and who now request reentrance into training will be referred to the Vocational Rehabilitation Board for a determination as to whether training is now medically feasible.

(c) Cases of veterans in the following classifications will be referred to the Vocational Rehabilitation Board for consideration and recommendation:

(1) Seriously handicapped trainees whose training is not proceeding satisfactorily and the attendant conditions present problems of required adjustment on the part of the veteran or the training facility, or both, which the education and training activity has been unable to solve through the usual resources; or

(2) Veterans whose reentrance into training after rehabilitation is being considered under § 21.286 (b) (1) and the chief, education and training activity, desires advice from the Vocational Rehabilitation Board in determining whether the veteran's disability precludes performance of the duties of the occupation for which trained under Part VII.

54. In § 21.261, paragraph (a) is amended to read as follows:

§ 21.261 *Ordinary leave.* • • •

(a) *Granting of ordinary leave.* The training officer is authorized to approve ordinary leave of absence which will not exceed the amount of leave accumulated to the credit of the trainee and which in no case will exceed an aggregate of 30 days in each 12 months of training status, beginning with the date of the veteran's entrance into training: *Provided*, That the granting of such leave will not materially interfere with the pursuit of the prescribed course: *And provided further*, That no ordinary leave will be granted, except as provided in § 21.203a, which will require extending the veteran's training beyond 48 months, or further extending the veteran's training beyond 48 months where training in excess of 48 months already has been authorized under § 21.206.

• • • • • •

55. Sections 21.261a, 21.262, and 21.263 are revised to read as follows:

§ 21.261a *Ordinary leave for veterans pursuing institutional on-farm training.* A veteran pursuing a course of institutional on-farm training may be granted ordinary leave from the on-farm part of the course not to exceed 30 days in each 12 months of training status beginning with the date of the veteran's entrance into training: *Provided*, That such leave will not materially interfere with the pursuit of the prescribed course, and that leave will not be charged for routine absences from the farm required in the ordinary day to day conduct of the farm business or for absences from that part of an institutional on-farm course which is given at the educational institution. However, absences which materially interfere with the pursuit of the course or absences from instruction to the extent of failing to meet the requirements of § 21.201a (a) will be cause for interruption or discontinuance of training.

§ 21.262 *Additional leave under exceptional circumstances.* The training officer is authorized to approve leave of absence in addition to that allowable by §§ 21.261 and 21.261a under the following conditions, provided the training officer is reasonably certain that the veteran will return to the pursuit of his course within the period for which the training officer is authorized to grant leave.

(a) *Personal illness.* When required by reason of bona fide illness of the trainee, sick leave, without regard to ordinary leave, may be granted not to exceed a total of 30 days in each 12 months of training status beginning with the date of the veteran's entrance into training. Sick leave will be charged to include all of the elapsed time from the beginning of absence from training until the veteran returns to training, including Saturdays, Sundays, and holidays, except where such veteran returns on the first day training is available following a weekend or a holiday when training was not available, sick leave will not be charged for such weekend or holiday—for example, where the veteran is absent on Friday but he returns on Monday following the weekend when training was not available, leave will not be charged for such weekend.

(b) *Personal hardship.* (1) After all accrued ordinary leave has been exhausted, additional leave, not to exceed 30 days in each 12 months of training status beginning with the date of the veteran's entrance into training, may be granted for reasons other than personal illness, when failure to do so would cause personal hardship to the trainee. Satisfactory reasons under this category might include illness or death in the trainee's immediate family or other compelling conditions beyond the veterans' control which, in the opinion of the training officer, make it necessary that the trainee be permitted to absent himself from training. In no case is there authority to grant personal hardship leave to cover periods between ordinary school years.

(2) After all accrued ordinary leave has been exhausted, leave in addition to the sick leave permitted by paragraph (a) of this section, not to exceed 30 days in each 12 months of training status may be granted when it is clear that it could not have been foreseen that the illness would require more than the amount of leave which was approvable under paragraph (a) of this section and when there is clear indication that training will be resumed within the additional period. The basic 30 days' sick leave provided for in paragraph (a) of this section, together with ordinary leave, generally should be a sufficient allowance for personal illness. A greater period of absence from training ordinarily would interfere with the course.

(3) In no case shall any combination of leave under subparagraphs (1) and

(2) of this paragraph be granted in excess of 30 days during each 12 months of training. Such leave will be charged to include all of the elapsed time from the beginning of absence from training to the return of the veteran to training, including Saturdays, Sundays, and holidays, except where such veteran returns on the first day training is available following a weekend or holiday when training was not available, leave will not be charged for such weekend or holiday.

§ 21.263 *Maximum leave allowable.* Leave in excess of that authorized under §§ 21.261, 21.261a, and 21.262 will not be approved. Whenever, in an individual case, it becomes evident to the training officer that the veteran will not be able to resume his training course upon the expiration of the period of leave he is authorized to approve under this section, the veteran will be removed from training status.

56. Section 21.265 is revised to read as follows:

§ 21.265 *Unauthorized absences.* Trainees should be instructed that they will be expected to apply for and obtain approval for leave of absence in advance. However, when a veteran has absented himself from his place of training under conditions which would make his obtaining advance approval from the Veterans' Administration impracticable, and when the responsible officials of the training establishment and the training officer agree that the absence has not materially interfered with the course of training, the training officer is authorized to excuse the absence and to make charges against the veteran's leave in accordance with the policy stated in §§ 21.261, 21.261a, and 21.262. When such absence from training is not satisfactorily explained, the training officer will take such action as is deemed necessary, including forfeiture of subsistence allowance for the period of absence.

57. In § 21.267, paragraph (a) is amended to read as follows:

§ 21.267 *Interregional transfers for training.*—(a) *Induction into a facility outside the regional area.* Managers are authorized to effect the transfer of veterans for training under Part VII, Veterans Regulation 1 (a), as amended (38 U. S. C. ch. 12), to the jurisdiction of other regional offices within the limits of the continental United States at Government expense when any such transfer is necessary for the purposes of the Veterans' Administration in accomplishing vocational rehabilitation in the chosen employment objective. Such transfer at Government expense will be limited to the nearest satisfactory training facility, except that where regional territorial lines do not coincide with State border lines, transfers may be effected at Government expense to induct the veteran into training in any satisfactory training facility located within the State of the veteran's residence, despite the existence of satisfactory training facilities within the regional territory. An interregional transfer which involves travel at Government expense between a point within the continental limits of the United States and a point within the insular possessions and territories and an interregional transfer to or from the Republic of the Philippines at Government expense will be effected in each case only upon the personal prior approval by the Manager based upon a written statement presented by the chief, vocational rehabilitation and education division which provides full particulars to establish that the veteran cannot be properly trained without the transfer. The veteran's records will be fully documented to show the decision made by the Manager and the facts upon which such decision was based.

* * * * *

58. In § 21.279, paragraphs (a) and (b) are amended and a new paragraph (e) is added as follows:

§ 21.279 *Reader service under Part VII, Veterans Regulation 1 (a), as amended (38 U. S. C. ch. 12), for veterans with visual impairment.* (a) When reader service is necessary for the successful pursuit of a course of vocational rehabilitation by a veteran with visual impairment, such service may be furnished in accordance with the policy set forth in this section.

(b) Every trainee in school training whose vision is so impaired as to make it impossible or inadvisable for him to use his eyes for reading will be furnished with necessary reader service. This group of trainees will include those whose best corrected vision is 20/200 or less in both eyes, or whose central vision is greater than 20/200 but whose field of vision is limited to such an extent that the widest diameter of the visual field subtends an angle no greater than 20 degrees, and those with impaired vision, whose condition or prognosis indicates that the residual sight will be affected detrimentally by the use of his eyes for reading. Trainees with visual impairment who are in training on the job will be provided with necessary reader service when study is required in connection with their training and when the need for such assistance is established.

* * * * *

(e) The number of hours of service in each case will be determined by the amount of reading necessitated by the course. For undergraduate school training, the criterion of 2 hours of reader service per week for each credit-hour may be utilized as a general guide in estimating the amount of reader service required. For graduate training, ordinarily more than 2 hours of reader service per credit hour will be required. An arbitrary maximum should not be applied, rather the amount of reader service needed should be determined upon the basis of the amount of actual oral reading required to cover the subject matter of the course and in consideration of the learning ability of the particular veteran. Under the provisions of this section, reader service is not permissible for reading into a recording machine not in the veteran's presence for the purpose of making sound recordings of textbook material for later use by the trainee. If advance recording of textbooks is desired, the recording service should be obtained through free service offered by volunteer organizations serving that need.

59. In § 21.281, paragraphs (a) (2) and (c) are amended and new subparagraphs (4) and (5) of paragraph (a) are added as follows:

§ 21.281 *Status "rehabilitated."* (a) * * *

(2) When a trainee while in training status or while properly in interrupted status as required by § 21.282 accepts employment in the same occupation for which he is being trained or in an occupation for which the training received under Part VII has contributed materially toward rehabilitation, and his earnings approximate those of the average trained worker in the occupation, and the employment is such kind that to pursue it full time would be not incompatible with the trainee's disability—thus demonstrating attainment of satisfactory employment: *Provided,* That where such employment is not in the same occupation for which the veteran was being trained, his case will be referred to the counseling activity for determination of whether the occupation in which the veteran is employed is compatible with the veteran's disability and aptitudes. The effective date of rehabilitation will be the day following the last day of instruction. If the findings of the counseling activity are negative, the veteran wil be placed in discontinued status.

* * * * *

(4) When a veteran satisfactorily completes a prescribed course of vocational rehabilitation for an occupation the practice of which requires the passing of an examination for licensure and the veteran chooses to apply for licensure in a State other than either the State in which he pursued his training, or a State that was specified at the time he entered training in order to plan his program to meet licensure requirements of that specified State. Under such circumstances the veteran will be considered to have completed the training necessary to qualify him for employment and the matter of his becoming licensed will not be the responsibility of the Veterans' Administration. The effective date of rehabilitation will be the day following the day of completion of the prescribed course.

(5) When a veteran satisfactorily completes a prescribed course of vocational rehabilitation under Part VII for an occupation the practice of which requires the passing of an examination for licensure but is unable to take the licensure examination prior to the termination date for vocational rehabilitation training (see § 21.204 (b)). Under such circumstances the veteran will be considered to have completed the training necessary to qualify him for employment and the matter of his becoming licensed will not be the responsibility of the Veterans' Administration. The effective date of rehabilitation will be the day following the day of completion of the prescribed course.

* * * * *

(c) When a trainee discontinues training under § 21.283 (a) (1), (2), (3), (4), (5), or (7) and investigation later discloses that the trainee has accepted employment in an occupation for which the training received under Part VII has contributed materially toward employability and medical or other acceptable evidence indicates that the employment is of a kind which to pursue full time would be not incompatible with the trainee's disability, the trainee will be placed in status "rehabilitated" for purposes of the office record effective on the day following the last day of instruction or, where leave was authorized after the last day of instruction in accord with §§ 21.260 through 21.265, on the day following the last day of leave. In such cases, the veteran shall not receive written notice of rehabilitation and shall not be paid the subsistence allowance ordinarily paid for 2 months following the determination of employability. As indicated, this action is for record purposes only, and the veteran's reentrance into training under the conditions provided for in § 21.288 will not be jeopardized by this recording, where reentrance is otherwise warranted.

* * * * *

60. In § 21.282, paragraph (d) is amended to read as follows:

§ 21.282 *Status "interrupted."* * * *

(d) The veteran completes the prescribed course of vocational rehabilitation for an occupation, the practice of which requires passing of an examination for license and such examination is not given on or before the day following the completion of the course or on or before the day following the last day of approved leave (see § 21.287 (a) (1)); except where following completion of the course the veteran declines to take the examination in the State for which he was trained (see § 21.281 (a) (4)); or in the case of a Public Law 16 veteran although the course is completed prior to his termination date the veteran is unable to take the licensing examination by that date (see § 21.281 (a) (5)).

* * * * *

61. In § 21.283, paragraph (a) (4) is amended to read as follows:

§ 21.283 *Status "discontinued."* (a) * * *

(4) When pursuant to § 21.705 action has been suspended on revaluation because of noncooperation on the part of the trainee.

* * * * *

62. Section 21.285 *Authority is revoked.*

63. In § 21.286, the introduction of paragraph (b) is amended to read as follows:

§ 21.286 *Reentrance after rehabilitation.* * * *

(b) When, subsequent to an official declaration of rehabilitation, a veteran whose disability rating has not been reduced to less than a compensable degree, requests further training under Public Law 16, as amended, or Public Law 894, as amended, the declaration of rehabilitation may be canceled and the veteran reentered into training only if it is determined by the chief, education and training activity, that:

* * * * *

64. In § 21.287, paragraph (c) (1) is amended to read as follows:

§ 21.287 *Reentrance after interruption.* * * *

(c) * * *

(1) Except as indicated in the last sentence of this subparagraph, prior to authorizing reentrance into training under Public Law 16, 78th Congress, as amended, a check will be made to ascertain whether the veteran has a compensable disability incurred in or aggravated by service on or after June 27, 1950. If so, the veteran will be referred to the counseling activity for a determination of whether need for training exists under Public Law 894, 81st Congress, as amended, and if need is found to exist, to determine whether the previous objective is suitable considering the new disability, and if not, to select a suitable objective following which, the veteran will be processed into training under Public Law 894, as amended, and in accordance with instructions governing vocational rehabilitation training of veterans under that law. If the veteran does not have a compensable disability incurred in or aggravated by service on or after June 27, 1950, or if need is not found to exist under Public Law 894, as amended, he will be reentered into training under Public Law 16, as amended, in accord with paragraph (c) of this section. If the check as to compensable disability by virtue of service on or after June 27, 1950, and referring the veteran for a determination of whether need for training exists under Public Law 894 will delay unduly reentrance into training—as for example, cause the veteran to miss the beginning of a term or semester—the veteran may be reentered into training under Public Law 16, pending determination of entitlement under Public Law 894, as amended, with the understanding that if he is found entitled under the latter law, his case will be reprocessed under instructions governing vocational rehabilitation under that law.

* * * * *

65. Section 21.288 is revised to read as follows:

§ 21.288 *Reentrance after discontinuance.* (a) When a veteran, whose training was discontinued under one of the conditions set forth in § 21.283 (a) (1), (2), (3), (4), (5), or (7), applies for reentrance into training under Part VII, Veterans Regulation 1 (a), as amended (38 U. S. C. ch. 12) (Public Law 16, 78th Congress, or Public Law 894, 81st Congress, as amended), due consideration will be given to the facts in the individual case and, if the reasons for discontinuance have been removed, and if the veteran's disability rating has not been reduced to less than a compensable degree, and if, need for vocational rehabilitation is reestablished, the veteran may be reentered into training: *Provided,* That the veteran may not be reentered into training for an employment objective other than the previous employment objective for which he was pursuing training at the time of discontinuance except where it is clear that a change of employment objective is warranted because (1) for the veteran to resume training for the previous objective would result in failure to accomplish bona fide vocational rehabilitation for reasons not within the veteran's control, or (2) although the veteran could successfully resume and complete training for the previous employment objective, the veteran desires to change his employment objective and the employment objective desired by the veteran will not require any greater period of time for completion than completion of the previous employment objective and it is determined by the counseling activity that the desired employment objective is more in keeping with the veteran's interests and aptitudes.

(b) When a veteran whose training was discontinued under § 21.283 (a) (2) applies for reentrance into training, the provisions of paragraph (a) of this section will govern except that where application for reentrance after discontinuance under § 21.283 (a) (2) is made within 30 days from the date the veteran is able to resume his training as determined by competent medical examination, the veteran's disability rating has not been reduced to less than a compensable degree and all other factors indicate that the veteran may successfully resume training, reentrance will be accomplished without referral for redetermination as to need for vocational rehabilitation, unless there exists some other compelling reason for such referral.

(c) Where a veteran who meets all the other requirements of paragraph (a) or (b) of this section for reentrance into training and who could successfully resume training for the previous employment objective, desires an employment objective which requires a greater period of time than the previous objective and which the counseling activity determines is more in keeping with his interests and aptitudes, he will be informed that if he will pursue independently of the Veterans' Administration a portion of the course for the employment objective desired by him sufficient to enable him to complete the remainder in no greater period of time than completion of the present employment objective would require, upon request he will be reentered into training under Part VII, Veterans Regulation 1 (a), as amended (Public Law 16, 78th Congress, or Public Law 894, 81st Congress, as amended), to complete the remainder of the course: *Provided,* That, in the meantime, his disability rating is not reduced to less than compensable and the service-connection of his disability is not severed.

66. In § 21.290, paragraph (b) is amended to read as follows:

§ 21.290 *Veterans' Administration responsibility under the law.* * * *

(b) The best proof that employability has been restored is a showing that the veterans actually has been placed in suitable employment. Accordingly, every training program will have as its goal the

actual employment of the veteran in the selected employment objective.

67. Sections 21.291 and 21.292 are revised to read as follows:

§ 21.291 *Referral of trainees for employment assistance.* In order to discharge the responsibility set forth in § 21.290 in the most effective manner, the education and training activity of each regional office will maintain liaison with the appropriate State and Federal employment agencies and will utilize the services of those agencies to the fullest extent possible in assisting rehabilitated veterans to obtain employment upon completion of their prescribed courses. Not less than 60 days prior to the anticipated date of rehabilitation it will be ascertained whether the trainee needs and desires employment assistance. If he does need and desires such assistance, he will be referred to the appropriate employment agency. If the trainee does not desire assistance in obtaining employment, he will not be referred to the employment agency and his records will be documented accordingly.

§ 21.292 *The veteran's responsibility for his employment.* The training officer will inform each trainee under his supervision that although the Veterans' Administration will assist the trainee in obtaining employment by referring him to the appropriate State or Federal employment agency if he so desires and by other suitable means, he is not to rely on such assistance to accomplish his placement into employment without any effort on his part. Rather, the trainee personally is to do those things which are essential and commonly expected of anyone who is seeking employment.

68. A new § 21.293 is added as follows:

§ 21.293 *Assisting seriously handicapped veterans in obtaining employment.* The problem of assisting seriously handicapped veterans in securing employment following completion of training often is particularly complex and difficult and requires special attention by the Veterans' Administration to the end that every reasonable effort is made to ensure that the training program actually leads to the desired goal, i. e., stable employment in the rehabilitation objective or a closely related one.

(a) During the counseling of the seriously handicapped veteran the training officer or training specialist who collaborates with the counselor should anticipate and explore all potential employment placement difficulties, such as barriers to employment because of disability, as a basis for his decision as to whether to concur in the proposed objective. Where necessary, he will contact employers to ascertain their attitudes toward employing the veteran at some future date, and explore other possibilities and resources which might be of aid in effecting placement after training has been completed. Promises of employment should be obtained if possible. Such preliminary steps should be taken particularly if the training being contemplated ordinarily is pursued in a school or under other circumstances in which the training does not lead directly into employment.

(b) If the contemplated objective is one which will require training over a long period, such as in an institution of higher learning, the locating of well-defined opportunities for employment may be delayed until an appropriate point in the training program, such as completion of pre-professional requirements or some other suitable point at which it will not be too late to redirect the training, if necessary, toward an employment goal which offers reasonable assurance of attainment.

(c) During training the training officer will give continued attention to guiding the trainee into the specific employment situations projected. Sixty days before the scheduled date of completion of training, or sooner if considered desirable, the veteran who desires and needs assistance will be referred to the employment service for such assistance. To the end that the goal of vocational rehabilitation may be achieved the training officer in consultation with the employment service will, as deemed necessary and advisable, begin at the same time to contact any known prospective employers and will make every reasonable effort to develop and explore every other possibility which may lead to successful placement of the veteran into suitable employment.

(d) If by the date of rehabilitation the veteran has not been employed or assured of employment, the training officer will continue to make every reasonable effort to effect placement until the veteran is suitably placed or until it is determined by the chief, education and training activity, that all possibilities and resources in the area under jurisdiction of the regional office have been fully explored and developed and that there is little likelihood that continued efforts would result in placement.

(e) When a veteran has entered into suitable employment the purpose of vocational rehabilitation has been satisfied. The Veterans' Administration thereafter has no continuing responsibility in respect to the veteran's employment.

69. Immediately following § 21.293, a new centerhead "Combination of Training Under Public Law 16, 78th Congress, As Amended, And Public Law 346, 78th Congress, As Amended" and §§ 21.294 and 21.295 are added as follows:

§ 21.294 *Combination where Public Law 16 training follows Public Law 346 training*—(a) *Where veteran pursued Public Law 346 training before eligibility under Public Law 16 was determined.* When a veteran who is or has been pursuing training under Public Law 346 is initially determined to have a service-incurred disability for which compensation is payable, and elects to pursue training under Public Law 16, if found in need thereof, there shall be prescribed and provided whatever course of vocational rehabilitation is needed to fit him for employment consistent with his disability. The obligation to restore employability is not lessened by the fact that the veteran has pursued training under Public Law 346 at a time when the existence of a compensable disability had not been determined. When, following appropriate action by counseling activity giving consideration to all training previously pursued under Public Law 346, there has been selected a proper objective which capitalizes to the fullest extent practicable the previous training under Public Law 346, training under Public Law 16 in combination with training previously pursued under Public Law 346 will be approved to the extent necessary to restore employability in that employment objective. If such combination of training will require a total training time under both laws in excess of 4 years the case will be processed under the provisions of § 21.206.

(b) *Where veteran pursues Public Law 346 training after eligibility for Public Law 16 is determined.* Where a veteran enters or resumes training under Public Law 346 after he has initially been determined to have a service-incurred compensable disability and notified to that effect; or where a veteran continues to pursue training under Public Law 346 for a period of more than 30 days after such notification without having filed an application for vocational rehabilitation or, having filed such an application, continues under Public Law 346 for a period of not more than 30 days after being found in need, combination training under both laws may be approved under the following conditions:

(1) When, after procuring all factual information pertaining to prior training, the training officer has determined that the veteran's progress and conduct while in training under Public Law 346 were satisfactory according to the standards usually applied by the Veterans' Administration to training under Public Law 16. If either conduct or progress was unsatisfactory, the application will be denied at this point unless the facts show that the unsatisfactory condition or conditions were beyond the control of the veteran or that under the standards usually applied under similar circumstances for Public Law 16 cases the causative factors have been or will be removed leaving an excellent prospect for success in training if need for training should be found to exist; and

(2) It has been currently determined or redetermined that the veteran is in need of training to overcome the handicap resulting from his service-connected disability; and

(3) A suitable employment objective has been determined, the selection of which included a thorough consideration of training previously pursued under Public Law 346 to the end that previous training will be utilized to the fullest extent practicable in qualifying the veteran for employment in the objective occupation; and the conditions of either subparagraph (4) or (5) of this paragraph are met.

(4) It has been determined by the training officer, in the process of concurrence that the veteran can be trained to employability in the objective selected without exceeding, under both Public Law 16 and Public Law 346 either the time that would have been required to train the veteran to employability in the objective selected under subparagraph (3) of this paragraph, had he elected to train under Public Law 16 at the time he became eligible under that law, or the period of the veteran's original entitlement under Public Law 346, whichever is the greater. If such combination of training, including all Public Law 346 training before and after election, will require a total training time under both laws in excess of 4 years, the case must be processed under the provisions of § 21.206. In any case where the requirements specified in the first sentence of this subparagraph are not satisfied, the application for a course under Public Law 16 will be disapproved. The veteran will be informed that his application will be reconsidered if he pursues, independently of the Veterans' Administration, a sufficient portion of the course to enable him to complete the remainder within either of the time limitations specified in this subparagraph. Where the veteran signifies that he will pursue such portion of the course independently of the Veterans' Administration under these conditions he will be advised that when he has completed such sufficient portion of the course on his own, upon request, he will be entered into training under Public Law 16 to complete the remainder of the course: *Provided*, That in the meantime, his disability rating is not reduced to less than compensable and the service connection of his disability is not severed. Such advice will be confirmed by letter to the veteran. Approval under authority of § 21.206 (d) may be given only when the facts show that the conditions of § 21.206 (a) (1) (i) or (iii) would have been satisfied at the time eligibility for Public Law 16 training was originally determined; or

(5) In the case of a veteran who is now seriously disabled, it has been determined through counseling, including concurrence by the training officer, that after his date of election the veteran entered or continued in training under Public Law 346 for an objective which might reasonably have been considered so suitable for him that it might have been selected under Public Law 16 had he been counseled and entered into training under that law; it is now established by medical evidence of record that his service-incurred disability has worsened to an extent that the occupation for which he pursued training under Public Law 346 after election is not now medically feasible and it is clear that had the veteran entered Public Law 16 training at the time of election it would now be necessary to change his objective. If such combination of courses including all Public Law 346 training before and after election, will require a total training time under both laws in excess of 4 years, the case will be processed under the provisions of § 21.206.

(c) *Approval of training under Public Law 16 following training under Public Law 346.* A veteran may pursue training under Public Law 16 following training under Public Law 346 only when such combination of training has the prior approval of the Veterans' Administration, and decisions in all such cases of training under Public Law 16 following training under Public Law 346 will be the responsibility of the education and training activity.

§ 21.295 *Combination where Public Law 346 training follows Public Law 16 training*—(a) *Public Law 346 training following rehabilitation under Public Law 16.* A course under Public Law 346 will be approved, subject to the limit of any remaining entitlement under Public Law 346 after all time used under Public Law 16 has been deducted, for any veteran who has successfully pursued a course of vocational rehabilitation under Public Law 16 and whose employability has been restored, provided that at the time he requests additional training under Public Law 346 the veteran understands that he may not thereafter assert a right to further benefits under Public Law 16. (See also paragraph (d) of this section.)

(b) *Public Law 346 training following discontinuance under Public Law 16; conduct and progress satisfactory.* When the veteran's conduct and progress while enrolled for the course he has discontinued under Public Law 16 are shown to have been satisfactory judged by standards applicable to Public Law 346 cases, a course under Public Law 346 will be approved to the limit of any remaining entitlement under Public Law 346 after all time used under Public Law 16 has been deducted, provided all of the following conditions are met:

(1) The veteran understands that if he enters training under Public Law 346 he may not thereafter assert a right to further vocational rehabilitation training under Public Law 16. (See also paragraph (d) of this section.)

(2) It does not appear that the best interests of the veteran will be impaired through his enrollment under Public Law 346. (For example, approval should be denied when the veteran's disability is of such a handicapping nature that a carefully planned course of vocational rehabilitation is clearly needed and it is determined through counseling, that the course which the veteran is contemplating under Public Law 346 will not contribute materially to the restoration of his employability.)

(c) *Public Law 346 training following discontinuance under Public Law 16; progress not satisfactory.* When a course under Public Law 16 was discontinued because of unsatisfactory progress judged by standards applicable to Public Law 346 cases, a course under Public Law 346 may be approved only when it is evident that the conditions which caused the previous failure have been overcome and are not likely to prevent success in the course desired under Public Law 346, subject to the limit of remaining entitlement under Public Law 346 after all time used under Public Law 16 has been deducted. Discontinuance of training under Public Law 16 because of unsatisfactory conduct will constitute a bar to the approval of such a combination of training unless it is established that the school or establishment in which the veteran was pursuing training under Public Law 16 would be willing to readmit him as a student or trainee in accord with its regularly prescribed standards and practices. The following conditions also must be met:

(1) The veteran understands that if he enters training under Public Law 346 he may not thereafter assert a right to further vocational rehabilitation training under Public Law 16. (See also paragraph (d) of this section.)

(2) A favorable recommendation for approval of a combination of courses is made on the basis of findings arrived at through counseling.

(3) It does not otherwise appear that the best interests of the veteran will be impaired through his enrollment under Public Law 346. (For example, if current conditions are such that the veteran could be reinducted under Public Law 16 and his disability is of such a handicapping nature that a carefully planned course of vocational rehabilitation is clearly needed, approval should be denied unless it is determined through counseling that the course the veteran is contemplating under Public Law 346 will contribute materially to the restoration of his employability.)

(d) *Statutory and regulatory limitations.* (1) The requirement of the first proviso of paragraph 1, Part VIII, Veterans Regulation 1 (a), as amended (38 U. S. C. ch. 12), that the veteran shall initiate his course not later than 4 years after either the date of his discharge or the termination of the present war, whichever is later, will be satisfied by commencement of the course within the stated time either under Public Law 16 or Public Law 346.

(2) All statutory and regulatory limitations under Public Law 346, including those governing a change of course and the prohibition against the pursuit of avocational or recreational courses, apply in any case where training under Public Law 346 following training under Public Law 16 is proposed.

(3) A combination of training which would permit a veteran to enroll for a course under Public Law 346 during a period of interruption of his training under Public Law 16 will not be approved. In any such case, the training officer will determine whether the veteran should be declared rehabilitated or the training discontinued before a finding is made in connection with the proposed combination.

(4) A veteran may pursue training under Public Law 346 following training under Public Law 16 only when such combination of training has the prior approval of the Veterans' Administration, and decisions in all such cases of training under Public Law 346 following training under Public Law 16 will be the responsibility of the educational benefits activity.

70. Immediately following § 21.295, a new centerhead and § 21.296 are added as follows:

COMBINATION OF TRAINING UNDER PUBLIC LAW 894, 81ST CONGRESS, AS AMENDED, PUBLIC LAW 16, 78TH CONGRESS, AS AMENDED, AND/OR PUBLIC LAW 346, 78TH CONGRESS, AS AMENDED

§ 21.296 *Combination where training under Public Law 894, as amended, follows training under Public Law 16, as*

amended, and/or Public Law 346, as amended— (a) *General.* Combination training under Public Law 894 following training under Public Law 16 or Public Law 346 will be approved when the veteran has been determined to have basic entitlement under Public Law 894 and through counseling has been determined to be in need of vocational rehabilitation under that law and there has been selected an objective which capitalizes to the fullest extent practicable the training previously pursued under Public Law 16 and/or Public Law 346. Approval of such combination training will be subject to the provisions of paragraph (b) or (c) of this section.

(b) *Where all training pursued under Public Law 16 and/or Public Law 346 was prior to the date of the veteran's first notice of disability incurred in or aggravated by service on or after June 27, 1950, for which compensation is payable.* In such case, training under Public Law 894 will be approved and the veteran will be provided vocational rehabilitation training to the extent necessary to accomplish vocational rehabilitation, notwithstanding time spent in training under Public Law 16 or Public Law 346 prior to the date of such notice and without reference to § 21.206 except when the course under Public Law 894 alone will exceed 4 years.

(1) Where a veteran has been reentered into training under provisions of § 21.287 (c) to complete his course of vocational rehabilitation under Public Law 16, 78th Congress, as amended, at a time when he had no compensable disability incurred in or aggravated by service on or after June 27, 1950, but while in training under Public Law 16 is rated for a compensable disability incurred in or aggravated by such service, a determination will be made as to whether need exists under Public Law 894, 81st Congress.

(i) If need is found to exist it will be determined whether the previous objective is suitable considering the new disability and if not, a suitable objective will be selected and, in either case, training will be afforded under Public Law 894.

(ii) If it is determined that the veteran is not in need of training under Public Law 894, he will be continued in training under Public Law 16 to complete his course under that law.

(c) *Where a veteran enters, reenters or continues for a period of more than 30 days, a course under Public Law 346, as amended, after the date of first notice of the existence of basic eligibility under Public Law 894, as amended.* (1) A veteran who enters or resumes training under Public Law 346 after he has initially been determined to have a service-incurred compensable disability and notified to that effect; or who continues to pursue training under Public Law 346 for a period of more than 30 days after such notification without having filed an application for vocational rehabilitation or, having filed such an application, continues under Public Law 346 for a period of more than 30 days after being found in need, will be limited to a total period of training under Part VIII and under Public Law 894 (but not considering any training which the veteran may have had under Public Law 16) which will not exceed:

(i) The time that normally would have been required to train the veteran to employability in the objective selected had he chosen training under Public Law 894 when he became eligible therefor, or

(ii) The total period of the veteran's original entitlement under Public Law 346,

whichever is the greater: In any such case there would be for application the principles which apply to Public Law 16 training following Public Law 346 training as set forth in § 21.294 (b).

(2) A veteran who pursues training under Public Law 346 under conditions set forth in subparagraph (1) of this paragraph after notice of a disability incurred in or aggravated by service on or after June 27, 1950 for which compensation is payable and who also pursues training under Public Law 550 after need for vocational rehabilitation has been established under Public Law 894 will be limited to a total period of training under all such laws which will not exceed:

(i) The time that normally would have been required to train the veteran to employability in the objective selected had he chosen training under Public Law 894 when he became eligible therefor, or

(ii) The total period of the veteran's original entitlement under Public Law 346 and Public Law 550 which pursuant to the law is limited to 4 years,

whichever is the greater.

(Where training under Public Law 894 is to follow training under Public Law 550 only or is to follow training under Public Law 550 in combination with training under other laws, except in combination with Public Law 346 training pursued after notice of the existence of a disability as set forth in paragraph (c) (2) of this section, see § 21.2015 (b).)

71. The centerhead immediately following revoked § 21.293 is amended to read as follows: "Furnishing Supplies Under Part VIII, Veterans Regulation 1 (a), as Amended (38 U. S. C. ch. 12)".

72. The centerhead "Furnishing Supplies" immediately preceding § 21.310 is revoked.

73. Section 21.310 is revised to read as follows:

§ 21.310 *Definition.* As referred to in §§ 21.310 through 21.324a, inclusive, the term "supplies" will include books, tools, supplies, equipment, etc.

74. Sections 21.312 and 21.313 are revised to read as follows:

§ 21.312 *Authority.* Subject to the limitations set forth in §§ 21.310 through 21.324a, inclusive, regional office Managers are authorized to furnish, through the school or training establishment or through direct purchase in accordance with current regulations governing the procurement of and accounting for trainee's property, supplies of such kind and in such minimum amounts as are necessary to the satisfactory pursuit of a course of education or training in a particular institution.

§ 21.313 *Prevention of abuse.* The furnishing of supplies is fraught with possibilities of marked abuse. Accordingly, the entire matter of furnishing such articles is to be so administered as to avoid and prevent abuses. Care is to be exercised, including examination of the veteran's records, to make certain that articles will not be furnished to the veteran-trainee which duplicate those which have been previously furnished by the Veterans' Administration or which otherwise are in his possession. The provisions of the law and the instructions authorizing the furnishing of supplies are not to be construed as authorization for furnishing supplies except under the most careful checks as to what is required by the training institution of all trainees. It is to be emphasized and always borne in mind that the trainee is not to be allowed to determine what supplies will be furnished. An understanding of the law and the Veterans' Administration policy on this point and cooperation on the part of the institution or establishment should be encouraged and developed to the end that the institution or establishment will approve for the trainee only those items which it requires other students or trainees to personally possess in order to pursue the training. The training officer will be held responsible for determining, in individual cases, that the list of supplies to be furnished to the trainee by the Veterans' Administration has been determined by responsible officials of the institution rather than by the trainee himself and has been determined on the basis of actual training needs.

75. Section 21.319 is revised to read as follows:

§ 21.319 *Furnishing supplies in noncredit courses.* The Veterans' Administration may furnish to an enrollee pursuing a noncredit course those supplies required by the school to be owned personally by all students in the same course when the enrollee is required to perform all of the work which all students enrolled for credit must perform in the course excepting taking credit examinations. Supplies may not be furnished to enrollees in "noncredit" courses which require only attendance and listening at class.

76. In § 21.321, former paragraph (a) is amended and former paragraphs (b) and (c) are revoked, so that § 21.321 reads as follows:

§ 21.321 *Furnishing clothing.* One of the purposes of the subsistence allowance is to enable the trainee to provide himself with clothing. Apparel worn in lieu of ordinary clothing will not be identified as articles of training equipment or supplies. Consequently, gymnasium clothing, laboratory coats and trousers, nurses or medical technicians uniforms, school or military uniforms, coveralls, work uniforms or other similar articles will not be furnished by the Veterans' Administration notwithstanding the fact that the training establishment may require a certain type or style of apparel to be worn by all students, trainees, or employees. Protective articles, such as laboratory aprons, rubber gloves, goggles, etc., which are required to be worn for the purpose of protecting the trainee from physical harm incident to pursuit of the course and are not worn in lieu of, or for the purpose of protecting his personal clothing, may be furnished when required to be worn by all students taking the same course.

77. In the provisional regulations immediately following the revoked centerhead "Termination of Training", § 21.375 is revoked.

§ 21.375 *Application of the provisions of the vocational rehabilitation act for disabled veterans of World War II and the act extending vocational rehabilitation to disabled veterans of service on or after June 27, 1950, as amended by sections 2 and 3, Public Law 610, 83d Congress, approved August 20, 1954.* (Instruction 2, Public Law 610, 83d Congress) [Revoked.]

78. Immediately preceding § 21.700, add the centerhead "Counseling".

79. Section 21.700 is revised to read as follows:

§ 21.700 *Counseling claimants under Part VII, Veterans Regulation 1 (a), as amended (38 U. S. C. ch. 12).* (a) Counseling will be provided each disabled person who applies for vocational rehabilitation under Part VII, Veterans Regulation 1 (a), as amended, and who meets the basic eligibility requirements set forth in § 21.40 (a) and (b). Counseling procedure will be applied to determine whether the person is in need of vocational rehabilitation and, when such need is determined to exist, to assist him in the selection of an employment objective for which he may be trained so as to be able to secure employment in an occupation best suited to his individual capacities and compatible with his disability. The selection of an occupation in which rehabilitation is to be effected will be based upon consideration of the person's interests, aptitudes, abilities, educational background, work experiences, personality traits, limitations imposed by disabilities, and any other relevant factors in relation to characteristics, requirements, and employment opportunities of occupations. Standards of counseling will be maintained in accordance with accepted professional practices, and counseling personnel will apply approved counseling principles in order to accomplish the purposes in this paragraph.

(b) Personal adjustment counseling will be provided as a specialized service:

(1) To those veterans identified during counseling process as having problems of personal adjustment or emotional difficulties which would interfere with successful vocational rehabilitation; or

(2) To those veterans who experience difficulty in pursuit of training deemed by the training officer to result from problems of personal adjustment or emotional difficulties in order to assist such veterans in realizing maximum benefit from training.

(c) Counseling under Part VII, Veterans Regulation 1 (a), for purposes set forth in paragraphs (a) and (b) of this section will include veterans having basic eligibility under Public Law 16, 78th Congress, as amended, and under Public Law 894, 81st Congress, as amended.

(d) When counseling a veteran who has had previous counseling or training under Part VII, Public Law 346, 78th Congress or Public Law 550, 82d Congress, available information regarding the veteran's previous counseling, if any, and his previous training under the laws cited above will be carefully and fully considered together with current medical data, to the end that the previous training will be capitalized as far as may be found practicable and objectives to be certified will be those for which training may be provided in accordance with any limitations contained in § 21.294, § 21.296, or § 21.2015, whichever is applicable.

80. Section 21.702 is revised to read as follows:

§ 21.702 *Authority to determine whether a veteran is in need of vocational rehabilitation and to provide personal adjustment counseling.* Authority to determine whether a disabled person who applies for benefits under Part VII, Veterans Regulation 1 (a), as amended (38 U. S. C. ch. 12), and who has basic eligibility for such benefits, is in need of vocational rehabilitation, is delegated to counseling psychologists (vocational rehabilitation and education), psychologists (personal counselor), psychologists (vocational adviser-personal counselor) and psychologists (vocational adviser) employed by vocational rehabilitation and education divisions. Authority to provide personal adjustment counseling is delegated to counseling psychologists (vocational rehabilitation and education), psychologists (personal counselor), and psychologists (vocational adviser-personal counselor).

81. Section 21.711 is revised to read as follows:

§ 21.711 *Redetermination of need*— (a) *Prior to induction into training.* When a determination as to need for vocational rehabilitation has been made by authorized personnel, including any such determination made by counselors on an authorized liaison visit to a Veterans' Administration hospital, that determination will not be reopened or changed by personnel of either that office or any other office to the jurisdiction of which the veteran moves or is transferred, unless (1) there is clear and unmistakable error of fact or law; or (2) there is new and material evidence which clearly indicates the necessity for reconsideration of need; or (3) the veteran reapplies for induction into training after having been placed in status "training declined" in accordance with § 21.209. Need for vocational rehabilitation will be redetermined, however, in any case in which a determination was previously made that need for vocational rehabilitation did not exist, if evidence showing that the conditions basic to such determination have materially changed.

(b) *After induction into training.* (1) When upon the basis of a proper determination of need a claimant has been inducted into training, the question of need will not be reopened with a view to discontinuing training merely because of a decrease in the disability, even though the decrease be such that the disability rating is reduced to less than compensable degree.

(2) Need will not be redetermined in the course of making revaluations for veterans in training under Part VII, Veterans Regulation 1 (a), as amended (38 U. S. C. ch. 12), or in status "interrupted" under § 21.282 except as set forth under subparagraph (5) of this paragraph.

(3) Need will be redetermined in the case of veterans whose training under Part VII has been discontinued, when they are referred by the education and training activity for such determination.

(4) Need will be redetermined in the case of veterans who have previously been declared rehabilitated, when they are referred by the education and training activity for such determination.

(5) When a veteran is referred to the counseling activity in accordance with § 21.287 (c) or § 21.296 (c) (1), a determination will be made as to whether need for vocational rehabilitation is established under Public Law 894, 81st Congress, as amended, independently of the finding of need previously made under Public Law 16, 78th Congress, as amended, if this determination is affirmative and it is found that the objective for which training was pursued under Public Law 16 is no longer suitable, a suitable objective will be selected to accomplish vocational rehabilitation. If the determination is negative, the provisions of § 21.252 (a) will be applicable to any proposed change of objective under Public Law 16.

82. In § 21.715, that portion of paragraph (b) preceding subparagraph (1), and paragraph (d) are amended to read as follows:

§ 21.715 *Vocational rehabilitation of seriously handicapped veterans.* • • •

(b) The board will be responsible for the functions and determinations described in this paragraph with regard to claimants whose cases are referred to the board by the counseling activity or the education and training activity for a determination as to medical feasibility or for assistance in developing a plan of vocational rehabilitation.

• • • • •

(d) When a veteran who is in training or who has been in training under Part VII is unable, in the opinion of the medical consultant, to continue or reenter training because of general medical infeasibility, and the case is referred to the board, it will discharge the responsibilities set forth in paragraph (b) of this section, with special reference to the record of previous counseling and training. When general medical infeasibility is found by the board, the case will be returned to the education and training activity for action in accordance with appropriate vocational rehabilitation and education procedures under applicable Veterans' Administration Regulations. If the board finds that infeasibility will probably be temporary in accordance with paragraph (b) (5) of this section, the case will be diaried by the education and training

activity for followup at appropriate intervals to ascertain whether the veteran's condition apparently has improved to such extent that the case may again be referred to the board for a determination as to whether medical infeasibility still continues, or whether resumption of training is warranted because of improvement in the veteran's condition.

83. A new § 21.716 is added as follows:

§ 21.716 *Determining whether medical infeasibility prevented timely entrance into or completion of training for vocational rehabilitation.* When a veteran otherwise eligible for vocational rehabilitation would not have sufficient time to enter and complete training for a suitable objective or, having entered, to complete such training by his basic termination date as defined in § 21.204 (b) (1) and (2), and there is indication that a period of hospitalization or illness interfered with timely entrance into or with completion of vocational rehabilitation training, the Vocational Rehabilitation Board will develop and evaluate pertinent information in the case and upon the basis of such evaluation will make and record the determination as to medical infeasibility required by § 21.204 (c), together with the principal supporting reasons. If the board determines that the veteran was not prevented by reason of medical infeasibility of training from timely entering training or, having entered, from completing training by his basic termination date, the veteran will be informed regarding resultant limitations upon vocational rehabilitation benefits and of his right of appeal by the activity which made the referral.

84. In § 21.728, paragraph (a) is amended to read as follows:

§ 21.728 *Authorization of transportation, meals, and lodging for counseling appointments.* (a) Transportation at Government expense including necessary meals and lodging may be authorized when a claimant who has been found to have basic eligibility for vocational rehabilitation under Part VII, Veterans Regulation 1 (a), as amended (38 U. S. C. ch. 12), is requested to report to a field station or to another designated place for counseling purposes, including determination of need for vocational rehabilitation, determination of medical feasibility for training, reconsideration, revaluation, and personal adjustment counseling. The travel authorization will provide for return to the place from which travel was authorized. Managers of regional offices may authorize travel at Government expense for the purpose of providing personal adjustment counseling whenever such service may be needed to accomplish vocational rehabilitation.

* * * * *

85. In § 21.730, paragraph (c) is amended to read as follows:

§ 21.730 *Counseling veterans under Part VIII, Veterans Regulation 1 (a), as amended (38 U. S. C. ch. 12).* * * *

(c) The counseling techniques and methods used in providing educational and vocational guidance under Part VIII will be the same as those applied in the counseling of veterans under Part VII, as set forth in § 21.700 (a), and the limitations contained in § 21.295 will be observed whenever applicable.

86. In § 21.735, paragraph (a) is amended to read as follows:

§ 21.735 *Counseling services on contract basis.*—(a) *Authorization.* Managers of regional offices are authorized to negotiate and approve contracts with educational institutions and other approved agencies for the purpose of providing services relating to the counseling of veterans who are eligible for such services under the provisions of §§ 21.700, 21.730, and 21.2300, and to establish the rates of payment which are just and reasonable for such services.

TITLE 43—PUBLIC LANDS: INTERIOR

Chapter I—Bureau of Land Management, Department of the Interior

Appendix C—Public Land Orders

[Public Land Order 1130]

ALASKA

PARTIALLY REVOKING EXECUTIVE ORDER NO. 9136 RESERVING PUBLIC LANDS FOR USE OF THE WAR DEPARTMENT

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

Executive Order No. 9136 of April 16, 1942, reserving certain public lands in Alaska for use of the War Department is hereby revoked so far as it refers to the following described lands:

SEWARD MERIDIAN

T. 13 N., R. 3 W.,

A right-of-way 60 feet on each side of the following described center-line:

Beginning at a point 110 feet South of the NW corner of the NE¼SW¼, sec. 9; thence S. 57° 31' W. 2,600.70 feet to a point; thence on a 2° 00' curve to the right with a central angle of 17° 27' a distance of 873.10 feet to a point; thence S. 74° 57' W. 1,546.66 feet to a point; thence on a 9° 50' curve to the left with a central angle of 74° 47' a distance of 571.80 feet to a point at the intersection of the said center-line with the South line of sec. 8, and being East 1,720 feet, more or less, from the Southwest corner of said section, as shown on Map No. 638, approved January 23, 1941, office of the Corps of Engineers, War Department, Fort Richardson, Alaska, on file in the Bureau of Land Management, Department of the Interior, Misc. No. 1878210.

The area described contains 15.14 acres.

The lands are withdrawn for railroad and townsite purposes by Executive Orders No. 1919½ of April 21, 1914, No. 2728 of October 8, 1917, and No. 3672 of May 8, 1922.

ORME LEWIS,
Assistant Secretary of the Interior.

APRIL 15, 1955.

[F. R. Doc. 55-3352; Filed, Apr. 25, 1955; 8:46 a. m.]

[Public Land Order 1135]

COLORADO

WITHDRAWING LANDS FOR USE OF THE ATOMIC ENERGY COMMISSION; REVOKING AIR NAVIGATION SITE WITHDRAWAL NO. 256

By virtue of the authority vested in the President and pursuant to section 4 of the act of May 24, 1928 (45 Stat. 729; 49 U. S. C. 214) and Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

Subject to valid existing rights, the following-described public lands in Colorado are hereby withdrawn from all forms of appropriation under the public-land laws, including the mining and the mineral-leasing laws, and reserved for use of the Atomic Energy Commission as a radio terminal installation site:

SIXTH PRINCIPAL MERIDIAN

T. 9 S., R. 102 W.,
Sec. 18, lot 1.

The area described contains 39.40 acres.

The order of the Acting Director, Bureau of Land Management of July 18, 1949, withdrawing the lands as Air Navigation Site Withdrawal No. 256 is hereby revoked.

ORME LEWIS,
Assistant Secretary of the Interior.

APRIL 20, 1955.

[F. R. Doc. 55-3354; Filed, Apr. 25, 1955; 8:46 a. m.]

[Public Land Order 1136]

ARKANSAS

REVOKING EXECUTIVE ORDER NO. 9130 OF APRIL 13, 1942, WHICH RESERVED LANDS IN CONNECTION WITH THE RANDOLPH COUNTY STATE GAME REFUGE

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

Executive Order No. 9130 of April 13, 1942, reserving the following-described public lands in Arkansas, under the jurisdiction of the Department of the Interior, for use by the State Game and Fish Commission in connection with the Randolph County State Game Refuge, is hereby revoked:

FIFTH PRINCIPAL MERIDIAN

T. 19 N., R. 1 W.,
Sec. 20, S½SW¼, SW¼SE¼.

T. 19 N., R. 2 W.,
Sec. 14, SW¼NW¼;
Sec. 24, W½NW¼, SE¼NW¼.

The areas described aggregate 280 acres.

The released lands, along with other adjacent public lands, have been used primarily for limited woodland grazing. They are located in Randolph County, Arkansas. The soil is thin, rocky and subject to rapid drying. The topography is rough with steep slopes prevailing over the area. The lands are not suitable for cultivation, recreational use, or small tracts.

No application for the lands may be allowed under the homestead, desert-land, small tract, or any other non-mineral public-land law unless the lands have already been classified as valuable or suitable for such type of application, or shall be so classified upon the consideration of an application. Any application that is filed will be considered on its merits. The lands will not be subject to occupancy or disposition until they have been classified.

This order shall not otherwise become effective to change the status of the described lands until 10:00 a. m. on the 35th day after the date of this order. At that time the said lands shall become subject to application, petition, location and selection, subject to valid existing rights, the provisions of existing withdrawals, the requirements of applicable laws, and the 91-day preference-right filing period for veterans and others entitled to preference under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284), as amended.

Veterans' preference-right applications under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284) as amended, may be filed on or before 10:00 a. m. on the 35th day after the date of this order, and those covering the same lands shall be treated as though simultaneously filed at that time. Applications filed under the act after that time and during the succeeding 91 days shall be considered in the order of filing. Applications by the general public under the public-land laws, filed on or before 10:00 a. m. on the 126th day after the date of this order shall be treated as though simultaneously filed at that time, where the applications are for the same lands; otherwise, priority of filing shall govern.

Inquiries regarding the lands shall be addressed to the Supervisor, Eastern States Office, Bureau of Land Management, Washington 25, D. C.

ORME LEWIS,
Assistant Secretary of the Interior.

APRIL 20, 1955.

[F. R. Doc. 55-3353; Filed, Apr. 25, 1955; 8:46 a. m.]

PROPOSED RULE MAKING

CIVIL AERONAUTICS BOARD

[14 CFR Part 248]

[Economic Regs. Draft Release No. 73A]

SUBMISSION OF AUDIT REPORTS BY PUBLIC ACCOUNTANTS

SUPPLEMENTAL NOTICE OF PROPOSED RULE-MAKING

APRIL 21, 1955.

In the notice of proposed rule-making on this matter, published in the FEDERAL REGISTER on March 22, 1955 (20 F. R. 1703), it was stated that the Board would consider all relevant matter in communications received on or before April 20, 1955. The Air Transport Association of America, acting on behalf of itself and its members, has requested the Board to extend the date by which comments must be filed for an additional period of 30 days. This request was predicated upon a further need for consultation between airline officials and independent public accountants.

Since the draft release proposed that all scheduled air carriers file an annual audit and a reconciliation of Form 41 Reports with the financial statements certified by public accountants, which are matters of substantial concern to such carriers, the Board finds that a one month extension for return of comment should be granted in order to allow these comments to be submitted.

Accordingly, the second sentence of the last paragraph of the aforementioned notice is amended to read as follows: "All relevant matter in communications received on or before May 20, 1955, will be considered by the Board before taking final action on the proposed rule."

(Secs. 205 (a) and 407 of the Civil Aeronautics Act of 1938, as amended, (52 Stat. 984, 1000; 49 U. S. C. 425, 487))

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
Secretary.

[F. R. Doc. 55-3412; Filed, Apr. 25, 1955; 8:58 a. m.]

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 52]

PROCESSED RAISINS

UNITED STATES STANDARDS FOR GRADES [1]

Notice is hereby given that the United States Department of Agriculture is considering the revision of the United States Standards for Grades of Processed Raisins (7 CFR 52.1841 to 52.1851) under the authority contained in the Agricultural Marketing Act of 1946 (60 Stat. 1087 et seq., 7 U. S. C. 1621 et seq.). These standards, if made effective, will be the fourth issue by the Department of grade standards for this product.

All persons who desire to submit written data, views, or arguments for consideration in connection with the proposed revision should file the same with the Chief, Processed Products Standardization and Inspection Branch, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, Washington 25, D. C., not later than 60 days after publication hereof in the FEDERAL REGISTER.

The proposed revision is as follows:

PRODUCT DESCRIPTION, SUMMARY OF TYPES

Sec.
52.1841 Product description.
52.1842 Summary of types (Varieties) of processed Raisins.

TYPE I—THOMPSON SEEDLESS RAISINS SIZES, COLORS, GRADES

52.1843 Sizes of Thompson Seedless Raisins.
52.1844 Colors of Sulfur Bleached and Golden Bleached Thompson Seedless Raisins.
52.1845 Grades of Thompson Seedless Raisins.

TYPE II—MUSCAT RAISINS SIZES, GRADES

52.1846 Sizes of Muscat Raisins.
52.1847 Grades of Muscat Raisins.

TYPE III—SULTANA RAISINS SIZES, GRADES

52.1848 Sizes of Sultana Raisins.
52.1849 Grades of Sultana Raisins.

EXPLANATIONS AND METHODS OF ANALYSES

52.1850 Definitions of terms.

WORK SHEET

52.1851 Work sheet for processed raisins.

AUTHORITY: §§ 52.1841 to 52.1851 issued under sec. 205, 60 Stat., 1090, 7 U. S. C. 1624.

PRODUCT DESCRIPTION, SUMMARY OF TYPES

§ 52.1841 *Product description.* Processed raisins are dried grapes of the Vinifera varieties, such as Thompson Seedless (Sultanina), Muscat of Alexandria, Muscatel Gordo Blanco, and Sultana. The processed raisins are prepared from clean, sound, dried grapes; are properly stemmed and capstemmed; and are sorted or cleaned, or both, to assure a wholesome product.

§ 52.1842 *Summary of types (varieties) of processed raisins*—(a) *Type I—Thompson Seedless.* (1) Unbleached (natural).

(2) Sulfur Bleached and Golden Bleached.

(3) Soda Dipped.

(b) *Type II—Muscat.* (1) Seeded (seeds removed).

(2) Unseeded (loose).

(3) Soda Dipped Unseeded (Valencia).

(c) *Type III—Sultana.*

TYPE I—THOMPSON SEEDLESS RAISINS SIZES, COLORS, GRADES

§ 52.1843 *Sizes of Thompson Seedless Raisins.* The sizes of Thompson Seedless Raisins are not incorporated in the grades of the finished product since size, as such, is not a factor of quality for the purposes of these grades. The common size designations and measurement requirements applicable thereto include, but are not limited to, the following:

[1] Compliance with the requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

(a) "Select" size raisins means that not less than 35 percent, by weight, but not more than 85 percent, by weight, of all the raisins will pass through round perforations $^{24}/_{64}$ inch in diameter, but not more than 5 percent, by weight, of all the raisins may pass through round perforations $^{20}/_{64}$ inch in diameter.

(b) "Small" (or "midget") size raisins means that all of the raisins will pass through round perforations $^{24}/_{64}$ inch in diameter and not less than 90 percent, by weight, of all the raisins will pass through round perforations $^{20}/_{64}$ inch in diameter.

(c) "Mixed" size raisins means a mixture which does not meet the requirements of "Select" size.

§ 52.1844 *Colors of Sulfur Bleached and Golden Bleached Thompson Seedless Raisins.* The color of Sulfur Bleached and Golden Bleached Thompson Seedless Raisins is not a factor of quality for the purposes of these grades. The color requirements applicable to the respective color designations are as follows:

(a) "Well-bleached color" (or "extra fancy color") means that the raisins are practically uniform in color and may range from yellow or golden to light amber color with a predominating yellow or golden color and that not more than 1 percent, by weight, of all the raisins may be definitely dark berries.

(b) "Reasonably well-bleached color" (or "fancy color") means that the raisins are reasonably uniform in color and may range from yellow or golden or greenish yellow to light amber wherein the predominating color may be greenish yellow or light amber and that not more than 3 percent, by weight, of all the raisins may be definitely dark berries.

(c) "Fairly well-bleached color" (or "extra choice color") means that the raisins are fairly uniform in color and may range from yellow or greenish yellow or yellowish green to amber or light greenish amber and that not more than 6 percent, by weight, of all the raisins may be definitely dark berries.

(d) "Bleached color" (or "choice color") means that the raisins may be generally dark amber or dark greenish amber; that not more than 15 percent, by weight, of all the raisins may be definitely dark berries in Sulfur Bleached; that not more than 20 percent, by weight, of all the raisins may be definitely dark berries in Golden Bleached; and that the color may also lack uniformity.

(e) "Definitely dark berries" means raisins which are definitely darker than dark amber and characteristic of naturally "raisined" grapes.

§ 52.1845 *Grades of Thompson Seedless Raisins.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of Thompson Seedless Raisins that possess similar varietal characteristics; that in Unbleached and Soda Dipped raisins possess a good typical color; that possess a good characteristic flavor; that show development characteristic of raisins prepared from well-matured grapes; that contain not more than 18 percent, by weight, of moisture; and that meet the following additional requirements as also outlined in Table I of this subpart:

(1) Not more than 1 piece of stem per 32 ounces of raisins may be present;

(2) Not more than 15 capstems per 16 ounces of raisins may be present;

(3) Not more than 1 percent, by weight, of raisins may be poorly developed, blowovers;

(4) Not more than 2 percent, by weight, of raisins may be damaged;

(5) Not more than 5 percent, by weight, of raisins may be sugared;

(6) Not more than 2 percent, by count, of raisins may be moldy;

(7) The appearance or edibility of the product may not be affected by raisins damaged by fermentation; and

(8) No grit, sand, or silt of any consequence may be present that affects the appearance or edibility of the raisins.

(b) "U. S. Grade B" or "U. S. Choice" is the quality of Thompson Seedless Raisins that possess similar varietal characteristics; that in Unbleached and Soda Dipped raisins possess a reasonably good typical color; that possess a good characteristic flavor; that show development characteristic of raisins prepared from reasonably well-matured grapes; that contain not more than 18 percent, by weight, of moisture; and that meet the following additional requirements as also outlined in Table I of this subpart:

(1) Not more than 2 pieces of stem per 32 ounces of raisins may be present;

(2) Not more than 25 capstems per 16 ounces of raisins may be present;

(3) Not more than 2 percent, by weight, of raisins may be poorly developed, blowovers;

(4) Not more than 3 percent, by weight, of raisins may be damaged;

(5) Not more than 10 percent, by weight, of raisins may be sugared;

(6) Not more than 3 percent, by count, of raisins may be moldy;

(7) The appearance or edibility of the product may not be more than slightly affected by raisins damaged by fermentation; and

(8) No grit, sand, or silt of any consequence may be present that affects the appearance or edibility of the raisins.

(c) "U. S. Grade C" or "U. S. Standard" is the quality of Thompson Seedless Raisins that possess similar varital characteristics; that in Unbleached and Soda Dipped raisins possess a fairly good typical color; that possess a fairly good flavor; that show development characteristics of raisins prepared from fairly well-matured grapes; that contain not more than 18 percent, by weight, of moisture; and that meet the following additional requirements as also outlined in Table I of this subpart:

(1) Not more than 3 pieces of stem per 32 ounces of raisins may be present;

(2) Not more than 35 capstems per 16 ounces of raisins may be present;

(3) Not more than 3 percent, by weight, of raisins may be poorly developed, blowovers;

(4) Not more than 5 percent, by weight, of raisins may be damaged;

(5) Not more than 15 percent by weight, of raisins may be sugared;

(6) Not more than 4 percent, by count, of raisins may be moldy;

(7) The appearance or edibility of the product may not be materially affected by raisins damaged by fermentation; and

(8) Not more than a trace of grit, sand, or silt may be present that affects the appearance or edibility of the raisins.

(d) "Substandard" is the quality of Thompson Seedless Raisins that fail to meet the requirements of U. S. Grade C or U. S. Standard.

TABLE I—ALLOWANCES FOR DEFECTS IN TYPE I, THOMPSON SEEDLESS RAISINS

Defects	U. S. Grade A or U. S. Fancy	U. S. Grade B or U. S. Choice	U. S. Grade C or U. S. Standard
	Maximum count (per 32 ounces)		
Pieces of stem	1	2	3
	Maximum count (per 16 ounces)		
Capstems	15	25	35
	Maximum (by weight) (percent)		
Poorly developed, blowovers	1	2	3
Damaged	2	3	5
Sugared	5	10	15
	Maximum (by count) (percent)		
Moldy raisins	2	3	4
Damaged by fermentation	Appearance or edibility of product		
	May not be affected	May not be more than slightly affected.	May not be materially affected.
Grit, sand, or silt	None of any consequence may be present that affects the appearance or edibility of the product.		Not more than a trace may be present that affects the appearance or edibility of the product.

TYPE II—MUSCAT RAISINS SIZES, GRADES

§ 52.1846 *Sizes of Muscat Raisins.* The sizes of Muscat Raisins are not incorporated in the grades of the finished product since size, as such, is not a factor of quality for the purposes of these grades. The common size designations and measurement requirements applicable thereto include, but are not limited to, the following:

(a) *Seeded.* (1) "Select" size raisins means that not less than 30 percent, by weight, of all the raisins will not pass through round perforations $^{34}/_{64}$ inch in diameter; and the balance will pass through round perforations $^{34}/_{64}$ inch in diameter but not more than 5 percent, by weight, of all the raisins may pass through round perforations $^{22}/_{64}$ inch in diameter.

(2) "Small" (or "midget") size raisins means that all of the raisins will pass through round perforations $^{34}/_{64}$ inch in diameter and not less than 90 percent, by weight, of all the raisins will pass through round perforations $^{22}/_{64}$ inch in diameter.

(3) "Mixed" size raisins means a mixture of sizes that do not meet the requirements of "select" size.

(b) *Unseeded.* (1) "4 Crown" means raisins that will not pass through round perforations $^{42}/_{64}$ inch in diameter.

(2) "3 Crown" means raisins that will pass through round perforations $^{42}/_{64}$ inch in diameter but will not pass through round perforations $^{34}/_{64}$ inch in diameter.

(3) "2 Crown" means raisins that will pass through round perforations $^{34}/_{64}$ inch in diameter but will not pass through round perforations $^{24}/_{64}$ inch in diameter.

(4) "1 Crown" means raisins that will pass through round perforations $^{24}/_{64}$ inch in diameter.

§ 52.1847 *Grades of Muscat Raisins.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of Muscat Raisins that possess similar varietal characteristics; that possess a good typical color with not more than 10 percent, by weight, of raisins that may be dark redish-brown berries in Soda Dipped Unseeded (Valencia) raisins; that possess a good characteristic flavor; that show development characteristics of raisins prepared from well-matured grapes; that contain not more than 18 percent, by weight, of moisture, except that Seeded Muscats may contain not more than 19 percent, by weight, of moisture; and that meet the following additional requirements as also outlined in Table II of this subpart:

(1) Not more than 1 piece of stem per 32 ounces of raisins may be present;

(2) Not more than 10 capstems per 16 ounces of raisins may be present;

(3) Not more than 12 seeds per 16 ounces of raisins in Muscat Seeded Raisins may be present;

(4) Not more than 1 percent, by weight, of raisins may be poorly developed, blowovers;

(5) Not more than 3 percent, by weight, of raisins may be damaged;

(6) Not more than 5 percent, by weight, of raisins may be sugared;

(7) Not more than 2 percent, by count, of raisins may be moldy;

(8) The appearance of edibility of the product may not be affected by raisins damaged by fermentation; and

(9) No grit, sand, or silt of any consequence may be present that affects the appearance or edibility of the raisins.

(b) "U. S. Grade B" or "U. S. Choice" is the quality of Muscat Raisins that possess similar varietal characteristics; that possess a reasonably good typical color with not more than 15 percent, by weight, of raisins that may be dark redish-brown berries in Soda Dipped Unseeded (Valencia) raisins; that possess a good characteristic flavor; that show development characteristic of raisins prepared from reasonably well-matured grapes; that contain not more than 19 percent, by weight, of moisture, except that Seeded Muscats may contain not more than 19 percent, by weight, of moisture; and that meet the following additional requirements as also outlined in Table II of this subpart:

(1) Not more than 2 stems per 32 ounces of raisins may be present;

(2) Not more than 15 capstems per 16 ounces of raisins may be present;

(3) Not more than 15 seeds per 16 ounces of raisins in Muscat Seeded Raisins may be present;

(4) Not more than 2 percent, by weight, of raisins may be poorly developed, blowovers;

(5) Not more than 4 percent, by weight, of raisins may be damaged;

(6) Not more than 10 percent, by weight of raisins may be sugared;

(7) Not more than 3 percent, by count, of raisins may be moldy;

(8) The appearance or edibility of the product may not be more than slightly affected by raisins damaged by fermentation; and

(9) No grit, sand, or silt of any consequence may be present that affects the appearance or edibility of the raisins.

(c) "U. S. Grade C" or "U. S. Standard" is the quality of Muscat Raisins that possess similar varietal characteristics; that possess a fairly good typical color with not more than 20 percent, by weight, of raisins that may be dark reddish-brown berries in Soda Dipped Unseeded (Valencia) raisins; that possess a fairly good flavor; that show development characteristic of raisins prepared from fairly well-matured grapes; that contain not more than 18 percent, by weight, of moisture, except that Seeded Muscats may contain not more than 19 percent, by weight, of moisture; and that meet the following additional requirements as also outlined in Table II of this subpart:

(1) Not more than 3 stems per 32 ounces of raisins may be present;

(2) Not more than 20 capstems per 16 ounces of raisins may be present;

(3) Not more than 20 seeds per 16 ounces of raisins in Muscat Seeded Raisins may be present;

(4) Not more than 3 percent, by weight, of raisins may be poorly developed, blowovers;

(5) Not more than 5 percent, by weight of raisins may be damaged;

(6) Not more than 15 percent, by weight, of raisins may be sugared;

(7) Not more than 4 percent, by count, of raisins may be moldy;

(8) The appearance or edibility of the product may not be materially affected by raisins damaged by fermentation; and

(9) Not more than a trace of grit, sand, or silt may be present that affects the appearance or edibility of the raisins.

(d) "Substandard" is the quality of Muscat Raisins that fail to meet the requirements of U. S. Grade C or U. S. Standard.

TABLE II—ALLOWANCES FOR DEFECTS IN TYPE II, MUSCAT RAISINS

Defects	U. S. Grade A or U. S. Fancy	U. S. Grade B or U. S. Choice	U. S. Grade C or U. S. Standard
	Maximum count (per 32 ounces)		
Pieces of stem	1	2	3
	Maximum count (per 16 ounces)		
Capstems	10	15	20
Seeds (seeded type)	12	15	20
	Maximum (by weight) (percent)		
Poorly developed, blowovers	1	2	3
Damaged	3	4	5
Sugared	5	10	15
	Maximum (by count) (percent)		
Moldy raisins	2	3	4
Damaged by fermentation	Appearance or edibility of product		
	May not be affected	May not be more than slightly affected.	May not be materially affected.
Grit, sand, or silt	None of any consequence may be present that affects the appearance or edibility of the product.		Not more than a trace may be present that affects the appearance or edibility of the product.

TYPE III—SULTANA RAISINS SIZES, GRADES

§ 52.1848 *Sizes of Sultana Raisins.* Size designations are not applicable to Sultana Raisins.

§ 52.1849 *Grades of Sultana Raisins.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of Sultana Raisins that possess similar varietal characteristics; that possess a good typical color; that possess a good characteristic flavor; that show development characteristic of raisins prepared from well-matured grapes; that contain not more than 18 percent, by weight, of moisture; and that meet the following additional requirements as also outlined in Table III of this subpart:

(1) Not more than 1 stem per 32 ounces of raisins may be present;

(2) Not more than 25 capstems per 16 ounces of raisins may be present;

(3) Not more than 1 percent, by weight, of raisins may be poorly developed, blowovers;

(4) Not more than 2 percent, by weight, of raisins may be damaged;
(5) Not more than 5 percent, by weight, of raisins may be sugared;
(6) Not more than 2 percent, by count, of raisins may be moldy;
(7) The appearance or edibility of the product may not be affected by raisins damaged by fermentation; and
(8) No grit, sand, or silt of any consequence may be present that affects the appearance or edibility of the raisins.

(b) "U. S. Grade B" or "U. S. Choice" is the quality of Sultana Raisins that possess similar varietal characteristics; that possess a reasonably good typical color; that possess a good characteristic flavor; that show development characteristic of raisins prepared from reasonably well-matured grapes; that contain not more than 18 percent, by weight, of moisture; and that meet the following additional requirements as also outlined in Table III of this subpart:

(1) Not more than 2 pieces of stem per 32 ounces of raisins may be present;
(2) Not more than 45 capstems per 16 ounces of raisins may be present;
(3) Not more than 2 percent, by weight, of raisins may be poorly developed, blowovers;
(4) Not more than 3 percent, by weight, of raisins may be damaged;
(5) Not more than 10 percent, by weight, of raisins may be sugared;
(6) Not more than 3 percent, by count, of raisins may be moldy;
(7) The appearance or edibility of the product may not be more than slightly affected by raisins damaged by fermentation; and
(8) No grit, sand, or silt of any consequence may be present that affects the appearance or edibility of the raisins.

(c) "U. S. Grade C" or "U. S. Standard" is the quality of Sultana Raisins that possess similar varietal characteristics; that possess a fairly good typical color; that possess a fairly good flavor; that show development characteristic of raisins prepared from fairly well-matured grapes; that contain not more than 18 percent, by weight, of moisture; and that meet the following additional requirements as also outlined in Table III of this subpart:

(1) Not more than 3 pieces of stem per 32 ounces of raisins may be present;
(2) Not more than 65 capstems per 16 ounces of raisins may be present;
(3) Not more than 3 percent, by weight, of raisins may be poorly developed, blowovers;
(4) Not more than 5 percent, by weight, of raisins may be damaged;
(5) Not more than 15 percent, by weight, of raisins may be sugared;
(6) Not more than 4 percent, by count, of raisins may be moldy;
(7) The appearance or edibility of the product may not be materially affected by raisins damaged by fermentation; and
(8) Not more than a trace of grit, sand, or silt may be present that affects the appearance or edibility of the raisins.

(d) "Substandard" is the quality of Sultana Raisins that fails to meet the requirements of U. S. Grade C or U. S. Standard.

TABLE III—ALLOWANCES FOR DEFECTS IN TYPE III, SULTANA RAISINS

Defects	U. S. Grade A or U. S. Fancy	U. S. Grade B or U. S. Choice	U. S. Grade C or U. S. Standard
	Maximum count (per 32 ounces)

Grit, sand, or silt	None of any consequence may be present that affects the appearance or edibility of the product.		Not more than a trace may be present that affects the appearance or edibility of the product.

EXPLANATIONS AND METHODS OF ANALYSES

§ 52.1850 *Definitions of terms.* (a) "Capstems" means small woody stems exceeding ⅛ inch in length which attach the raisins to the branches of the bunch.

(b) A "piece of stem" means a portion of the branch or main stem.

(c) "Seeds" refers to the whole, fully developed seeds which have not been removed during the processing of Muscat Seeded Raisins.

(d) "Poorly developed, blowovers" refers to berries that are immature, contain practically no flesh, are very light in weight, and have very coarse wrinkles.

(e) "Damaged" raisins means raisins affected by sunburn, scars, mechanical injury, or other similar means which seriously affect the appearance, edibility, keeping quality, or shipping quality of the raisins. In Muscat Seeded Raisins, mechanical injury resulting from normal seeding operations is not considered damage.

(f) "Sugared" means either external or internal sugar crystals are present and the accumulation of such crystallized fruit sugars in the flesh of the raisins or on the surface are readily apparent.

(g) "Moldy" raisins are those that show mold on more than one-fourth of the surface when ascertained in accordance with whichever of the following methods is applicable:

(1) *Raisins showing catalase activity.* (For use on raisins where catalase activity has not been destroyed by treatment with lye, oil, or heat). Count out 100 raisins from a well-mixed sample and place 10 or 15 at a time in a crystallizing dish. Cover each lot with a fresh solution made up to contain 5 percent hydrogen peroxide and 1 percent Hn_4OH. The moldy areas are detected by the presence of copious oxygen bubbles. Place the crystallizing dish over black glazed paper to give greater contrast. Confirm the presence of mold filaments microscopically. Do not class as "moldy" raisins, those in which yeasts also give a reaction with hydrogen peroxide.

(2) *Bleached raisins and others treated with lye, oil, or heat.* Count out 100 raisins from a well-mixed sample. Place them in a 400 ml. beaker, cover with H_2O, heat to boiling and boil approximately 5 minutes. Drain off H_2O, and place raisins in a white pan. Cover completely with H_2O and examine with an ocular loupe or jeweler's eyepiece with magnification of approxmately 5×. Count as moldy those that are obviously moldy, and examine microscopically those that are suspected of being moldy to determine the presence or absence of mold filaments.

(h) "Grit, sand, or silt" means any particle of earthy material.

§ 52.1851 *Work sheet for processed raisins.*

[7 CFR Part 952]

[Docket No. AO 256-A1]

HANDLING OF MILK IN AUSTIN-WACO, TEXAS, MARKETING AREA

DECISION WITH RESPECT TO PROPOSED AMENDMENT TO TENTATIVE MARKETING AGREEMENT AND TO ORDER

Pursuit to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held at Austin, Texas, on March 29-31, 1955, pursuant to notice thereof which was published in the FEDERAL REGISTER on March 22, 1955 (20 F. R. 1700).

The material issues of record are concerned with:

1. A decrease in the price of milk used in the production of Cheddar cheese;
2. The need for immediate action by the Secretary with respect to Issue No. 1;
3. The level of the Class I milk price;
4. Revision of the location differentials;
5. The classification at a regulated plant of milk received from another regulated plant; and
6. Clarification of the "route" definition as now provided in the order.

Findings and conclusions. The following findings and conclusions on issues numbered 1 and 2 are based upon the evidence introduced at the hearing and the record thereof. Emergency action is recommended on Issue No. 1, on which issue the filing of briefs was waived by all interested parties. Findings and conclusions relating to issues numbered 3 through 6 will be recommended in a separate decision to be issued at a later date.

1. Handlers should be allowed a credit on Class II milk used in the production of Cheddar cheese. This credit per hundredweight of milk should be the difference between the Class II price for milk containing 4 percent butterfat and the price obtained by multiplying by 8.2 the average of the daily prices per pound of cheese at Wisconsin Primary markets ("Cheddars" f. o. b. Wisconsin assembly points, cars or truckloads) as reported by the United States Department of Agriculture during the month.

There are inadequate facilities for the handling and utilization of milk not needed for Class I purposes in the Austin-Waco marketing area. A few

handlers maintain facilities for ice cream manufacture but the operations at the plants of most handlers are limited almost exclusively to the processing and packaging of Class I products. Receipts of milk from producers at various plants currently exceed the plants' needs, and the operators of such plants are moving such surplus milk to local cheese plants at prices which are significantly below the order Class II price that handlers are required to pay for such milk.

There are two cheese plants to which milk has been transferred or diverted by the larger handlers in Austin and Waco in the past and to which transfer of seasonal reserve supplies are now being made from the plants of regulated handlers. These plants, both of which manufacture Cheddar cheese almost exclusively, are the Round Rock Cheese Company, Round Rock, Texas, and the Triangle Cheese Company, Stephenville, Texas. The Round Rock plant is approximately 20 miles from Austin and 80 miles from Waco. The approximate distances of the Triangle Cheese Company plant at Stephenville from Austin and Waco are 150 and 80 miles, respectively. The quantities of milk which the operator of these plants would be able to receive during the heavy production season from Austin-Waco handlers would depend, on among other factors, the quantity he is obligated to accept during the same period from other areas. Testimony at the hearing indicated that these cheese factories are the only reasonably available outlets for most of the seasonal reserve milk from Austin-Waco producers. A plant at Muenster, Texas, operated by the North Texas Milk Producers Association, may afford an outlet for some reserve milk from the northern portion of the Austin-Waco supply area. However, due to the greater charge for moving milk to this plant, it is generally impracticable to utilize this outlet. Moreover, the testimony indicated that the full facilities of the Muenster plant will be needed to handle seasonal reserve supplies from the North Texas marketing area.

One handler, who during 1954 transferred 1.8 million pounds of milk to the Round Rock and Stephenville cheese plants, indicated that transfers during 1955 would approximate or be somewhat larger than those of a year ago. Another handler, who has been disposing of about 10,000 pounds of milk daily for manufacturing purposes, began late in March to move substantial quantities of milk to a cheese plant.

Prices paid by the Round Rock and Stephenville cheese companies for milk of 4 percent butterfat content at the time of the hearing were $2.80 f. o. b. their plants and $2.60 f. o. b. the handlers' plants. The order Class II price for the most recent month available at the time of the hearing, February 1955, was $3.35.

Prior to the inception of the order it had been the practice of the various handlers to return to producers for the seasonal reserve supplies of milk which had been moved to a cheese factory the amount which the handler had realized in the sale of such milk. Without some allowance in the pricing of the surplus milk moving to cheese plants, there may be a reluctance on the part of handlers to continue to receive all the increased producer deliveries during the months of flush production. It is desirable that the seasonal reserve supplies of milk from producers which must be moved to cheese plants be marketed by the handler who regularly receives the milk from such producers. However, unless relief is granted the handler in the form of a lower price for this distressed milk it is expected that such milk will be either turned back to the producer cooperative association which would be forced to incur substantial losses in moving it to manufacturing outlets or the individual producers would be without a market for their milk. Such producers, although needed during the remainder of the year, would be forced to withdraw from the market.

The principal factor in determining the price which cheese factories will pay for milk is the market price of their finished product. The average of the prices paid for Cheddar cheese on the Wisconsin Primary markets reflects current market value. This quotation represents a large number of transactions and is widely accepted for use in price determinations. As herein proposed the price to handlers for milk used in the manufacture of Cheddar cheese, the average of the Wisconsin Primary quotations times 8.2 (approximately $2.70 currently), will generally be close to the prices paid by the Round Rock and Triangle cheese companies, which prices are those that may be obtained for surplus milk for Cheddar cheese manufacture in the Austin-Waco marketing area.

A proposal by handlers would provide that producer milk utilized in the manufacture of Cheddar cheese be priced at the average of the prices paid by several local manufacturing plants. The prices paid by the cheese factories to which Austin-Waco handlers move their reserve supplies would be the principal quotations used in determining such an average price. In effect, the plants which actually converted the producer milk into cheese would determine the producer price for such milk. It would not be desirable or feasible to provide in the order that the buyers of reserve supplies shall establish the order price for such milk.

The Austin-Waco order has been fully effective only since February 1, 1955, and the data currently available are not adequate to justify the establishment of a credit allowance to handlers for milk used in the production of Cheddar cheese beyond the present flush production season. The record indicates that the months of March through June are months of heavy production for the Austin-Waco market and months during which the handling and disposition of reserve supplies of producer milk are likely to be burdensome. As recommended herein, therefore, the credit on Class II milk used in the production of Cheddar cheese should be limited to the period from the effective date hereof through June 1955.

Where milk is transferred or diverted to a nonfluid plant the use of such milk should be considered to have been established at the nonfluid plant if an equivalent amount of milk was used at such plant during the month in the production of Cheddar cheese. Similarly, in order for a handler to receive a credit for milk disposed of to a cheese plant, he must establish that an equivalent quantity of producer milk was available for and allocated to Class II during the month.

The computation of the price for excess milk should also be modified so as to account for the lower value of milk to which the cheese price adjustment applies.

2. The due and timely execution of the function of the Secretary under the act imperatively and unavoidably requires the omission of a recommended decision by the Deputy Administrator, Agricultural Marketing Service, and the opportunity for exceptions thereto on the above issue.

The conditions complained of are such that it is urgent that remedial action be taken as soon as possible. Delay beyond the minimum time required to make the attached order effective would defeat the purpose of such amendment. Accordingly, the time necessarily involved in the preparation, filing, and publication of a recommended decision and exceptions thereto would make such relief ineffective.

It is therefore found that good cause exists for the omission of the recommended decision in order to inform interested parties of the conclusions reached. Uncertainty on the part of interested parties might lead to instability in the market. Knowledge of the action decided upon by the Secretary will permit those affected to adjust their operations promptly in accordance with such decision.

General findings. (a) The proposed marketing agreement and the order as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the proposed marketing agreement and in the order as hereby proposed to be amended are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(c) The proposed marketing agreement and the order as hereby proposed to be amended will regulate the handling of milk in the same manner as, and are applicable only to persons in the respective classes of industrial and commercial activity specified in, the said marketing agreement upon which a hearing has been held.

Determination of representative period. The month of February 1955 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of the order amending the order now in effect, regulating the handling of milk in the Austin-Waco, Texas, marketing area in the manner set forth in the attached amending order is approved or favored by producers who, during such period, were engaged in the production of milk for sale in the marketing area specified in such marketing order.

Marketing agreement and order, as amended. Annexed hereto and made a part hereof are two documents entitled, respectively, "Marketing Agreement Regulating the Handling of Milk in the Austin-Waco, Texas, Marketing Area" and "Order Amending the Order Regulating the Handling of Milk in the Austin-Waco, Texas, Marketing Area", which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

It is hereby ordered, That all of this decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the order as hereby proposed to be amended by the attached order which will be published with this decision.

This decision filed at Washington, D. C., this 21st day of April 1955.

[SEAL] EARL L. BUTZ,
Assistant Secretary.

Order[1] Amending the Order Regulating the Handling of Milk in the Austin-Waco, Texas, Marketing Area

§ 952.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and all said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Austin-Waco, Texas, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended and all of the terms and conditions thereof will tend to effectuate the declared policy of the act;

(2) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply of and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof the handling of milk in the Austin-Waco, Texas, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order as hereby amended, as follows:

1. Amend § 952.70 by adding a new paragraph to read as follows:

(e) From the effective date hereof through June 1955 deduct for each hundred pounds of producer milk which was allocated to Class II pursuant to § 952.46 and which was either used in the production of Cheddar cheese or assigned to such product pursuant to § 952.44 the difference between the Class II price for milk containing 4 percent butterfat and the price obtained by multiplying by 8.2 the average of the daily prices paid per pound of cheese at Wisconsin Primary markets ("Cheddars" f. o. b. Wisconsin assembling points, cars or truckloads) as reported by the Department during the month.

2. Delete § 952.73 (a) and substitute therefor the following:

(a) Subject to the conditions set forth in paragraph (b) of this section, compute the value on a 4.0 percent butterfat basis of excess milk received by such handler by multiplying the hundredweight of such milk by the price for Class II milk of 4.0 percent butterfat content and deducting therefrom the deduction made pursuant to § 952.70 (e);

[F. R. Doc. 55-3388; Filed, Apr. 25, 1955; 8:51 a. m.]

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

NOTICES

DEPARTMENT OF DEFENSE

Department of the Navy

ORGANIZATION STATEMENT

MISCELLANEOUS AMENDMENTS

In Orangization Statement of the Department of the Navy, published at 18 F. R 3461-3462, amend section VII, I, United States Marine Corps, as follows:

(d) The office of the Commandant of the Marine Corps is Headquarters U. S. Marine Corps, which is composed of the following:

Offices of the Commandant:

• • • • •

Fiscal Division.

• • • • •

(t) The Quartermaster General of the Marine Corps is head of the Supply Department, Headquarters, U. S. Marine Corps. He executes the plans and policies of the Commandant of the Marine Corps, as directed, in matters of supply and disbursing including:

(1) Procurement, storage, distribution, repair, salvage and disposal of equipment and supplies.

(2) Management of quarters, barracks and other public buildings owned by the Marine Corps.

(3) Transportation of Marine Corps personnel, their dependents and authorized household effects.

(4) Payment for equipment, supplies and services from funds appropriated by Congress for the Marine Corps.

(5) Pay and allowances of Marine Corps personnel, assigned Navy personnel and civilian employees of the Marine Corps.

(6) Administrative analysis of accounts and returns of disbursing officers.

(u) The Fiscal Director, as the representative of the Commandant of the Marine Corps, is responsible for the formulation of fiscal policy, and for fiscal administration in the Marine Corps to the end that fiscal action, policies, and procedures of the Marine Corps will be in conformity with the law, good business practice, and the policies, procedures, and regulations of the Department of the Navy as applicable to the Marine Corps. Exercises technical supervison over fiscal activities in local staffs and field organizations. Performs duties and functions of Budget Officer.

Dated: April 19, 1955.

By direction of the Secretary of the Navy.

IRA H. NUNN,
Rear Admiral, U. S. Navy,
Judge Advocate General of the Navy.

FEDERAL POWER COMMISSION

[Docket No. E-6614]

KANSAS GAS AND ELECTRIC CO.

NOTICE OF APPLICATION

APRIL 19, 1955.

Take notice that on April 14, 1955, an application was filed with the Federal Power Commission by the Kansas Gas and Electric Company (Applicant), for authorization pursuant to section 204 of the Federal Power Act, to issue 975,000 shares of its common stock (no par value).

Applicant, a corporation organized and existing under the laws of the State of West Virginia and qualified to do business as a foreign corporation in the State of Kansas, with its principal place of business in Wichita, Kansas, states that the 970,000 shares will be distributed pro rata to its existing stockholders. This distribution is intended to accomplish a two-for-one split of its presently outstanding shares of common stock. Each common stockholder of record at the close of business on May 25, 1955, will be entitled to receive one additional share of Applicant's common stock for each share held.

The Applicant states that this two-for-one split of its common stock will broaden the market therefor and stimulate trading therein with resulting benefits in any future marketing of the stock; all as more fully appears in the application on file with the Commission.

Any person desiring to be heard or to make any protest with reference to the application should on or before the 9th day of May, 1955, file with the Federal Power Commission, Washington 25, D. C., a petition or protest in accordance with the Commission's rules of practice and procedure. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
Secretary.

[F. R. Doc. 55-3360; Filed, Apr. 25, 1955; 8:48 a. m.]

[Docket No. E-6616]

NETLEY CORP. AND NIAGARA MOHAWK POWER CORP.

NOTICE OF APPLICATION

APRIL 19, 1955.

Take notice that on April 14, 1955, an application was filed with the Federal Power Commission by The Netley Corporation (Netley), for authorization, pursuant to section 202 (e) of the Federal Power Act, to export electric energy from the United States to Canada. The application was joined in by Niagara Mohawk Power Corporation (Niagara Mohawk).

Netley, a corporation organized and existing under the laws of the Province of Ontario, Canada, proposes to purchase an amount of electric energy from Niagara Mohawk which will be transmitted by it (Netley), from a point on the northerly side of Grindstone Island, Jefferson County, New York, to Netley Island, Leeds County, Ontario, Canada, by means of a submarine cable. The amount of electric energy to be transmitted to Canada will be under 1,000,000 kwh per annum and will be used solely to supply needs of Netley. The joinder filed by Niagara Mohawk shows it to be a corporation organized and existing under the laws of the State of New York.

Any person desiring to be heard, or to make any protest with reference to the application should, on or before the 9th day of May 1955, file with the Federal Power Commission, Washington 25, D. C., a petition or protest in accordance with the Commission's general rules and regulations. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
Secretary.

[Docket No. E-6618]

IDAHO POWER CO.

NOTICE OF APPLICATION

APRIL 19, 1955.

Take notice that on April 15, 1955, an application was filed with the Federal Power Commission, pursuant to Part 34 of the Commission's general rules and regulations under the Federal Power Act, by the Idaho Power Company (Applicant), for authorization to issue 15,000 shares of its 4 percent Preferred Stock (par value $100 per share).

Applicant, a corporation organized and existing under the laws of the State of Maine, and qualified to do business as a foreign corporation in the States of Oregon, Idaho and Nevada, with its principal place of business at Boise, Idaho, requests that the proposed issuance be exempted from the competitive bidding requirements of the Commission's general rules and regulations. Applicant proposes to enter into an underwriting agreement with Wegener & Daly Corporation, of Boise, Idaho, for the purchase of the proposed issuance of preferred stock for resale to the general public. The 15,000 shares to be issued are to be sold at par value to the underwriter. Applicant anticipates that the total underwriter's fee to be paid in connection with the proposed issuance will approximate $33,750. The application states that the proceeds to be obtained from the proposed issuance will be used for construction, extension and improvement of Applicant's facilities; all as more fully appears in the application on file with the Commission.

Any person desiring to be heard or to make any protest with reference to the application should, on or before the 9th day of May 1955, file with the Federal Power Commission, Washington 25, D. C., a petition or protest in accordance with the Commission's general rules and regulations. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
Secretary.

[Docket No. E-6621]

IOWA POWER AND LIGHT CO.

NOTICE OF APPLICATION

APRIL 19, 1955.

Take notice that on April 19, 1955, an application was filed with the Federal Power Commission, pursuant to section 204 of the Federal Power Act, by Iowa Power and Light Company (Applicant), for authorization to issue up to maximum of $8,500,000, principal amount, of promissory notes on or before March 31, 1956.

Applicant, a corporation organized and existing under the laws of the State of Iowa, with its principal place of business at Des Moines, Iowa, states that the promissory notes to be issued will be unsecured and mature within ninety days from issuance and be renewable at maturity. The promissory notes are to be of varying denominations and will be issued to commercial banks to evidence loans made to the Applicant under established lines of credit. The Applicant will receive amounts equal to the face value of the promissory notes issued and will pay interest on loans made at the prime bank interest rates in effect when negotiated. The Applicant states that the proceeds to be obtained from the proposed issuance of promissory notes will be used to provide funds for its construction program pending permanent financing; all as more fully appears in the application on file with the Commission.

Any person desiring to be heard, or to make any protest with reference to the application should, on or before the 9th day of May 1955, file with the Federal Power Commission, Washington 25, D. C., a petition or protest in accordance with the Commission's general rules and regulations. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
Secretary.

[Docket Nos. G-2952, G-4671, G-5261]

DEEP SOUTH OIL CO. OF TEXAS ET AL.

ORDER EXTENDING TIME FOR FILING EXCEPTIONS AND FIXING DATE FOR ORAL ARGUMENT

In the matters of Deep South Oil Company of Texas, Docket No. G-2952, Shell Oil Company, Docket No. G-4671, Humble Oil & Refining Company, Docket No. G-5261.

Motions for extension of time within which to file briefs and exceptions to the Presiding Examiner's decision in the above-entitled status determination proceedings, and requests for opportunity for oral argument before the full Commission, have been filed by Deep South Oil Company of Texas, Shell Oil Company, and Humble Oil & Refining Company (Petitioners).

Upon consideration of the motions and requests, and in view of the importance and complexity of the issues involved, the Commission orders:

(A) The time within which briefs and exceptions to the decision of the Presiding Examiner shall be filed be and the same hereby is extended to and including May 25, 1955.

(B) Oral argument shall be held before the Commission on June 3, 1955, at 10:00 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C.

(C) Each party to the proceeding filing a brief and desiring to participate in the oral argument shall notify the Secretary of the Commission on or before May 27, 1955, of such intention and of the amount of time requested for the presentation of such argument.

Adopted: April 20, 1955.

Issued: April 20, 1955.

By the Commission.

[SEAL] LEON M. FUQUAY,
Secretary.

These related matters should be heard on a consolidated record and disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on May 16, 1955, at 9:30 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such applications: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before May 9, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[SEAL] LEON M. FUQUAY,
Secretary.

[Docket No. G-5295]

JOE RUBIN & SONS

NOTICE OF APPLICATION AND DATE OF HEARING

APRIL 20, 1955.

Take notice that Joe Rubin & Sons (Applicant), a West Virginia organization whose address is 1708 Pennsylvania Avenue, Charleston, West Virginia, filed an application on November 22, 1954, for a certificate of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, authorizing Applicant to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant proposes to sell natural gas produced from the E. M. Johnson Field, Nicholas County, West Virginia, to Columbian Carbon Company, at 16 cents per Mcf, for transportation in interstate commerce for resale. The rate of delivery will be 2,000 Mcf per day.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on May 10, 1955, at 9:40 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a non-contested hearing, dispose of the proceedings pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before May 4, 1955. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[SEAL] LEON M. FUQUAY,
Secretary.

[Docket Nos. G-6851—G-6853]

TEXAS GAS TRANSMISSION CORP. ET AL.

NOTICE OF DATE OF HEARING

APRIL 20, 1955.

In the matters of Texas Gas Transmission Corporation, Docket No. G-6853, Louisiana Natural Gas Corporation, Docket No. G-6852, Texas Northern Gas Corporation, Docket No. G-6851.

Applications have been filed with the Federal Power Commission on December 2, 1954, for certificates of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, authorizing the acquisition, operation, and abandonment of service and facilities as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the respective applications now on file with the Commission and open to public inspection.

Texas Gas Transmission Corporation (Texas Gas), a Delaware corporation with its principal place of business in Owensboro, Kentucky, filed its application in Docket No. G–6853, requesting authority to acquire, through merger, and operate the facilities of its wholly-owned subsidiaries, Texas Northern Gas Corporation (Texas Northern) and Louisiana Natural Gas Corporation (Louisiana Natural).

Louisiana Natural, a Louisiana corporation with its principal place of business in Shreveport, Louisiana, filed an application in Docket No. G–6852 for permission and approval to abandon, through merger with Texas Gas, its facilities and service by means of such facilities, subject to the jurisdiction of the Commission.

Texas Northern, a Delaware corporation with its principal place of business in Shreveport, Louisiana, filed an application in Docket No. G–6851 for permission and approval to abandon, through merger with Texas Gas, its facilities and service rendered by means of such facilities, subject to the jurisdiction of the Commission.

Texas Gas proposes to succeed to the rights and obligations of Texas Northern and Louisiana Natural and to commence and continue the operation of all facilities, subject to the jurisdiction of the Commission, of each of the predecessor companies.

Notice of said applications have been duly published in the FEDERAL REGISTER on February 9, 1955 (20 F. R. 844).

Applicants have requested that their respective applications be heard under the shortened procedure provided by § 1.32 (b) (18 CFR 1.32 (b)) of the Commission's rules of practice and procedure.

These related matters should be heard on a consolidated record and disposed of as promptly as possible under the applicable rules and regulations and to that end:
